#	ARTICLE	IF	CITATIONS
1	Cytokine profiles and the dynamic of gingivitis development in humans. <i>Journal of Clinical Periodontology</i> , 2022, 49, 67-75.	2.3	11
2	Association of peptidoglycan recognition protein 1 to post-myocardial infarction and periodontal inflammation: A subgroup report from the PAROKRANK (Periodontal Disease and the Relation to) Tj ETQq0 0 0 rgB1/D Overlock 10 Tf 50 6	1.0	10
3	Implementing of aMMP-8 point-of-care test with a modified new disease classification in Finnish adolescent cohorts. <i>Clinical and Experimental Dental Research</i> , 2022, 8, 1142-1148.	0.8	4
4	ImmunoDisk® A Fully Automated Bead-Based Immunoassay Cartridge with All Reagents Pre-Stored. <i>Biosensors</i> , 2022, 12, 413.	2.3	3
5	Novel and known periodontal pathogens residing in gingival crevicular fluid are associated with rheumatoid arthritis. <i>Journal of Periodontology</i> , 2021, 92, 359-370.	1.7	18
6	Metaproteome and metabolome of oral microbial communities. <i>Periodontology 2000</i> , 2021, 85, 46-81.	6.3	26
7	Associations between serum antibodies to periodontal pathogens and preclinical phases of rheumatoid arthritis. <i>Rheumatology</i> , 2021, 60, 4755-4764.	0.9	13
8	Elevated serum TREM-1 is associated with periodontitis and disease activity in rheumatoid arthritis. <i>Scientific Reports</i> , 2021, 11, 2888.	1.6	12
9	Severe Periodontitis and Biomarkers of Bacterial Burden. Results From a Case-Control and Intervention Clinical Trial. <i>Frontiers in Oral Health</i> , 2021, 2, 615579.	1.2	1
10	Salivary Biomarkers for Dental Caries Detection and Personalized Monitoring. <i>Journal of Personalized Medicine</i> , 2021, 11, 235.	1.1	19
11	Validation and verification of predictive salivary biomarkers for oral health. <i>Scientific Reports</i> , 2021, 11, 6406.	1.6	29
12	Dysbiosis of the Human Oral Microbiome During the Menstrual Cycle and Vulnerability to the External Exposures of Smoking and Dietary Sugar. <i>Frontiers in Cellular and Infection Microbiology</i> , 2021, 11, 625229.	1.8	24
13	Regulation of matrix metalloproteinases-8, -9 and endogenous tissue inhibitor-1 in oral biofluids during pregnancy and postpartum. <i>Archives of Oral Biology</i> , 2021, 124, 105065.	0.8	4
14	One-step, wash-free, bead-based immunoassay employing bound-free phase detection. <i>Analytica Chimica Acta</i> , 2021, 1153, 338280.	2.6	14
15	Probiotic therapy for periodontal and peri-implant health – silver bullet or sham?. <i>Beneficial Microbes</i> , 2021, 12, 215-230.	1.0	6
16	Oral health and emotional well-being in premenopausal and postmenopausal women: a cross-sectional cohort study. <i>BMC Women's Health</i> , 2021, 21, 338.	0.8	8
17	Active matrix metalloproteinase-8 (aMMP-8) point-of-care test (POCT) in the COVID-19 pandemic. <i>Expert Review of Proteomics</i> , 2021, 18, 707-717.	1.3	24
18	C3-targeted therapy in periodontal disease: moving closer to the clinic. <i>Trends in Immunology</i> , 2021, 42, 856-864.	2.9	27

#	ARTICLE	IF	CITATIONS
19	Metagenomic sequencing provides new insights into the subgingival bacteriome and aetiopathology of periodontitis. <i>Journal of Periodontal Research</i> , 2021, 56, 205-218.	1.4	26
20	Lectinâ€‘functionalized Polyethylene Glycol for Relief of Mucosal Dryness. <i>Advanced Healthcare Materials</i> , 2021, , 2101719.	3.9	4
21	OralDisk: A Chair-Side Compatible Molecular Platform Using Whole Saliva for Monitoring Oral Health at the Dental Practice. <i>Biosensors</i> , 2021, 11, 423.	2.3	13
22	A pointâ€‘ofâ€‘care test of active matrix metalloproteinaseâ€‘8 predicts triggering receptor expressed on myeloid cellsâ€‘1 (TREMâ€‘1) levels in saliva. <i>Journal of Periodontology</i> , 2020, 91, 102-109.	1.7	13
23	The modulation of the TREM-1/PGLYRP1/MMP-8 axis in peri-implant diseases. <i>Clinical Oral Investigations</i> , 2020, 24, 1837-1844.	1.4	9
24	Pressure Cycling Technology Assisted Mass Spectrometric Quantification of Gingival Tissue Reveals Proteome Dynamics during the Initiation and Progression of Inflammatory Periodontal Disease. <i>Proteomics</i> , 2020, 20, e1900253.	1.3	12
25	Effect of Chewing on the Expression of Salivary Protein Composition: A Systematic Review. <i>Proteomics - Clinical Applications</i> , 2020, 14, e1900039.	0.8	10
26	Labelâ€‘Free Quantitative Proteomics versus Antibodyâ€‘Based Assays to Measure Neutrophilâ€‘Derived Enzymes in Saliva. <i>Proteomics - Clinical Applications</i> , 2020, 14, e1900050.	0.8	14
27	The adjunctive use of host modulators in nonâ€‘surgical periodontal therapy. A systematic review of randomized, placeboâ€‘controlled clinical studies. <i>Journal of Clinical Periodontology</i> , 2020, 47, 199-238.	2.3	82
28	Microbial Analysis of Saliva to Identify Oral Diseases Using a Point-of-Care Compatible qPCR Assay. <i>Journal of Clinical Medicine</i> , 2020, 9, 2945.	1.0	20
29	Salivary Fingerprinting of Periodontal Disease by Infraredâ€‘ATR Spectroscopy. <i>Proteomics - Clinical Applications</i> , 2020, 14, e1900092.	0.8	4
30	Salivary proteotypes of gingivitis tolerance and resilience. <i>Journal of Clinical Periodontology</i> , 2020, 47, 1304-1316.	2.3	13
31	Proteome and Microbiome Mapping of Human Gingival Tissue in Health and Disease. <i>Frontiers in Cellular and Infection Microbiology</i> , 2020, 10, 588155.	1.8	16
32	Salivary Biomarkers of Oral Inflammation Are Associated With Cardiovascular Events and Death Among Kidney Transplant Patients. <i>Transplantation Proceedings</i> , 2020, 52, 3231-3235.	0.3	4
33	Revisiting â€‘omicsâ€‘in Oral Health and Disease. <i>Proteomics - Clinical Applications</i> , 2020, 14, e1900022.	0.8	3
34	Treatment of stage Iâ€‘III periodontitisâ€‘The EFP S3 level clinical practice guideline. <i>Journal of Clinical Periodontology</i> , 2020, 47, 4-60.	2.3	621
35	The relationship between oral diseases and infectious complications in patients under dialysis. <i>Oral Diseases</i> , 2020, 26, 1045-1052.	1.5	8
36	Salivary biomarkers in the context of gingival inflammation in children with cystic fibrosis. <i>Journal of Periodontology</i> , 2020, 91, 1339-1347.	1.7	10

#	ARTICLE	IF	CITATIONS
37	Regulation of Salivary Peptidoglycan Recognition Protein 1 in Adolescents. <i>JDR Clinical and Translational Research</i> , 2020, 5, 332-341.	1.1	7
38	Dysbiosis of the Oral Ecosystem in Severe Congenital Neutropenia Patients. <i>Proteomics - Clinical Applications</i> , 2020, 14, e1900058.	0.8	7
39	Salivary Microbiome Shifts in Response to Periodontal Treatment Outcome. <i>Proteomics - Clinical Applications</i> , 2020, 14, e2000011.	0.8	23
40	Active matrix metalloproteinase-8 and interleukin-6 detect periodontal degeneration caused by radiotherapy of head and neck cancer: a pilot study. <i>Expert Review of Proteomics</i> , 2020, 17, 777-784.	1.3	23
41	Complement C3 as a Target of Host Modulation in Periodontitis. , 2020, , 13-29.		1
42	Salivary Total Protease Activity Based on a Broad-Spectrum Fluorescence Resonance Energy Transfer Approach to Monitor Induction and Resolution of Gingival Inflammation. <i>Molecular Diagnosis and Therapy</i> , 2019, 23, 667-676.	1.6	19
43	Virulence and Pathogenicity Properties of <i>Aggregatibacter actinomycetemcomitans</i> . <i>Pathogens</i> , 2019, 8, 222.	1.2	55
44	Periodontal disease: From the lenses of light microscopy to the specs of proteomics and next-generation sequencing. <i>Advances in Clinical Chemistry</i> , 2019, 93, 263-290.	1.8	29
45	TREM-1 Is Upregulated in Experimental Periodontitis, and Its Blockade Inhibits IL-17A and RANKL Expression and Suppresses Bone loss. <i>Journal of Clinical Medicine</i> , 2019, 8, 1579.	1.0	23
46	Applications of the oral microbiome in personalized dentistry. <i>Archives of Oral Biology</i> , 2019, 104, 7-12.	0.8	77
47	Regulation of PGLYRP1 and TREM-1 during Progression and Resolution of Gingival Inflammation. <i>JDR Clinical and Translational Research</i> , 2019, 4, 352-359.	1.1	21
48	Automated Pre-Analytic Processing of Whole Saliva Using Magnet-Beating for Point-of-Care Protein Biomarker Analysis. <i>Micromachines</i> , 2019, 10, 833.	1.4	18
49	Effect of orthodontic force magnitude on cytokine networks in gingival crevicular fluid: a longitudinal randomized split-mouth study. <i>European Journal of Orthodontics</i> , 2019, 41, 214-222.	1.1	4
50	Cytokine, chemokine, and growth factor levels in peri-implant sulcus during wound healing and osseointegration after piezosurgical versus conventional implant site preparation: Randomized, controlled, split-mouth trial. <i>Journal of Periodontology</i> , 2019, 90, 616-626.	1.7	11
51	Association of the salivary triggering receptor expressed on myeloid cells/its ligand peptidoglycan recognition protein 1 axis with oral inflammation in kidney disease. <i>Journal of Periodontology</i> , 2018, 89, 117-129.	1.7	35
52	Alarm anti-protease trypsin-2 negatively correlates with proinflammatory cytokines in patients with periodontitis. <i>Journal of Periodontology</i> , 2018, 89, 58-66.	1.7	12
53	Targeted Proteomics Guided by Label-free Quantitative Proteome Analysis in Saliva Reveal Transition Signatures from Health to Periodontal Disease. <i>Molecular and Cellular Proteomics</i> , 2018, 17, 1392-1409.	2.5	74
54	Immune response profiling of primary monocytes and oral keratinocytes to different <i>Tannerella forsythia</i> strains and their cell surface mutants. <i>Molecular Oral Microbiology</i> , 2018, 33, 155-167.	1.3	13

#	ARTICLE	IF	CITATIONS
55	Periodontal Pathogenesis: Definitions and Historical Perspectives. , 2018, , 1-7.		1
56	Gingival crevicular fluid and its immune mediators in the proteomic era. Periodontology 2000, 2018, 76, 68-84.	6.3	58
57	Aggregatibacter actinomycetemcomitans H-NS promotes biofilm formation and alters protein dynamics of other species within a polymicrobial oral biofilm. Npj Biofilms and Microbiomes, 2018, 4, 12.	2.9	19
58	Annexin A1 as a salivary biomarker for gingivitis during pregnancy. Journal of Periodontology, 2018, 89, 875-882.	1.7	13
59	Gingival Exudate Dynamics Implicate Inhibition of the Alternative Complement Pathway in the Protective Action of the C3 Inhibitor C3b in Nonhuman Primate Periodontitis. Journal of Proteome Research, 2018, 17, 3153-3175.	1.8	24
60	Periodontal Pathogenesis: Conclusions and Future Directions. , 2018, , 111-114.		0
61	Gingival Inflammation and Salivary or Serum Granulocyte-Secreted Enzymes in Patients With Polycystic Ovary Syndrome. Journal of Periodontology, 2017, 88, 1145-1152.	1.7	21
62	Impact of implant-abutment connection on osteoimmunological and microbiological parameters in short implants: a randomized controlled clinical trial. Clinical Oral Implants Research, 2017, 28, e111-e120.	1.9	5
63	Contribution of proteomics to our understanding of periodontal inflammation. Proteomics, 2017, 17, 1500518.	1.3	41
64	The epigenetic architecture at gene promoters determines cell type-specific LPS tolerance. Journal of Autoimmunity, 2017, 83, 122-133.	3.0	25
65	Salivary and Serum Markers Related to Innate Immunity in Generalized Aggressive Periodontitis. Journal of Periodontology, 2017, 88, 1339-1347.	1.7	31
66	Shotgun proteomic analysis of <i>Anaeroglobus geminatus</i> . Journal of Oral Microbiology, 2017, 9, 1325252.	1.2	1
67	Proteomic shifts in multi-species oral biofilms caused by <i>Anaeroglobus geminatus</i> . Scientific Reports, 2017, 7, 4409.	1.6	29
68	Oral Biofilms and Their Implication in Oral Diseases. , 2017, , 69-80.		0
69	Microbial dynamics during conversion from supragingival to subgingival biofilms in an <i>in vitro</i> model. Molecular Oral Microbiology, 2016, 31, 125-135.	1.3	38
70	The effect of piezoelectric surgery implant osteotomy on radiological and molecular parameters of peri-implant crestal bone loss: a randomized, controlled, split-mouth trial. Clinical Oral Implants Research, 2016, 27, 535-544.	1.9	29
71	Tribute. Molecular Oral Microbiology, 2016, 31, 205-206.	1.3	0
72	SAT0024...Epigenetic Analysis of Lps-Induced Tolerance in Rheumatoid Arthritis Synovial Fibroblasts and Macrophages. Annals of the Rheumatic Diseases, 2016, 75, 672.2-672.	0.5	0

#	ARTICLE	IF	CITATIONS
73	Impact of aging on TREM-1 responses in the periodontium: a cross-sectional study in an elderly population. <i>BMC Infectious Diseases</i> , 2016, 16, 429.	1.3	14
74	Sequencing of 16S rRNA reveals a distinct salivary microbiome signature in Behçet's disease. <i>Clinical Immunology</i> , 2016, 169, 28-35.	1.4	88
75	Chair/bedside diagnosis of oral and respiratory tract infections, and identification of antibiotic resistances for personalised monitoring and treatment. <i>Studies in Health Technology and Informatics</i> , 2016, 224, 61-6.	0.2	15
76	Proteomic profiling of host-biofilm interactions in an oral infection model resembling the periodontal pocket. <i>Scientific Reports</i> , 2015, 5, 15999.	1.6	30
77	Quantitative Proteomics Reveal Distinct Protein Regulations Caused by <i>Aggregatibacter actinomycetemcomitans</i> within Subgingival Biofilms. <i>PLoS ONE</i> , 2015, 10, e0119222.	1.1	37
78	Peri-Implant Infections of Oral Biofilm Etiology. <i>Advances in Experimental Medicine and Biology</i> , 2015, 830, 69-84.	0.8	91
79	The actin-binding protein <i>LipL32</i> : a novel local inflammatory marker associated with periodontitis. <i>Journal of Periodontal Research</i> , 2015, 50, 337-346.	1.4	11
80	Elevated matrix metalloproteinase-8 in saliva and serum in polycystic ovary syndrome and association with gingival inflammation. <i>Innate Immunity</i> , 2015, 21, 619-625.	1.1	27
81	Secretome of gingival epithelium in response to subgingival biofilms. <i>Molecular Oral Microbiology</i> , 2015, 30, 323-335.	1.3	42
82	Oxidative stress markers in saliva and periodontal disease status: modulation during pregnancy and postpartum. <i>BMC Infectious Diseases</i> , 2015, 15, 261.	1.3	36
83	The novel species <i>Streptococcus tigurinus</i> and its association with oral infection. <i>Virulence</i> , 2015, 6, 177-182.	1.8	19
84	Establishment of an oral infection model resembling the periodontal pocket in a perfusion bioreactor system. <i>Virulence</i> , 2015, 6, 265-273.	1.8	40
85	The expression of gingival epithelial junctions in response to subgingival biofilms. <i>Virulence</i> , 2015, 6, 704-709.	1.8	32
86	Influence of the Mechanical Environment on the Engineering of Mineralised Tissues Using Human Dental Pulp Stem Cells and Silk Fibroin Scaffolds. <i>PLoS ONE</i> , 2014, 9, e1111010.	1.1	43
87	Establishment and Characterization of Immortalized Gingival Epithelial and Fibroblastic Cell Lines for the Development of Organotypic Cultures. <i>Cells Tissues Organs</i> , 2014, 199, 228-237.	1.3	25
88	Transcriptional profiling of human gingival fibroblasts in response to multi-species <i>in vitro</i> subgingival biofilms. <i>Molecular Oral Microbiology</i> , 2014, 29, 174-183.	1.3	23
89	Expression of embryonic stem cell markers and osteogenic differentiation potential in cells derived from periodontal granulation tissue. <i>Cell Biology International</i> , 2014, 38, 179-186.	1.4	14
90	Expression and regulation of triggering receptor expressed on myeloid cells 1 in periodontal diseases. <i>Clinical and Experimental Immunology</i> , 2014, 178, 190-200.	1.1	28

#	ARTICLE	IF	CITATIONS
91	Role of Porphyromonas gingivalis gingipains in multi-species biofilm formation. BMC Microbiology, 2014, 14, 258.	1.3	76
92	Porphyromonas gingivalis. Virulence, 2014, 5, 463-464.	1.8	6
93	Inflammatory and Bone Remodeling Responses to the Cytolethal Distending Toxins. Cells, 2014, 3, 236-246.	1.8	14
94	Comparison of vehicles to collect dentinal fluid for molecular analysis. Journal of Dentistry, 2014, 42, 1027-1032.	1.7	12
95	Frequent detection of Streptococcus tigurinus in the human oral microbial flora by a specific 16S rRNA gene real-time TaqMan PCR. BMC Microbiology, 2014, 14, 231.	1.3	17
96	Soluble Triggering Receptor Expressed on Myeloid Cells 1 (sTREM-1) in Gingival Crevicular Fluid: Association With Clinical and Microbiologic Parameters. Journal of Periodontology, 2014, 85, 204-210.	1.7	45
97	Periapical fluid RANKL and IL-8 are differentially regulated in pulpitis and apical periodontitis. Cytokine, 2014, 69, 116-119.	1.4	30
98	Colonisation of gingival epithelia by subgingival biofilms in vitro: Role of the red complex bacteria. Archives of Oral Biology, 2014, 59, 977-986.	0.8	60
99	Association between Polycystic Ovary Syndrome, Oral Microbiota and Systemic Antibody Responses. PLoS ONE, 2014, 9, e108074.	1.1	51
100	Validation of a quantitative real-time PCR assay and comparison with fluorescence microscopy and selective agar plate counting for species-specific quantification of an <i>in vitro</i> subgingival biofilm model. Journal of Periodontal Research, 2013, 48, 517-526.	1.4	74
101	<i>Synergistetes</i> cluster <i>A</i> in saliva is associated with periodontitis. Journal of Periodontal Research, 2013, 48, 727-732.	1.4	34
