| #  | Article   | IF                   | CITATIONS   |
|----|---|----------------------|-------------|
| 1  | Explicit vs. implicit spatial processing in arrow vs. eye-gaze spatial congruency effects. Psychological<br>Research, 2023, 87, 242-259.  | 1.0                  | 7           |
| 2  | Influence of Emotion Regulation on Affective State: Moderation by Trait Cheerfulness. Journal of<br>Happiness Studies, 2022, 23, 303-325.   | 1.9                  | 3           |
| 3  | Cognitive load mitigates the executive but not the arousal vigilance decrement. Consciousness and Cognition, 2022, 98, 103263.  | 0.8                  | 6           |
| 4  | What gaze adds to arrows: Changes in attentional response to gaze versus arrows in childhood and adolescence. British Journal of Psychology, 2022, 113, 718-738.  | 1.2                  | 6           |
| 5  | Maybe causal, but still cautious: Reply to "Cautious or causal? Key implicit sequence learning paradigms should not be overlooked when assessing the role of DLPFC (Commentary on Prutean) Tj ETQq1 1                         | 0.78 <b>43</b> 14 rg | BT¢Overlock |
| 6  | Please don't stop the music: A meta-analysis of the cognitive and academic benefits of instrumental musical training in childhood and adolescence. Educational Research Review, 2022, 35, 100436.                             | 4.1                  | 21          |
| 7  | Integration of Facial Expression and Gaze Direction in Individuals with a High Level of Autistic Traits.<br>International Journal of Environmental Research and Public Health, 2022, 19, 2798.                                | 1.2                  | 11          |
| 8  | Individual Differences in Dispositional Mindfulness Predict Attentional Networks and Vigilance<br>Performance. Mindfulness, 2022, 13, 967-981.  | 1.6                  | 6           |
| 9  | A vigilance decrement comes along with an executive control decrement: Testing the resource-control theory. Psychonomic Bulletin and Review, 2022, 29, 1831-1843.   | 1.4                  | 11          |
| 10 | Gaze elicits social and nonsocial attentional orienting: An interplay of shared and unique conflict<br>processing mechanisms Journal of Experimental Psychology: Human Perception and Performance,<br>2022, 48, 824-841.      | 0.7                  | 7           |
| 11 | Cognitive control modulates the expression of implicit sequence learning: Congruency sequence and oddball-dependent sequence effects Journal of Experimental Psychology: Human Perception and Performance, 2022, 48, 842-855. | 0.7                  | 0           |
| 12 | Measuring attention and vigilance in the laboratory vs. online: The split-half reliability of the ANTI-Vea. Behavior Research Methods, 2021, 53, 1124-1147.   | 2.3                  | 20          |
| 13 | Attentional networks functioning and vigilance in expert musicians and non-musicians. Psychological Research, 2021, 85, 1121-1135.  | 1.0                  | 11          |
| 14 | On the putative role of intervening events in exogenous attention. Psychological Research, 2021, 85, 808-815.   | 1.0                  | 1           |
| 15 | The ANTI-Vea task: analyzing the executive and arousal vigilance decrements while measuring the three attentional networks. Psicologica, 2021, 42, 1-26.  | 0.5                  | 10          |
| 16 | Effects of acoustic warning signal intensity in the control of visuospatial interference. Psicologica, 2021, 42, 27-52.   | 0.5                  | 0           |
| 17 | Transcranial Magnetic Stimulation of the Right Superior Parietal Lobule Modulates the Retro-Cue<br>Benefit in Visual Short-Term Memory. Brain Sciences, 2021, 11, 252.  | 1.1                  | 1           |
| 18 | Microstructural white matter connectivity underlying the attentional networks system. Behavioural<br>Brain Research, 2021, 401, 113079.   | 1.2                  | 9           |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Attentional networks, vigilance, and distraction as a function of attentionâ€deficit/hyperactivity<br>disorder symptoms in an adult community sample. British Journal of Psychology, 2021, 112, 1053-1079.  | 1.2 | 5         |
| 20 | Spatial interference triggered by gaze and arrows. The role of target background on spatial interference. Psicologica, 2021, 42, 192-209.   | 0.5 | 6         |
| 21 | The causal role of DLPFC top-down control on the acquisition and the automatic expression of implicit learning: State of the art. Cortex, 2021, 141, 293-310.   | 1.1 | 10        |
| 22 | Crossmodal Semantic Congruence Interacts with Object Contextual Consistency in Complex Visual Scenes to Enhance Short-Term Memory Performance. Brain Sciences, 2021, 11, 1206.  | 1.1 | 6         |
| 23 | Older and Younger Adults Perform Similarly in an Iterated Trust Game. Frontiers in Psychology, 2021, 12, 747187.  | 1.1 | 5         |
| 24 | Attentional Capture From Inside vs. Outside the Attentional Focus. Frontiers in Psychology, 2021, 12, 758747.   | 1.1 | 1         |
| 25 | Target–background segregation in a spatial interference paradigm reveals shared and specific<br>attentional mechanisms triggered by gaze and arrows Journal of Experimental Psychology: Human<br>Perception and Performance, 2021, 47, 1561-1573. | 0.7 | 9         |
| 26 | Asymmetrical effects of control on the expression of implicit sequence learning. Psychological Research, 2020, 84, 2157-2171.   | 1.0 | 0         |
| 27 | Does Mindfulness Meditation Training Enhance Executive Control? A Systematic Review and Meta-Analysis of Randomized Controlled Trials in Adults. Mindfulness, 2020, 11, 411-424.  | 1.6 | 59        |
| 28 | Coordinating the interaction between past and present: Visual working memory for feature bindings overwritten by subsequent action to matching features. Attention, Perception, and Psychophysics, 2020, 82, 593-606.                             | 0.7 | 2         |
| 29 | Reduction of emotional distraction during target processing by attentional manipulations. Acta<br>Psychologica, 2020, 207, 103068.  | 0.7 | 1         |
| 30 | Registered Replication Report on Fischer, Castel, Dodd, and Pratt (2003). Advances in Methods and Practices in Psychological Science, 2020, 3, 143-162.   | 5.4 | 27        |
| 31 | Deliberate Soccer Practice Modulates Attentional Functioning in Children. Frontiers in Psychology, 2020, 11, 761.   | 1.1 | 10        |
| 32 | Sex Differences in Attentional Selection Following Gaze and Arrow Cues. Frontiers in Psychology, 2020, 11, 95.  | 1.1 | 8         |
| 33 | On the time course of spatial cueing: Dissociating between a set for fast reorienting and a set for cue-target segregation. Acta Psychologica, 2020, 203, 103004.   | 0.7 | 0         |
| 34 | A High-Definition tDCS and EEG study on attention and vigilance: Brain stimulation mitigates the executive but not the arousal vigilance decrement. Neuropsychologia, 2020, 142, 107447.  | 0.7 | 36        |
| 35 | Concurrent working memory load may increase or reduce cognitive interference depending on the attentional set Journal of Experimental Psychology: Human Perception and Performance, 2020, 46, 667-680.  | 0.7 | 8         |
| 36 | Effects of caffeine intake and exercise intensity on executive and arousal vigilance. Scientific Reports, 2020, 10, 8393.   | 1.6 | 20        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Trait cheerfulness sensitivity to positive and negative affective states. Humor, 2020, 33, 467-484.   | 0.6 | 3         |
| 38 | Relative Age Effect in the Sport Environment. Role of Physical Fitness and Cognitive Function in Youth Soccer Players. International Journal of Environmental Research and Public Health, 2019, 16, 2837. | 1.2 | 24        |
| 39 | Caffeine intake modulates the functioning of the attentional networks depending on consumption habits and acute exercise demands. Scientific Reports, 2019, 9, 10043.                                     | 1.6 | 15        |
| 40 | Does spatial attention modulate sensory memory?. PLoS ONE, 2019, 14, e0219504.  | 1.1 | 6         |
| 41 | The causal role of the left parietal lobe in facilitation and inhibition of return. Cortex, 2019, 117, 311-322.   | 1.1 | 6         |
| 42 | Are eyes special? Electrophysiological and behavioural evidence for a dissociation between eye-gaze and arrows attentional mechanisms. Neuropsychologia, 2019, 129, 146-152.                              | 0.7 | 22        |
| 43 | Different faces of (un)controllability: Control restoration modulates the efficiency of task switching. Motivation and Emotion, 2019, 43, 12-34.  | 0.8 | 6         |
| 44 | Are You Ready to Have Fun? The Spanish State Form of the State–Trait–Cheerfulness Inventory. Journal of Personality Assessment, 2019, 101, 84-95.   | 1.3 | 11        |
| 45 | Attentional influences on memory formation: A tale of a not-so-simple story. Memory and Cognition, 2018, 46, 544-557.   | 0.9 | 13        |
| 46 | Arrows don't look at you: Qualitatively different attentional mechanisms triggered by gaze and arrows. Psychonomic Bulletin and Review, 2018, 25, 2254-2259.  | 1.4 | 36        |
| 47 | Semantic incongruity attracts attention at a pre-conscious level: Evidence from a TMS study. Cortex, 2018, 102, 96-106.   | 1.1 | 15        |
| 48 | High Trait Cheerfulness Individuals are More Sensitive to the Emotional Environment. Journal of<br>Happiness Studies, 2018, 19, 1589-1612.  | 1.9 | 18        |
| 49 | Musical practice as an enhancer of cognitive function in healthy aging - A systematic review and meta-analysis. PLoS ONE, 2018, 13, e0207957.   | 1.1 | 62        |
| 50 | Executive and arousal vigilance decrement in the context of the attentional networks: The ANTI-Vea task. Journal of Neuroscience Methods, 2018, 306, 77-87.   | 1.3 | 41        |
| 51 | The face-specific proportion congruency effect: social stimuli as contextual cues. Cognitive Processing, 2018, 19, 537-544.   | 0.7 | 3         |
| 52 | The moderating effects of vigilance on other components of attentional functioning. Journal of Neuroscience Methods, 2018, 308, 151-161.  | 1.3 | 9         |
| 53 | Category-Based Learning About Deviant Outgroup Members Hinders Performance in Trust Decision<br>Making. Frontiers in Psychology, 2018, 9, 1008.   | 1.1 | 7         |
| 54 | Differential effects of intensity and response preparation components of acoustic warning signals.<br>Psicologica, 2018, 39, 292-318.   | 0.5 | 1         |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Automatic Ingroup Bias as Resistance to Traditional Gender Roles?. Psychologia SpoÅ,eczna, 2018, 13, .  | 1.8 | 5         |
| 56 | A cow on the prairie vs. a cow on the street: long-term consequences of semantic conflict on episodic encoding. Psychological Research, 2017, 81, 1264-1275.                          | 1.0 | 20        |
| 57 | Dispositional mindfulness facets predict the efficiency of attentional networks. Mindfulness, 2017, 8, 101-109.   | 1.6 | 18        |
| 58 | Eye Contact and Fear of Being Laughed at in a Gaze Discrimination Task. Frontiers in Psychology, 2017,<br>8, 1954.  | 1.1 | 20        |
| 59 | Trait Cheerfulness Does Not Influence Switching Costs But Modulates Preparation and Repetition Effects in a Task-Switching Paradigm. Frontiers in Psychology, 2017, 8, 1013.          | 1.1 | 4         |
| 60 | Effectiveness of a neuropsychological treatment for confabulations after brain injury: A clinical trial with theoretical implications. PLoS ONE, 2017, 12, e0173166.                  | 1.1 | 9         |
| 61 | Brain networks of temporal preparation: A multiple regression analysis of neuropsychological data.<br>NeuroImage, 2016, 142, 489-497.   | 2.1 | 12        |
| 62 | Registered Replication Report. Perspectives on Psychological Science, 2016, 11, 917-928.  | 5.2 | 245       |
| 63 | No single electrophysiological marker for facilitation and inhibition of return: A review. Behavioural<br>Brain Research, 2016, 300, 1-10.  | 1.2 | 40        |
| 64 | Perceiving emotions: Cueing social categorization processes and attentional control through facial expressions. Cognition and Emotion, 2016, 30, 1149-1163.                           | 1.2 | 14        |
| 65 | Endogenous attention modulates attentional and motor interference from distractors: evidence from behavioral and electrophysiological results. Frontiers in Psychology, 2015, 6, 132. | 1.1 | 7         |
| 66 | The effect of social categorization on trust decisions in a trust game paradigm. Frontiers in Psychology, 2015, 6, 1568.  | 1.1 | 8         |
| 67 | Men and women with fibromyalgia: Relation between attentional function and clinical symptoms.<br>British Journal of Health Psychology, 2015, 20, 632-647.                             | 1.9 | 29        |
| 68 | Limits of control: The effects of uncontrollability experiences on the efficiency of attentional control. Acta Psychologica, 2015, 154, 43-53.  | 0.7 | 16        |
| 69 | Beyond the Inhibition of Return of Attention: Reduced Habituation to Threatening Faces in<br>Schizophrenia. Frontiers in Psychiatry, 2014, 5, 7.                                      | 1.3 | 8         |
| 70 | Comparing neural substrates of emotional vs. non-emotional conflict modulation by global control context. Frontiers in Human Neuroscience, 2014, 8, 66.                               | 1.0 | 12        |
| 71 | Recognizing the Bank Robber and Spotting the Difference: Emotional State and Global vs. Local<br>Attentional Set. Spanish Journal of Psychology, 2014, 17, E28.                       | 1.1 | 1         |
| 72 | The Spatial Orienting paradigm: How to design and interpret spatial attention experiments.<br>Neuroscience and Biobehavioral Reviews, 2014, 40, 35-51.                                | 2.9 | 160       |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 73 | Gradual proportion congruent effects in the absence of sequential congruent effects. Acta<br>Psychologica, 2014, 149, 78-86.   | 0.7 | 18        |
| 74 | Reduced habituation to angry faces: increased attentional capture as to override inhibition of return.<br>Psychological Research, 2014, 78, 196-208.   | 1.0 | 26        |
| 75 | Additions are biased by operands: evidence from repeated versus different operands. Psychological<br>Research, 2014, 78, 248-265.  | 1.0 | 10        |
| 76 | Men in the Office, Women in the Kitchen? Contextual Dependency of Gender Stereotype Activation in<br>Spanish Women. Sex Roles, 2014, 70, 468-478.  | 1.4 | 12        |
| 77 | When endogenous spatial attention improves conscious perception: Effects of alerting and bottom-up activation. Consciousness and Cognition, 2014, 23, 63-73.   | 0.8 | 21        |
| 78 | Electrophysiological modulations of exogenous attention by intervening events. Brain and Cognition, 2014, 85, 239-250.   | 0.8 | 24        |
| 79 | Spatial distribution of attentional bias in visuo-spatial working memory following multiple cues. Acta<br>Psychologica, 2014, 150, 1-13.   | 0.7 | 2         |
| 80 | Re-examining the role of context in implicit sequence learning. Consciousness and Cognition, 2014, 27, 172-193.  | 0.8 | 7         |
| 81 | Task dependent modulation of exogenous attention: Effects of target duration and intervening events. Attention, Perception, and Psychophysics, 2013, 75, 1148-1160.  | 0.7 | 13        |
| 82 | Social categories as a context for the allocation of attentional control Journal of Experimental Psychology: General, 2013, 142, 934-943.  | 1.5 | 43        |
| 83 | Inhibition of Return in Response to Eye Gaze and Peripheral Cues in Young People with Asperger's<br>Syndrome. Journal of Autism and Developmental Disorders, 2013, 43, 917-923.  | 1.7 | 42        |
| 84 | Is "Inhibition of Return―due to the inhibition of the return of attention?. Quarterly Journal of<br>Experimental Psychology, 2013, 66, 347-359.  | 0.6 | 32        |
| 85 | Context congruency effects in change detection: Opposing effects on detection and identification.<br>Visual Cognition, 2013, 21, 99-122.   | 0.9 | 25        |
| 86 | Are drivers' attentional lapses associated with the functioning of the neurocognitive attentional<br>networks and with cognitive failure in everyday life?. Transportation Research Part F: Traffic<br>Psychology and Behaviour, 2013, 17, 98-113. | 1.8 | 37        |
| 87 | Race, emotion and trust: An ERP study. Brain Research, 2013, 1494, 44-55.  | 1.1 | 51        |
| 88 | Visual unimodal grouping mediates auditory attentional bias in visuo-spatial working memory. Acta<br>Psychologica, 2013, 144, 104-111.   | 0.7 | 5         |
| 89 | Dissociating proportion congruent and conflict adaptation effects in a Simon–Stroop procedure.<br>Acta Psychologica, 2013, 142, 203-210.   | 0.7 | 64        |
| 90 | Implementing flexibility in automaticity: Evidence from context-specific implicit sequence learning.<br>Consciousness and Cognition, 2013, 22, 64-81.  | 0.8 | 13        |
