

Morgane Thomsen

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5865434/morgane-thomsen-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
50	Effects of acute and repeated administration of the selective M PAM VU0152099 on cocaine versus food choice in male rats.. <i>Addiction Biology</i> , 2022 , 27, e13145	4.6	0
49	Effects of ketogenic diet and ketone monoester supplement on acute alcohol withdrawal symptoms in male mice. <i>Psychopharmacology</i> , 2021 , 238, 833-844	4.7	5
48	The role of glucagon-like peptide 1 (GLP-1) in addictive disorders. <i>British Journal of Pharmacology</i> , 2021 ,	8.6	2
47	CalDAG-GEFI mediates striatal cholinergic modulation of dendritic excitability, synaptic plasticity and psychomotor behaviors. <i>Neurobiology of Disease</i> , 2021 , 158, 105473	7.5	1
46	Effects of muscarinic M receptor stimulation on reinforcing and neurochemical effects of cocaine in rats. <i>Neuropsychopharmacology</i> , 2020 , 45, 1994-2002	8.7	6
45	Glucagon-like peptide-1 receptor regulation of basal dopamine transporter activity is species-dependent. <i>Neurochemistry International</i> , 2020 , 138, 104772	4.4	5
44	Revealing a compulsive phenotype in cholinergic M mice depends on the inter-trial interval initiation settings in a five choice serial reaction time task. <i>Behavioural Brain Research</i> , 2020 , 389, 112649 ^{3,4}		1
43	The activity-regulated cytoskeleton-associated protein, Arc/Arg3.1, influences mouse cocaine self-administration. <i>Pharmacology Biochemistry and Behavior</i> , 2020 , 188, 172818	3.9	5
42	Sex differences in opioid reinforcement under a fentanyl vs. food choice procedure in rats. <i>Neuropsychopharmacology</i> , 2019 , 44, 2022-2029	8.7	43
41	The effect of glucagon-like peptide-1 (GLP-1) receptor agonists on substance use disorder (SUD)-related behavioural effects of drugs and alcohol: A systematic review. <i>Physiology and Behavior</i> , 2019 , 206, 232-242	3.5	5
40	Glucagon-Like Peptide-1 Receptor Agonist Treatment Does Not Reduce Abuse-Related Effects of Opioid Drugs. <i>ENeuro</i> , 2019 , 6,	3.9	22
39	Effects of glucagon-like peptide 1 analogs on alcohol intake in alcohol-preferring vervet monkeys. <i>Psychopharmacology</i> , 2019 , 236, 603-611	4.7	21
38	Effects of muscarinic M and M acetylcholine receptor stimulation on extinction and reinstatement of cocaine seeking in male mice, independent of extinction learning. <i>Psychopharmacology</i> , 2018 , 235, 815-827	4.7	15
37	Physiological roles of CNS muscarinic receptors gained from knockout mice. <i>Neuropharmacology</i> , 2018 , 136, 411-420	5.5	28
36	Ketogenic Diet Suppresses Alcohol Withdrawal Syndrome in Rats. <i>Alcoholism: Clinical and Experimental Research</i> , 2018 , 42, 270-277	3.7	17
35	Effects of Acute and Chronic Treatments with Dopamine D and D Receptor Ligands on Cocaine versus Food Choice in Rats. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2017 , 362, 161-176	4.7	19
34	Effects of muscarinic receptor antagonists on cocaine discrimination in wild-type mice and in muscarinic receptor M, M, and M receptor knockout mice. <i>Behavioural Brain Research</i> , 2017 , 329, 75-83	3.4	14

33	Muscarinic receptor M positive allosteric modulators attenuate central effects of cocaine. <i>Drug and Alcohol Dependence</i> , 2017 , 176, 154-161	4.9	12
32	The glucagon-like peptide 1 receptor agonist Exendin-4 decreases relapse-like drinking in socially housed mice. <i>Pharmacology Biochemistry and Behavior</i> , 2017 , 160, 14-20	3.9	41
31	Effects of the GLP-1 Agonist Exendin-4 on Intravenous Ethanol Self-Administration in Mice. <i>Alcoholism: Clinical and Experimental Research</i> , 2016 , 40, 2247-2252	3.7	25
30	Effects of dopamine D1-like and D2-like antagonists on cocaine discrimination in muscarinic receptor knockout mice. <i>European Journal of Pharmacology</i> , 2016 , 776, 71-80	5.3	5
29	Nicotine-like behavioral effects of the minor tobacco alkaloids nornicotine, anabasine, and anatabine in male rodents. <i>Experimental and Clinical Psychopharmacology</i> , 2014 , 22, 9-22	3.2	45
28	Locomotor activating effects of cocaine and scopolamine combinations in rats: isobolographic analysis. <i>Behavioural Pharmacology</i> , 2014 , 25, 259-66	2.4	7
27	Acute and chronic effects of the M1/M4-preferring muscarinic agonist xanomeline on cocaine vs. food choice in rats. <i>Psychopharmacology</i> , 2014 , 231, 469-79	4.7	20
26	Cocaine versus food choice procedure in rats: environmental manipulations and effects of amphetamine. <i>Journal of the Experimental Analysis of Behavior</i> , 2013 , 99, 211-33	2.1	71
25	Cocaine self-administration in dopamine D1 receptor knockout mice. <i>Experimental and Clinical Psychopharmacology</i> , 2012 , 20, 352-63	3.2	27
24	Muscarinic Acetylcholine Receptor Subtypes as Potential Drug Targets for the Treatment of Schizophrenia, Drug Abuse and Parkinson's Disease. <i>ACS Chemical Neuroscience</i> , 2012 , 3, 80-89	5.7	43
23	Contribution of both M1 and M4 receptors to muscarinic agonist-mediated attenuation of the cocaine discriminative stimulus in mice. <i>Psychopharmacology</i> , 2012 , 220, 673-85	4.7	30
22	Monoamine transporters: vulnerable and vital doorkeepers. <i>Progress in Molecular Biology and Translational Science</i> , 2011 , 98, 1-46	4	34
21	False positive in the intravenous drug self-administration test in C57BL/6J mice. <i>Behavioural Pharmacology</i> , 2011 , 22, 239-47	2.4	17
20	Psychomotor stimulation by dopamine D1-like but not D2-like agonists in most mouse strains. <i>Experimental and Clinical Psychopharmacology</i> , 2011 , 19, 342-60	3.2	10
19	Psychomotor stimulant effects of cocaine in rats and 15 mouse strains. <i>Experimental and Clinical Psychopharmacology</i> , 2011 , 19, 321-41	3.2	51
18	Increased cocaine self-administration in M4 muscarinic acetylcholine receptor knockout mice. <i>Psychopharmacology</i> , 2011 , 216, 367-78	4.7	55
17	Involvement of a subpopulation of neuronal M4 muscarinic acetylcholine receptors in the antipsychotic-like effects of the M1/M4 preferring muscarinic receptor agonist xanomeline. <i>Journal of Neuroscience</i> , 2011 , 31, 5905-8	6.6	39
16	Attenuation of cocaine's reinforcing and discriminative stimulus effects via muscarinic M1 acetylcholine receptor stimulation. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2010 , 332, 959-69	4.7	38

15	Modulation of prepulse inhibition through both M(1) and M (4) muscarinic receptors in mice. <i>Psychopharmacology</i> , 2010 , 208, 401-16	4.7	34
14	Dramatically decreased cocaine self-administration in dopamine but not serotonin transporter knock-out mice. <i>Journal of Neuroscience</i> , 2009 , 29, 1087-92	6.6	93
13	Lack of cocaine self-administration in mice expressing a cocaine-insensitive dopamine transporter. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2009 , 331, 204-11	4.7	77
12	Aripiprazole blocks acute self-administration of cocaine and is not self-administered in mice. <i>Psychopharmacology</i> , 2008 , 199, 37-46	4.7	40
11	Effects of acute and chronic aripiprazole treatment on choice between cocaine self-administration and food under a concurrent schedule of reinforcement in rats. <i>Psychopharmacology</i> , 2008 , 201, 43-53	4.7	51
10	EVP-ABD-enhanced MRI to evaluate diffuse liver disease in a rat model. <i>Journal of Magnetic Resonance Imaging</i> , 2008 , 27, 1317-21	5.6	
9	Involvement of Y(5) receptors in neuropeptide Y agonist-induced analgesic-like effect in the rat hot plate test. <i>Brain Research</i> , 2007 , 1155, 49-55	3.7	11
8	Decreased prepulse inhibition and increased sensitivity to muscarinic, but not dopaminergic drugs in M5 muscarinic acetylcholine receptor knockout mice. <i>Psychopharmacology</i> , 2007 , 192, 97-110	4.7	30
7	Intravenous drug self-administration in mice: practical considerations. <i>Behavior Genetics</i> , 2007 , 37, 101-112	3.2	58
6	Lack of self-administration of cocaine in dopamine D1 receptor knock-out mice. <i>Journal of Neuroscience</i> , 2007 , 27, 13140-50	6.6	134
5	Cocaine self-administration under fixed and progressive ratio schedules of reinforcement: comparison of C57BL/6J, 129X1/SvJ, and 129S6/SvEvTac inbred mice. <i>Psychopharmacology</i> , 2006 , 184, 145-54	4.7	34
4	Reduced cocaine self-administration in muscarinic M5 acetylcholine receptor-deficient mice. <i>Journal of Neuroscience</i> , 2005 , 25, 8141-9	6.6	94
3	Chronic intravenous drug self-administration in rats and mice. <i>Current Protocols in Neuroscience</i> , 2005 , Chapter 9, Unit 9.20	2.7	76
2	Role for M5 muscarinic acetylcholine receptors in cocaine addiction. <i>Journal of Neuroscience Research</i> , 2003 , 74, 91-6	4.4	98
1	Mutations in CalDAG-GEFI Lead to Striatal Signaling Deficits and Psychomotor Symptoms in Multiple Species Including Human		2
