#	ARTICLE	IF	CITATIONS
1	Effects of growth hormone-releasing hormone gene targeted ablation on ghrelin-induced feeding. Growth Hormone and IGF Research, 2017, 37, 40-46.	1.1	12
2	Central inhibitory effects on feeding induced by the adipo-myokine irisin. European Journal of Pharmacology, 2016, 791, 389-394.	3.5	52
3	Increased locomotor and thermogenic activity in mice with targeted ablation of the GHRH gene. Growth Hormone and IGF Research, 2015, 25, 80-84.	1.1	25
4	Peripheral chemerin administration modulates hypothalamic control of feeding. Peptides, 2014, 51, 115-121.	2.4	51
5	Behavioural phenotyping of male growth hormone-releasing hormone (GHRH) knockout mice. Growth Hormone and IGF Research, 2014, 24, 192-197.	1.1	23
6	Hypotensive effects of omentin-1 related to increased adiponectin and decreased interleukin-6 in intra-thoracic pericardial adipose tissue. Pharmacological Reports, 2014, 66, 991-995.	3.3	31
7	Orexigenic effects of omentin-1 related to decreased CART and CRH gene expression and increased norepinephrine synthesis and release in the hypothalamus. Peptides, 2013, 44, 66-74.	2.4	36
8	Orexigenic effects of endomorphin-2 (EM-2) related to decreased CRH gene expression and increased dopamine and norepinephrine activity in the hypothalamus. Peptides, 2013, 48, 83-88.	2.4	18
9	Effects of isolated GH deficiency on adipose tissue, feeding and adipokines in mice. Growth Hormone and IGF Research, 2013, 23, 237-242.	1.1	17
10	Effects of GH deficiency and GH replacement on inter-male aggressiveness in mice. Growth Hormone and IGF Research, 2011, 21, 76-80.	1.1	13
