#	Article	IF	CITATIONS
1	Error Analysis of Customer Baseline Load (CBL) Calculation Methods for Residential Customers. IEEE Transactions on Industry Applications, 2017, 53, 5-14.	4.9	72
2	Power distribution system fault cause analysis by using association rule mining. Electric Power Systems Research, 2017, 152, 140-147.	3.6	52
3	Optimal Sizing and Operation of Battery Energy Storage Systems Connected to Wind Farms Participating in Electricity Markets. IEEE Transactions on Sustainable Energy, 2019, 10, 1184-1193.	8.8	46
4	An investigation of the relationship between accuracy of customer baseline calculation and efficiency of Peak Time Rebate program. , $2016, , .$		13
5	A dataâ€driven approach for predicting vegetationâ€related outages in power distribution systems. International Transactions on Electrical Energy Systems, 2020, 30, e12154.	1.9	11
6	Predicting Lightning-Related Outages in Power Distribution Systems: A Statistical Approach. IEEE Access, 2020, 8, 84541-84550.	4.2	11
7	Including surge arresters in the lightning performance analysis of 132kV transmission line. , 2016, , .		8
8	Concurrent placement of distributed generation resources and capacitor banks in distribution systems. , 2016, , .		5
9	Towards the Interactive Effects of Demand Response Participation on Electricity Spot Market Price. International Journal of Emerging Electric Power Systems, 2017, 18, .	0.8	5
10	Power distribution system equipment failure identification using machine learning algorithms. , 2017, , .		5
11	Statistical Analysis of Animal-Related Outages in Power Distribution Systems - A Case Study. , 2019, , .		4
12	A data-driven analysis of outage duration in power distribution systems. , 2017, , .		3
13	Investigation of naturally aged timing relays' service life by employing thermally accelerated aging. , $2016,$, .		0
14	Probabilistic approach in evaluation of backflashover in 230kV double circuit transmission line., 2016,		0
