

# Reza Tavakkoli-Moghaddam

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/5629773/reza-tavakkoli-moghaddam-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

512  
papers

#	Paper	IF	Citations
512	Search in forest optimizer: a bioinspired metaheuristic algorithm for global optimization problems. <i>Soft Computing</i> , <b>2022</b> , 26, 2325	3.5	1
511	Designing a clinical decision support system for Alzheimer's diagnosis on OASIS-3 data set. <i>Biomedical Signal Processing and Control</i> , <b>2022</b> , 74, 103527	4.9	1
510	Simulation of the COVID-19 patient flow and investigation of the future patient arrival using a time-series prediction model: a real-case study. <i>Medical and Biological Engineering and Computing</i> , <b>2022</b> , 60, 969	3.1	1
509	An integrated approach to open-pit mines production scheduling. <i>Resources Policy</i> , <b>2022</b> , 75, 102459	7.2	0
508	A heuristic-based simulated annealing algorithm for the scheduling of relief teams in natural disasters. <i>Soft Computing</i> , <b>2022</b> , 26, 1825	3.5	5
507	Optimization of a television advertisement scheduling problem by multi-criteria decision making and dispatching rules. <i>Multimedia Tools and Applications</i> , <b>2022</b> , 81, 11755-11772	2.5	0
506	A new robust optimization model for relief logistics planning under uncertainty: a real-case study. <i>Soft Computing</i> , <b>2022</b> , 26, 3883-3901	3.5	2
505	Post-Disaster Temporary Shelters Distribution after a Large-Scale Disaster: An Integrated Model. <i>Buildings</i> , <b>2022</b> , 12, 414	3.2	2
504	A new fuzzy tri-objective model for a home health care problem with green ambulance routing and congestion under uncertainty. <i>Expert Systems With Applications</i> , <b>2022</b> , 117093	7.8	0
503	Sustainable negotiation-based nesting and scheduling in additive manufacturing systems: A case study and multi-objective meta-heuristic algorithms. <i>Engineering Applications of Artificial Intelligence</i> , <b>2022</b> , 112, 104836	7.2	1
502	Solving a parallel-line capacitated lot-sizing and scheduling problem with sequence-dependent setup time/cost and preventive maintenance by a rolling horizon method. <i>Computers and Industrial Engineering</i> , <b>2022</b> , 168, 108041	6.4	1
501	Sustainable High-Tech Brick Production with Energy-Oriented Consumption: An Integrated Possibilistic Approach Based on Criteria Interdependencies. <i>Sustainability</i> , <b>2022</b> , 14, 202	3.6	0
500	A multi-objective optimization framework for a sustainable closed-loop supply chain network in the olive industry: Hybrid meta-heuristic algorithms. <i>Expert Systems With Applications</i> , <b>2022</b> , 117566	7.8	2
499	An intelligent algorithm to evaluate and improve the performance of a home healthcare center considering trust indicators. <i>Computers in Biology and Medicine</i> , <b>2022</b> , 146, 105656	7	1
498	Scheduling Piecewise Linear Deteriorating Jobs to Minimize Makespan in a Two-Machine Flowshop. <i>SN Operations Research Forum</i> , <b>2021</b> , 2, 1	0.5	
497	An integrated approach for evaluating and improving the performance of surgical theaters with resilience engineering. <i>Computers in Biology and Medicine</i> , <b>2021</b> , 141, 105148	7	2
496	Two hybrid meta-heuristic algorithms for a dual-channel closed-loop supply chain network design problem in the tire industry under uncertainty. <i>Advanced Engineering Informatics</i> , <b>2021</b> , 50, 101418	7.4	29

495	Robust Modeling of Acceptance Control Chart to Specify Best Design Parameters. <i>Studies in Fuzziness and Soft Computing</i> , <b>2021</b> , 321-332	0.7	
494	Developing a green and bipolar fuzzy inventory-routing model in agri-food reverse logistics with postharvest behavior. <i>Environmental Science and Pollution Research</i> , <b>2021</b> , 28, 41071-41088	5.1	3
493	An integrated quality, maintenance and production model based on the delayed monitoring under the ARMA control chart. <i>Journal of Statistical Computation and Simulation</i> , <b>2021</b> , 91, 2645-2669	0.9	7
492	Prioritizing the effective strategies for construction and demolition waste management using fuzzy IDOCRIW and WASPAS methods. <i>Engineering, Construction and Architectural Management</i> , <b>2021</b> , ahead-of-print,	3.1	6
491	A simulation-optimization algorithm for return strategies in emergency medical systems. <i>Simulation</i> , <b>2021</b> , 97, 565-588	1.2	3
490	Bi-objective build-to-order supply chain network design under uncertainty and time-dependent demand: An automobile case study. <i>Computers and Industrial Engineering</i> , <b>2021</b> , 154, 107126	6.4	5
489	Solving a new robust reverse job shop scheduling problem by meta-heuristic algorithms. <i>Engineering Applications of Artificial Intelligence</i> , <b>2021</b> , 101, 104207	7.2	4
488	An optimization model for evacuating people with disability in extreme disaster conditions: A case study. <i>Scientia Iranica</i> , <b>2021</b> , 0-0	1.5	2
487	Sustainable Facility relocation in agriculture systems using the GIS and best/worst method. <i>Kybernetes</i> , <b>2021</b> , ahead-of-print,	2	1
486	Integration of Facility Location and Hypercube Queuing Models in Emergency Medical Systems. <i>Journal of Systems Science and Systems Engineering</i> , <b>2021</b> , 30, 495	1.2	2
485	A multi-functional tri-objective mathematical model for the pharmaceutical supply chain considering congestion of drugs in factories. <i>Research in Transportation Economics</i> , <b>2021</b> , 101094	2.4	
484	Bi-level programming for home health care supply chain considering outsourcing. <i>Journal of Industrial Information Integration</i> , <b>2021</b> , 100246	7	17
483	A routing and scheduling problem for cross-docking networks with perishable products, heterogeneous vehicles and split delivery. <i>Computers and Industrial Engineering</i> , <b>2021</b> , 157, 107299	6.4	4
482	Competitive green supply chain network design model considering inventory decisions under uncertainty: a real case of a filter company. <i>International Journal of Production Research</i> , <b>2021</b> , 59, 4248-4267	7.8	15
481	A hybrid Z-number data envelopment analysis and neural network for assessment of supply chain resilience: a case study. <i>Central European Journal of Operations Research</i> , <b>2021</b> , 29, 611-631	2.2	12
480	Determining the price and refund of products in a supply chain with quality and advertising costs in a fuzzy environment. <i>Soft Computing</i> , <b>2021</b> , 25, 2351-2370	3.5	5
479	A green multi-facilities open location-routing problem with planar facility locations and uncertain customer. <i>Journal of Cleaner Production</i> , <b>2021</b> , 282, 124343	10.3	5
478	A mathematical model to design dynamic cellular manufacturing systems in multiple plants with production planning and location allocation decisions. <i>Soft Computing</i> , <b>2021</b> , 25, 3931-3954	3.5	5

477	Incorporating order acceptance, pricing and equity considerations in the scheduling of cloud manufacturing systems: matheuristic methods. <i>International Journal of Production Research</i> , <b>2021</b> , 59, 2009-2027	7.8	12
476	Layout optimization of injection process by considering integrated resilience engineering: a fuzzy-DEA approach. <i>International Journal of Modelling and Simulation</i> , <b>2021</b> , 41, 52-66	1.5	3
475	A new bi-objective model of the urban public transportation hub network design under uncertainty. <i>Annals of Operations Research</i> , <b>2021</b> , 296, 131-162	3.2	9
474	Sustainable Facility Location-Routing Problem for Blood Package Delivery by Drones with a Charging Station. <i>IFIP Advances in Information and Communication Technology</i> , <b>2021</b> , 3-14	0.5	
473	Home Healthcare Routing and Scheduling Problem During the COVID-19 Pandemic. <i>IFIP Advances in Information and Communication Technology</i> , <b>2021</b> , 373-382	0.5	0
472	Scheduling of Parallel 3D-Printing Machines with Incompatible Job Families: A Matheuristic Algorithm. <i>IFIP Advances in Information and Communication Technology</i> , <b>2021</b> , 51-61	0.5	2
471	An integrated approach based on artificial intelligence and novel meta-heuristic algorithms to predict demand for dairy products: a case study. <i>Network: Computation in Neural Systems</i> , <b>2021</b> , 32, 1-35	0.7	28
470	Integration of parts scheduling, MRP, production planning and generalized fixed-charge transportation planning in the design of a dynamic cellular manufacturing system. <i>RAIRO - Operations Research</i> , <b>2021</b> , 55, S1875-S1912	2.2	1
469	Designing a sustainable closed-loop pharmaceutical supply chain in a competitive market considering demand uncertainty, manufacturer's brand and waste management. <i>Annals of Operations Research</i> , <b>2021</b> , 1-32	3.2	21
468	A hybrid of clustering and meta-heuristic algorithms to solve a p-mobile hub location-allocation problem with the depreciation cost of hub facilities. <i>Engineering Applications of Artificial Intelligence</i> , <b>2021</b> , 98, 104121	7.2	10
467	A new technology acceptance model: a mixed-method of grounded theory and system dynamics. <i>Kybernetes</i> , <b>2021</b> , ahead-of-print,	2	1
466	A combinatorial auction-based approach for ridesharing in a student transportation system. <i>Networks</i> , <b>2021</b> , 78, 229-247	1.6	
465	Hybridization of an interactive fuzzy methodology with a lexicographic min-max approach for optimizing a multi-period multi-product multi-echelon sustainable closed-loop supply chain network. <i>Computers and Industrial Engineering</i> , <b>2021</b> , 158, 107282	6.4	1
464	Post-disaster reconstruction supply chain: Empirical optimization study. <i>Automation in Construction</i> , <b>2021</b> , 129, 103811	9.6	4
463	Sustainable vehicle routing problem for coordinated solid waste management. <i>Journal of Industrial Information Integration</i> , <b>2021</b> , 23, 100220	7	24
462	A two-stage multi-objective second generation biodiesel supply chain design considering social sustainability: A case study. <i>Energy</i> , <b>2021</b> , 233, 121020	7.9	6
461	Designing a sustainable resilient disaster waste management system under hybrid uncertainty: A case study. <i>Engineering Applications of Artificial Intelligence</i> , <b>2021</b> , 106, 104459	7.2	6
460	A robust home health care routing-scheduling problem with temporal dependencies under uncertainty. <i>Expert Systems With Applications</i> , <b>2021</b> , 182, 115209	7.8	6

459	Integrated Workforce Allocation and Scheduling in a Reconfigurable Manufacturing System Considering Cloud Manufacturing. <i>IFIP Advances in Information and Communication Technology</i> , <b>2021</b> , 535-543	0.5	
458	Two calibrated meta-heuristics to solve an integrated scheduling problem of production and air transportation with the interval due date. <i>Soft Computing</i> , <b>2020</b> , 24, 16383-16411	3.5	2
457	Pricing and market segmentation in an uncertain supply chain. <i>Sadhana - Academy Proceedings in Engineering Sciences</i> , <b>2020</b> , 45, 1	1	4
456	Educational demographics: a system dynamics model for human resource management. <i>International Journal of Systems Assurance Engineering and Management</i> , <b>2020</b> , 11, 662-676	1.3	3
455	Air and ground ambulance location-allocation-routing problem for designing a temporary emergency management system after a disaster. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , <b>2020</b> , 234, 812-828	1.7	10
454	Scheduling of human-robot collaboration in assembly of printed circuit boards: a constraint programming approach. <i>International Journal of Computer Integrated Manufacturing</i> , <b>2020</b> , 33, 460-473	4.3	12
453	Red deer algorithm (RDA): a new nature-inspired meta-heuristic. <i>Soft Computing</i> , <b>2020</b> , 24, 14637-14665	3.5	120
452	A new weighted distance-based approximation methodology for flow shop scheduling group decisions under the interval-valued fuzzy processing time. <i>Applied Soft Computing Journal</i> , <b>2020</b> , 91, 106248	7.5	11
451	New integration of preventive maintenance and production planning with cell formation and group scheduling for dynamic cellular manufacturing systems. <i>Journal of Manufacturing Systems</i> , <b>2020</b> , 56, 341-358	9.1	16
450	Design of an integrated model for diagnosis and classification of pediatric acute leukemia using machine learning. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , <b>2020</b> , 234, 1051-1069	1.7	12
449	Achieving sustainable development of supply chain by incorporating various carbon regulatory mechanisms. <i>Transportation Research, Part D: Transport and Environment</i> , <b>2020</b> , 81, 102253	6.4	15
448	Solving a Discounted Closed-Loop Supply Chain Network Design Problem by Recent Metaheuristics. <i>Advances in Intelligent Systems and Computing</i> , <b>2020</b> , 3-24	0.4	1
447	A New Application of Coordination Contracts for Supplier Selection in a Cloud Environment. <i>IFIP Advances in Information and Communication Technology</i> , <b>2020</b> , 197-205	0.5	3
446	A hybrid intelligent algorithm for a fuzzy multi-objective job shop scheduling problem with reentrant workflows and parallel machines. <i>Journal of Intelligent and Fuzzy Systems</i> , <b>2020</b> , 39, 7769-7785	1.6	4
445	Fuzzy Goal Programming Based on a Taylor Series for a Pharmaceutical Supply Chain with a Marketing Mix Strategy and Product Life Cycle. <i>Ecoproduction</i> , <b>2020</b> , 395-406	0.5	
444	<b>2020</b> ,		2
443	Lagrangian Dual Decomposition for Two-Echelon Reliable Facility Location Problems with Facility Disruptions. <i>Ecoproduction</i> , <b>2020</b> , 363-379	0.5	
442	An Improvement in Master Surgical Scheduling Using Artificial Neural Network and Fuzzy Programming Approach. <i>IFIP Advances in Information and Communication Technology</i> , <b>2020</b> , 254-262	0.5	2

441	A Bi-objective Scheduling Model for Additive Manufacturing with Multiple Materials and Sequence-Dependent Setup Time. <i>IFIP Advances in Information and Communication Technology</i> , <b>2020</b> , 451-459	0.5	4
440	Dynamic Distributed Job-Shop Scheduling Problem Consisting of Reconfigurable Machine Tools. <i>IFIP Advances in Information and Communication Technology</i> , <b>2020</b> , 460-468	0.5	2
439	Flexible job shop scheduling problem with reconfigurable machine tools: An improved differential evolution algorithm. <i>Applied Soft Computing Journal</i> , <b>2020</b> , 94, 106416	7.5	25
438	Reliable blood supply chain network design with facility disruption: A real-world application. <i>Engineering Applications of Artificial Intelligence</i> , <b>2020</b> , 90, 103493	7.2	39
437	A bi-objective transportation-location arc routing problem. <i>Transportation Letters</i> , <b>2020</b> , 12, 623-637	2.1	8
436	A bi-level and robust optimization-based framework for a hazardous waste management problem: A real-world application. <i>Journal of Cleaner Production</i> , <b>2020</b> , 252, 119830	10.3	26
435	Production scheduling of open-pit mines using genetic algorithm: a case study. <i>International Journal of Management Science and Engineering Management</i> , <b>2020</b> , 15, 176-183	2.8	9
434	A multi-objective model for a nurse scheduling problem by emphasizing human factors. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , <b>2020</b> , 234, 179-199	1.7	17
433	A new bi-objective vehicle routing-scheduling problem with cross-docking: Mathematical model and algorithms. <i>Computers and Industrial Engineering</i> , <b>2020</b> , 149, 106832	6.4	14
432	A novel FMEA model based on fuzzy multiple-criteria decision-making methods for risk assessment. <i>Journal of Enterprise Information Management</i> , <b>2020</b> , 33, 881-904	4.4	13
431	A multi-modal competitive hub location pricing problem with customer loyalty and elastic demand. <i>Computers and Operations Research</i> , <b>2020</b> , 123, 105048	4.6	12
430	In-port multi-ship routing and scheduling problem with draft limits. <i>Maritime Policy and Management</i> , <b>2020</b> , 1-22	2.5	4
429	A bi-objective Optimization Model for a Dynamic Cell Formation Integrated with Machine and Cell Layouts in a Fuzzy Environment. <i>Fuzzy Information and Engineering</i> , <b>2020</b> , 1-19	0.5	9
428	A robust location-arc routing problem under uncertainty: mathematical model with lower and upper bounds. <i>Computational and Applied Mathematics</i> , <b>2020</b> , 39, 1	2.4	4
427	Simultaneous waterway scheduling, berth allocation, and quay crane assignment: A novel matheuristic approach. <i>International Journal of Production Research</i> , <b>2020</b> , 1-18	7.8	4
426	A robust bi-objective location-routing model for providing emergency medical services. <i>Journal of Humanitarian Logistics and Supply Chain Management</i> , <b>2020</b> , 10, 285-319	2.4	7
425	A decision support model for robust allocation and routing of search and rescue resources after earthquake: a case study. <i>Operational Research</i> , <b>2020</b> , 1	1.6	8
424	Mixed-integer linear programming model for tree-like pipeline scheduling problem with intermediate due dates on demands. <i>Operational Research</i> , <b>2020</b> , 20, 399-425	1.6	5

4 <sup>23</sup>	Bi-objective inventory routing problem with backhauls under transportation risks: two meta-heuristics. <i>Transportation Letters</i> , <b>2020</b> , 12, 113-129	2.1	4
4 <sup>22</sup>	Designing a model for service facility protection with a time horizon based on tri-level programming. <i>Engineering Optimization</i> , <b>2020</b> , 52, 90-105	2	2
4 <sup>21</sup>	New definition of the cross entropy based on the Dempster-Shafer theory and its application in a decision-making process. <i>Communications in Statistics - Theory and Methods</i> , <b>2020</b> , 49, 909-923	0.5	11
4 <sup>20</sup>	Location Optimization of Gas Power Plants by a Z-Number Data Envelopment Analysis. <i>Advances in Intelligent Systems and Computing</i> , <b>2020</b> , 926-936	0.4	1
4 <sup>19</sup>	Multiobjective fuzzy mathematical model for a financially constrained closed-loop supply chain with labor employment. <i>Computational Intelligence</i> , <b>2020</b> , 36, 4-34	2.5	36
4 <sup>18</sup>	Agile two-stage lot-sizing and scheduling problem with reliability, customer satisfaction and behaviour under uncertainty: a hybrid metaheuristic algorithm. <i>Engineering Optimization</i> , <b>2020</b> , 52, 1323 <sup>2</sup> 1343 <sup>3</sup>		3
4 <sup>17</sup>	Optimization of imperfect economic manufacturing models with a power demand rate dependent production rate. <i>Sadhana - Academy Proceedings in Engineering Sciences</i> , <b>2019</b> , 44, 1	1	6
4 <sup>16</sup>	A new robust-possibilistic reliable hub protection model with elastic demands and backup hubs under risk. <i>Engineering Applications of Artificial Intelligence</i> , <b>2019</b> , 86, 68-82	7.2	10
4 <sup>15</sup>	Hybrid artificial intelligence and robust optimization for a multi-objective product portfolio problem Case study: The dairy products industry. <i>Computers and Industrial Engineering</i> , <b>2019</b> , 137, 106090 <sup>4</sup>	6.4	42
4 <sup>14</sup>	Reliable single-allocation hub location problem with disruptions. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , <b>2019</b> , 123, 90-120	9	37
4 <sup>13</sup>	Supply chain network design considering sustainable development paradigm: A case study in cable industry. <i>Journal of Cleaner Production</i> , <b>2019</b> , 234, 366-380	10.3	24
4 <sup>12</sup>	A robust approach for a green periodic competitive VRP under uncertainty: DE and PSO algorithms. <i>Journal of Intelligent and Fuzzy Systems</i> , <b>2019</b> , 36, 5213-5225	1.6	7
4 <sup>11</sup>	A Lagrangean decomposition approach for a novel two-echelon node-based location-routing problem in an offshore oil and gas supply chain. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , <b>2019</b> , 128, 96-114	9	16
4 <sup>10</sup>	Multi-objective mathematical modeling for sustainable supply chain management in the paper industry. <i>Computers and Industrial Engineering</i> , <b>2019</b> , 135, 1092-1102	6.4	33
4 <sup>09</sup>	A Robust Optimization Model for Joint Maintenance and Build-To-Order Supply Chain Under Uncertainties: A Case Study <b>2019</b> ,		1
4 <sup>08</sup>	A two-stage approach to agile pharmaceutical supply chain management with product substitutability in crises. <i>Computers and Chemical Engineering</i> , <b>2019</b> , 127, 200-217	4	21
4 <sup>07</sup>	A multi-objective model for the closed-loop supply chain network design with a price-dependent demand, shortage and disruption. <i>Journal of Intelligent and Fuzzy Systems</i> , <b>2019</b> , 36, 5261-5272	1.6	6
4 <sup>06</sup>	Pricing decisions in a multiechelon supply chain under a bundling strategy. <i>International Transactions in Operational Research</i> , <b>2019</b> , 26, 2096-2128	2.9	8

405	Forward and reverse flows pricing decisions for two competing supply chains with common collection centers in an intuitionistic fuzzy environment. <i>Soft Computing</i> , <b>2019</b> , 23, 7865-7888	3.5	6
404	A new comprehensive possibilistic group decision approach for resilient supplier selection with mean-variance-skewness-kurtosis and asymmetric information under interval-valued fuzzy uncertainty. <i>Neural Computing and Applications</i> , <b>2019</b> , 31, 6959-6979	4.8	9
403	Prioritizing disaster-prone areas for large-scale earthquakes' preparedness: Methodology and application. <i>Socio-Economic Planning Sciences</i> , <b>2019</b> , 67, 9-25	3.7	12
402	An interval-valued fuzzy statistical group decision making approach with new evaluating indices for sustainable supplier selection problem. <i>Journal of Intelligent and Fuzzy Systems</i> , <b>2019</b> , 36, 1855-1866	1.6	11
401	Extending the solid step fixed-charge transportation problem to consider two-stage networks and multi-item shipments. <i>Computers and Industrial Engineering</i> , <b>2019</b> , 137, 106008	6.4	15
400	Evolutionary algorithms for multi-objective dual-resource constrained flexible job-shop scheduling problem. <i>Opsearch</i> , <b>2019</b> , 56, 983-1006	1.6	18
399	A Markov decision process for modeling adverse drug reactions in medication treatment of type 2 diabetes. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , <b>2019</b> , 233, 793-811	1.7	4
398	A multi-product pricing and inventory model with production rate proportional to power demand rate. <i>Advances in Production Engineering and Management</i> , <b>2019</b> , 14, 112-124	2.5	5
397	Application of robust optimization for a product portfolio problem using an invasive weed optimization algorithm. <i>Numerical Algebra, Control and Optimization</i> , <b>2019</b> , 9, 187-209	1.7	31
396	Optimizing Number and Locations of Alternative-Fuel Stations Using a Multi-Criteria Approach. <i>Engineering, Technology &amp; Applied Science Research</i> , <b>2019</b> , 9, 3715-3720	1	4
395	Location-Pricing Problem in the Closed-Loop Supply Chain Network Design Under Uncertainty. <i>Studies in Computational Intelligence</i> , <b>2019</b> , 360-371	0.8	
394	Energy-Aware Permutation Flow Shop Scheduling Problem Considering the Inventory, Tardiness and Energy Costs <b>2019</b> ,		1
393	Integrated Waterway Scheduling, Berth Allocation and Quay Crane Assignment Problem by Using a Hybrid Flow Shop Concept <b>2019</b> ,		2
392	A Self-Learning Particle Swarm Optimization for Robust Multi-Echelon Capacitated Location-Allocation-Inventory Problem. <i>Journal of Advanced Manufacturing Systems</i> , <b>2019</b> , 18, 677-694	1.8	25
391	Prioritizing Surgical Cancellation Factors Based on a Fuzzy Best-Worst Method: A Case Study. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 112-117	0.7	3
390	Home Health Care Routing and Scheduling Problem Considering Temporal Dependencies and Perishability with Simultaneous Pickup and Delivery. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 118-123	0.7	10
389	A Bi-Level Bi-Objective Mathematical Model for Stop Location in a School Bus Routing Problem. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 1120-1125	0.7	4
388	Simulation-based optimization approach with scenario-based product sequence in a reconfigurable manufacturing system (RMS): A case study. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 2638-2643	0.7	11

387	A New Sustainable Location-Routing Problem with Simultaneous Pickup and Delivery by Two-Compartment Vehicles for a Perishable Product Considering Circular Economy. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 790-795	0.7	4
386	A Tailored Fuzzy Simulation Integrated with a Fuzzy DEA Method for a Resilient Facility Layout Problem: A Case Study of a Refrigerator Injection Process. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 541-546	0.7	2
385	An integrated production inventory routing problem for multi perishable products with fuzzy demands and time windows. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 523-528	0.7	7
384	A Multi-Objective Scheduling Model for a Cloud Manufacturing System with Pricing, Equity, and Order Rejection. <i>IFAC-PapersOnLine</i> , <b>2019</b> , 52, 2177-2182	0.7	8

120	An integrated approach for risk-assessment analysis in a manufacturing process using FMEA and DES <b>2011</b> ,		4
119	Solving a bi-objective flowshop scheduling problem by a Multi-objective Immune System and comparing with SPEA2+ and SPGA. <i>Advances in Engineering Software</i> , <b>2011</b> , 42, 772-779	3.6	11
118	Solving a multi-objective job shop scheduling problem with sequence-dependent setup times by a Pareto archive PSO combined with genetic operators and VNS. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2011</b> , 53, 733-750	3.2	30

117	A hybrid algorithm based on particle swarm optimization and simulated annealing for a periodic job shop scheduling problem. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2011</b> , 54, 309-322	3.2	34
116	A novel two-stage genetic algorithm for a mixed-model U-line balancing problem with duplicated tasks. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2011</b> , 55, 1111-1122	3.2	34
115	A replenishment policy based on joint optimization in a downstream pharmaceutical supply chain: centralized vs. decentralized replenishment. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2011</b> , 57, 367-378	3.2	35
114	An integrated Data Envelopment AnalysisArtificial Neural NetworkRough Set Algorithm for assessment of personnel efficiency. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 1364-1373	7.8	48
113	Two novel FMCDM methods for alternative-fuel buses selection. <i>Applied Mathematical Modelling</i> , <b>2011</b> , 35, 1396-1412	4.5	49
112	A hybridization of simulated annealing and electromagnetism-like mechanism for a periodic job shop scheduling problem. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 5895-5901	7.8	25
111	A new hybrid multi-objective Pareto archive PSO algorithm for a bi-objective job shop scheduling problem. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 10812-10821	7.8	72
110	Group decision making based on novel fuzzy modified TOPSIS method. <i>Applied Mathematical Modelling</i> , <b>2011</b> , 35, 4257-4269	4.5	128
109	Solving a multi-objective open shop scheduling problem by a novel hybrid ant colony optimization. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 2817-2822	7.8	31
108	The use of multi-criteria data envelopment analysis (MCDEA) for location allocation problems in a fuzzy environment. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 5687-5695	7.8	31
107	Risk assessment for highway projects using jackknife technique. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 5514-5524	7.8	30
106	Solving a capacitated fixed-charge transportation problem by artificial immune and genetic algorithms with a Preference number representation. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 10462-10474	7.8	63
105	The use of a genetic algorithm for clustering the weighing station performance in transportation A case study. <i>Expert Systems With Applications</i> , <b>2011</b> , 38, 11744-11750	7.8	6
104	A hybrid approach based on the genetic algorithm and neural network to design an incremental cellular manufacturing system. <i>Applied Soft Computing Journal</i> , <b>2011</b> , 11, 4195-4202	7.5	26
103	A new mathematical model for a competitive vehicle routing problem with time windows solved by simulated annealing. <i>Journal of Manufacturing Systems</i> , <b>2011</b> , 30, 83-92	9.1	39
102	Genetic and hybrid shuffled frog leaping algorithms for solving a 2-stage model for a hub covering location network <b>2011</b> ,		1
101	Solving a multi-criteria group scheduling problem for a cellular manufacturing system by scatter search. <i>Journal of the Chinese Institute of Industrial Engineers</i> , <b>2011</b> , 28, 192-205		10
100	Imperialistic Competitive Algorithm for Solving a Dynamic Cell Formation Problem with Production Planning. <i>Lecture Notes in Computer Science</i> , <b>2010</b> , 266-276	0.9	5

99	The use of a fuzzy multi-objective linear programming for solving a multi-objective single-machine scheduling problem. <i>Applied Soft Computing Journal</i> , <b>2010</b> , 10, 919-925	7.5	25
98	Multi-objective Particle Swarm Optimization for Sequencing and Scheduling a Cellular Manufacturing System. <i>Communications in Computer and Information Science</i> , <b>2010</b> , 69-75	0.3	1
97	A New Hybrid Multi-objective Pareto Archive PSO Algorithm for a Classic Job Shop Scheduling Problem with Ready Times. <i>Communications in Computer and Information Science</i> , <b>2010</b> , 61-68	0.3	1
96	A genetic algorithm-based grouping method for a cell formation problem with the efficacy measure. <i>International Journal of Industrial and Systems Engineering</i> , <b>2010</b> , 6, 340	0.4	5
95	Two meta-heuristics for three-stage assembly flowshop scheduling with sequence-dependent setup times. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2010</b> , 50, 1153-1164	3.2	40
94	Solving a multi periodic stochastic model of the railbar fleet sizing by two-stage optimization formulation. <i>Applied Mathematical Modelling</i> , <b>2010</b> , 34, 1164-1174	4.5	37
93	Addressing a nonlinear fixed-charge transportation problem using a spanning tree-based genetic algorithm. <i>Computers and Industrial Engineering</i> , <b>2010</b> , 59, 259-271	6.4	51
92	Solving a single-machine scheduling problem with maintenance, job deterioration and learning effect by simulated annealing. <i>Journal of Manufacturing Systems</i> , <b>2010</b> , 29, 1-9	9.1	36
91	A new integrated mathematical model for a bi-objective multi-depot location-routing problem solved by a multi-objective scatter search algorithm. <i>Journal of Manufacturing Systems</i> , <b>2010</b> , 29, 111-119	9.1	35
90	Solving multi-objective optimization formulation for fleet planning in a railway industry. <i>Annals of Operations Research</i> , <b>2010</b> , 181, 185-197	3.2	13
89	Electromagnetism-like mechanism and simulated annealing algorithms for flowshop scheduling problems minimizing the total weighted tardiness and makespan. <i>Knowledge-Based Systems</i> , <b>2010</b> , 23, 77-85	7.3	84
88	Design of a scatter search method for a novel multi-criteria group scheduling problem in a cellular manufacturing system. <i>Expert Systems With Applications</i> , <b>2010</b> , 37, 2661-2669	7.8	58
87	A fuzzy multi-objective tabu-search method for a new bi-objective open shop scheduling problem <b>2009</b> ,		4
86	<b>2009</b> ,		3
85	A series-parallel redundant reliability system for cellular manufacturing design. <i>Proceedings of the Institution of Mechanical Engineers, Part O: Journal of Risk and Reliability</i> , <b>2009</b> , 223, 233-250	0.8	4
84	A hybridization of simulated annealing and electromagnetic-like mechanism for job shop problems with machine availability and sequence-dependent setup times to minimize total weighted tardiness. <i>Soft Computing</i> , <b>2009</b> , 13, 995-1006	3.5	42
83	A comprehensive decision making structure for partitioning of make-to-order, make-to-stock and hybrid products. <i>Soft Computing</i> , <b>2009</b> , 13, 1035-1054	3.5	22
82	An extension of the relaxation algorithm for solving a special case of capacitated arc routing problems. <i>Journal of Combinatorial Optimization</i> , <b>2009</b> , 17, 214-234	0.9	2

81	A novel hybrid approach combining electromagnetism-like method with Solis and Wets local search for continuous optimization problems. <i>Journal of Global Optimization</i> , <b>2009</b> , 44, 227-234	1.5	25
80	Integrated multi-period cell formation and subcontracting production planning in dynamic cellular manufacturing systems. <i>International Journal of Production Economics</i> , <b>2009</b> , 120, 301-314	9.3	83
79	Dynamic lot sizing problem with continuous-time Markovian production cost. <i>International Journal of Production Economics</i> , <b>2009</b> , 120, 607-612	9.3	9
78	A fuzzy-mixed-integer goal programming model for a parallel-machine scheduling problem with sequence-dependent setup times and release dates. <i>Robotics and Computer-Integrated Manufacturing</i> , <b>2009</b> , 25, 853-859	9.2	46
77	An efficient algorithm for solving a new mathematical model for a quay crane scheduling problem in container ports. <i>Computers and Industrial Engineering</i> , <b>2009</b> , 56, 241-248	6.4	81
76	A hybrid artificial immune algorithm for a realistic variant of job shops to minimize the total completion time. <i>Computers and Industrial Engineering</i> , <b>2009</b> , 56, 1494-1501	6.4	33
75	Design of a genetic algorithm for bi-objective unrelated parallel machines scheduling with sequence-dependent setup times and precedence constraints. <i>Computers and Operations Research</i> , <b>2009</b> , 36, 3224-3230	4.6	61
74	Application of genetic algorithm to computer-aided process planning in preliminary and detailed planning. <i>Engineering Applications of Artificial Intelligence</i> , <b>2009</b> , 22, 1179-1187	7.2	59
73	Designing a fuzzy system for controlling the armament fire in dynamic siege. <i>Expert Systems With Applications</i> , <b>2009</b> , 36, 11691-11698	7.8	2
72	A simulated annealing method for solving a new mathematical model of a multi-criteria cell formation problem with capital constraints. <i>Advances in Engineering Software</i> , <b>2009</b> , 40, 268-273	3.6	15
71	Solving a multi-objective multi-depot stochastic location-routing problem by a hybrid simulated annealing algorithm. <i>Proceedings of the Institution of Mechanical Engineers, Part B: Journal of Engineering Manufacture</i> , <b>2009</b> , 223, 1045-1054	2.4	19
70	A fuzzy random Vehicle Routing Problem: The case of Iran <b>2009</b> ,		8
69	SOLVING A SINGLE MACHINE SCHEDULING PROBLEM BY A DISCRETE VERSION OF ELECTROMAGNETISM-LIKE METHOD. <i>Journal of Circuits, Systems and Computers</i> , <b>2009</b> , 18, 1597-1608	0.9	3
68	A memetic algorithm for the flexible flow line scheduling problem with processor blocking. <i>Computers and Operations Research</i> , <b>2009</b> , 36, 402-414	4.6	55
67	An extended fuzzy parametric programming-based approach for designing cellular manufacturing systems under uncertainty and dynamic conditions. <i>International Journal of Computer Integrated Manufacturing</i> , <b>2009</b> , 22, 538-548	4.3	19
66	A New Mathematical Model for Fuzzy Flexible Flow Shop Scheduling of Unrelated Parallel Machines Maximizing the Weighted Satisfaction Level. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , <b>2009</b> , 42, 798-803		3
65	A New Branch-and-Bound Algorithm for the Unrelated Parallel Machine Scheduling Problem with Sequence-Dependent Setup Times. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , <b>2009</b> , 42, 792-797		4
64	<b>2008</b> ,		4

63	A Discrete Binary Version of the Electromagnetism-Like Heuristic for Solving Traveling Salesman Problem. <i>Lecture Notes in Computer Science</i> , <b>2008</b> , 123-130	0.9	9
62	Solving an Open Shop Scheduling Problem by a Novel Hybrid Multi-Objective Ant Colony Optimization <b>2008</b> ,		3
61	A new mathematical model for a distribution network problem in a multi-product supply chain system: a real-case study. <i>International Journal of Manufacturing Technology and Management</i> , <b>2008</b> , 15, 1	0.4	4
60	A new solution for a dynamic cell formation problem with alternative routing and machine costs using simulated annealing. <i>Journal of the Operational Research Society</i> , <b>2008</b> , 59, 443-454	2	24
59	A simple and effective heuristic for periodic vehicle routing problem <b>2008</b> ,		2
58	A multi-objective scatter search for a bi-criteria no-wait flow shop scheduling problem. <i>Engineering Optimization</i> , <b>2008</b> , 40, 331-346	2	34
57	Minimization of weighted tardiness and makespan in an open shop environment by a novel hybrid multi-objective meta-heuristic method <b>2008</b> ,		2
56	A genetic algorithm and memetic algorithm to sequencing and scheduling of cellular manufacturing systems. <i>International Journal of Management Science and Engineering Management</i> , <b>2008</b> , 3, 119-130	2.8	20
55	Accessing feasible space in a generalized job shop scheduling problem with the fuzzy processing times: a fuzzy-neural approach. <i>Journal of the Operational Research Society</i> , <b>2008</b> , 59, 431-442	2	17
54	Make-to-order or make-to-stock decision by a novel hybrid approach. <i>Advanced Engineering Informatics</i> , <b>2008</b> , 22, 186-201	7.4	33
53	Solving a multi-objective no-wait flow shop scheduling problem with an immune algorithm. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2008</b> , 36, 969-981	3.2	36
52	Partitioning machines in tandem AGV systems based on Balanced flow strategy by simulated annealing. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2008</b> , 38, 355-366	3.2	12
51	Reliability optimization of series-parallel systems with a choice of redundancy strategies using a genetic algorithm. <i>Reliability Engineering and System Safety</i> , <b>2008</b> , 93, 550-556	6.3	199
50	A fuzzy programming approach for a cell formation problem with dynamic and uncertain conditions. <i>Fuzzy Sets and Systems</i> , <b>2008</b> , 159, 215-236	3.7	45
49	A new decision-making structure for the order entry stage in make-to-order environments. <i>International Journal of Production Economics</i> , <b>2008</b> , 111, 351-367	9.3	37
48	A Comparison of Three Meta-heuristics for a Closed-Loop Layout Problem with Unequal-Sized Facilities. <i>Studies in Computational Intelligence</i> , <b>2008</b> , 265-278	0.8	1
47	Solving a new mathematical model of a closed-loop layout problem with unequal-sized facilities by a genetic algorithm <b>2007</b> ,		2
46	A hybrid fuzzy clustering PSO algorithm for a clustering supplier problem <b>2007</b> ,		10

45	Solving a Bi-Criteria Permutation Flow Shop Problem Using Immune Algorithm <b>2007</b> ,		8
44	A hybrid multi-objective immune algorithm for a flow shop scheduling problem with bi-objectives: Weighted mean completion time and weighted mean tardiness. <i>Information Sciences</i> , <b>2007</b> , 177, 5072-5090	7.7	101
43	Design of a facility layout problem in cellular manufacturing systems with stochastic demands. <i>Applied Mathematics and Computation</i> , <b>2007</b> , 184, 721-728	2.7	96
42	A New Capacitated Vehicle Routing Problem with Split Service for Minimizing Fleet Cost by Simulated Annealing. <i>Journal of the Franklin Institute</i> , <b>2007</b> , 344, 406-425	4	57
41	Multi-objective time/cost trade-off in dynamic PERT networks using an interactive approach. <i>European Journal of Operational Research</i> , <b>2007</b> , 180, 1186-1200	5.6	28
40	A multi-objective scatter search for a mixed-model assembly line sequencing problem. <i>Advanced Engineering Informatics</i> , <b>2007</b> , 21, 85-99	7.4	68
39	A fuzzy aggregate production planning model for make-to-stock environments <b>2007</b> ,		9
38	A discrete-time approximation technique for the time-cost trade-off in PERT networks. <i>RAIRO - Operations Research</i> , <b>2007</b> , 41, 61-81	2.2	2
37	FINITE HORIZON ELSP IN FLEXIBLE FLOW LINES WITH UNRELATED PARALLEL MACHINES. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , <b>2006</b> , 39, 139-144		
36	SCHEDULING OF FLEXIBLE FLOW LINES WITH BLOCKING BY MEMETIC ALGORITHMS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , <b>2006</b> , 39, 21-26		1
35	A GENERALIZED CELL FORMATION PROBLEM IN DYNAMIC ENVIRONMENT WITH DIFFERENT INTER and INTRA-CELL BATCH SIZES. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , <b>2006</b> , 39, 401-406		1
34	A branch-and-bound algorithm for a single machine sequencing to minimize the sum of maximum earliness and tardiness with idle insert. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 174, 388-408	2.7	15
33	A hybrid simulated annealing for capacitated vehicle routing problems with the independent route length. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 176, 445-454	2.7	77
32	A multi-objective resource allocation problem in dynamic PERT networks. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 181, 163-174	2.7	20
31	An economic production lot size model with deteriorating items, stock-dependent demand, inflation, and partial backlogging. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 181, 380-389	2.7	44
30	A memetic algorithm for a vehicle routing problem with backhauls. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 181, 1049-1060	2.7	50
29	Multi-criteria sequencing problem for a mixed-model assembly line in a JIT production system. <i>Applied Mathematics and Computation</i> , <b>2006</b> , 181, 1471-1481	2.7	49
28	Solving a Dynamic Cell Formation Problem with Machine Cost and Alternative Process Plan by Memetic Algorithms. <i>Lecture Notes in Computer Science</i> , <b>2005</b> , 213-227	0.9	16

27	Allocation of parts to cells, minimising tardiness and idle time by simulated annealing. <i>International Journal of Manufacturing Technology and Management</i> , <b>2005</b> , 7, 581	0.4	1
26	Optimal scheduling for a single machine to minimize the sum of maximum earliness and tardiness considering idle insert. <i>Applied Mathematics and Computation</i> , <b>2005</b> , 167, 1430-1450	2.7	26
25	A hybrid method for solving stochastic job shop scheduling problems. <i>Applied Mathematics and Computation</i> , <b>2005</b> , 170, 185-206	2.7	64
24	Solving a dynamic cell formation problem using metaheuristics. <i>Applied Mathematics and Computation</i> , <b>2005</b> , 170, 761-780	2.7	90
23	A computer simulation model for job shop scheduling problems minimizing makespan. <i>Computers and Industrial Engineering</i> , <b>2005</b> , 48, 811-823	6.4	33
