## MartÃ-n R Salazar

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/5795363/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Masked hypertension and neonatal outcome in high-risk pregnancies. Journal of Human Hypertension, 2023, 37, 36-41.	2.2	6
2	Neurodevelopmental assessment of infants born to mothers with hypertensive disorder of pregnancy at six months of age. Journal of Developmental Origins of Health and Disease, 2022, 13, 197-203.	1.4	4
3	Timing of convalescent plasma administration and 28-day mortality in COVID-19 pneumonia. Journal of Investigative Medicine, 2022, 70, 1258-1264.	1.6	7
4	Risk factors for COVID-19 mortality: The effect of convalescent plasma administration. PLoS ONE, 2021, 16, e0250386.	2.5	12
5	May Measurement Month 2019: an analysis of blood pressure screening results from Argentina. European Heart Journal Supplements, 2021, 23, B12-B14.	0.1	1
6	Arterial Stiffness: Its Relation with Prediabetes and Metabolic Syndrome and Possible Pathogenesis. Journal of Clinical Medicine, 2021, 10, 3251.	2.4	11
7	Early adherence to antihypertensive drugs and longâ€ŧerm cardiovascular mortality in the "real world― Journal of Clinical Hypertension, 2021, 23, 1703-1705.	2.0	2
8	Nocturnal hypertension and risk of developing early-onset preeclampsia in high-risk pregnancies. Hypertension Research, 2021, 44, 1633-1640.	2.7	11
9	Is hypertension without any other comorbidities an independent predictor for COVIDâ€19 severity and mortality?. Journal of Clinical Hypertension, 2021, 23, 232-234.	2.0	7
10	Adherence to antihypertensive drug treatment in Argentina: A multicenter study. Journal of Clinical Hypertension, 2020, 22, 656-662.	2.0	7
11	Evaluation of ventricular-arterial coupling by impedance cardiography in healthy volunteers. Physiological Measurement, 2019, 40, 115002.	2.1	2
12	Hypertension control in Argentina, in the middle of a long road. Journal of Clinical Hypertension, 2019, 21, 1604-1606.	2.0	5
13	Office blood pressure values and the necessity of out-of-office measurements in high-risk pregnancies. Journal of Hypertension, 2019, 37, 1838-1844.	0.5	12
14	Nocturnal hypertension in high-risk mid-pregnancies predict the development of preeclampsia/eclampsia. Journal of Hypertension, 2019, 37, 182-186.	0.5	21
15	Could self-measured office blood pressure be a hypertension screening tool for limited-resources settings?. Journal of Human Hypertension, 2018, 32, 415-422.	2.2	2
16	Use of the Triglyceride/High-Density Lipoprotein Cholesterol Ratio to Identify Cardiometabolic Risk: Impact of Obesity?. Journal of Investigative Medicine, 2017, 65, 323-327.	1.6	15
17	Comparison of two surrogate estimates of insulin resistance to predict cardiovascular disease in apparently healthy individuals. Nutrition, Metabolism and Cardiovascular Diseases, 2017, 27, 366-373.	2.6	28
18	Significance of masked and nocturnal hypertension in normotensive women coursing a high-risk pregnancy. Journal of Hypertension, 2016, 34, 2248-2252.	0.5	42

MartÃn R Salazar

#	Article	IF	CITATIONS
19	Insulin resistance: The linchpin between prediabetes and cardiovascular disease. Diabetes and Vascular Disease Research, 2016, 13, 157-163.	2.0	20
20	The Reply. American Journal of Medicine, 2015, 128, e27.	1.5	0
21	Should the first blood pressure reading be discarded?. Journal of Human Hypertension, 2015, 29, 373-378.	2.2	8
22	Identification of Cardiometabolic Risk: Visceral Adiposity Index Versus Triglyceride/HDL Cholesterol Ratio. American Journal of Medicine, 2014, 127, 152-157.	1.5	62
23	Use of the plasma triglyceride/high-density lipoprotein cholesterol ratio to identify cardiovascular disease in hypertensive subjects. Journal of the American Society of Hypertension, 2014, 8, 724-731.	2.3	28
24	Do Differences in Waist Circumference Modify the Relationships Among Body Mass Index, Insulin Resistance, and Related Cardiometabolic Risk Factors in Apparently Healthy Women?. Journal of the American College of Nutrition, 2014, 33, 32-38.	1.8	4
25	Blood Pressure Response to a Community-Based Program and Long-term Cardiovascular Outcome. American Journal of Hypertension, 2014, 27, 1061-1068.	2.0	10
26	Identifying cardiovascular disease risk and outcome: use of the plasma triglyceride/highâ€density lipoprotein cholesterol concentration ratio versus metabolic syndrome criteria. Journal of Internal Medicine, 2013, 273, 595-601.	6.0	77
27	Comparison of the abilities of the plasma triglyceride/high-density lipoprotein cholesterol ratio and the metabolic syndrome to identify insulin resistance. Diabetes and Vascular Disease Research, 2013, 10, 346-352.	2.0	64
28	Optimal Uric Acid Threshold to Identify Insulin Resistance in Healthy Women. Metabolic Syndrome and Related Disorders, 2012, 10, 39-46.	1.3	1
29	Relation Among the Plasma Triglyceride/High-Density Lipoprotein Cholesterol Concentration Ratio, Insulin Resistance, and Associated Cardio-Metabolic Risk Factors in Men and Women. American Journal of Cardiology, 2012, 109, 1749-1753.	1.6	151
30	Relationships among insulin resistance, obesity, diagnosis of the metabolic syndrome and cardio-metabolic risk. Diabetes and Vascular Disease Research, 2011, 8, 109-116.	2.0	54
31	Glomerular filtration rate, cardiovascular risk factors and insulin resistance. Medicina, 2009, 69, 541-6.	0.6	3
32	Alanine-aminotransferase: an early marker for insulin resistance?. Medicina, 2007, 67, 125-30.	0.6	2
33	Decrease of blood pressure by community-based strategies. Medicina, 2005, 65, 507-12.	0.6	1
34	Ten-year blood pressure trends in nonhypertensive inhabitants of La Plata, Argentina. Canadian Journal of Cardiology, 1998, 14, 917-22.	1.7	1
