#	ARTICLE	IF	CITATIONS
1	Patients with low activation level report limited possibilities to participate in cancer care. <i>Health Expectations</i> , 2022, 25, 914-924.	1.1	8
2	Older patients' attitudes towards, and perceptions of, preoperative physical activity and exercise prior to colorectal cancer surgery—a gap between awareness and action. <i>Supportive Care in Cancer</i> , 2020, 28, 3945-3953.	1.0	11
3	Patient participation in gastrointestinal endoscopy — From patients' perspectives. <i>Health Expectations</i> , 2020, 23, 893-903.	1.1	6
4	Short-term postoperative physical decline and patient-reported recovery in people aged 70 or older undergoing abdominal cancer resection— A prospective cohort study. <i>Journal of Geriatric Oncology</i> , 2019, 10, 610-617.	0.5	12
5	Improved patient satisfaction 2 years after introducing person-centred handover in an oncological inpatient care setting. <i>Journal of Clinical Nursing</i> , 2019, 28, 3262-3270.	1.4	3
6	Observations of nursing staff compliance to a checklist for person-centred handovers — a quality improvement project. <i>Scandinavian Journal of Caring Sciences</i> , 2019, 33, 892-901.	1.0	6
7	Phase III study of the European Organisation for Research and Treatment of Cancer satisfaction with cancer care core questionnaire (EORTC PATSAT-C33) and specific complementary outpatient module (EORTC OUT-PATSAT7). <i>European Journal of Cancer Care</i> , 2018, 27, e12786.	0.7	30
8	Better preoperative physical performance reduces the odds of complication severity and discharge to care facility after abdominal cancer resection in people over the age of 70 — A prospective cohort study. <i>European Journal of Surgical Oncology</i> , 2018, 44, 1760-1767.	0.5	26
9	Nurse perceptions of person-centered handovers in the oncological inpatient setting: A qualitative study. <i>International Journal of Nursing Studies</i> , 2018, 86, 44-51.	2.5	13
10	The European organization for research and treatment of cancer — satisfaction with cancer care questionnaire: revision and extended application development. <i>Psycho-Oncology</i> , 2017, 26, 400-404.	1.0	14
11	Patient satisfaction after implementation of person-centred handover in oncological inpatient care — A cross-sectional study. <i>PLoS ONE</i> , 2017, 12, e0175397.	1.1	14
12	Person-centered endoscopy safety checklist: Development, implementation, and evaluation. <i>World Journal of Gastroenterology</i> , 2017, 23, 8605-8614.	1.4	13
13	Patients' knowledge and perceived understanding — Associations with consenting to participate in cancer clinical trials. <i>Contemporary Clinical Trials Communications</i> , 2016, 2, 6-11.	0.5	24
14	International field testing of the psychometric properties of an EORTC quality of life module for oral health: the EORTC QLQ-OH15. <i>Supportive Care in Cancer</i> , 2016, 24, 3915-3924.	1.0	26
15	Higher sexual interest with androgen receptor inhibitor monotherapy than with castration plus an androgen receptor inhibitor in prostate cancer patients treated with curative radiotherapy, but otherwise small health-related quality of life differences: A randomised prospective 18-month follow-up study. <i>European Journal of Cancer</i> , 2016, 65, 43-51.	1.3	2
16	Changed nursing scheduling for improved safety culture and working conditions - patients' and nurses' perspectives. <i>Journal of Nursing Management</i> , 2016, 24, 524-532.	1.4	15
17	Information exchange in oncological inpatient care — Patient satisfaction, participation, and safety. <i>European Journal of Oncology Nursing</i> , 2015, 19, 142-147.	0.9	30
18	Nurse-led outpatient clinics in oncology care — Patient satisfaction, information and continuity of care. <i>European Journal of Oncology Nursing</i> , 2015, 19, 724-730.	0.9	38

#	ARTICLE	IF	CITATIONS
19	Audio-recorded information to patients considering participation in cancer clinical trials – a randomized study. <i>Acta Oncologica</i> , 2014, 53, 1197-1204.	0.8	6
20	Less Satisfaction With Information in Patients With Prostate Cancer Treated With Surgery and Salvage Radiotherapy Compared With Patients Treated With Curative Radiotherapy Alone, Despite Similar Health-Related Quality of Life. <i>Clinical Genitourinary Cancer</i> , 2014, 12, e71-e82.	0.9	9
21	Patients' perception of information after completion of adjuvant radiotherapy for breast cancer. <i>European Journal of Oncology Nursing</i> , 2014, 18, 305-309.	0.9	21
22	Levels of knowledge and perceived understanding among participants in cancer clinical trials – factors related to the informed consent procedure. <i>Clinical Trials</i> , 2011, 8, 77-84.	0.7	36
23	Surgical resection margins do not influence health related quality of life or emotional distress in patients with cutaneous melanoma: Results of a prospective randomised trial. <i>Journal of Plastic Surgery and Hand Surgery</i> , 2010, 44, 146-155.	0.4	12
24	An international validation study of the EORTC QLQ-INFO25 questionnaire: An instrument to assess the information given to cancer patients. <i>European Journal of Cancer</i> , 2010, 46, 2726-2738.	1.3	155
25	Family members' perceptions of genetic testing for malignant melanoma – A prospective interview study. <i>European Journal of Oncology Nursing</i> , 2009, 13, 74-80.	0.9	18
26	Knowledge and understanding among cancer patients consenting to participate in clinical trials. <i>European Journal of Cancer</i> , 2008, 44, 2627-2633.	1.3	51
27	Improvements in patient satisfaction at an outpatient clinic for patients with breast cancer. <i>Acta Oncologica</i> , 2006, 45, 550-558.	0.8	56
28	Detection of nodular and superficial spreading melanoma with tumour thickness $\leq 2.0$ mm – An interview study. <i>European Journal of Cancer Prevention</i> , 2002, 11, 49-55.	0.6	23
29	Nodular histogenetic type – the most significant factor for thick melanoma: implications for prevention. <i>Melanoma Research</i> , 1998, 8, 403-411.	0.6	41
30	Factors Related To Non-Attendance In A Population Based Melanoma Screening Program. , 1997, 6, 218-226.		19
