#	ARTICLE	IF	CITATIONS
1	Nonemotional features suppress early and enhance late emotional electrocortical responses to negative pictures. <i>Biological Psychology</i> , 2011, 86, 83-89.	2.2	64
2	Emotional event-related potentials are reduced if negative pictures presented at fixation are unattended. <i>Neuroscience Letters</i> , 2011, 495, 178-182.	2.1	33
3	Subliminal or not? Comparing null-hypothesis and Bayesian methods for testing subliminal priming. <i>Consciousness and Cognition</i> , 2016, 44, 29-40.	1.5	30
4	Processing of unattended, simple negative pictures resists perceptual load. <i>NeuroReport</i> , 2011, 22, 348-352.	1.2	25
5	High negative valence does not protect emotional event-related potentials from spatial inattention and perceptual load. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2012, 12, 151-160.	2.0	23
6	On the Benefits of Speech-Language Therapy for Individuals Born With Cleft Palate: A Systematic Review and Meta-Analysis of Individual Participant Data. <i>Journal of Speech, Language, and Hearing Research</i> , 2022, 65, 555-573.	1.6	12
7	Larger reported impact of stuttering in teenage females, compared to males – A comparison of teenagers’ result on Overall Assessment of the Speaker’s Experience of Stuttering (OASES). <i>Journal of Fluency Disorders</i> , 2021, 67, 105822.	1.7	8
8	Asymmetric transfer of sound localization learning between indistinguishable interaural cues. <i>Experimental Brain Research</i> , 2014, 232, 1707-1716.	1.5	6
9	Reversed Priming Effects May Be Driven by Misperception Rather than Subliminal Processing. <i>Frontiers in Psychology</i> , 2016, 7, 198.	2.1	6
10	When Perception Trumps Reality. <i>Psychological Science</i> , 2017, 28, 346-355.	3.3	6
11	Asking parents about babbling at 10 months produced valid answers but did not predict language screening result two years later. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 0, , .	1.5	3
12	Children and adolescents with speech sound disorders are more likely to have orofacial dysfunction and malocclusion. <i>Clinical and Experimental Dental Research</i> , 2022, 8, 1130-1141.	1.9	2
13	A preliminary validation of a dynamic speech motor assessment for Swedish-speaking children with childhood apraxia of speech. <i>Logopedics Phoniatrics Vocology</i> , 2022, 47, 230-238.	1.0	1
14	A gentle reminder that mean does not imply modal behavior: Few are in a group biased in minimal groups. <i>Scandinavian Journal of Psychology</i> , 2020, 61, 794-802.	1.5	0
