#	ARTICLE	IF	CITATIONS
1	Alternative experimental methods for machine tool dynamics identification: A review. Mechanical Systems and Signal Processing, 2022, 170, 108837.	4.4	23
2	High-speed machining of additively manufactured Inconel 718 using hybrid cryogenic cooling methods. Virtual and Physical Prototyping, 2022, 17, 419-436.	5.3	10
3	Chatter stability of thin-walled part machining using special end mills. CIRP Annals - Manufacturing Technology, 2022, 71, 365-368.	1.7	10
4	Mechanical interfaces in machine tools. CIRP Annals - Manufacturing Technology, 2022, 71, 647-670.	1.7	7
5	Experimental evaluation of eco-friendly hybrid cooling methods in slot milling of titanium alloy. Journal of Cleaner Production, 2021, 289, 125817.	4.6	48
6	A 3D analytical thermal model in grinding considering a periodic heat source under dry and wet conditions. Journal of Materials Processing Technology, 2021, 295, 117158.	3.1	19
7	On the prediction of surface burn and its thickness in grinding processes. CIRP Annals - Manufacturing Technology, 2021, 70, 285-288.	1.7	20
8	Dynamics and chatter stability of crest-cut end mills. International Journal of Machine Tools and Manufacture, 2021, 171, 103813.	6.2	22
9	An analytical grinding force model based on individual grit interaction. Journal of Materials Processing Technology, 2020, 283, 116700.	3.1	49
10	A Hybrid Contact Implementation Framework for Finite Element Analysis and Topology Optimization of Machine Tools. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2020, 142, .	1.3	6
11	Chatter Stability of Machining Operations. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2020, 142, .	1.3	65
12	Broaching tool design through force modelling and process simulation. CIRP Annals - Manufacturing Technology, 2020, 69, 53-56.	1.7	11
13	Investigating effects of serration geometry on milling forces and chatter stability for their optimal selection. International Journal of Machine Tools and Manufacture, 2019, 144, 103425.	6.2	31
14	Identification of active number of grits and its effects on mechanics and dynamics of abrasive processes. Journal of Materials Processing Technology, 2019, 273, 116239.	3.1	45
15	Effects of turn-milling conditions on chip formation and surface finish. CIRP Annals - Manufacturing Technology, 2019, 68, 113-116.	1.7	9
16	Suppressing vibration modes of spindle-holder-tool assembly through FRF modification for enhanced chatter stability. CIRP Annals - Manufacturing Technology, 2018, 67, 397-400.	1.7	19
17	Investigation of temperature distribution in orthogonal cutting through dual-zone contact model on the rake face. International Journal of Advanced Manufacturing Technology, 2018, 96, 81-89.	1.5	15
18	Destabilizing effect of low frequency modes on process damped stability of multi-mode milling systems. Mechanical Systems and Signal Processing, 2018, 111, 423-441.	4.4	26

#	ARTICLE	IF	CITATIONS
19	Investigation of machinability in turning of difficult-to-cut materials using a new cryogenic cooling approach. Tribology International, 2018, 119, 510-520.	3.0	109
20	Determination of minimum uncut chip thickness under various machining conditions during micro-milling of Ti-6Al-4V. International Journal of Advanced Manufacturing Technology, 2018, 95, 1617-1634.	1.5	41
21	Investigating High Productivity Conditions for Turn-Milling in Comparison to Conventional Turning. Procedia CIRP, 2018, 77, 259-262.	1.0	7
22	Grinding Temperature Modeling Based on a Time Dependent Heat Source. Procedia CIRP, 2018, 77, 299-302.	1.0	15
23	Machining Process Improvement Through Process Twins. Lecture Notes in Mechanical Engineering, 2018, , 164-179.	0.3	0
24	Investigating effects of milling conditions on cutting temperatures through analytical and experimental methods. Journal of Materials Processing Technology, 2018, 262, 532-540.	3.1	27
25	Chatter reduction in boring process by using piezoelectric shunt damping with experimental verification. Mechanical Systems and Signal Processing, 2017, 94, 312-321.	4.4	44
26	Design of Serrated End Mills for Improved Productivity. Procedia CIRP, 2017, 58, 493-498.	1.0	28
27	The Effect of Linear Guide Representation for Topology Optimization of a Five-axis Milling Machine. Procedia CIRP, 2017, 58, 487-492.	1.0	9
28	Modeling dynamics and stability of variable pitch and helix milling tools for development of a design method to maximize chatter stability. Precision Engineering, 2017, 47, 459-468.	1.8	85
29	Multi-dimensional chatter stability for enhanced productivity in different parallel turning strategies. International Journal of Machine Tools and Manufacture, 2017, 123, 116-128.	6.2	27
30	Mechanical and Thermal Modeling of Orthogonal Turn-milling Operation. Procedia CIRP, 2017, 58, 287-292.	1.0	20
31	Process simulation integrated tool axis selection for 5-axis tool path generation. CIRP Annals - Manufacturing Technology, 2016, 65, 381-384.	1.7	24
32	Thermo-mechanical modeling of the third deformation zone in machining for prediction of cutting forces. CIRP Annals - Manufacturing Technology, 2016, 65, 121-124.	1.7	31
33	Chatter suppression techniques in metal cutting. CIRP Annals - Manufacturing Technology, 2016, 65, 785-808.	1.7	474
34	Generalized model for dynamics and stability of multi-axis milling with complex tool geometries. Journal of Materials Processing Technology, 2016, 238, 446-458.	3.1	38
35	An experimental investigation of oblique cutting mechanics. Machining Science and Technology, 2016, 20, 495-521.	1.4	10
36	Modeling and Measurement of Cutting Temperatures in Milling. Procedia CIRP, 2016, 46, 173-176.	1.0	53

#	ARTICLE	IF	CITATIONS
37	Modeling and Measurement of Micro End Mill Dynamics using Inverse Stability Approach. Procedia CIRP, 2016, 46, 242-245.	1.0	13
38	Improving Performance of Turn-milling by Controlling Forces and Thermally Induced Tool-center Point (TCP) Displacement. Procedia CIRP, 2016, 40, 481-485.	1.0	3
39	Machining strategy development and parameter selection in 5-axis milling based on process simulations. International Journal of Advanced Manufacturing Technology, 2016, 85, 1483-1500.	1.5	17
40	Effects of tool axis offset in turn-milling process. Journal of Materials Processing Technology, 2016, 231, 239-247.	3.1	26
41	Tuning of tool dynamics for increased stability of parallel (simultaneous) turning processes. Journal of Sound and Vibration, 2016, 360, 17-30.	2.1	27
42	Increasing tool life in machining of difficult-to-cut materials using nonconventional turning processes. International Journal of Advanced Manufacturing Technology, 2015, 77, 1993-2004.	1.5	34
43	Analytical modeling of turn-milling process geometry, kinematics and mechanics. International Journal of Machine Tools and Manufacture, 2015, 91, 24-33.	6.2	53
44	Surface roughness and thermo-mechanical force modeling for grinding operations with regular and circumferentially grooved wheels. Journal of Materials Processing Technology, 2015, 223, 75-90.	3.1	43
45	Optimization of Turn-milling Processes. Procedia CIRP, 2015, 33, 476-483.	1.0	15
46	Identification of bearing dynamics under operational conditions for chatter stability prediction in high speed machining operations. Precision Engineering, 2015, 42, 53-65.	1.8	30
47	Appreciation of 2014 reviewers. International Journal of Advanced Manufacturing Technology, 2015, 80, 1-2.	1.5	22
48	In-process tool point FRF identification under operational conditions using inverse stability solution. International Journal of Machine Tools and Manufacture, 2015, 89, 64-73.	6.2	83
49	Chatter Reduction in Turning by Using Piezoelectric Shunt Circuits. Conference Proceedings of the Society for Experimental Mechanics, 2014, , 415-420.	0.3	2
50	Analytical modeling of asymmetric multi-segment rotor bearing systems with Timoshenko beam model including gyroscopic moments. Computers and Structures, 2014, 144, 119-126.	2.4	42
51	Virtual process systems for part machining operations. CIRP Annals - Manufacturing Technology, 2014, 63, 585-605.	1.7	247
52	Semi-analytical Force Model for Grinding Operations. Procedia CIRP, 2014, 14, 7-12.	1.0	20
53	Investigating Eccentricity Effects in Turn-milling Operations. Procedia CIRP, 2014, 14, 176-181.	1.0	12
54	Stability and high performance machining conditions in simultaneous milling. CIRP Annals - Manufacturing Technology, 2013, 62, 403-406.	1.7	37

#	ARTICLE	IF	CITATIONS
55	Modeling and Experimental Investigation of Edge Hone and Flank Contact Effects in Metal Cutting. <i>Procedia CIRP</i> , 2013, 8, 194-199.	1.0	8
56	Optimization of Serrated End Mills for Reduced Cutting Energy and Higher Stability. <i>Procedia CIRP</i> , 2013, 8, 570-575.	1.0	29
57	Machining of Difficult-to-Cut-Alloys Using Rotary Turning Tools. <i>Procedia CIRP</i> , 2013, 8, 81-87.	1.0	34
58	Identification and Modeling of Process Damping in Milling. <i>Journal of Manufacturing Science and Engineering, Transactions of the ASME</i> , 2013, 135, .	1.3	43
59	Process Modeling of Turn-Milling Using Analytical Approach. <i>Procedia CIRP</i> , 2012, 4, 131-139.	1.0	16
60	Prediction of workpiece dynamics and its effects on chatter stability in milling. <i>CIRP Annals - Manufacturing Technology</i> , 2012, 61, 339-342.	1.7	158
61	Effect of cutting conditions and tool geometry on process damping in machining. <i>International Journal of Machine Tools and Manufacture</i> , 2012, 57, 10-19.	6.2	73
62	Analytical methods for increased productivity in 5-axis ball-end milling. <i>International Journal of Mechatronics and Manufacturing Systems</i> , 2011, 4, 238.	0.1	5
63	Dynamics and stability of parallel turning operations. <i>CIRP Annals - Manufacturing Technology</i> , 2011, 60, 383-386.	1.7	50
64	An Experimental Study on Dynamics and Stability of Miniature End Mills. <i>Advanced Materials Research</i> , 2011, 223, 869-878.	0.3	3
65	Identifying parameters of a broaching design using non-linear optimisation. <i>International Journal of Modelling, Identification and Control</i> , 2011, 12, 244.	0.2	13
66	Analysis and compensation of mass loading effect of accelerometers on tool point FRF measurements for chatter stability predictions. <i>International Journal of Machine Tools and Manufacture</i> , 2010, 50, 585-589.	6.2	48
67	Identification and modeling of process damping in turning and milling using a new approach. <i>CIRP Annals - Manufacturing Technology</i> , 2010, 59, 403-408.	1.7	110
68	Dynamics and Stability of Five-Axis Ball-End Milling. <i>Journal of Manufacturing Science and Engineering, Transactions of the ASME</i> , 2010, 132, .	1.3	59
69	TWO-ZONE ANALYTICAL CONTACT MODEL APPLIED TO ORTHOGONAL CUTTING. <i>Machining Science and Technology</i> , 2010, 14, 323-343.	1.4	35
70	Analytical Prediction of Part Dynamics for Machining Stability Analysis. <i>International Journal of Automation Technology</i> , 2010, 4, 259-267.	0.5	41
71	A New Method for Identification and Modeling of Process Damping in Machining. <i>Journal of Manufacturing Science and Engineering, Transactions of the ASME</i> , 2009, 131, .	1.3	68
72	Modeling and simulation of 5-axis milling processes. <i>CIRP Annals - Manufacturing Technology</i> , 2009, 58, 347-350.	1.7	123

#	ARTICLE	IF	CITATIONS
73	Extraction of 5-axis milling conditions from CAM data for process simulation. International Journal of Advanced Manufacturing Technology, 2009, 43, 538-550.	1.5	54
74	A closed-form approach for identification of dynamical contact parameters in spindle-“holder”-tool assemblies. International Journal of Machine Tools and Manufacture, 2009, 49, 25-35.	6.2	74
75	Analytical and experimental investigation of rake contact and friction behavior in metal cutting. International Journal of Machine Tools and Manufacture, 2009, 49, 865-875.	6.2	123
76	Investigation of lead and tilt angle effects in 5-axis ball-end milling processes. International Journal of Machine Tools and Manufacture, 2009, 49, 1053-1062.	6.2	137
77	An experimental investigation of chatter effects on tool life. Proceedings of the Institution of Mechanical Engineers, Part B: Journal of Engineering Manufacture, 2009, 223, 1455-1463.	1.5	64
78	Dynamic Analysis and Control. Springer Series in Advanced Manufacturing, 2009, , 21-84.	0.2	2
79	High Speed Machining of AISI 1050 Steel: Modelling and Experimental. International Journal of Material Forming, 2008, 1, 1439-1441.	0.9	7
80	Development of a thermomechanical cutting process model for machining process simulations. CIRP Annals - Manufacturing Technology, 2008, 57, 97-100.	1.7	65
81	Analytical Modeling of Chatter Stability in Turning and Boring Operations-“Part I: Model Development. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2007, 129, 726-732.	1.3	34
82	Analytical Modeling of Chatter Stability in Turning and Boring Operations-“Part II: Experimental Verification. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2007, 129, 733-739.	1.3	39
83	Microstrip Patch Antenna for RFID Applications. , 2007, , .		8
84	Design of an RFID-based Manufacturing Monitoring and Analysis System. , 2007, , .		11
85	Analytical Modeling of Chatter Stability in Turning and Boring Operations: A Multi-Dimensional Approach. CIRP Annals - Manufacturing Technology, 2007, 56, 401-404.	1.7	71
86	Effect analysis of bearing and interface dynamics on tool point FRF for chatter stability in machine tools by using a new analytical model for spindle-“tool assemblies. International Journal of Machine Tools and Manufacture, 2007, 47, 23-32.	6.2	70
87	Selection of design and operational parameters in spindle-“holder”-tool assemblies for maximum chatter stability by using a new analytical model. International Journal of Machine Tools and Manufacture, 2007, 47, 1401-1409.	6.2	53
88	Comparison of one-dimensional and multi-dimensional models in stability analysis of turning operations. International Journal of Machine Tools and Manufacture, 2007, 47, 1875-1883.	6.2	20
89	Development of a machine tool selection system using AHP. International Journal of Advanced Manufacturing Technology, 2007, 35, 363-376.	1.5	61
90	Analytical models for high performance milling. Part I: Cutting forces, structural deformations and tolerance integrity. International Journal of Machine Tools and Manufacture, 2006, 46, 1478-1488.	6.2	202

#	ARTICLE	IF	CITATIONS
91	Analytical models for high performance milling. Part II: Process dynamics and stability. International Journal of Machine Tools and Manufacture, 2006, 46, 1489-1499.	6.2	68
92	Analytical modeling of spindle-tool dynamics on machine tools using Timoshenko beam model and receptance coupling for the prediction of tool point FRF. International Journal of Machine Tools and Manufacture, 2006, 46, 1901-1912.	6.2	187
93	A Modeling Approach for Analysis and Improvement of Spindle-Holder-Tool Assembly Dynamics. CIRP Annals - Manufacturing Technology, 2006, 55, 369-372.	1.7	50
94	Maximizing Chatter Free Material Removal Rate in Milling through Optimal Selection of Axial and Radial Depth of Cut Pairs. CIRP Annals - Manufacturing Technology, 2005, 54, 353-356.	1.7	83
95	MAXIMIZATION OF CHATTER-FREE MATERIAL REMOVAL RATE IN END MILLING USING ANALYTICAL METHODS. Machining Science and Technology, 2005, 9, 147-167.	1.4	30
96	A decision support system for machine tool selection. Journal of Manufacturing Technology Management, 2004, 15, 101-109.	3.3	75
97	Structural modeling of end mills for form error and stability analysis. International Journal of Machine Tools and Manufacture, 2004, 44, 1151-1161.	6.2	123
98	Improving Cycle Time in Sculptured Surface Machining Through Force Modeling. CIRP Annals - Manufacturing Technology, 2004, 53, 103-106.	1.7	30
99	An Analytical Design Method for Milling Cutters With Nonconstant Pitch to Increase Stability, Part I: Theory. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2003, 125, 29-34.	1.3	156
100	An Analytical Design Method for Milling Cutters With Nonconstant Pitch to Increase Stability, Part 2: Application. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2003, 125, 35-38.	1.3	95
101	Development of Analytical Endmill Deflection and Dynamics Models. , 2003, , 85.		5
102	Modeling of Broaching Process for Improved Tool Design. , 2003, , 291.		10
103	Cutting Load Capacity of End Mills with Complex Geometry. CIRP Annals - Manufacturing Technology, 2001, 50, 65-68.	1.7	11
104	Sources of nonlinearities, chatter generation and suppression in metal cutting. Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences, 2001, 359, 663-693.	1.6	215
105	Improving Productivity and Part Quality in Milling of Titanium Based Impellers by Chatter Suppression and Force Control. CIRP Annals - Manufacturing Technology, 2000, 49, 31-36.	1.7	81
106	Analytical Stability Prediction and Design of Variable Pitch Cutters. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 1999, 121, 173-178.	1.3	228
107	Analytical Prediction of Stability Lobes in Ball End Milling. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 1999, 121, 586-592.	1.3	113
108	Analytical Prediction of Chatter Stability in Milling-Part I: General Formulation. Journal of Dynamic Systems, Measurement and Control, Transactions of the ASME, 1998, 120, 22-30.	0.9	536

#	ARTICLE	IF	CITATIONS
109	Analytical Prediction of Chatter Stability in Millingâ€™Part II: Application of the General Formulation to Common Milling Systems. Journal of Dynamic Systems, Measurement and Control, Transactions of the ASME, 1998, 120, 31-36.	0.9	230
110	Prediction of Milling Force Coefficients From Orthogonal Cutting Data. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 1996, 118, 216-224.	1.3	575
111	Modeling and avoidance of static form errors in peripheral milling of plates. International Journal of Machine Tools and Manufacture, 1995, 35, 459-476.	6.2	212
112	Analytical Prediction of Stability Lobes in Milling. CIRP Annals - Manufacturing Technology, 1995, 44, 357-362.	1.7	1,474
113	Peripheral milling conditions for improved dimensional accuracy. International Journal of Machine Tools and Manufacture, 1994, 34, 907-918.	6.2	110
114	Iterative receptance method for determining harmonic response of structures with symmetrical non-linearities. Mechanical Systems and Signal Processing, 1993, 7, 75-87.	4.4	37
115	Dynamic Peripheral Milling of Flexible Structures. Journal of Engineering for Industry, 1992, 114, 137-145.	0.8	70
116	Increasing Productivity in 5-Axis Milling of IBR's Using Force Modeling and Control. , 0, , .		0
117	Investigating Dynamics of Machine Tool Spindles under Operational Conditions. Advanced Materials Research, 0, 223, 610-621.	0.3	26
