

Tim Reston

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5629027/tim-reston-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

41
papers

1,573

#	Paper	IF	Citations
41	On the rotation and frictional lock-up of normal faults: Explaining the dip distribution of normal fault earthquakes and resolving the low-angle normal fault paradox. <i>Tectonophysics</i> , 2020 , 790, 228550	3.1	3
40	3-D P-wave velocity structure of oceanic core complexes at 13°N on the Mid-Atlantic Ridge. <i>Geophysical Journal International</i> , 2020 , 221, 1555-1579	2.6	6
39	Magmatism versus serpentinization: Crustal structure along the 13°N segment at the Mid-Atlantic Ridge. <i>Geophysical Journal International</i> , 2020 , 221, 981-1001	2.6	6
38	Constraints on crustal structure of adjacent OCCs and segment boundaries at 13°N on the Mid-Atlantic Ridge. <i>Geophysical Journal International</i> , 2019 , 217, 988-1010	2.6	16
37	The Mid-Atlantic Ridge Near 13°20'N: High-Resolution Magnetic and Bathymetry Imaging. <i>Geochemistry, Geophysics, Geosystems</i> , 2019 , 20, 295-313	3.6	7
36	Resolving the fine-scale velocity structure of continental hyperextension at the Deep Galicia Margin using full-waveform inversion. <i>Geophysical Journal International</i> , 2018 , 212, 244-263	2.6	17
35	Deep structure of the Porcupine Basin from wide-angle seismic data. <i>Petroleum Geology Conference Proceedings</i> , 2018 , 8, 199-209		11
34	Flipping detachments: The kinematics of ultraslow spreading ridges. <i>Earth and Planetary Science Letters</i> , 2018 , 503, 144-157	5.3	25
33	From Continental Hyperextension to Seafloor Spreading: New Insights on the Porcupine Basin From Wide-Angle Seismic Data. <i>Journal of Geophysical Research: Solid Earth</i> , 2018 , 123, 8312-8330	3.6	12
32	Continental hyperextension, mantle exhumation, and thin oceanic crust at the continent-ocean transition, West Iberia: New insights from wide-angle seismic. <i>Journal of Geophysical Research: Solid Earth</i> , 2016 , 121, 3177-3199	3.6	43
31	Fault-controlled hydration of the upper mantle during continental rifting. <i>Nature Geoscience</i> , 2016 , 9, 384-388	18.3	56
30	To see, or not to see? Rifted margin extension. <i>Geology</i> , 2015 , 43, 967-970	5	24
29	Interplay between magmatic accretion, spreading asymmetry and detachment faulting at a segment end: Crustal structure south of the Ascension Fracture Zone. <i>Earth and Planetary Science Letters</i> , 2015 , 432, 84-94	5.3	1
28	An assessment of the cause of the extension discrepancy with reference to the west Galicia margin. <i>Basin Research</i> , 2014 , 26, 135-153	3.2	24
27	The 3-D geometry of detachment faulting at mid-ocean ridges. <i>Geochemistry, Geophysics, Geosystems</i> , 2011 , 12, n/a-n/a	3.6	63
26	Magma fingers and host rock fluidization in the emplacement of sills. <i>Geology</i> , 2010 , 38, 63-66	5	83
25	Heterogeneous deformation in the Cascadia convergent margin and its relation to thermal gradient (Washington, NW USA). <i>Tectonics</i> , 2008 , 27, n/a-n/a	4.3	33

24	Extension discrepancy at North Atlantic nonvolcanic rifted margins: Depth-dependent stretching or unrecognized faulting?. <i>Geology</i> , 2007 , 35, 367	5	99
23	Movement along a low-angle normal fault: The S reflector west of Spain. <i>Geochemistry, Geophysics, Geosystems</i> , 2007 , 8, n/a-n/a	3.6	39
22	Lithospheric extension from rifting to continental breakup at magma-poor margins: rheology, serpentinisation and symmetry. <i>International Journal of Earth Sciences</i> , 2007 , 96, 1033-1046	2.2	44
21	The formation of non-volcanic rifted margins by the progressive extension of the lithosphere: the example of the West Iberian margin. <i>Geological Society Special Publication</i> , 2007 , 282, 77-110	1.7	23
20	Waveform inversion of the S reflector west of Spain: Fine structure of a detachment fault. <i>Geophysical Research Letters</i> , 2005 , 32, n/a-n/a	4.9	11
19	Geometry of extensional faults developed at slow-spreading centres from pre-stack depth migration of seismic reflection data in the Central Atlantic (Canary Basin). <i>Geophysical Journal International</i> , 2004 , 159, 591-606	2.6	13
18	Microearthquake seismicity of the Mid-Atlantic Ridge at 5°S: A view of tectonic extension. <i>Journal of Geophysical Research</i> , 2004 , 109,		27
17	Mechanisms of extension at nonvolcanic margins: Evidence from the Galicia interior basin, west of Iberia. <i>Journal of Geophysical Research</i> , 2003 , 108,		118
16	The structure of Cretaceous oceanic crust of the NW Pacific: Constraints on processes at fast spreading centers. <i>Journal of Geophysical Research</i> , 1999 , 104, 629-644		29
15	Reflective oceanic crust formed at a fast-spreading center in the Pacific. <i>Geology</i> , 1997 , 25, 499	5	42
14	Insight into the nature of the ocean-continent transition off West Iberia from a deep multichannel seismic reflection profile. <i>Geology</i> , 1996 , 24, 1079	5	151
13	The S reflector west of Galicia (Spain): Evidence from prestack depth migration for detachment faulting during continental breakup. <i>Journal of Geophysical Research</i> , 1996 , 101, 8075-8091		132
12	Detachment and steep normal faulting in Atlantic oceanic crust west of Africa. <i>Geology</i> , 1996 , 24, 811	5	9
11	The S reflector west of Galicia: the seismic signature of a detachment fault. <i>Geophysical Journal International</i> , 1996 , 127, 230-244	2.6	63
10	Detachment tectonics during Atlantic rifting: analysis and interpretation of the S reflection, the west Galicia margin. <i>Geological Society Special Publication</i> , 1995 , 90, 93-109	1.7	18
9	The formation of passive margins: constraints from the crustal structure and segmentation of the deep Galicia margin, Spain. <i>Geological Society Special Publication</i> , 1995 , 90, 71-91	1.7	31
8	Detachment Faulting and Continental Breakup: The S Reflector Offshore Galicia 1995 , 231-246		12
7	Evidence for extensional shear zones in the mantle, offshore Britain, and their implications for the extension of the continental lithosphere. <i>Tectonics</i> , 1993 , 12, 492-506	4.3	30

6	Nature of the S reflector beneath the Galicia Banks rifted margin: Preliminary results from prestack depth migration. <i>Geology</i> , 1992 , 20, 1091	5	41
5	Mantle shear zones and the evolution of the northern North Sea basin. <i>Geology</i> , 1990 , 18, 272	5	47
4	The lower crust and the extension of the continental lithosphere: Kinematic analysis of Birps Deep Seismic Data. <i>Tectonics</i> , 1990 , 9, 1235-1248	4.3	55
3	The Structure of the Crust and Uppermost Mantle Offshore Britain: Deep Seismic Reflection Profiling and Crustal Cross-Sections 1990 , 603-621		6
2	The Outer Hebrides fault: a major Proterozoic structure in NW Britain. <i>Journal of the Geological Society</i> , 1989 , 146, 253-259	2.7	32
1	Evidence for shear zones in the lower crust offshore Britain. <i>Tectonics</i> , 1988 , 7, 929-945	4.3	71
