#	Article	IF	CITATIONS
1	Is salivary alpha-amylase an indicator of autonomic nervous system dysregulations in mental disorders?—A review of preliminary findings and the interactions with cortisol. Psychoneuroendocrinology, 2013, 38, 729-743.	2.7	153
2	HPA axis regulation in posttraumatic stress disorder: A meta-analysis focusing on potential moderators. Neuroscience and Biobehavioral Reviews, 2019, 100, 35-57.	6.1	73
3	Menstrual cycle-related fluctuations in oxytocin concentrations: A systematic review and meta-analysis. Frontiers in Neuroendocrinology, 2019, 52, 144-155.	5.2	66
4	The endogenous oxytocin system in depressive disorders: A systematic review and meta-analysis. Psychoneuroendocrinology, 2019, 101, 138-149.	2.7	34
5	Who is stressed? A pilot study of salivary cortisol and alpha-amylase concentrations in agoraphobic patients and their novice therapists undergoing in vivo exposure. Psychoneuroendocrinology, 2014, 49, 280-289.	2.7	30
6	Demographic, sampling- and assay-related confounders of endogenous oxytocin concentrations: A systematic review and meta-analysis. Frontiers in Neuroendocrinology, 2019, 54, 100775.	5.2	27
7	Psychotherapeutic treatment and HPA axis regulation in posttraumatic stress disorder: A systematic review and meta-analysis. Psychoneuroendocrinology, 2018, 98, 186-201.	2.7	26
8	Effect of combined cognitive-behavioural therapy and endurance training on cortisol and salivary alpha-amylase in panic disorder. Journal of Psychiatric Research, 2014, 58, 12-19.	3.1	25
9	Long-term outcomes of psychological treatment for posttraumatic stress disorder: a systematic review and meta-analysis. Psychological Medicine, 2021, 51, 1420-1430.	4.5	24
10	Cortisol and alpha-amylase assessment in psychotherapeutic intervention studies: A systematic review. Neuroscience and Biobehavioral Reviews, 2018, 95, 235-262.	6.1	22
11	Trauma exposure, posttraumatic stress disorder and oxytocin: A meta-analytic investigation of endogenous concentrations and receptor genotype. Neuroscience and Biobehavioral Reviews, 2019, 107, 560-601.	6.1	18
12	Genes and hormones of the hypothalamic–pituitary–adrenal axis in post-traumatic stress disorder. What is their role in symptom expression and treatment response?. Journal of Neural Transmission, 2021, 128, 1279-1286.	2.8	18
13	Fingernail cortisol – State of research and future directions. Frontiers in Neuroendocrinology, 2020, 58, 100855.	5.2	17
14	Therapists' and patients' stress responses during graduated versus flooding in vivo exposure in the treatment of specific phobia: A preliminary observational study. Psychiatry Research, 2015, 230, 668-675.	3.3	16
15	Dissemination of exposure in the treatment of anxiety disorders and postâ€ŧraumatic stress disorder among German cognitive behavioural therapists. Clinical Psychology and Psychotherapy, 2018, 25, 856-864.	2.7	12
16	Clinical and neurobiological effects of aerobic exercise in dental phobia: A randomized controlled trial. Depression and Anxiety, 2017, 34, 1040-1048.	4.1	8
17	Associations Between Difficulties in Emotion Regulation and Post-Traumatic Stress Disorder in Deployed Service Members of the German Armed Forces. Frontiers in Psychiatry, 2020, 11, 576553.	2.6	8
18	Evaluation of an internet-based intervention for service members of the German armed forces with deployment-related posttraumatic stress symptoms. BMC Psychiatry, 2020, 20, 205.	2.6	8

#	Article	IF	CITATIONS
19	Salivary Cortisol and Alphaâ€Amylase in Posttraumatic Stress Disorder and Their Potential Role in the Evaluation of Cognitive Behavioral Treatment Outcomes. Journal of Traumatic Stress, 2022, 35, 78-89.	1.8	8
20	The Cortisol Assessment List (CoAL) A tool to systematically document and evaluate cortisol assessment in blood, urine and saliva. Comprehensive Psychoneuroendocrinology, 2022, 9, 100108.	1.7	8
21	Patterns of Recovery From Early Posttraumatic Stress Symptoms After a Preventive Intervention With Oxytocin: Hormonal Contraception Use Is a Prognostic Factor. Biological Psychiatry, 2019, 85, e71-e73.	1.3	6
22	Early posttraumatic autonomic and endocrine markers to predict posttraumatic stress symptoms after a preventive intervention with oxytocin. H¶gre Utbildning, 2020, 11, 1761622.	3.0	5
23	Associations between oxytocin and vasopressin concentrations, traumatic event exposure and posttraumatic stress disorder symptoms: group comparisons, correlations, and courses during an internet-based cognitive-behavioural treatment. HA¶gre Utbildning, 2021, 12, 1886499.	3.0	5
24	Trauma-related but not PTSD-related increases in hair cortisol concentrations in military personnel. Journal of Psychiatric Research, 2022, 150, 17-20.	3.1	5
25	HPA axis activity across the menstrual cycle - a systematic review and meta-analysis of longitudinal studies. Frontiers in Neuroendocrinology, 2022, 66, 100998.	5.2	5
26	Biological markers in clinical psychological research - A systematic framework applied to HPA axis regulation in PTSD. Comprehensive Psychoneuroendocrinology, 2022, 11, 100148.	1.7	4
27	The German Adaptation of the Therapist Beliefs about Exposure Scale: a Validation Study among Licensed Cognitive Behavioural Therapists in Germany. Behavioural and Cognitive Psychotherapy, 2019, 47, 164-180.	1.2	3
28	Long-term Outcomes of Psychological Treatment for Posttraumatic Stress Disorder: A Systematic Review and Meta-Analysis - Corrigendum. Psychological Medicine, 2021, , 1-1.	4.5	1
29	Attentional bias in German Armed Forces veterans with and without posttraumatic stress symptoms – An eye-tracking investigation and group comparison. Journal of Behavior Therapy and Experimental Psychiatry, 2022, 76, 101726	1.2	0
