#	Article	IF	Citations
1	Mucosal-associated Invariant T-Cell Function Is Modulated by Programmed Death-1 Signaling in Patients with Active Tuberculosis. American Journal of Respiratory and Critical Care Medicine, 2014, 190, 329-339.	5.6	140
2	Mucosal-associated invariant T cells from patients with tuberculosis exhibit impaired immune response. Journal of Infection, 2016, 72, 338-352.	3.3	52
3	Enhanced immune response of MAIT cells in tuberculous pleural effusions depends on cytokine signaling. Scientific Reports, 2016, 6, 32320.	3.3	45
4	Association of mycobacterial antigen-specific CD4+ memory T cell subsets with outcome of pulmonary tuberculosis. Journal of Infection, 2010, 60, 133-139.	3.3	42
5	Elevated expression of Tim-3 on CD8 T cells correlates with disease severity of pulmonary tuberculosis. Journal of Infection, 2011, 62, 292-300.	3.3	40
6	Identification of CD244-expressing myeloid-derived suppressor cells in patients with active tuberculosis. Immunology Letters, 2014, 158, 66-72.	2.5	35
7	Involvement of CD244 in Regulating CD4+ T Cell Immunity in Patients with Active Tuberculosis. PLoS ONE, 2013, 8, e63261.	2.5	23
8	PDâ€1â€expressing MAIT cells from patients with tuberculosis exhibit elevated production of CXCL13. Scandinavian Journal of Immunology, 2020, 91, e12858.	2.7	22
9	A subset of CD1c+ dendritic cells is increased in patients with tuberculosis and promotes Th17â€¯cell polarization. Tuberculosis, 2018, 113, 189-199.	1.9	11
10	4-1BB expression on MAIT cells is associated with enhanced IFN-Î³ production and depends on IL-2. Cellular Immunology, 2018, 328, 58-69.	3.0	8
11	Elevated expression of T-bet in mycobacterial antigen-specific CD4+ T cells from patients with tuberculosis. Cellular Immunology, 2015, 298, 1-8.	3.0	5
12	Tim-3 expression is induced by mycobacterial antigens and identifies tissue-resident subsets of MAIT cells from patients with tuberculosis. Microbes and Infection, 2023, 25, 105021.	1.9	3
