#	ARTICLE	IF	CITATIONS
1	Neuropsychological and mood effects of ketamine in electroconvulsive therapy: A randomised controlled trial. <i>Journal of Affective Disorders</i> , 2012, 142, 233-240.	4.1	108
2	Measuring beliefs about gluten free diet adherence in adult coeliac disease using the theory of planned behaviour. <i>Appetite</i> , 2011, 56, 476-483.	3.7	73
3	A Randomized Controlled Trial of an Online Intervention to Improve Gluten-Free Diet Adherence in Celiac Disease. <i>American Journal of Gastroenterology</i> , 2013, 108, 811-817.	0.4	71
4	A sham-controlled trial of left and right temporal rTMS for the treatment of auditory hallucinations. <i>Psychological Medicine</i> , 2010, 40, 541-546.	4.5	63
5	Reduced quality of life in coeliac disease is more strongly associated with depression than gastrointestinal symptoms. <i>Journal of Psychosomatic Research</i> , 2013, 75, 135-141.	2.6	60
6	Examining the predictive utility of an extended theory of planned behaviour model in the context of specific individual safe food-handling. <i>Appetite</i> , 2015, 90, 91-98.	3.7	59
7	A unified call to action from Australian nursing and midwifery leaders: ensuring that Black lives matter. <i>Contemporary Nurse</i> , 2020, 56, 297-308.	1.0	55
8	Food knowledge and psychological state predict adherence to a gluten-free diet in a survey of 5310 Australians and New Zealanders with coeliac disease. <i>Alimentary Pharmacology and Therapeutics</i> , 2018, 48, 78-86.	3.7	50
9	NHS Diabetes Prevention Programme in England: formative evaluation of the programme in early phase implementation. <i>BMJ Open</i> , 2018, 8, e019467.	1.9	47
10	Attribution of weight regain to emotional reasons amongst European adults with overweight and obesity who regained weight following a weight loss attempt. <i>Eating and Weight Disorders</i> , 2019, 24, 351-361.	2.5	45
11	Gluten free diet adherence in coeliac disease. The role of psychological symptoms in bridging the intention-behaviour gap. <i>Appetite</i> , 2013, 61, 52-58.	3.7	44
12	Explaining the intention-behaviour gap in gluten-free diet adherence: The moderating roles of habit and perceived behavioural control. <i>Journal of Health Psychology</i> , 2015, 20, 580-591.	2.3	37
13	The relationship between gluten free diet adherence and depressive symptoms in adults with coeliac disease: A systematic review with meta-analysis. <i>Appetite</i> , 2018, 120, 578-588.	3.7	35
14	Determining motivation to engage in safe food handling behaviour. <i>Food Control</i> , 2016, 61, 47-53.	5.5	32
15	Maintenance of a gluten free diet in coeliac disease: The roles of self-regulation, habit, psychological resources, motivation, support, and goal priority. <i>Appetite</i> , 2018, 125, 356-366.	3.7	32
16	Active behaviour change safety interventions in the construction industry: A systematic review. <i>Safety Science</i> , 2015, 79, 139-148.	4.9	31
17	The NoHoW protocol: a multicentre 2Ã—2 factorial randomised controlled trial investigating an evidence-based digital toolkit for weight loss maintenance in European adults. <i>BMJ Open</i> , 2019, 9, e029425.	1.9	30
18	Behavioural intervention for weight loss maintenance versus standard weight advice in adults with obesity: A randomised controlled trial in the UK (NULevel Trial). <i>PLoS Medicine</i> , 2019, 16, e1002793.	8.4	29

#	ARTICLE	IF	CITATIONS
19	The NUILevel trial of a scalable, technology-assisted weight loss maintenance intervention for obese adults after clinically significant weight loss: study protocol for a randomised controlled trial. <i>Trials</i> , 2015, 16, 421.	1.6	26
20	Predicting intention and behaviour following participation in a theory-based intervention to improve gluten free diet adherence in coeliac disease. <i>Psychology and Health</i> , 2015, 30, 1063-1074.	2.2	23
21	Dissemination of an Online Theory-Based Intervention to Improve Gluten-Free Diet Adherence in Coeliac Disease: the Relationship Between Acceptability, Effectiveness, and Attrition. <i>International Journal of Behavioral Medicine</i> , 2015, 22, 356-364.	1.7	15
22	An investigation of the predictors of photoprotection and UVR dose to the face in patients with XP: a protocol using observational mixed methods. <i>BMJ Open</i> , 2017, 7, e018364.	1.9	15
23	Using the theory of planned behaviour to measure motivation for recovery in anorexia nervosa. <i>Appetite</i> , 2015, 84, 309-315.	3.7	14
24	Support needs of patients with obesity in primary care: a practice-list survey. <i>BMC Family Practice</i> , 2018, 19, 6.	2.9	14
25	Psychological correlates of adherence to photoprotection in a rare disease: International survey of people with Xeroderma Pigmentosum. <i>British Journal of Health Psychology</i> , 2019, 24, 668-686.	3.5	14
26	Understanding and predicting a complex behavior using n-of-1 methods: Photoprotection in xeroderma pigmentosum.. <i>Health Psychology</i> , 2018, 37, 1145-1158.	1.6	11
27	Challenges and proposed solutions for formative research to inform systematic intervention development in rare and unstudied conditions: The case example of Xeroderma Pigmentosum. <i>British Journal of Health Psychology</i> , 2018, 23, 229-237.	3.5	10
28	Can Ego Depletion and Post-event Discussion Change the Way We Remember a Crime?. <i>Psychiatry, Psychology and Law</i> , 2015, 22, 172-183.	1.2	7
29	Evidence-Based Digital Tools for Weight Loss Maintenance: The NoHoW Project. <i>Obesity Facts</i> , 2021, 14, 320-333.	3.4	7
30	Supporting the transition from weight loss to maintenance: development and optimisation of a face-to-face behavioural intervention component. <i>Health Psychology and Behavioral Medicine</i> , 2017, 5, 66-84.	1.8	6
31	Why? What? How? Using an Intervention Mapping approach to develop a personalised intervention to improve adherence to photoprotection in patients with Xeroderma Pigmentosum. <i>Health Psychology and Behavioral Medicine</i> , 2020, 8, 475-500.	1.8	6
32	“Champion” behavior in a community obesity reduction program: Feedback from peers. <i>Journal of Health Psychology</i> , 2017, 22, 148-157.	2.3	5
33	Prevalence and predictors of weight loss maintenance: a retrospective population-based survey of European adults with overweight and obesity. <i>Journal of Human Nutrition and Dietetics</i> , 2019, 32, 745-753.	2.5	5
34	Improving photoprotection in adults with xeroderma pigmentosum: personalisation and tailoring in the “XPAND”™ intervention. <i>Health Psychology and Behavioral Medicine</i> , 2020, 8, 543-572.	1.8	5
35	Evaluation of a personalised adherence intervention to improve photoprotection in adults with Xeroderma Pigmentosum (XP): protocol for the trial of XPAND. <i>BMJ Open</i> , 2019, 9, e028577.	1.9	5
36	The roles of autonomous motivation and self-control lapses in concurrent adherence to a gluten-free diet and a self-chosen weight loss plan in adults with coeliac disease. <i>Psychology and Health</i> , 2019, 34, 943-962.	2.2	3

#	ARTICLE	IF	CITATIONS
37	Ultraviolet exposure to the face in patients with xeroderma pigmentosum and healthy controls: applying a novel methodology to define photoprotection behaviour. <i>British Journal of Dermatology</i> , 2021, , .	1.5	3
38	Facial photoprotection in xeroderma pigmentosum (XP) patients: Validation of a new self-reported questionnaire of adherence. <i>Photodermatology Photoimmunology and Photomedicine</i> , 2020, 36, 118-125.	1.5	2
39	Identifying the psychosocial predictors of ultraviolet exposure to the face in patients with xeroderma pigmentosum: a study of the behavioural factors affecting clinical outcomes in this genetic disease. <i>Journal of Medical Genetics</i> , 2022, 59, 1095-1103.	3.2	2
