

Keemin Sohn

List of Publications by Citations

Source: <https://exaly.com/author-pdf/5874930/keemin-sohn-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
48	Factors generating boardings at Metro stations in the Seoul metropolitan area. <i>Cities</i> , 2010 , 27, 358-368	5.6	95
47	Classification of crystal structure using a convolutional neural network. <i>IUCrJ</i> , 2017 , 4, 486-494	4.7	83
46	An analysis of Metro ridership at the station-to-station level in Seoul. <i>Transportation</i> , 2012 , 39, 705-722	4	73
45	Activity imputation for trip-chains elicited from smart-card data using a continuous hidden Markov model. <i>Transportation Research Part B: Methodological</i> , 2016 , 83, 121-135	7.2	54
44	Dynamic Origin-Destination Flow Estimation Using Cellular Communication System. <i>IEEE Transactions on Vehicular Technology</i> , 2008 , 57, 2703-2713	6.8	51
43	Forecasting road traffic speeds by considering area-wide spatio-temporal dependencies based on a graph convolutional neural network (GCN). <i>Transportation Research Part C: Emerging Technologies</i> , 2020 , 114, 189-204	8.4	49
42	. <i>IEEE Transactions on Intelligent Transportation Systems</i> , 2018 , 19, 1670-1675	6.1	47
41	. <i>IEEE Transactions on Intelligent Transportation Systems</i> , 2008 , 9, 559-568	6.1	39
40	Calibrating a social-force-based pedestrian walking model based on maximum likelihood estimation. <i>Transportation</i> , 2013 , 40, 91-107	4	34
39	An extremely simple macroscale electronic skin realized by deep machine learning. <i>Scientific Reports</i> , 2017 , 7, 11061	4.9	32
38	Deep-learning architecture to forecast destinations of bus passengers from entry-only smart-card data. <i>IET Intelligent Transport Systems</i> , 2017 , 11, 334-339	2.4	32
37	Inferring the route-use patterns of metro passengers based only on travel-time data within a Bayesian framework using a reversible-jump Markov chain Monte Carlo (MCMC) simulation. <i>Transportation Research Part B: Methodological</i> , 2015 , 81, 1-17	7.2	30
36	Separation of car-dependent commuters from normal-choice riders in mode-choice analysis. <i>Transportation</i> , 2009 , 36, 423-436	4	26
35	Image-to-Image Learning to Predict Traffic Speeds by Considering Area-Wide Spatio-Temporal Dependencies. <i>IEEE Transactions on Vehicular Technology</i> , 2019 , 68, 1188-1197	6.8	25
34	Identifying driver heterogeneity in car-following based on a random coefficient model. <i>Transportation Research Part C: Emerging Technologies</i> , 2013 , 36, 35-44	8.4	22
33	Why do passengers choose a specific car of a metro train during the morning peak hours?. <i>Transportation Research, Part A: Policy and Practice</i> , 2014 , 61, 249-258	3.7	19
32	Analyzing the time frame for the transition from leisure-cyclist to commuter-cyclist. <i>Transportation</i> , 2011 , 38, 305-319	4	18

31	Artificial intelligence for traffic signal control based solely on video images. <i>Journal of Intelligent Transportation Systems: Technology, Planning, and Operations</i> , 2018 , 22, 433-445	3.2	18
30	Statistical Model for Forecasting Link Travel Time Variability. <i>Journal of Transportation Engineering</i> , 2009 , 135, 440-453		17
29	Identifying the Impact on Land Prices of Replacing At-grade or Elevated Railways with Underground Subways in the Seoul Metropolitan Area. <i>Urban Studies</i> , 2014 , 51, 44-62	3.2	16
28	Deep-Learning Technique To Convert a Crude Piezoresistive Carbon Nanotube-Ecoflex Composite Sheet into a Smart, Portable, Disposable, and Extremely Flexible Keypad. <i>ACS Applied Materials & Interfaces</i> , 2018 , 10, 20862-20868	9.5	15
27	Multi-objective optimization of a road diet network design. <i>Transportation Research, Part A: Policy and Practice</i> , 2011 , 45, 499-511	3.7	14
26	Transportation Deficiencies for Older Adults in Seoul, South Korea. <i>Transportation Research Record</i> , 2014 , 2469, 76-88	1.7	11
25	Deep-Learning Architectures to Forecast Bus Ridership at the Stop and Stop-To-Stop Levels for Dense and Crowded Bus Networks. <i>Applied Artificial Intelligence</i> , 2016 , 30, 861-885	2.3	11
24	An investigation into passenger preference for express trains during peak hours. <i>Transportation</i> , 2016 , 43, 623-641	4	10
23	Image-Based Learning to Measure the Space Mean Speed on a Stretch of Road without the Need to Tag Images with Labels. <i>Sensors</i> , 2019 , 19,	3.8	10
22	Optimizing Train-Stop Positions Along a Platform to Distribute the Passenger Load More Evenly Across Individual Cars. <i>IEEE Transactions on Intelligent Transportation Systems</i> , 2013 , 14, 994-1002	6.1	9
21	Zonal centrality measures and the neighborhood effect. <i>Transportation Research, Part A: Policy and Practice</i> , 2010 , 44, 733-743	3.7	8
20	Systematic control of experimental inconsistency in combinatorial materials science. <i>ACS Combinatorial Science</i> , 2009 , 11, 131-7		8
19	Increasing the number of bicycle commuters. <i>Proceedings of the Institution of Civil Engineers: Transport</i> , 2012 , 165, 63-72	0.5	7
18	Predicting Short-Term Traffic Speed Using a Deep Neural Network to Accommodate Citywide Spatio-Temporal Correlations. <i>IEEE Transactions on Intelligent Transportation Systems</i> , 2021 , 22, 1435-1448	6.1	7
17	Reinforcement Learning for Joint Control of Traffic Signals in a Transportation Network. <i>IEEE Transactions on Vehicular Technology</i> , 2020 , 69, 1375-1387	6.8	6
16	Feature Mapping the Seoul Metro Station Areas Based on a Self-Organizing Map. <i>Journal of Urban Technology</i> , 2013 , 20, 23-42	5.9	6
15	Clustering the seoul metropolitan area by travel patterns based on a deep belief network 2016 ,		5
14	An Expectation-Maximization Algorithm to Estimate the Integrated Choice and Latent Variable Model. <i>Transportation Science</i> , 2017 , 51, 946-967	4.4	4

13	A systematic decision criterion for the elimination of useless overpasses. <i>Transportation Research, Part A: Policy and Practice</i> , 2008 , 42, 1043-1055	3.7	4
12	An investigation into the station capacities for personal rapid transit systems. <i>Proceedings of the Institution of Mechanical Engineers, Part F: Journal of Rail and Rapid Transit</i> , 2012 , 226, 457-468	1.4	3
11	Image-Based Learning to Measure the Stopped Delay in an Approach of a Signalized Intersection. <i>IEEE Access</i> , 2019 , 7, 169888-169898	3.5	3
10	Variational embedding of a hidden Markov model to generate human activity sequences. <i>Transportation Research Part C: Emerging Technologies</i> , 2021 , 131, 103347	8.4	3
9	Commuter dependence on expressways when travelling to work. <i>Proceedings of the Institution of Civil Engineers: Transport</i> , 2015 , 168, 23-33	0.5	2
8	Non-Anchor-Based Vehicle Detection for Traffic Surveillance Using Bounding Ellipses. <i>IEEE Access</i> , 2021 , 9, 123061-123074	3.5	2
7	Facilitating an expectation-maximization (EM) algorithm to solve an integrated choice and latent variable (ICLV) model with fully correlated latent variables. <i>Journal of Choice Modelling</i> , 2018 , 26, 64-79	3.8	1
6	Transferability of a Convolutional Neural Network (CNN) to Measure Traffic Density. <i>Electronics (Switzerland)</i> , 2021 , 10, 1189	2.6	1
5	Special issue on smart cities and its applications. <i>ETRI Journal</i> , 2022 , 44, 179-182	1.4	1
4	Area-wide traffic signal control based on a deep graph Q-Network (DGQN) trained in an asynchronous manner. <i>Applied Soft Computing Journal</i> , 2022 , 108497	7.5	0
3	Multi-Regime Analysis for Computer Vision- Based Traffic Surveillance Using a Change-Point Detection Algorithm. <i>IEEE Access</i> , 2021 , 9, 40980-40995	3.5	0
2	Imputing qualitative attributes for trip chains extracted from smart card data using a conditional generative adversarial network. <i>Transportation Research Part C: Emerging Technologies</i> , 2022 , 137, 103616	8.4	0
1	Measuring Traffic Volumes Using an Autoencoder with No Need to Tag Images with Labels. <i>Electronics (Switzerland)</i> , 2020 , 9, 702	2.6
