ΙΟΛΝ ΤΛΝΤΑΙΙ

#	Article	IF	CITATIONS
1	A new scenario for the Quaternary history of European beech populations: palaeobotanical evidence and genetic consequences. New Phytologist, 2006, 171, 199-221.	7.3	757
2	Late Glacial and Holocene vegetation history in the southern part of Transylvania (Romania): pollen analysis of two sequences from Avrig. Journal of Quaternary Science, 2006, 21, 49-61.	2.1	221
3	Climate variability and associated vegetation response throughout Central and Eastern Europe (CEE) between 60 and 8Âka. Quaternary Science Reviews, 2014, 106, 206-224.	3.0	188
4	The influence of refugial population on Lateglacial and early Holocene vegetational changes in Romania. Review of Palaeobotany and Palynology, 2007, 145, 305-320.	1.5	88
5	Last Millennium hydro-climate variability in Central–Eastern Europe (Northern Carpathians, Romania). Holocene, 2015, 25, 1179-1192.	1.7	65
6	Vegetation history in the Eastern Romanian Carpathians: pollen analysis of two sequences from the Moho? crater. Vegetation History and Archaeobotany, 2003, 12, 113-125.	2.1	64
7	Fire has been an important driver of forest dynamics in the Carpathian Mountains during the Holocene. Forest Ecology and Management, 2017, 389, 15-26.	3.2	64
8	Holocene variability in the range distribution and abundance of Pinus, Picea abies, and Quercus in Romania; implications for their current status. Quaternary Science Reviews, 2011, 30, 3060-3075.	3.0	58
9	Holocene vegetation history in the upper forest belt of the Eastern Romanian Carpathians. Palaeogeography, Palaeoclimatology, Palaeoecology, 2011, 309, 281-290.	2.3	55
10	Fire hazard modulation by long-term dynamics in land cover and dominant forest type in eastern and central Europe. Biogeosciences, 2020, 17, 1213-1230.	3.3	52
11	Elevational variation in regional vegetation responses to lateâ€glacial climate changes in the Carpathians. Journal of Biogeography, 2012, 39, 258-271.	3.0	51
12	Recent fire regime in the southern boreal forests of western Siberia is unprecedented in the last five millennia. Quaternary Science Reviews, 2020, 244, 106495.	3.0	46
13	Biodiversity variability across elevations in the Carpathians: Parallel change with landscape openness and land use. Holocene, 2013, 23, 869-881.	1.7	45
14	Vegetation sensitivity to climate changes and human impact in the Harghita Mountains (Eastern) Tj ETQq0 0 0	rgBT /Over 2.1	lock 10 Tf 50
15	Tree and timberline shifts in the northern Romanian Carpathians during the Holocene and the responses to environmental changes. Quaternary Science Reviews, 2016, 134, 100-113.	3.0	43
16	European pollen-based REVEALS land-cover reconstructions for the Holocene: methodology, mapping and potentials. Earth System Science Data, 2022, 14, 1581-1619.	9.9	42
17	Holocene vegetation history in Romanian Subcarpathians. Quaternary Research, 2009, 72, 164-173.	1.7	41

18	A 9000 year record of cyclic vegetation changes identified in a montane peatland deposit located in the Eastern Carpathians (Central-Eastern Europe): Autogenic succession or regional climatic influences?. Palaeogeography, Palaeoclimatology, Palaeoecology, 2016, 449, 52-61.	2.3	41

#	Article	IF	CITATIONS
19	Postâ€glacial patterns in vegetation dynamics in Romania: homogenization or differentiation?. Journal of Biogeography, 2010, 37, 2197-2208.	3.0	36
20	Carbon isotope composition as indicator for climatic changes during the middle and late Holocene in a peat bog from MaramureÅŸ Mountains (Romania). Holocene, 2014, 24, 15-23.	1.7	34
21	A Late Holocene environmental history of a bat guano deposit from Romania: an isotopic, pollen and microcharcoal study. Quaternary Science Reviews, 2015, 127, 141-154.	3.0	34
22	The Eurasian Modern Pollen Database (EMPD), version 2. Earth System Science Data, 2020, 12, 2423-2445.	9.9	34
23	Holocene vegetation history in the MaramureÅŸ Mountains (Northern Romanian Carpathians). Quaternary International, 2013, 293, 92-104.	1.5	33
24	How warm? How wet? Hydroclimate reconstruction of the past 7500 years in northern Carpathians, Romania. Palaeogeography, Palaeoclimatology, Palaeoecology, 2017, 482, 1-12.	2.3	33
25	High mountain region of the Northern Romanian Carpathians responded sensitively to Holocene climate and land use changes: A multi-proxy analysis. Holocene, 2014, 24, 944-956.	1.7	29
26	Pollenâ€derived biomes in the Eastern Mediterranean–Black Sea–Caspianâ€Corridor. Journal of Biogeography, 2018, 45, 484-499.	3.0	28
27	Palaeoenvironmental information from the palynology of an 800year old bat guano deposit from Măgurici Cave, NW Transylvania (Romania). Review of Palaeobotany and Palynology, 2012, 174, 57-66.	1.5	27
28	Hydrological conditions and carbon accumulation rates reconstructed from a mountain raised bog in the Carpathians: A multi-proxy approach. Catena, 2017, 152, 57-68.	5.0	27
29	Response of a spring-fed fen ecosystem in Central Eastern Europe (NW Romania) to climate changes during the last 4000†years: A high resolution multi-proxy reconstruction. Palaeogeography, Palaeoclimatology, Palaeoecology, 2018, 504, 170-185.	2.3	27
30	2000 years of variability in hydroclimate and carbon accumulation in western Siberia and the relationship with large-scale atmospheric circulation: A multi-proxy peat record. Quaternary Science Reviews, 2019, 226, 105948.	3.0	25
31	Lateglacial/Holocene transition to mid-Holocene: Vegetation responses to climate changes in the Apuseni Mountains (NW Romania). Quaternary International, 2015, 388, 76-86.	1.5	23
32	The transformation of the forest steppe in the lower Danube Plain of southeastern Europe: 6000Âyears of vegetation and land use dynamics. Biogeosciences, 2021, 18, 1081-1103.	3.3	19
33	Pollen, δ15N and δ13C guano-derived record of late Holocene vegetation and climate in the southern Carpathians, Romania. Review of Palaeobotany and Palynology, 2019, 265, 62-75.	1.5	17
34	Plant succession in a peatland in the Eastern Carpathian Mts. (CE Europe) during the last 10,200 years: Implications for peatland development and palaeoclimatic research. Review of Palaeobotany and Palynology, 2017, 244, 203-216.	1.5	16
35	A guanoâ€derived δ ¹³ C and δ ¹⁵ N record of climate since the Medieval Warm Period in northâ€west Romania. Journal of Quaternary Science, 2018, 33, 677-688.	2.1	15
36	Linking vegetation dynamics and stability in the old-growth forests of Central Eastern Europe: Implications for forest conservation and management. Biological Conservation, 2019, 229, 160-169.	4.1	15

Ioan Tantau

#	Article	IF	CITATIONS
37	Middle to Late Holocene vegetation shifts in the NW Transylvanian lowlands (Romania). Studia Universitatis Babes-Bolyai, Geologia, 2014, 59, 29-37.	1.0	15
38	Episodic build-up of alluvial fan deposits during the Weichselian Pleniglacial in the western Transylvanian Basin, Romania and their paleoenvironmental significance. Quaternary International, 2009, 198, 98-112.	1.5	14
39	16. Poiana Ruscă Mountains (Romania): Peşteana peat bog. Grana, 2012, 51, 249-251.	0.8	12
40	Relative pollen productivity estimates in the forest steppe landscape of southeastern Romania. Review of Palaeobotany and Palynology, 2019, 264, 54-63.	1.5	12
41	A multi-proxy analysis of hydroclimate trends in an ombrotrophic bog over the last millennium in the Eastern Carpathians of Romania. Palaeogeography, Palaeoclimatology, Palaeoecology, 2020, 538, 109390.	2.3	10
42	The role of climate-fuel feedbacks on Holocene biomass burning in upper-montane Carpathian forests. Global and Planetary Change, 2020, 193, 103264.	3.5	10
43	Holocene wildfire regimes in western Siberia: interaction between peatland moisture conditions and the composition of plant functional types. Climate of the Past, 2022, 18, 1255-1274.	3.4	10
44	Disentangling dust and sand deposition using a peat record in CE Europe (northern Romania): A multiproxy approach. Palaeogeography, Palaeoclimatology, Palaeoecology, 2019, 532, 109257.	2.3	9
45	The Evolution of Vegetation from the Last Glacial Maximum Until the Present. Springer Geography, 2017, , 67-83.	0.4	7
46	Late Holocene palaeohydrological changes in a Sphagnum peat bog from NW Romania based on testate amoebae. Studia Universitatis Babes-Bolyai, Geologia, 2016, 60, 21-28.	1.0	7
47	Multiproxy paleoenvironmental reconstruction of Early Pleistocene sites from the Olteţ River Valley of Romania. Palaeogeography, Palaeoclimatology, Palaeoecology, 2021, 574, 110445.	2.3	5
48	The Holocene dynamics of moss communities in subalpine wetland ecosystems in the Eastern Carpathian Mountains, Central Europe. Bryologist, 2020, 123, 84.	0.6	5
49	37. Doda Pilii, Apuseni Mountains (Romania). Grana, 2017, 56, 478-480.	0.8	2
50	Early to mid-Holocene hydroclimate trends in the western Carpathians of Romania. Palaeogeography, Palaeoclimatology, Palaeoecology, 2020, 543, 109608.	2.3	1
51	47. Mlaca TË~atarilor peat bog, Southern Transylvania (Romania). Grana, 2020, 59, 476-478.	0.8	0
52	CONSIDERATIONS ON THE AGE OF THE "GLIMEE―IN TRANSYLVANIA. Contributii Botanice, 2021, 55, 109-1	180.4	0
53	The history of Dacia's forests in the OrÄfÅŸtie Mts. region Contributii Botanice, 2019, 53, 67-78.	0.4	0
