| #  | ARTICLE  | IF   | CITATIONS |
|----|--|------|-----------|
| 1  | Modeling future asthma attributable to fine particulate matter (PM <sub>2.5</sub> ) in a changing climate: a health impact assessment. <i>Air Quality, Atmosphere and Health</i> , 2022, 15, 311-319.  | 3.3  | 4         |
| 2  | The Role of Temperature in Modifying the Risk of Ozone-Attributable Mortality under Future Changes in Climate: A Proof-of-Concept Analysis. <i>Environmental Science &amp; Technology</i> , 2022, 56, 1202-1210.   | 10.0 | 4         |
| 3  | Dynamic Versus Static Modeling of Mortality-Related Benefits of PM <sub>2.5</sub> Reductions in the USA and Chile: 1990 to 2050. <i>Journal of Benefit-Cost Analysis</i> , 2022, 13, 198-223.  | 1.2  | 2         |
| 4  | Reanalysis of the association between reduction in long-term PM <sub>2.5</sub> concentrations and improved life expectancy. <i>Environmental Health</i> , 2021, 20, 102.   | 4.0  | 3         |
| 5  | A database for evaluating the InMAP, APEEP, and EASIUR reduced complexity air-quality modeling tools. <i>Data in Brief</i> , 2020, 28, 104886.   | 1.0  | 16        |
| 6  | CABOT-O <sub>3</sub> : An Optimization Model for Air Quality Benefit-Cost and Distributional Impacts Analysis. <i>Environmental Science &amp; Technology</i> , 2020, 54, 13370-13378.  | 10.0 | 5         |
| 7  | Quantifying the Public Health Benefits of Reducing Air Pollution: Critically Assessing the Features and Capabilities of WHO's AirQ+ and U.S. EPA's Environmental Benefits Mapping and Analysis Program's Community Edition (BenMAP-CE). <i>Atmosphere</i> , 2020, 11, 516. | 2.3  | 35        |
| 8  | Ozone-related asthma emergency department visits in the US in a warming climate. <i>Environmental Research</i> , 2020, 183, 109206.  | 7.5  | 12        |
| 9  | The recent and future health burden of the U.S. mobile sector apportioned by source. <i>Environmental Research Letters</i> , 2020, 15, 075009.   | 5.2  | 12        |
| 10 | Estimating Lifetime Cost of Illness. An Application to Asthma. <i>Annals of the American Thoracic Society</i> , 2020, 17, 1558-1569.   | 3.2  | 12        |
| 11 | Health benefits and control costs of tightening particulate matter emissions standards for coal power plants - The case of Northeast Brazil. <i>Environment International</i> , 2019, 124, 420-430.  | 10.0 | 20        |
| 12 | Effects of Increasing Aridity on Ambient Dust and Public Health in the U.S. Southwest Under Climate Change. <i>GeoHealth</i> , 2019, 3, 127-144.   | 4.0  | 56        |
| 13 | Change in fine particle-related premature deaths among US population subgroups between 1980 and 2010. <i>Air Quality, Atmosphere and Health</i> , 2019, 12, 673-682.   | 3.3  | 9         |
| 14 | Estimates of Present and Future Asthma Emergency Department Visits Associated With Exposure to Oak, Birch, and Grass Pollen in the United States. <i>GeoHealth</i> , 2019, 3, 11-27.   | 4.0  | 33        |
| 15 | Monetized health benefits attributable to mobile source emission reductions across the United States in 2025. <i>Science of the Total Environment</i> , 2019, 650, 2490-2498.  | 8.0  | 18        |
| 16 | Estimating the Health and Economic Impacts of Changes in Local Air Quality. <i>American Journal of Public Health</i> , 2018, 108, S151-S157.   | 2.7  | 12        |
| 17 | The Environmental Benefits Mapping and Analysis Program's Community Edition (BenMAP-CE): A tool to estimate the health and economic benefits of reducing air pollution. <i>Environmental Modelling and Software</i> , 2018, 104, 118-129.                                  | 4.5  | 122       |
| 18 | The health impacts and economic value of wildland fire episodes in the U.S.: 2008-2012. <i>Science of the Total Environment</i> , 2018, 610-611, 802-809.  | 8.0  | 184       |

| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 19 | Heat-Related Health Impacts under Scenarios of Climate and Population Change. International Journal of Environmental Research and Public Health, 2018, 15, 2438.  | 2.6  | 22        |
| 20 | Estimates of the Global Burden of Ambient PM <sub>2.5</sub> , Ozone, and NO <sub>2</sub> on Asthma Incidence and Emergency Room Visits. Environmental Health Perspectives, 2018, 126, 107004.                                     | 6.0  | 209       |
| 21 | Global estimates of mortality associated with long-term exposure to outdoor fine particulate matter. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, 9592-9597.                       | 7.1  | 1,407     |
| 22 | Assessing Human Health PM <sub>2.5</sub> and Ozone Impacts from U.S. Oil and Natural Gas Sector Emissions in 2025. Environmental Science & Technology, 2018, 52, 8095-8103.   | 10.0 | 32        |
| 23 | The estimated change in the level and distribution of PM <sub>2.5</sub> -attributable health impacts in the United States: 2005–2014. Environmental Research, 2018, 167, 506-514.   | 7.5  | 53        |
| 24 | The Environmental Benefits Mapping and Analysis Program - Community Edition (BenMAP-CE): A tool to estimate the health and economic benefits of reducing air pollution. Environmental Modelling and Software, 2018, 104, 118-129. | 4.5  | 39        |
| 25 | Impacts of oak pollen on allergic asthma in the United States and potential influence of future climate change. GeoHealth, 2017, 1, 80-92.  | 4.0  | 42        |
| 26 | Estimated Changes in Life Expectancy and Adult Mortality Resulting from Declining PM <sub>2.5</sub> Exposures in the Contiguous United States: 1980–2010. Environmental Health Perspectives, 2017, 125, 097003.                   | 6.0  | 65        |
| 27 | Survey of Ambient Air Pollution Health Risk Assessment Tools. Risk Analysis, 2016, 36, 1718-1736.   | 2.7  | 66        |
| 28 | Characterizing the Long-Term PM <sub>2.5</sub> Concentration–Response Function: Comparing the Strengths and Weaknesses of Research Synthesis Approaches. Risk Analysis, 2016, 36, 1693-1707.                                      | 2.7  | 17        |
| 29 | A class of non-linear exposure-response models suitable for health impact assessment applicable to large cohort studies of ambient air pollution. Air Quality, Atmosphere and Health, 2016, 9, 961-972.                           | 3.3  | 106       |
| 30 | Characterizing the confluence of air pollution risks in the United States. Air Quality, Atmosphere and Health, 2016, 9, 293-301.  | 3.3  | 13        |
| 31 | The geographic distribution and economic value of climate change-related ozone health impacts in the United States in 2030. Journal of the Air and Waste Management Association, 2015, 65, 570-580.                               | 1.9  | 85        |
| 32 | The health benefits of reducing air pollution in Sydney, Australia. Environmental Research, 2015, 143, 19-25.   | 7.5  | 85        |
| 33 | Using Science to Shape Policy. Molecular and Integrative Toxicology, 2015, , 403-436.   | 0.5  | 0         |
| 34 | Outdoor Fine Particles and Nonfatal Strokes. Epidemiology, 2014, 25, 835-842.   | 2.7  | 35        |
| 35 | Effect modification of ozone-related mortality risks by temperature in 97 US cities. Environment International, 2014, 73, 128-134.  | 10.0 | 81        |
| 36 | The public health context for PM <sub>2.5</sub> and ozone air quality trends. Air Quality, Atmosphere and Health, 2013, 6, 1-11.  | 3.3  | 69        |

| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 37 | The Recent and Future Health Burden of Air Pollution Apportioned Across U.S. Sectors. Environmental Science & Technology, 2013, 47, 3580-3589.  | 10.0 | 124       |
| 38 | Letter in Response to Fraas & Lutter Article: “Uncertain Benefits Estimates for Reductions in Fine Particle Concentrations” Risk Analysis, 2013, 33, 755-756.   | 2.7  | 2         |
| 39 | Health Benefits from Large-Scale Ozone Reduction in the United States. Environmental Health Perspectives, 2012, 120, 1404-1410.   | 6.0  | 99        |
| 40 | Characterizing the PM <sub>2.5</sub> -related health benefits of emission reductions for 17 industrial, area and mobile emission sectors across the U.S.. Environment International, 2012, 49, 141-151. | 10.0 | 113       |
| 41 | Estimating the National Public Health Burden Associated with Exposure to Ambient PM <sub>2.5</sub> and Ozone. Risk Analysis, 2012, 32, 81-95.   | 2.7  | 472       |
| 42 | Response. Risk Analysis, 2012, 32, 197-199.   | 2.7  | 3         |
| 43 | Response to Cox Letter: “Miscommunicating Risk, Uncertainty, and Causation: Fine Particulate Air Pollution and Mortality Risk as an Example” Risk Analysis, 2012, 32, 768-770.                          | 2.7  | 2         |
| 44 | Climate Change-Related Temperature Impacts on Warm Season Heat Mortality: A Proof-of-Concept Methodology Using BenMAP. Environmental Science & Technology, 2011, 45, 1450-1457.                         | 10.0 | 67        |
| 45 | Maximizing Health Benefits and Minimizing Inequality: Incorporating Local-Scale Data in the Design and Evaluation of Air Quality Policies. Risk Analysis, 2011, 31, 908-922.                            | 2.7  | 80        |
| 46 | Improving the Linkages between Air Pollution Epidemiology and Quantitative Risk Assessment. Environmental Health Perspectives, 2011, 119, 1671-1675.  | 6.0  | 47        |
| 47 | Meeting Report: Estimating the Benefits of Reducing Hazardous Air Pollutants—Summary of 2009 Workshop and Future Considerations. Environmental Health Perspectives, 2011, 119, 125-130.                 | 6.0  | 4         |
| 48 | A multi-pollutant, risk-based approach to air quality management: Case study for Detroit. Atmospheric Pollution Research, 2010, 1, 296-304.   | 3.8  | 52        |
| 49 | Methodological considerations in developing local-scale health impact assessments: balancing national, regional, and local data. Air Quality, Atmosphere and Health, 2009, 2, 99-110.                   | 3.3  | 68        |
| 50 | The influence of location, source, and emission type in estimates of the human health benefits of reducing a ton of air pollution. Air Quality, Atmosphere and Health, 2009, 2, 169-176.                | 3.3  | 139       |
