#	ARTICLE	IF	CITATIONS
1	Mechanisms in bariatric surgery: Gut hormones, diabetes resolution, and weight loss. Surgery for Obesity and Related Diseases, 2018, 14, 708-714.	1.0	144
2	Postprandial Nutrient Handling and Gastrointestinal Hormone Secretion After Roux-en-Y Gastric Bypass vs Sleeve Gastrectomy. Gastroenterology, 2019, 156, 1627-1641.e1.	0.6	99
3	Plasma Proteome Profiling Reveals Dynamics of Inflammatory and Lipid Homeostasis Markers after Roux-En-Y Gastric Bypass Surgery. Cell Systems, 2018, 7, 601-612.e3.	2.9	80
4	Immediate enhancement of first-phase insulin secretion and unchanged glucose effectiveness in patients with type 2 diabetes after Roux-en-Y gastric bypass. American Journal of Physiology - Endocrinology and Metabolism, 2015, 308, E535-E544.	1.8	62
5	GLP-2 and GIP exert separate effects on bone turnover: A randomized, placebo-controlled, crossover study in healthy young men. Bone, 2019, 125, 178-185.	1.4	45
6	Effect of bariatric surgery on plasma GDF15 in humans. American Journal of Physiology - Endocrinology and Metabolism, 2019, 316, E615-E621.	1.8	25
7	Secretin release after Roux-en-Y gastric bypass reveals a population of glucose-sensitive S cells in distal small intestine. International Journal of Obesity, 2020, 44, 1859-1871.	1.6	25
8	No Islet Cell Hyperfunction, but Altered Gut-Islet Regulation and Postprandial Hypoglycemia in Glucose-Tolerant Patients 3Years After Gastric Bypass Surgery. Obesity Surgery, 2016, 26, 2263-2267.	1.1	20
9	Augmented GLP-1 Secretion as Seen After Gastric Bypass May Be Obtained by Delaying Carbohydrate Digestion. Journal of Clinical Endocrinology and Metabolism, 2019, 104, 3233-3244.	1.8	15
10	The effect of acute dual SGLT1/SGLT2 inhibition on incretin release and glucose metabolism after gastric bypass surgery. American Journal of Physiology - Endocrinology and Metabolism, 2020, 318, E956-E964.	1.8	13
11	GIP and GLP-2 together improve bone turnover in humans supporting GIPR-GLP-2R co-agonists as future osteoporosis treatment. Pharmacological Research, 2022, 176, 106058.	3.1	13
12	Intestinal sensing and handling of dietary lipids in gastric bypass-operated patients and matched controls. American Journal of Clinical Nutrition, 2020, 111, 28-41.	2.2	7
13	On measurements of glucagon secretion in healthy, obese, and Roux-en-Y gastric bypass operated individuals using sandwich ELISA. Scandinavian Journal of Clinical and Laboratory Investigation, 2022, 82, 75-83.	0.6	7
14	Sustained Improvements in Glucose Metabolism Late After Roux-En-Y Gastric Bypass Surgery in Patients with and Without Preoperative Diabetes. Scientific Reports, 2019, 9, 15154.	1.6	6
15	Integrated model of insulin and glucose kinetics describing both hepatic glucose and pancreatic insulin regulation. Computer Methods and Programs in Biomedicine, 2018, 156, 121-131.	2.6	5
16	Plasma GDF15 levels are similar between subjects after bariatric surgery and matched controls and are unaffected by meals. American Journal of Physiology - Endocrinology and Metabolism, 2021, 321, E443-E452.	1.8	5
17	No effects of a 6-week intervention with a glucagon-like peptide-1 receptor agonist on pancreatic volume and oedema in obese men without diabetes. Diabetes, Obesity and Metabolism, 2020, 22, 1837-1846.	2.2	4
18	Neurotensin secretion after Roux-en-Y gastric bypass, sleeve gastrectomy, and truncal vagotomy with pyloroplasty. Neurogastroenterology and Motility, 2021, , e14210.	1.6	2

#	ARTICLE	IF	CITATIONS
19	Successful Use of a GLP-1 Receptor Agonist as Add-on Therapy to Sulfonylurea in the Treatment of KCNJ11 Neonatal Diabetes. European Journal of Case Reports in Internal Medicine, 2021, 8, 002352.	0.2	0
