| #  | ARTICLE                                                                                                                                                                                                                   | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Treatment of enterocutaneous fistula in Crohn's Disease with adipose-derived stem cells: a comparison of protocols with and without cell expansion. <i>International Journal of Colorectal Disease</i> , 2009, 24, 27-30. | 2.2 | 143       |
| 2  | Expanded Adipose-Derived Stem Cells for the Treatment of Complex Perianal Fistula. <i>Diseases of the Colon and Rectum</i> , 2009, 52, 79-86.                                                                             | 1.3 | 694       |
| 3  | An assessment of the incidence of fistula-in-ano in four countries of the European Union. <i>International Journal of Colorectal Disease</i> , 2007, 22, 1459-1462.                                                       | 2.2 | 190       |
| 4  | Distribution of HERV-LTR elements in HLA-DQB1 alleles: comments on the article by Bieda et al.. <i>Diabetologia</i> , 2003, 46, 869-870.                                                                                  | 6.3 | 1         |
| 5  | A poly(ADP-ribose) polymerase haplotype spanning the promoter region confers susceptibility to rheumatoid arthritis. <i>Arthritis and Rheumatism</i> , 2003, 48, 638-641.                                                 | 6.7 | 37        |
| 6  | Genetic polymorphisms in Spanish rheumatoid arthritis patients: an association and linkage study. <i>Genes and Immunity</i> , 2003, 4, 117-121.                                                                           | 4.1 | 38        |
| 7  | Association of MICA-A5.1 allele with susceptibility to celiac disease in a family study. <i>American Journal of Gastroenterology</i> , 2003, 98, 359-362.                                                                 | 0.4 | 28        |
| 8  | HLA haplotypes and susceptibility to rheumatoid arthritis. <i>Scandinavian Journal of Rheumatology</i> , 2002, 31, 275-278.                                                                                               | 1.1 | 24        |
| 9  | Polymorphism of the inducible nitric oxide synthase gene in celiac disease. <i>Human Immunology</i> , 2002, 63, 1062-1065.                                                                                                | 2.4 | 8         |
| 10 | Association of Fc $\gamma$ 3 receptor IIIA polymorphism with rheumatoid arthritis: Comment on the article by Morgan et al. <i>Arthritis and Rheumatism</i> , 2002, 46, 556-557.                                           | 6.7 | 3         |
| 11 | A new allele within the transmembrane region of the human MICA gene with seven GCT repeats. <i>Tissue Antigens</i> , 2002, 60, 526-528.                                                                                   | 1.0 | 33        |
| 12 | Genetic determinants of rheumatoid arthritis: the inducible nitric oxide synthase (NOS2) gene promoter polymorphism. <i>Genes and Immunity</i> , 2002, 3, 299-301.                                                        | 4.1 | 24        |
| 13 | The telomeric part of the HLA region predisposes to rheumatoid arthritis independently of the class II loci. <i>Human Immunology</i> , 2001, 62, 75-84.                                                                   | 2.4 | 63        |
| 14 | Distribution of HERV-LTR elements in the 5' flanking region of HLA-DQB1 and association with autoimmunity. <i>Immunogenetics</i> , 2001, 53, 114-118.                                                                     | 2.4 | 29        |
| 15 | Involvement of Fc $\gamma$ 3 receptor IIIA genotypes in susceptibility to rheumatoid arthritis. <i>Arthritis and Rheumatism</i> , 2000, 43, 735.                                                                          | 6.7 | 130       |
| 16 | IL-6 promoter polymorphisms in rheumatoid arthritis. <i>Genes and Immunity</i> , 2000, 1, 338-340.                                                                                                                        | 4.1 | 86        |
