

Shuwei Li

List of Publications by Citations

Source: <https://exaly.com/author-pdf/5758830/shuwei-li-publications-by-citations.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
32	LncRNA MT1JP functions as a ceRNA in regulating FBXW7 through competitively binding to miR-92a-3p in gastric cancer. <i>Molecular Cancer</i> , 2018 , 17, 87	42.1	166
31	Association of genetic variants in lncRNA H19 with risk of colorectal cancer in a Chinese population. <i>Oncotarget</i> , 2016 , 7, 25470-7	3.3	68
30	Genetic variants in m6A modification genes are associated with colorectal cancer risk. <i>Carcinogenesis</i> , 2020 , 41, 8-17	4.6	30
29	Circadian clock pathway genes associated with colorectal cancer risk and prognosis. <i>Archives of Toxicology</i> , 2018 , 92, 2681-2689	5.8	24
28	Genome-wide long non-coding RNAs identified a panel of novel plasma biomarkers for gastric cancer diagnosis. <i>Gastric Cancer</i> , 2019 , 22, 731-741	7.6	19
27	Genetic variants in SLC22A3 contribute to the susceptibility to colorectal cancer. <i>International Journal of Cancer</i> , 2019 , 145, 154-163	7.5	15
26	Combinations of single nucleotide polymorphisms identified in genome-wide association studies determine risk for colorectal cancer. <i>International Journal of Cancer</i> , 2019 , 145, 2661-2669	7.5	12
25	Association study of genetic variants in estrogen metabolic pathway genes and colorectal cancer risk and survival. <i>Archives of Toxicology</i> , 2018 , 92, 1991-1999	5.8	12
24	Remote modulation of lncRNA by risk variant at 16p13 underlying genetic susceptibility to gastric cancer. <i>Science Advances</i> , 2020 , 6, eaay5525	14.3	10
23	Plasma Mesothelin as a Novel Diagnostic and Prognostic Biomarker in Colorectal Cancer. <i>Journal of Cancer</i> , 2017 , 8, 1355-1361	4.5	10
22	Evaluating the effect of multiple genetic risk score models on colorectal cancer risk prediction. <i>Gene</i> , 2018 , 673, 174-180	3.8	9
21	A genetic variant located in the miR-532-5p-binding site of TGFBR1 is associated with the colorectal cancer risk. <i>Journal of Gastroenterology</i> , 2019 , 54, 141-148	6.9	9
20	Genetic variants in RPA1 associated with the response to oxaliplatin-based chemotherapy in colorectal cancer. <i>Journal of Gastroenterology</i> , 2019 , 54, 939-949	6.9	8
19	Systematic evaluation of the effects of genetic variants on PIWI-interacting RNA expression across 33 cancer types. <i>Nucleic Acids Research</i> , 2021 , 49, 90-97	20.1	8
18	Sex hormones and genetic variants in hormone metabolic pathways associated with the risk of colorectal cancer. <i>Environment International</i> , 2020 , 137, 105543	12.9	7
17	Association study between genetic variants in retinol metabolism pathway genes and prostate cancer risk. <i>Cancer Medicine</i> , 2020 , 9, 9462-9470	4.8	7
16	Genetic variant in miR-21 binding sites is associated with colorectal cancer risk. <i>Journal of Cellular and Molecular Medicine</i> , 2019 , 23, 2012-2019	5.6	6

15	Exosomal circLPA1 functions in colorectal cancer diagnosis and tumorigenesis through suppressing BRD4 via METTL3-eIF3h interaction.. <i>Molecular Cancer</i> , 2022 , 21, 49	42.1	6
14	Evaluation of GWAS-Identified Genetic Variants for Gastric Cancer Survival. <i>EBioMedicine</i> , 2018 , 33, 82-88	8.8	5
13	Novel CpG-SNPs in the gastric acid secretion pathway GNAI3 and susceptibility to gastric cancer. <i>Gene</i> , 2020 , 736, 144447	3.8	3
12	The biogenesis and biological function of PIWI-interacting RNA in cancer. <i>Journal of Hematology and Oncology</i> , 2021 , 14, 93	22.4	3
11	Genetic variants in Ras/Raf/MEK/ERK pathway are associated with gastric cancer risk in Chinese Han population. <i>Archives of Toxicology</i> , 2020 , 94, 2683-2690	5.8	2
10	A transcriptomic study for identifying cardia- and non-cardia-specific gastric cancer prognostic factors using genetic algorithm-based methods. <i>Journal of Cellular and Molecular Medicine</i> , 2020 , 24, 9457-9465	5.6	2
9	Genetic variants in circTUBB interacting with smoking can enhance colorectal cancer risk. <i>Archives of Toxicology</i> , 2020 , 94, 325-333	5.8	2
8	Genetic variants in the cholesterol biosynthesis pathway genes and risk of prostate cancer. <i>Gene</i> , 2021 , 774, 145432	3.8	2
7	Genetic variants in Hippo signalling pathway-related genes affect the risk of colorectal cancer. <i>Archives of Toxicology</i> , 2021 , 95, 271-281	5.8	2
6	Association of genetic variants in autophagy-lysosome pathway genes with susceptibility and survival to prostate cancer. <i>Gene</i> , 2022 , 808, 145953	3.8	2
5	Functional genetic variant of HSD17B12 in the fatty acid biosynthesis pathway predicts the outcome of colorectal cancer. <i>Journal of Cellular and Molecular Medicine</i> , 2020 , 24, 14160-14170	5.6	1
4	LncRNA-422 suppresses the proliferation and growth of colorectal cancer cells by targeting SFPQ.. <i>Clinical and Translational Medicine</i> , 2022 , 12, e664	5.7	1
3	Evaluation of common genetic variants in vitamin E-related pathway genes and colorectal cancer susceptibility. <i>Archives of Toxicology</i> , 2021 , 95, 2523-2532	5.8	1
2	Genetic variations in the CTLA-4 immune checkpoint pathway are associated with colon cancer risk, prognosis, and immune infiltration via regulation of IQCB1 expression. <i>Archives of Toxicology</i> , 2021 , 95, 2053-2063	5.8	0
1	Genetic variants in the Folic acid Metabolic Pathway Genes predict outcomes of metastatic Colorectal Cancer patients receiving first-line Chemotherapy. <i>Journal of Cancer</i> , 2020 , 11, 6507-6515	4.5
