|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Changes in the incidence of invasive disease due to <i>Streptococcus pneumoniae</i> , <i>Haemophilus influenzae</i> , and <i>Neisseria meningitidis</i> during the COVID-19 pandemic in 26 countries and territories in the Invasive Respiratory Infection Surveillance Initiative: a prospective analysis of surveillance data. <i>The Lancet Digital Health</i> , 2021, 3, e360-e370. | 12.3 | 260       |
| 2  | Effect of childhood pneumococcal conjugate vaccination on invasive disease in older adults of 10 European countries: implications for adult vaccination. <i>Thorax</i> , 2019, 74, 473-482.                                                                                                                                                                                             | 5.6  | 125       |
| 3  | Serotype Replacement after Introduction of 10-Valent and 13-Valent Pneumococcal Conjugate Vaccines in 10 Countries, Europe. <i>Emerging Infectious Diseases</i> , 2022, 28, 137-138.                                                                                                                                                                                                    | 4.3  | 50        |
| 4  | Serotype Distribution of Remaining Pneumococcal Meningitis in the Mature PCV10/13 Period: Findings from the PSERENADE Project. <i>Microorganisms</i> , 2021, 9, 738.                                                                                                                                                                                                                    | 3.6  | 31        |
| 5  | Global Landscape Review of Serotype-Specific Invasive Pneumococcal Disease Surveillance among Countries Using PCV10/13: The Pneumococcal Serotype Replacement and Distribution Estimation (PSERENADE) Project. <i>Microorganisms</i> , 2021, 9, 742.                                                                                                                                    | 3.6  | 30        |
| 6  | Effectiveness of 10 and 13-valent pneumococcal conjugate vaccines against invasive pneumococcal disease in European children: SplDnet observational multicentre study. <i>Vaccine</i> , 2022, 40, 3963-3974.                                                                                                                                                                            | 3.8  | 24        |
| 7  | Invasive <i>Streptococcus pneumoniae</i> Infections and Vaccine Failures in Children in Ireland From the Postvaccine Era From 2007 to 2018. <i>Pediatric Infectious Disease Journal</i> , 2020, 39, 339-344.                                                                                                                                                                            | 2.0  | 11        |
| 8  | Using genomics to examine the persistence of <i>Streptococcus pneumoniae</i> serotype 19A in Ireland and the emergence of a sub-clade associated with vaccine failures. <i>Vaccine</i> , 2021, 39, 5064-5073.                                                                                                                                                                           | 3.8  | 9         |
| 9  | Clinical Utility of Polymerase Chain Reaction Testing for <i>Streptococcus pneumoniae</i> in Pediatric Cerebrospinal Fluid Samples. <i>Pediatric Infectious Disease Journal</i> , 2017, 36, 833-836.                                                                                                                                                                                    | 2.0  | 5         |
| 10 | Colonisation of Irish patients with chronic obstructive pulmonary disease by <i>Streptococcus pneumoniae</i> and analysis of the pneumococcal vaccine coverage: a non-interventional, observational, prospective cohort study. <i>BMJ Open</i> , 2017, 7, e013944.                                                                                                                      | 1.9  | 4         |
| 11 | Evaluation of the Clinical Utility of a Real-time PCR Assay for the Diagnosis of <i>Streptococcus pneumoniae</i> Bacteremia in Children. <i>Pediatric Infectious Disease Journal</i> , 2018, 37, 153-156.                                                                                                                                                                               | 2.0  | 2         |
