#	ARTICLE	IF	CITATIONS
1	High-density lipoprotein cholesterol (HDL-C) in cardiovascular disease: effect of exercise training. <i>Integrative Medicine Research</i> , 2016, 5, 212-215.	1.8	49
2	Effects of an elastic band resistance exercise program on lower extremity muscle strength and gait ability in patients with Alzheimer's disease. <i>Journal of Physical Therapy Science</i> , 2015, 27, 1953-1955.	0.6	22
3	The effect of ladder-climbing exercise on atrophy/hypertrophy-related myokine expression in middle-aged male Wistar rats. <i>Journal of Physiological Sciences</i> , 2015, 65, 515-521.	2.1	22
4	Effects of 12-week exercise training on osteocalcin, high-sensitivity C-reactive protein concentrations, and insulin resistance in elderly females with osteoporosis. <i>Journal of Physical Therapy Science</i> , 2016, 28, 2227-2231.	0.6	21
5	Effects of Aerobic and Resistance Exercise on Myokines in High Fat Diet-Induced Middle-Aged Obese Rats. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 2685.	2.6	17
6	Comparison of endoplasmic reticulum stress and mitochondrial biogenesis responses after 12 weeks of treadmill running and ladder climbing exercises in the cardiac muscle of middle-aged obese rats. <i>Brazilian Journal of Medical and Biological Research</i> , 2018, 51, e7508.	1.5	11
7	Exercise training-induced changes in metabolic syndrome parameters, carotid wall thickness, and thyroid function in middle-aged women with subclinical hypothyroidism. <i>Pflugers Archiv European Journal of Physiology</i> , 2019, 471, 479-489.	2.8	11
8	Can Active Aerobic Exercise Reduce the Risk of Cardiovascular Disease in Prehypertensive Elderly Women by Improving HDL Cholesterol and Inflammatory Markers?. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 5910.	2.6	11
9	Combined influence of dietary restriction and treadmill running on MCP-1 and the expression of oxidative stress-related mRNA in the adipose tissue in obese mice. <i>Journal of Exercise Nutrition & Biochemistry</i> , 2014, 18, 311-318.	1.3	11
10	Association of angiotensin-converting enzyme I/D and β -actinin-3 R577X genotypes with metabolic syndrome risk factors in Korean children. <i>Obesity Research and Clinical Practice</i> , 2016, 10, S125-S132.	1.8	9
11	Effects of intermittent ladder-climbing exercise training on mitochondrial biogenesis and endoplasmic reticulum stress of the cardiac muscle in obese middle-aged rats. <i>Korean Journal of Physiology and Pharmacology</i> , 2017, 21, 633.	1.2	9
12	Effects of an Exercise Program Combining Aerobic and Resistance Training on Protein Expressions of Neurotrophic Factors in Obese Rats Injected with Beta-Amyloid. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 7921.	2.6	6
13	Effects of Resistance Exercise and Fermented Soybean Consumption on Glucose Tolerance and Expressions of Immune Senescence-Related Myokines in Middle-Aged Obese Rats. <i>Journal of Obesity and Metabolic Syndrome</i> , 2018, 27, 186-194.	3.6	5
14	Strengthening Exercise for Prevention of Sarcopenia during the Aging Process. <i>The Korean Journal of Obesity</i> , 2012, 21, 187.	0.2	3
15	Association of Angiotensin Converting Enzyme I/D and β -actinin-3 R577X Genotypes with Growth Factors and Physical Fitness in Korean Children. <i>Korean Journal of Physiology and Pharmacology</i> , 2015, 19, 131.	1.2	2
16	Effects of Aerobic Exercise Training and Natural Fermented Vinegar on Body Composition and Cardiopulmonary Function in Middle Aged Women. <i>The Korean Journal of Sports Medicine</i> , 2018, 36, 126.	0.2	1
17	Comparisons of Body Composition and 12 Week Combined Exercise Intervention-mediated Effects According to ACE and IGF-1 Gene Polymorphisms in Children. <i>The Korean Journal of Obesity</i> , 2012, 21, 45.	0.2	0
