#	ARTICLE	IF	CITATIONS
1	Psychosocial working conditions and the risk of diagnosed depression: a Swedish register-based study. <i>Psychological Medicine</i> , 2022, 52, 3730-3738.	2.7	21
2	Under-reporting of non-fatal occupational injuries among precarious and non-precarious workers in Sweden. <i>Occupational and Environmental Medicine</i> , 2022, 79, 3-9.	1.3	6
3	The impact of musculoskeletal pain and strenuous work on self-reported physical work ability: a cohort study of Swedish men and women. <i>International Archives of Occupational and Environmental Health</i> , 2022, 95, 939-952.	1.1	1
4	Trajectories of precarious employment and the risk of myocardial infarction and stroke among middle-aged workers in Sweden: A register-based cohort study. <i>Lancet Regional Health - Europe</i> , The, 2022, 15, 100314.	3.0	8
5	Psychosocial workplace factors and alcohol-related morbidity: a prospective study of 3 million Swedish workers. <i>European Journal of Public Health</i> , 2022, 32, 366-371.	0.1	5
6	Fathers' alcohol consumption and risk of substance-related disorders in offspring. <i>Drug and Alcohol Dependence</i> , 2022, 233, 109354.	1.6	8
7	Business performance and occupational injuries trajectories in the construction sector in Sweden. <i>Safety Science</i> , 2022, 152, 105772.	2.6	1
8	Long-term sick leave for back pain, exposure to physical workload and psychosocial factors at work, and risk of disability and early-age retirement among aged Swedish workers. <i>International Archives of Occupational and Environmental Health</i> , 2022, 95, 1521-1535.	1.1	9
9	Educational qualification differences and early labor market exit among men: the contribution of labor market marginalization—measured across the working life. <i>BMC Public Health</i> , 2022, 22, 1015.	1.2	3
10	Death of a Parent and the Risk of Ischemic Heart Disease and Stroke in Denmark and Sweden. <i>JAMA Network Open</i> , 2022, 5, e2218178.	2.8	5
11	Further evidence that the worst performance rule is a special case of the correlation of sorted scores rule. <i>Intelligence</i> , 2021, 84, 101516.	1.6	2
12	Physical workload and increased frequency of musculoskeletal pain: a cohort study of employed men and women with baseline occasional pain. <i>Occupational and Environmental Medicine</i> , 2021, 78, 558-566.	1.3	12
13	Organisational factors and under-reporting of occupational injuries in Sweden: a population-based study using capture-recapture methodology. <i>Occupational and Environmental Medicine</i> , 2021, 78, 745-752.	1.3	12
14	Disability pensions related to heavy physical workload: a cohort study of middle-aged and older workers in Sweden. <i>International Archives of Occupational and Environmental Health</i> , 2021, 94, 1851-1861.	1.1	14
15	Labour market position of young people and premature mortality in adult life: A 26-year follow-up of 569 528 Swedish 18 year-olds. <i>Lancet Regional Health - Europe</i> , The, 2021, 3, 100048.	3.0	4
16	Death of a parent during childhood and blood pressure in youth: a population-based cohort study of Swedish men. <i>BMJ Open</i> , 2021, 11, e043657.	0.8	4
17	Occupational exposure to particles and increased risk of developing chronic obstructive pulmonary disease (COPD): A population-based cohort study in Stockholm, Sweden. <i>Environmental Research</i> , 2021, 200, 111739.	3.7	24
18	COVID-19 and Precarious Employment: Consequences of the Evolving Crisis. <i>International Journal of Health Services</i> , 2021, 51, 226-228.	1.2	53

#	ARTICLE	IF	CITATIONS
19	Intelligence, consistency, and Emerson's dilemma. <i>Personality and Individual Differences</i> , 2020, 160, 109943.	1.6	2
20	Educational differences in labor market marginalization among mature-aged working men: the contribution of early health behaviors, previous employment histories, and poor mental health. <i>BMC Public Health</i> , 2020, 20, 1784.	1.2	5
21	Death of a Parent During Childhood and the Risk of Ischemic Heart Disease and Stroke in Adult Men. <i>Psychosomatic Medicine</i> , 2020, 82, 810-816.	1.3	7
22	What is precarious employment? A systematic review of definitions and operationalizations from quantitative and qualitative studies. <i>Scandinavian Journal of Work, Environment and Health</i> , 2020, 46, 235-247.	1.7	139
23	Fathers' alcohol use and suicidal behaviour in offspring during youth and young adulthood. <i>Acta Psychiatrica Scandinavica</i> , 2019, 140, 563-573.	2.2	10
24	Precarious employment, business performance and occupational injuries: a study protocol of a register-based Swedish project. <i>BMJ Open</i> , 2019, 9, e026091.	0.8	6
25	Risk Behaviors Associated with Alcohol Consumption Predict Future Severe Liver Disease. <i>Digestive Diseases and Sciences</i> , 2019, 64, 2014-2023.	1.1	10
26	Social relations in late adolescence and incident coronary heart disease: a 38-year follow-up of the Swedish 1969-1970 Conscript Cohort. <i>BMJ Open</i> , 2019, 9, e030880.	0.8	0
27	Lifestyle Factors in Late Adolescence Associate With Later Development of Diverticular Disease Requiring Hospitalization. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 1474-1480.e1.	2.4	8
28	Reply to: "A measure of alcohol consumption in late adolescence associated with liver disease after 39 years of follow-up is insufficient to guide alcohol safe limits". <i>Journal of Hepatology</i> , 2018, 69, 252-253.	1.8	1
29	Alcohol consumption in late adolescence is associated with an increased risk of severe liver disease later in life. <i>Journal of Hepatology</i> , 2018, 68, 505-510.	1.8	52
30	1098...A population based longitudinal study of risk for chronic obstructive pulmonary disease and occupational exposure to organic and inorganic dust. , 2018, , .		0
31	Psychological Symptoms in Late Adolescence and Long-Term Risk of Suicide and Suicide Attempt. <i>Suicide and Life-Threatening Behavior</i> , 2018, 48, 315-327.	0.9	9
32	Early life predictors of high alcohol consumption in middle age. <i>Drugs: Education, Prevention and Policy</i> , 2018, 25, 273-279.	0.8	1
33	Fathers' Alcohol Consumption and Long-Term Risk for Mortality in Offspring. <i>Alcohol and Alcoholism</i> , 2018, 53, 753-759.	0.9	14
34	Childhood IQ and mortality during 53 years' follow-up of Swedish men and women. <i>Journal of Epidemiology and Community Health</i> , 2018, 72, 926-932.	2.0	9
35	Fathers' alcohol consumption and risk of alcohol-related hospitalization in offspring before 60 years of age. <i>Drugs: Education, Prevention and Policy</i> , 2017, 24, 3-8.	0.8	8
36	Effects of increased alcohol availability during adolescence on the risk of all-cause and cause-specific disability pension: a natural experiment. <i>Addiction</i> , 2017, 112, 1004-1012.	1.7	6

#	ARTICLE	IF	CITATIONS
37	The evolving relationship between premorbid intelligence and serious depression across the lifespan – A longitudinal study of 43,540 Swedish men. <i>Journal of Affective Disorders</i> , 2017, 211, 37-43.	2.0	9
38	Long-term effects of youth unemployment on mental health: does an economic crisis make a difference?. <i>Journal of Epidemiology and Community Health</i> , 2017, 71, 344-349.	2.0	50
39	Refractive state, intelligence, education, and Lord's paradox. <i>Intelligence</i> , 2017, 61, 115-119.	1.6	3
40	Occupational lifting and rhegmatogenous retinal detachment: a follow-up study of Swedish conscripts. <i>Occupational and Environmental Medicine</i> , 2017, 74, 489-495.	1.3	5
41	Cannabis, Tobacco, Alcohol Use, and the Risk of Early Stroke. <i>Stroke</i> , 2017, 48, 265-270.	1.0	59
42	Childhood IQ and mortality during 53 years of follow up among Swedish men and women. <i>European Journal of Public Health</i> , 2016, 26, .	0.1	0
43	Vascular risk factors and rhegmatogenous retinal detachment: a follow-up of a national cohort of Swedish men. <i>British Journal of Ophthalmology</i> , 2016, 100, 907-913.	2.1	11
44	Long-term physical workload in middle age and disability pension in men and women: a follow-up study of Swedish cohorts. <i>International Archives of Occupational and Environmental Health</i> , 2016, 89, 1239-1250.	1.1	28
45	Is poor self-rated health associated with low-grade inflammation in 43–110 late adolescent men of the general population? A cross-sectional study. <i>BMJ Open</i> , 2016, 6, e009440.	0.8	34
46	S09-2–Respondent-driven sampling in sampling hard-to-reach precarious workers. , 2016, , .		1
47	Fathers' intelligence measured at age 18–20 years is associated with offspring smoking: linking the Swedish 1969 conscription cohort to the Swedish Survey of Living Conditions. <i>Journal of Epidemiology and Community Health</i> , 2016, 70, 396-401.	2.0	1
48	Overweight in late adolescence predicts development of severe liver disease later in life: A 39years follow-up study. <i>Journal of Hepatology</i> , 2016, 65, 363-368.	1.8	68
49	The Association Between Self-Assessed Future Work Ability and Long-Term Sickness Absence, Disability Pension and Unemployment in a General Working Population: A 7-Year Follow-Up Study. <i>Journal of Occupational Rehabilitation</i> , 2016, 26, 195-203.	1.2	34
50	Cannabis use among Swedish men in adolescence and the risk of adverse life course outcomes: results from a 20 year follow-up study. <i>Addiction</i> , 2015, 110, 1794-1802.	1.7	30
51	IQ and alcohol-related morbidity and mortality among Swedish men and women: the importance of socioeconomic position. <i>Journal of Epidemiology and Community Health</i> , 2015, 69, 858-864.	2.0	20
52	Intelligence and Disability Pension in Swedish Men and Women Followed from Childhood to Late Middle Age. <i>PLoS ONE</i> , 2015, 10, e0128834.	1.1	4
53	IQ and Level of Alcohol Consumption – Findings from a National Survey of Swedish Conscripts. <i>Alcoholism: Clinical and Experimental Research</i> , 2015, 39, 548-555.	1.4	28
54	Does high intelligence improve prognosis? The association of intelligence with recurrence and mortality among Swedish men with coronary heart disease. <i>Journal of Epidemiology and Community Health</i> , 2015, 69, 347-353.	2.0	4

#	ARTICLE	IF	CITATIONS
55	Mediation of the gravitational influence of intelligence on socio-economic outcomes. <i>Intelligence</i> , 2015, 53, 8-15.	1.6	9
56	Sickness absence in workplaces: Does it reflect a healthy hire effect?. <i>International Journal of Occupational Medicine and Environmental Health</i> , 2015, 29, 315-330.	0.6	10
57	Body Mass Index in Young Adulthood and Suicidal Behavior up to Age 59 in a Cohort of Swedish Men. <i>PLoS ONE</i> , 2014, 9, e101213.	1.1	18
58	Unemployment and coronary heart disease among middle-aged men in Sweden: 39 243 men followed for 8â€¦years. <i>Occupational and Environmental Medicine</i> , 2014, 71, 183-188.	1.3	43
59	Prognosis of schizophrenia in persons with and without a history of cannabis use. <i>Psychological Medicine</i> , 2014, 44, 2513-2521.	2.7	62
60	Cannabis use in adolescence and risk of future disability pension: A 39-year longitudinal cohort study. <i>Drug and Alcohol Dependence</i> , 2014, 143, 239-243.	1.6	11
61	Sick leave and the impact of job-to-job mobility on the likelihood of remaining on the labour market - a longitudinal Swedish register study. <i>BMC Public Health</i> , 2014, 14, 305.	1.2	7
62	IQ and somatic health in late adolescence. <i>Intelligence</i> , 2014, 44, 155-162.	1.6	7
63	Do working conditions explain the increased risks of disability pension among men and women with low education? A follow-up of Swedish cohorts. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 483-492.	1.7	29
64	Intelligence moderates how education mediates the effect of social background on own attained occupational position. <i>Intelligence</i> , 2013, 41, 529-536.	1.6	3
65	The effect of childhood socioeconomic position on alcohol-related disorders later in life: a Swedish national cohort study. <i>Journal of Epidemiology and Community Health</i> , 2013, 67, 932-938.	2.0	37
66	Cognitive ability in early adulthood is associated with later suicide and suicide attempt: the role of risk factors over the life course. <i>Psychological Medicine</i> , 2013, 43, 49-60.	2.7	41
67	Psychosocial Functioning and Intelligence Both Partly Explain Socioeconomic Inequalities in Premature Death. A Population-Based Male Cohort Study. <i>PLoS ONE</i> , 2013, 8, e82031.	1.1	14
68	IQ and alcohol consumption. <i>European Journal of Public Health</i> , 2013, 23, .	0.1	0
69	IQ and somatic health in early adulthood - a cross-sectional analysis of associations. <i>European Journal of Public Health</i> , 2013, 23, .	0.1	0
70	Alcohol use in adolescence and risk of disability pension 20-40 years later in Sweden: What role does socioeconomic position play?. <i>European Journal of Public Health</i> , 2013, 23, .	0.1	0
71	Explaining associations between shorter education and future disability retirement among men and women in Sweden. <i>European Journal of Public Health</i> , 2013, 23, .	0.1	0
72	Characteristics of schizophrenia in persons with and without a history of cannabis use. <i>European Journal of Public Health</i> , 2013, 23, .	0.1	0

#	ARTICLE	IF	CITATIONS
73	Cognitive Ability in Late Adolescence and Disability Pension in Middle Age: Follow-Up of a National Cohort of Swedish Males. <i>PLoS ONE</i> , 2013, 8, e78268.	1.1	18
74	Educational differences in disability pension among Swedish middle-aged men: role of factors in late adolescence and work characteristics in adulthood. <i>Journal of Epidemiology and Community Health</i> , 2012, 66, 901-907.	2.0	33
75	Cannabis, schizophrenia and other non-affective psychoses: 35 years of follow-up of a population-based cohort. <i>Psychological Medicine</i> , 2012, 42, 1321-1328.	2.7	120
76	Unemployment and mental health—“who is (not) affected?”. <i>European Journal of Public Health</i> , 2012, 22, 429-433.	0.1	73
77	Unemployment and suicide in the Stockholm population: A register-based study on 771,068 men and women. <i>Public Health</i> , 2012, 126, 371-377.	1.4	45
78	Intelligence, socioeconomic background, emotional capacity, and level of education as predictors of attained socioeconomic position in a cohort of Swedish men. <i>Intelligence</i> , 2012, 40, 269-277.	1.6	24
79	Binge Drinking—“A Predictor for or a Consequence of Unemployment?”. <i>Alcoholism: Clinical and Experimental Research</i> , 2012, 36, 1983-1990.	1.4	16
80	Cannabis use and depression: a longitudinal study of a national cohort of Swedish conscripts. <i>BMC Psychiatry</i> , 2012, 12, 112.	1.1	54
81	Alcohol Use in Adolescence and Risk of Disability Pension: A 39 Year Follow-up of a Population-Based Conscriptioin Survey. <i>PLoS ONE</i> , 2012, 7, e42083.	1.1	36
82	Intelligence quotient (IQ) in adolescence and later risk of alcohol—related hospital admissions and deaths—“37—year follow—up of Swedish conscripts. <i>Addiction</i> , 2012, 107, 89-97.	1.7	28
83	Unemployment and Hospitalization Owing to an Alcohol—Related Diagnosis Among Middle—Aged Men in Sweden. <i>Alcoholism: Clinical and Experimental Research</i> , 2012, 36, 663-669.	1.4	17
84	Educational Level and Coronary Heart Disease: A Study of Potential Confounding from Factors in Childhood and Adolescence Based on the Swedish 1969 Conscriptioin Cohort. <i>Annals of Epidemiology</i> , 2011, 21, 336-342.	0.9	12
85	Childhood Socioeconomic Position and Objectively Measured Physical Capability Levels in Adulthood: A Systematic Review and Meta-Analysis. <i>PLoS ONE</i> , 2011, 6, e15564.	1.1	121
86	Childhood socio-economic position and risk of coronary heart disease in middle age: a study of 49 321 male conscripts. <i>European Journal of Public Health</i> , 2011, 21, 713-718.	0.1	16
87	How social position of origin relates to intelligence and level of education when adjusting for attained social position. <i>Scandinavian Journal of Psychology</i> , 2011, 52, 277-281.	0.8	6
88	Psychiatric diagnosis in late adolescence and long—term risk of suicide and suicide attempt. <i>Acta Psychiatrica Scandinavica</i> , 2011, 124, 454-461.	2.2	18
89	Unemployment and mortality—a longitudinal prospective study on selection and causation in 49321 Swedish middle-aged men. <i>Journal of Epidemiology and Community Health</i> , 2010, 64, 22-28.	2.0	126
90	Early-Onset Depression, Anxiety, and Risk of Subsequent Coronary Heart Disease. <i>Journal of the American College of Cardiology</i> , 2010, 56, 31-37.	1.2	226

#	ARTICLE	IF	CITATIONS
91	Association between erythrocyte sedimentation rate and IQ in Swedish males aged 18â€“20. <i>Brain, Behavior, and Immunity</i> , 2010, 24, 868-873.	2.0	29
92	The association between masculinity rank and mortality patterns: a prospective study based on the Swedish 1969 conscript cohort. <i>Journal of Epidemiology and Community Health</i> , 2009, 63, 408-413.	2.0	25
93	Cognitive ability in adolescence and mortality in middle age: a prospective life course study. <i>Journal of Epidemiology and Community Health</i> , 2009, 63, 697-702.	2.0	25
94	Unemployment and suicide. <i>Lancet, The</i> , 2009, 374, 270-271.	6.3	42
95	Cannabis and suicide: longitudinal study. <i>British Journal of Psychiatry</i> , 2009, 195, 492-497.	1.7	76
96	Obesity in Young Adulthood Is Related to Social Mobility Among Swedish Men. <i>Obesity</i> , 2008, 16, 654-658.	1.5	15
97	Adolescent mental health predicts quitting smoking in adulthood: a longitudinal analysis. <i>European Journal of Public Health</i> , 2008, 18, 66-70.	0.1	15
98	Mortality, morbidity and occupational exposure to airway-irritating agents among men with a respiratory diagnosis in adolescence. <i>Occupational and Environmental Medicine</i> , 2008, 65, 120-125.	1.3	25
99	Blood pressure in late adolescence and early incidence of coronary heart disease and stroke in the Swedish 1969 conscription cohort. <i>Journal of Hypertension</i> , 2008, 26, 1313-1320.	0.3	45
100	How Does IQ Affect Onset of Smoking and Cessation of Smokingâ€”Linking the Swedish 1969 Conscription Cohort to the Swedish Survey of Living Conditions. <i>Psychosomatic Medicine</i> , 2008, 70, 805-810.	1.3	39
101	Body mass index in late adolescence and its association with coronary heart disease and stroke in middle age among Swedish men. <i>International Journal of Obesity</i> , 2007, 31, 777-783.	1.6	60
102	The association between cognitive ability measured at ages 18â€“20 and coronary heart disease in middle age among men: A prospective study using the Swedish 1969 conscription cohort. <i>Social Science and Medicine</i> , 2007, 65, 1410-1419.	1.8	64
103	To what extent may the association between immigrant status and mental illness be explained by socioeconomic factors?. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2007, 42, 990-996.	1.6	99
104	Obesity and Attained Education: Cohort Study of More Than 700,000 Swedish Men. <i>Obesity</i> , 2006, 14, 1421-1428.	1.5	69
105	The association between cognitive ability measured at ages 18â€“20 and mortality during 30 years of follow-upâ€”a prospective observational study among Swedish males born 1949â€“51. <i>International Journal of Epidemiology</i> , 2006, 35, 665-670.	0.9	114
106	Is the association between low job control and coronary heart disease confounded by risk factors measured in childhood and adolescence among Swedish males 40â€“53 years of age?. <i>International Journal of Epidemiology</i> , 2006, 35, 616-622.	0.9	32
107	How far are socioeconomic differences in coronary heart disease hospitalization, all-cause mortality and cardiovascular mortality among adult Swedish males attributable to negative childhood circumstances and behaviour in adolescence?. <i>International Journal of Epidemiology</i> , 2005, 34, 260-267.	0.9	56
108	Can large relative mortality differences between socio-economic groups among Swedish men be explained by risk indicator-associated social mobility?. <i>European Journal of Public Health</i> , 2005, 15, 518-522.	0.1	14
