#	Article	IF	CITATIONS
1	Urban and rural environments differentially shape multisensory perception in ageing. Aging, Neuropsychology, and Cognition, 2022, 29, 197-212.	1.3	9
2	"CityQuest,―A Custom-Designed Serious Game, Enhances Spatial Memory Performance in Older Adults. Frontiers in Aging Neuroscience, 2022, 14, 806418.	3.4	5
3	Multisensory Perception and Learning: Linking Pedagogy, Psychophysics, and Human–Computer Interaction. Multisensory Research, 2022, 35, 335-366.	1.1	3
4	Multisensory integration precision is associated with better cognitive performance over time in older adults: A large-scale exploratory study. Aging Brain, 2022, 2, 100038.	1.3	13
5	Perceptual training narrows the temporal binding window of audiovisual integration in both younger and older adults. Neuropsychologia, 2022, 173, 108309.	1.6	15
6	Gray matter volume in the right angular gyrus is associated with differential patterns of multisensory integration with aging. Neurobiology of Aging, 2021, 100, 83-90.	3.1	14
7	The development of visuotactile congruency effects for sequences of events. Journal of Experimental Child Psychology, 2021, 207, 105094.	1.4	0
8	Haptic recognition memory and lateralisation for verbal and nonverbal shapes. Memory, 2021, 29, 1043-1057.	1.7	0
9	Children's spatial–numerical associations on horizontal, vertical, and sagittal axes. Journal of Experimental Child Psychology, 2021, 209, 105169.	1.4	12
10	Holistic processing of faces and words predicts reading accuracy and speed in dyslexic readers. PLoS ONE, 2021, 16, e0259986.	2.5	8
11	The effect of eye disease, cataract surgery and hearing aid use on multisensory integration in ageing. Cortex, 2020, 133, 161-176.	2.4	11
12	What you see is what you hear: Twenty years of research using the Sound-Induced Flash Illusion. Neuroscience and Biobehavioral Reviews, 2020, 118, 759-774.	6.1	63
13	Laterality effects in the haptic discrimination of verbal and non-verbal shapes. Laterality, 2020, 25, 654-674.	1.0	3
14	Changes in perceptual category affects serial dependence in judgements of attractiveness. Visual Cognition, 2020, 28, 557-580.	1.6	1
15	Seeing an image of the hand affects performance on a crossmodal congruency task for sequences of events. Consciousness and Cognition, 2020, 80, 102900.	1.5	0
16	Turning Heads: The Effects of Face View and Eye Gaze Direction on the Perceived Attractiveness of Expressive Faces. Perception, 2020, 49, 330-356.	1.2	2
17	351 Integration of Auditory and Visual Information is Associated with Ageing, Sex and Cognitive Performance. Age and Ageing, 2019, 48, iii17-iii65.	1.6	0
18	Do synaesthesia and mental imagery tap into similar cross-modal processes?. Philosophical Transactions of the Royal Society B: Biological Sciences, 2019, 374, 20180359.	4.0	7

#	Article	IF	CITATIONS
19	Age-related sensory decline mediates the Sound-Induced Flash Illusion: Evidence for reliability weighting models of multisensory perception. Scientific Reports, 2019, 9, 19347.	3.3	23
20	Individual differences in ageing, cognitive status, and sex on susceptibility to the sound-induced flash illusion: A large-scale study Psychology and Aging, 2019, 34, 978-990.	1.6	46
21	Changes in Regional Brain Grey-Matter Volume Following Successful Completion of a Sensori-Motor Intervention Targeted at Healthy and Fall-Prone OlderÂAdults. Multisensory Research, 2018, 31, 317-344.	1.1	7
22	Aging Impairs Audiovisual Facilitation of Object Motion Within Self-Motion. Multisensory Research, 2018, 31, 251-272.	1.1	6
23	Acceptability of a custom-designed game, CityQuest, aimed at improving balance confidence and spatial cognition in fall-prone and healthy older adults. Behaviour and Information Technology, 2018, 37, 538-557.	4.0	15
24	Crowded environments reduce spatial memory in older but not younger adults. Psychological Research, 2018, 82, 407-428.	1.7	16
25	Temporal shifts in eye gaze and facial expressions independently contribute to the perceived attractiveness of unfamiliar faces. Visual Cognition, 2018, 26, 831-852.	1.6	6
26	Tactile-to-Visual Cross-Modal Transfer of Texture Categorisation Following Training: An fMRI Study. Frontiers in Integrative Neuroscience, 2018, 12, 24.	2.1	6
27	Crossmodal priming of unfamiliar faces supports early interactions between voices and faces in person perception. Visual Cognition, 2017, 25, 611-628.	1.6	12
28	Individual differences in context-dependent effects reveal common mechanisms underlying the direction aftereffect and direction repulsion. Vision Research, 2017, 141, 109-116.	1.4	6
29	Introduction to the Special Issue on Synaesthesia and Cross-Modal Perception. Multisensory Research, 2017, 30, 195-197.	1.1	Ο
30	Perceptual and Social Attributes Underlining Age-Related Preferences for Faces. Frontiers in Human Neuroscience, 2016, 10, 437.	2.0	16
31	Perceptual learning shapes multisensory causal inference via two distinct mechanisms. Scientific Reports, 2016, 6, 24673.	3.3	33
32	Familiar environments enhance object and spatial memory in both younger and older adults. Experimental Brain Research, 2016, 234, 1555-1574.	1.5	30
33	Task-specific transfer of perceptual learning across sensory modalities. Current Biology, 2016, 26, R20-R21.	3.9	35
34	Multisensory integration and cross-modal learning in synaesthesia: A unifying model. Neuropsychologia, 2016, 88, 140-150.	1.6	28
35	Successful balance training is associated with improved multisensory function in fall-prone older adults. Computers in Human Behavior, 2015, 45, 192-203.	8.5	59
36	Task-Specific, Age Related Effects in the Cross-Modal Identification and Localisation of Objects. Multisensory Research, 2015, 28, 111-151.	1.1	13

#	Article	IF	CITATIONS
37	Non-rigid, but not rigid, motion interferes with the processing of structural face information in developmental prosopagnosia. Neuropsychologia, 2015, 70, 281-295.	1.6	6
38	Strutting Hero, Sneaking Villain. ACM Transactions on Applied Perception, 2015, 13, 1-21.	1.9	1
39	A Wii Bit of Fun: A Novel Platform to Deliver Effective Balance Training to Older Adults. Games for Health Journal, 2015, 4, 423-433.	2.0	50
40	The sound-induced flash illusion reveals dissociable age-related effects in multisensory integration. Frontiers in Aging Neuroscience, 2014, 6, 250.	3.4	92
41	Motion facilitates face perception across changes in viewpoint and expression in older adults Journal of Experimental Psychology: Human Perception and Performance, 2014, 40, 2266-2280.	0.9	6
42	A standing posture is associated with increased susceptibility to the sound-induced flash illusion in fall-prone older adults. Experimental Brain Research, 2014, 232, 423-434.	1.5	59
43	Improving the efficiency of multisensory integration in older adults: Audio-visual temporal discrimination training reduces susceptibility to the sound-induced flash illusion. Neuropsychologia, 2014, 61, 259-268.	1.6	96
44	Ambient visual information confers a context-specific, long-term benefit on memory for haptic scenes. Cognition, 2013, 128, 363-379.	2.2	49
45	Reduced Vision Selectively Impairs Spatial Updating in Fall-prone Older Adults. Multisensory Research, 2013, 26, 69-94.	1.1	18
46	Perception and prediction of social intentions from human body motion. , 2013, , .		3
47	Effects of ageing and sound on perceived timing of human interactions. , 2013, , .		Ο
48	The effect of non-informative spatial sounds on haptic scene recognition. International Journal of Autonomous and Adaptive Communications Systems, 2013, 6, 342.	0.3	2
49	Synesthesia, Meaning, and Multilingual Speakers. , 2013, , .		36
50	Susceptibility to a multisensory speech illusion in older persons is driven by perceptual processes. Frontiers in Psychology, 2013, 4, 575.	2.1	40
51	Combined structural and functional imaging reveals cortical deactivations in grapheme-color synaesthesia. Frontiers in Psychology, 2013, 4, 755.	2.1	20
52	The Effect of the Neurogranin Schizophrenia Risk Variant rs12807809 on Brain Structure and Function. Twin Research and Human Genetics, 2012, 15, 296-303.	0.6	26
53	Evidence for Crossmodal Interactions across Depth on Target Localisation Performance in a Spatial Array. Perception, 2012, 41, 757-773.	1.2	5
54	The sound of the crowd: Auditory information modulates the perceived emotion of a crowd based on bodily expressions Emotion, 2012, 12, 120-131.	1.8	4

#	Article	IF	CITATIONS
55	Integration of faces and voices, but not faces and names, in person recognition. British Journal of Psychology, 2012, 103, 73-82.	2.3	24
56	A glance back on 50 years of research in perception. Irish Journal of Psychology, 2012, 33, 65-71.	0.2	2
57	The NOS1 variant rs6490121 is associated with variation in prefrontal function and grey matter density in healthy individuals. NeuroImage, 2012, 60, 614-622.	4.2	26
58	ls maintaining balance during standing associated with inefficient audio–visual integration in older adults?. Seeing and Perceiving, 2012, 25, 50.	0.3	0
59	The effect of balance training on audio–visual integrationÂinÂolder adults. Seeing and Perceiving, 2012, 25, 155.	0.3	Ο
60	Inefficient cross-sensory temporal integration in olderÂpersons with a history of falling. Seeing and Perceiving, 2012, 25, 210.	0.3	2
61	The Effect of Combined Sensory and Semantic Components on Audio–Visual Speech Perception in Older Adults. Frontiers in Aging Neuroscience, 2011, 3, 19.	3.4	35
62	Audiovisual temporal discrimination is less efficient with aging. NeuroReport, 2011, 22, 554-558.	1.2	58
63	Is inefficient multisensory processing associated with falls in older people?. Experimental Brain Research, 2011, 209, 375-384.	1.5	152
64	Active and passive touch differentially activate somatosensory cortex in texture perception. Human Brain Mapping, 2011, 32, 1067-1080.	3.6	86
65	The role of social cues in the deployment of spatial attention: head-body relationships automatically activate directional spatial codes in a Simon task. Frontiers in Integrative Neuroscience, 2011, 6, 4.	2.1	18
66	Perceiving emotion in crowds: the role of dynamic body postures on the perception of emotion in crowded scenes. Experimental Brain Research, 2010, 204, 361-372.	1.5	31
67	Multisensory Processing in Review: from Physiology to Behaviour. Seeing and Perceiving, 2010, 23, 3-38.	0.3	239
68	The effect of body and part-based motion on the recognition of unfamiliar objects. Visual Cognition, 2010, 18, 456-480.	1.6	9
69	Static images of novel, moveable objects learned through touch activate visual area hMT+. NeuroImage, 2010, 49, 1708-1716.	4.2	6
70	Visuo-haptic Perception of Objects and Scenes. , 2010, , 251-271.		3
71	Colored-Speech Synaesthesia Is Triggered by Multisensory, Not Unisensory, Perception. Psychological Science, 2009, 20, 529-533.	3.3	23
72	Investigating the role of body shape on the perception of emotion. ACM Transactions on Applied Perception, 2009, 6, 1-11.	1.9	37

#	Article	IF	CITATIONS
73	Evaluating the effect of motion and body shape on the perceived sex of virtual characters. ACM Transactions on Applied Perception, 2009, 5, 1-14.	1.9	28
74	An exploratory study of linguistic–colour associations across languages in multilingual synaesthetes. Quarterly Journal of Experimental Psychology, 2009, 62, 1343-1355.	1.1	20
75	Short Article: Are Attractive Facial Characteristics Peculiar to the Sex of a Face?. Quarterly Journal of Experimental Psychology, 2009, 62, 833-843.	1.1	2
76	Synaesthesia is associated with enhanced, self-rated visual imagery. Consciousness and Cognition, 2008, 17, 1032-1039.	1.5	113
77	Behavioral evidence for task-dependent "what" versus "where" processing within and across modalities. Perception & Psychophysics, 2008, 70, 36-49.	2.3	36
78	Vision and touch: Independent or integrated systems for the perception of texture?. Brain Research, 2008, 1242, 59-72.	2.2	106
79	Menstrual cycle phase modulates cognitive control over male but not female stimuli. Brain Research, 2008, 1224, 79-87.	2.2	31
80	Familial patterns and the origins of individual differences in synaesthesia. Cognition, 2008, 106, 871-893.	2.2	144
81	Differences in early sensory-perceptual processing in synesthesia: A visual evoked potential study. NeuroImage, 2008, 43, 605-613.	4.2	101
82	Canonical Views in Haptic Object Perception. Perception, 2008, 37, 1867-1878.	1.2	23
83	Evaluating the emotional content of human motions on real and virtual characters. , 2008, , .		40
84	Investigating Visuo-tactile Recognition of Unfamiliar Moving Objects. Lecture Notes in Computer Science, 2008, , 308-312.	1.3	1
85	The Natural Truth: The Contribution of Vision and Touch in the Categorisation of "Naturalness― Lecture Notes in Computer Science, 2008, , 319-324.	1.3	2
86	Virtual shapers & movers. , 2007, , .		24
87	Multisensory recognition of actively explored objects Canadian Journal of Experimental Psychology, 2007, 61, 242-253.	0.8	34
88	New Insights into Multisensory Perception. Perception, 2007, 36, 1415-1417.	1.2	9
89	The role of visual experience on the representation and updating of novel haptic scenes. Brain and Cognition, 2007, 65, 184-194.	1.8	63
90	Are representations of unfamiliar faces independent of encoding modality?. Neuropsychologia, 2007, 45, 506-513.	1.6	26

#	Article	IF	CITATIONS
91	The role of familiarity in the recognition of static and dynamic objects. Progress in Brain Research, 2006, 154, 315-325.	1.4	21
92	Visual, haptic and crossmodal recognition of scenes. Experimental Brain Research, 2005, 161, 233-242.	1.5	99
93	Visual and haptic representations of scenes are updated with observer movement. Experimental Brain Research, 2005, 166, 481-488.	1.5	83
94	The role of long-term and short-term familiarity in visual and haptic face recognition. Experimental Brain Research, 2005, 166, 583-591.	1.5	18
95	The interaction of shape- and location-based priming in object categorisation: Evidence for a hybrid "what+where―representation stage. Vision Research, 2005, 45, 2065-2080.	1.4	28
96	The role of characteristic motion in object categorization. Journal of Vision, 2004, 4, 5.	0.3	34
97	Is object search mediated by object-based or image-based representations?. Spatial Vision, 2004, 17, 511-541.	1.4	12
98	Familiarity Breeds Attraction: Effects of Exposure on the Attractiveness of Typical and Distinctive Faces. Perception, 2004, 33, 147-157.	1.2	85
99	Categorical perception of sex occurs in familiar but not unfamiliar faces. Visual Cognition, 2004, 11, 823-855.	1.6	38
100	Visual, haptic and cross-modal recognition of objects and scenes. Journal of Physiology (Paris), 2004, 98, 147-159.	2.1	41
101	The effect of temporal delay and spatial differences on cross-modal object recognition. Cognitive, Affective and Behavioral Neuroscience, 2004, 4, 260-269.	2.0	27
102	Categorical perception of familiar objects. Cognition, 2002, 85, 113-143.	2.2	63
103	Viewpoint Dependence in Visual and Haptic Object Recognition. Psychological Science, 2001, 12, 37-42.	3.3	231
104	Recognizing Unfamiliar Faces: The Effects of Distinctiveness and View. Quarterly Journal of Experimental Psychology Section A: Human Experimental Psychology, 1999, 52, 509-534.	2.3	48
105	Recognizing Unfamiliar Faces: The Effects of Distinctiveness and View. Quarterly Journal of Experimental Psychology Section A: Human Experimental Psychology, 1999, 52, 509-534.	2.3	13
106	Stimulus Context and View Dependence in Object Recognition. Perception, 1998, 27, 47-68.	1.2	21
107	The Effect of Depth Rotation on Object Identification. Perception, 1997, 26, 1231-1257.	1.2	50
108	Viewpoint Invariance in Object Recognition. Irish Journal of Psychology, 1992, 13, 494-507.	0.2	3
