#	ARTICLE	IF	CITATIONS
1	Personality, spatiotemporal ecological variation and resident/explorer movement syndromes in the sleepy lizard. <i>Journal of Animal Ecology</i> , 2022, 91, 210-223.	1.3	10
2	Behavioural correlations across multiple stages of the antipredator response: do animals that escape sooner hide longer?. <i>Animal Behaviour</i> , 2022, 185, 175-184.	0.8	17
3	Beyond spatial overlap: harnessing new technologies to resolve the complexities of predator-prey interactions. <i>Oikos</i> , 2022, 2022, .	1.2	36
4	Frontiers in quantifying wildlife behavioural responses to chemical pollution. <i>Biological Reviews</i> , 2022, 97, 1346-1364.	4.7	46
5	Intrinsic traits, social context, and local environment shape home range size and fidelity of sleepy lizards. <i>Ecological Monographs</i> , 2022, 92, .	2.4	11
6	Host traits, identity, and ecological conditions predict consistent flea abundance and prevalence on free-living California ground squirrels. <i>International Journal for Parasitology</i> , 2021, 51, 587-598.	1.3	8
7	Task syndromes: linking personality and task allocation in social animal groups. <i>Behavioral Ecology</i> , 2021, 32, 1-17.	1.0	22
8	A Broader View on Mate Choice and Assortative Mating by Behavioral Type: A Reply to Dingemanse et al.. <i>Trends in Ecology and Evolution</i> , 2021, 36, 179-180.	4.2	0
9	Consistent after all: behavioural repeatability in a long-lived lizard across a 6-year field study. <i>Animal Behaviour</i> , 2021, 174, 263-277.	0.8	14
10	Stable social groups foster conformity and among-group differences. <i>Animal Behaviour</i> , 2021, 174, 197-206.	0.8	16
11	Early life experience influences dispersal in coyotes (<i>Canis latrans</i>). <i>Behavioral Ecology</i> , 2021, 32, 728-737.	1.0	11
12	Estimating encounter location distributions from animal tracking data. <i>Methods in Ecology and Evolution</i> , 2021, 12, 1158-1173.	2.2	21
13	Andrew Sih. <i>Current Biology</i> , 2021, 31, R934-R936.	1.8	0
14	Population differences in the effect of context on personality in an invasive lizard. <i>Behavioral Ecology</i> , 2021, 32, 1363-1371.	1.0	7
15	Personality, plasticity, tasks, and task syndromes: a response to comments on Loftus et al. 2020. <i>Behavioral Ecology</i> , 2021, 32, 23-24.	1.0	0
16	Mast seeding promotes evolution of scatter-hoarding. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021, 376, 20200375.	1.8	7
17	Enhancing the ecological realism of evolutionary mismatch theory. <i>Trends in Ecology and Evolution</i> , 2021, , .	4.2	10
18	A comparison of the establishment success, response to competition, and community impact of invasive and non-invasive <i>Gambusia</i> species. <i>Biological Invasions</i> , 2020, 22, 509-522.	1.2	5

#	ARTICLE	IF	CITATIONS
19	Transgenerational Plasticity in Human-Altered Environments. <i>Trends in Ecology and Evolution</i> , 2020, 35, 115-124.	4.2	105
20	Predator hunting modes and predator-prey space games. <i>Ethology</i> , 2020, 126, 476-485.	0.5	5
21	Sex-dependent personality in two invasive species of mosquitofish. <i>Biological Invasions</i> , 2020, 22, 1353-1364.	1.2	16
22	A closer look at invasiveness and relatedness: life histories, temperature, and establishment success of four congeners. <i>Ecosphere</i> , 2020, 11, e03222.	1.0	3
23	A framework and standardized terminology to facilitate the study of predation-risk effects. <i>Ecology</i> , 2020, 101, e03152.	1.5	52
24	Bugs scaring bugs: enemy-risk effects in biological control systems. <i>Ecology Letters</i> , 2020, 23, 1693-1714.	3.0	42
25	Leveraging Motivations, Personality, and Sensory Cues for Vertebrate Pest Management. <i>Trends in Ecology and Evolution</i> , 2020, 35, 990-1000.	4.2	39
26	Animal personalities and seed dispersal: A conceptual review. <i>Functional Ecology</i> , 2020, 34, 1294-1310.	1.7	39
27	Proportional fitness loss and the timing of defensive investment: a cohesive framework across animals and plants. <i>Oecologia</i> , 2020, 193, 273-283.	0.9	11
28	Consistent individual differences in ectoparasitism of a long-lived lizard host. <i>Oikos</i> , 2020, 129, 1061-1071.	1.2	10
29	You're Just My Type: Mate Choice and Behavioral Types. <i>Trends in Ecology and Evolution</i> , 2020, 35, 823-833.	4.2	41
30	Occurrence of the introduced snake mite, <i>Ophionyssus natricis</i> (Gervais, 1844), in the wild in Australia. <i>Acarologia</i> , 2020, 60, 559-565.	0.2	7
31	On the importance of individual differences in behavioural skill. <i>Animal Behaviour</i> , 2019, 155, 307-317.	0.8	18
32	Male social plasticity influences transient dynamics in the emergence of alternative mating systems in water striders. <i>Behavioral Ecology</i> , 2019, 30, 1530-1538.	1.0	3
33	Opportunities for behavioral rescue under rapid environmental change. <i>Global Change Biology</i> , 2019, 25, 3110-3120.	4.2	53
34	Rapid environmental change in games: complications and counter-intuitive outcomes. <i>Scientific Reports</i> , 2019, 9, 7373.	1.6	1
35	Predicting evolutionarily stable strategies from functional responses of Sonoran Desert annuals to precipitation. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2019, 286, 20182613.	1.2	7
36	On using conceptual frameworks to guide a systematic review: a comment on Berger-Tal et al.. <i>Behavioral Ecology</i> , 2019, 30, 12-13.	1.0	1

#	ARTICLE	IF	CITATIONS
37	Prey Responses to Exotic Predators: Effects of Old Risks and New Cues. <i>American Naturalist</i> , 2019, 193, 575-587.	1.0	31
38	Ecosystem Function and Services of Aquatic Predators in the Anthropocene. <i>Trends in Ecology and Evolution</i> , 2019, 34, 369-383.	4.2	143
39	Predicting Habitat Choice after Rapid Environmental Change. <i>American Naturalist</i> , 2019, 193, 619-632.	1.0	19
40	Environmentally relevant concentrations of bifenthrin affect the expression of estrogen and glucocorticoid receptors in brains of female western mosquitofish. <i>Aquatic Toxicology</i> , 2019, 209, 121-131.	1.9	10
41	Warming-induced shifts in amphibian phenology and behavior lead to altered predator-prey dynamics. <i>Oecologia</i> , 2019, 189, 803-813.	0.9	21
42	Diets of Largemouth Bass (<i>Micropterus salmoides</i>) in the Sacramento San Joaquin Delta. <i>San Francisco Estuary and Watershed Science</i> , 2019, 17, .	0.2	5
43	Challenges of Learning to Escape Evolutionary Traps. <i>Frontiers in Ecology and Evolution</i> , 2019, 7, .	1.1	35
44	Intermediate turbidity elicits the greatest antipredator response and generates repeatable behaviour in mosquitofish. <i>Animal Behaviour</i> , 2019, 158, 101-108.	0.8	16
45	Personality-dependent survival of the invasive mosquitofish: being social can be deadly. <i>Aquatic Invasions</i> , 2019, 14, 465-477.	0.6	15
46	Phylogenetic patterns of trait and trait plasticity evolution: Insights from amphibian embryos. <i>Evolution; International Journal of Organic Evolution</i> , 2018, 72, 663-678.	1.1	16
47	Genomic tools for behavioural ecologists to understand repeatable individual differences in behaviour. <i>Nature Ecology and Evolution</i> , 2018, 2, 944-955.	3.4	97
48	Male guppies compensate for lost time when mating in turbid water. <i>Behavioral Ecology and Sociobiology</i> , 2018, 72, 1.	0.6	15
49	Integrating social networks, animal personalities, movement ecology and parasites: a framework with examples from a lizard. <i>Animal Behaviour</i> , 2018, 136, 195-205.	0.8	59
50	Where should we meet? Mapping social network interactions of sleepy lizards shows sex-dependent social network structure. <i>Animal Behaviour</i> , 2018, 136, 207-215.	0.8	33
51	Fish-Habitat Relationships Along the Estuarine Gradient of the Sacramento-San Joaquin Delta, California: Implications for Habitat Restoration. <i>Estuaries and Coasts</i> , 2018, 41, 2389-2409.	1.0	19
52	Endure your parasites: Sleepy Lizard (<i>Tiliqua rugosa</i>) movement is not affected by their ectoparasites. <i>Canadian Journal of Zoology</i> , 2018, 96, 1309-1316.	0.4	10
53	Does sexual conflict increase juvenile survival by reducing cannibalism?. <i>Behavioural Processes</i> , 2018, 157, 438-444.	0.5	1
54	Juvenile rockfish show resilience to CO ₂ -acidification and hypoxia across multiple biological scales. , 2018, 6, coy038.		14

#	ARTICLE	IF	CITATIONS
55	Social Information Links Individual Behavior to Population and Community Dynamics. Trends in Ecology and Evolution, 2018, 33, 535-548.	4.2	122
56	Direct and indirect effects of chemical contaminants on the behaviour, ecology and evolution of wildlife. Proceedings of the Royal Society B: Biological Sciences, 2018, 285, 20181297.	1.2	195
57	Predicting behavioural responses to novel organisms: state-dependent detection theory. Proceedings of the Royal Society B: Biological Sciences, 2017, 284, 20162108.	1.2	32
58	Behavioural responses to human-induced change: Why fishing should not be ignored. Evolutionary Applications, 2017, 10, 231-240.	1.5	81
59	Effects of the group's mix of sizes and personalities on the emergence of alternative mating systems in water striders. Behavioral Ecology, 2017, 28, 1068-1074.	1.0	7
60	Altered physical and social conditions produce rapidly reversible mating systems in water striders. Behavioral Ecology, 2017, 28, 632-639.	1.0	10
61	Insights for behavioral ecology from behavioral syndromes: a comment on Beekman and Jordan. Behavioral Ecology, 2017, 28, 627-628.	1.0	6
62	Why Is Social Behavior Rare in Reptiles? Lessons From Sleepy Lizards. Advances in the Study of Behavior, 2017, 49, 1-26.	1.0	16
63	What's your move? Movement as a link between personality and spatial dynamics in animal populations. Ecology Letters, 2017, 20, 3-18.	3.0	287
64	The erroneous signals of detection theory. Proceedings of the Royal Society B: Biological Sciences, 2017, 284, 20171852.	1.2	27
65	Non-random dispersal mediates invader impacts on the invertebrate community. Journal of Animal Ecology, 2017, 86, 1298-1307.	1.3	27
66	Spatiotemporal patterns of duck nest density and predation risk: a multi-scale analysis of 18 years and more than 10 000 nests. Oikos, 2017, 126, 332-338.	1.2	15
67	Correlational selection on personality and social plasticity: morphology and social context determine behavioural effects on mating success. Journal of Animal Ecology, 2017, 86, 213-226.	1.3	29
68	Parasitism, personality and cognition in fish. Behavioural Processes, 2017, 141, 205-219.	0.5	37
69	Socially interacting or indifferent neighbours? Randomization of movement paths to tease apart social preference and spatial constraints. Methods in Ecology and Evolution, 2016, 7, 971-979.	2.2	102
70	The Role of Dispersal Behaviour and Personality in Post-establishment Spread. , 2016, , 96-116.		9
71	Behavioural hypervolumes of spider communities predict community performance and disbandment. Proceedings of the Royal Society B: Biological Sciences, 2016, 283, 20161409.	1.2	14
72	Novel Species Interactions in a Highly Modified Estuary: Association of Largemouth Bass with Brazilian Waterweed <i>Egeria densa</i> . Transactions of the American Fisheries Society, 2016, 145, 249-263.	0.6	30

#	ARTICLE	IF	CITATIONS
73	Multiple mating reveals complex patterns of assortative mating by personality and body size. <i>Journal of Animal Ecology</i> , 2016, 85, 125-135.	1.3	35
74	A conceptual framework for understanding behavioral responses to HIREC. <i>Current Opinion in Behavioral Sciences</i> , 2016, 12, 109-114.	2.0	49
75	The relationship between handling time and cortisol release rates changes as a function of brain parasite densities in California killifish <i>Fundulus parvipinnis</i> . <i>Journal of Fish Biology</i> , 2016, 88, 1125-1142.	0.7	6
76	A comparison of plants and animals in their responses to risk of consumption. <i>Current Opinion in Plant Biology</i> , 2016, 32, 1-8.	3.5	22
77	Dealing with stochastic environmental variation in space and time: bet hedging by generalist, specialist, and diversified strategies. <i>Theoretical Ecology</i> , 2016, 9, 149-161.	0.4	23
78	Environment modulates population social structure: experimental evidence from replicated social networks of wild lizards. <i>Animal Behaviour</i> , 2016, 111, 23-31.	0.8	86
79	Commentary: Four ways in which data-free papers on animal personality fail to be impactful. <i>Frontiers in Ecology and Evolution</i> , 2015, 3, .	1.1	4
80	Linking short-term behavior and personalities to feeding and mating rates in female water striders. <i>Behavioral Ecology</i> , 2015, 26, 1196-1202.	1.0	10
81	On connecting behavioral responses to HIREC to ecological outcomes: a comment on Wong and Candolin. <i>Behavioral Ecology</i> , 2015, 26, 676-677.	1.0	6
82	Effects of carbaryl on species interactions of the foothill yellow legged frog (<i>Rana boylei</i>) and the Pacific treefrog (<i>Pseudacris regilla</i>). <i>Hydrobiologia</i> , 2015, 746, 255-269.	1.0	5
83	Error management in plant allocation to herbivore defense. <i>Trends in Ecology and Evolution</i> , 2015, 30, 441-445.	4.2	51
84	Developmental plasticity in vision and behavior may help guppies overcome increased turbidity. <i>Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology</i> , 2015, 201, 1125-1135.	0.7	61
85	When the going gets tough: behavioural type-dependent space use in the sleepy lizard changes as the season dries. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20151768.	1.2	74
86	Animal personality and state-dependent behaviour feedbacks: a review and guide for empiricists. <i>Trends in Ecology and Evolution</i> , 2015, 30, 50-60.	4.2	472
87	The contribution of additive genetic variation to personality variation: heritability of personality. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20142201.	1.2	287
88	Personalities and presence of hyperaggressive males influence male mating exclusivity and effective mating in stream water striders. <i>Behavioral Ecology and Sociobiology</i> , 2015, 69, 27-37.	0.6	31
89	Dynamic feedbacks on dynamic networks: on the importance of considering real-time rewiring--comment on Pinter-Wollman et al.. <i>Behavioral Ecology</i> , 2014, 25, 258-259.	1.0	6
90	Effects of turbidity and an invasive waterweed on predation by introduced largemouth bass. <i>Environmental Biology of Fishes</i> , 2014, 97, 79-90.	0.4	53

#	ARTICLE	IF	CITATIONS
91	The keystone individual concept: an ecological and evolutionary overview. <i>Animal Behaviour</i> , 2014, 89, 53-62.	0.8	174
92	Effects of behavioural type, social skill and the social environment on male mating success in water striders. <i>Animal Behaviour</i> , 2014, 94, 9-17.	0.8	56
93	Behavioural syndromes and social insects: personality at multiple levels. <i>Biological Reviews</i> , 2014, 89, 48-67.	4.7	268
94	Behavioural plasticity and evolution. <i>Animal Behaviour</i> , 2013, 85, 1003.	0.8	17
95	The response of a sleepy lizard social network to altered ecological conditions. <i>Animal Behaviour</i> , 2013, 86, 763-772.	0.8	37
96	Understanding variation in behavioural responses to human-induced rapid environmental change: a conceptual overview. <i>Animal Behaviour</i> , 2013, 85, 1077-1088.	0.8	422
97	Predicting novel herbivore-plant interactions. <i>Oikos</i> , 2013, 122, 1554-1564.	1.2	81
98	Ecological novelty and the emergence of evolutionary traps. <i>Trends in Ecology and Evolution</i> , 2013, 28, 552-560.	4.2	349
99	Personality-dependent dispersal cancelled under predation risk. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2013, 280, 20132349.	1.2	89
100	Multilevel selection and effects of keystone hyperaggressive males on mating success and behavior in stream water striders. <i>Behavioral Ecology</i> , 2013, 24, 1166-1176.	1.0	44
101	Frontiers on the Interface between Behavioral Syndromes and Social Behavioral Ecology. , 2013, , 221-251.		8
102	Quantified Analyses of Aggression Pattern in a Captive Population of Musk Deer (<i>Moschus Sifanicus</i>). <i>Annals of Animal Science</i> , 2012, 12, 413-421.	0.6	3
103	Linking behavioural syndromes and cognition: a behavioural ecology perspective. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2012, 367, 2762-2772.	1.8	536
104	Impacts of the Insecticide Diazinon on the Behavior of Predatory Fish and Amphibian Prey. <i>Journal of Herpetology</i> , 2012, 46, 171-176.	0.2	18
105	Temporal dynamics and network analysis. <i>Methods in Ecology and Evolution</i> , 2012, 3, 958-972.	2.2	194
106	Behavioral Types of Predator and Prey Jointly Determine Prey Survival: Potential Implications for the Maintenance of Within-Species Behavioral Variation. <i>American Naturalist</i> , 2012, 179, 217-227.	1.0	101
107	Lovers and fighters in sleepy lizard land: where do aggressive males fit in a social network?. <i>Animal Behaviour</i> , 2012, 83, 209-215.	0.8	43
108	Individual sociability and choosiness between shoal types. <i>Animal Behaviour</i> , 2012, 83, 1469-1476.	0.8	82

#	ARTICLE	IF	CITATIONS
109	Spatial scale influences the outcome of the predator–prey space race between tadpoles and predatory dragonflies. <i>Functional Ecology</i> , 2012, 26, 522-531.	1.7	13
110	Ecological implications of behavioural syndromes. <i>Ecology Letters</i> , 2012, 15, 278-289.	3.0	705
111	Effects of Ocean Acidification on Learning in Coral Reef Fishes. <i>PLoS ONE</i> , 2012, 7, e31478.	1.1	111
112	Social Personality Polymorphism and the Spread of Invasive Species: A Model. <i>American Naturalist</i> , 2011, 177, 273-287.	1.0	135
113	Intragenetic variation in antipredator responses of coral reef fishes affected by ocean acidification: implications for climate change projections on marine communities. <i>Global Change Biology</i> , 2011, 17, 2980-2986.	4.2	161
