

Barry J Campbell

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5940112/barry-j-campbell-publications-by-year.pdf>

Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

59 papers	5,405 citations	32 h-index	73 g-index
78 ext. papers	6,345 ext. citations	8 avg, IF	5.37 L-index

#	Paper	IF	Citations
59	Long-Term Iron Deficiency and Dietary Iron Excess Exacerbate Acute Dextran Sodium Sulphate-Induced Colitis and Are Associated with Significant Dysbiosis. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	2
58	Impact of Interleukin 10 Deficiency on Intestinal Epithelium Responses to Inflammatory Signals. <i>Frontiers in Immunology</i> , 2021 , 12, 690817	8.4	0
57	Inter-kingdom relationships in Crohn's disease explored using a multi-omics approach. <i>Gut Microbes</i> , 2021 , 13, 1930871	8.8	2
56	Epigenetic Modifications of the Nuclear Factor Kappa B Signalling Pathway and its Impact on Inflammatory Bowel Disease. <i>Current Pharmaceutical Design</i> , 2021 , 27, 3702-3713	3.3	3
55	The fucose-specific lectin ANL from <i>Aspergillus niger</i> possesses anti-cancer activity by inducing the intrinsic apoptosis pathway in hepatocellular and colon cancer cells. <i>Cell Biochemistry and Function</i> , 2021 , 39, 401-412	4.2	
54	Soluble Non-Starch Polysaccharides From Plantain (L.) Diminish Epithelial Impact of .. <i>Frontiers in Pharmacology</i> , 2021 , 12, 766293	5.6	
53	Review article: impact of cigarette smoking on intestinal inflammation-direct and indirect mechanisms. <i>Alimentary Pharmacology and Therapeutics</i> , 2020 , 51, 1268-1285	6.1	15
52	Using systems medicine to identify a therapeutic agent with potential for repurposing in inflammatory bowel disease. <i>DMM Disease Models and Mechanisms</i> , 2020 , 13,	4.1	3
51	Macrophage-Specific NF- κ B Activation Dynamics Can Segregate Inflammatory Bowel Disease Patients. <i>Frontiers in Immunology</i> , 2019 , 10, 2168	8.4	13
50	An Open-Format Enteroid Culture System for Interrogation of Interactions Between and the Intestinal Epithelium. <i>Frontiers in Cellular and Infection Microbiology</i> , 2019 , 9, 300	5.9	14
49	Developing a 3D intestinal epithelium model for livestock species. <i>Cell and Tissue Research</i> , 2019 , 375, 409-424	4.2	43
48	Replication of Crohn's Disease Mucosal Isolates inside Macrophages Correlates with Resistance to Superoxide and Is Dependent on Macrophage NF-kappa B Activation. <i>Pathogens</i> , 2019 , 8,	4.5	4
47	DNA extraction and amplicon production strategies deeply influence the outcome of gut mycobiome studies. <i>Scientific Reports</i> , 2019 , 9, 9328	4.9	21
46	NF- κ B2 signalling in enteroids modulates enterocyte responses to secreted factors from bone marrow-derived dendritic cells. <i>Cell Death and Disease</i> , 2019 , 10, 896	9.8	6
45	Human TNF-Luc reporter mouse: A new model to quantify inflammatory responses. <i>Scientific Reports</i> , 2019 , 9, 193	4.9	10
44	Infliximab restores colonic barrier to adherent-invasive E. coli in Crohn's disease via effects on epithelial lipid rafts. <i>Scandinavian Journal of Gastroenterology</i> , 2018 , 53, 677-684	2.4	6
43	Oral iron exacerbates colitis and influences the intestinal microbiome. <i>PLoS ONE</i> , 2018 , 13, e0202460	3.7	40

42	Importance of the alternative NF- κ B activation pathway in inflammation-associated gastrointestinal carcinogenesis. <i>American Journal of Physiology - Renal Physiology</i> , 2016 , 310, G1081-90	5.1	36
41	Killing of Escherichia coli by Crohn's Disease Monocyte-derived Macrophages and Its Enhancement by Hydroxychloroquine and Vitamin D. <i>Inflammatory Bowel Diseases</i> , 2015 , 21, 1499-510	4.5	15
40	Review article: dietary fibre-microbiota interactions. <i>Alimentary Pharmacology and Therapeutics</i> , 2015 , 42, 158-79	6.1	288
39	Analysis of clinical isolates of Helicobacter pylori in Pakistan reveals high degrees of pathogenicity and high frequencies of antibiotic resistance. <i>Helicobacter</i> , 2014 , 19, 387-99	4.9	36
38	IBD: microbiota manipulation through diet and modified bacteria. <i>Digestive Diseases</i> , 2014 , 32 Suppl 1, 18-25	3.2	15
37	Mucosal barrier, bacteria and inflammatory bowel disease: possibilities for therapy. <i>Digestive Diseases</i> , 2014 , 32, 475-83	3.2	110
36	Inflammation-associated adherent-invasive Escherichia coli are enriched in pathways for use of propanediol and iron and M-cell translocation. <i>Inflammatory Bowel Diseases</i> , 2014 , 20, 1919-32	4.5	96
35	Colonic mucosa-associated diffusely adherent afaC+ Escherichia coli expressing lpfA and pks are increased in inflammatory bowel disease and colon cancer. <i>Gut</i> , 2014 , 63, 761-70	19.2	157
34	Dietary supplementation with soluble plantain non-starch polysaccharides inhibits intestinal invasion of Salmonella Typhimurium in the chicken. <i>PLoS ONE</i> , 2014 , 9, e87658	3.7	17
33	Escherichia coli-host macrophage interactions in the pathogenesis of inflammatory bowel disease. <i>World Journal of Gastroenterology</i> , 2014 , 20, 8751-63	5.6	17
32	Soluble plantain fibre blocks adhesion and M-cell translocation of intestinal pathogens. <i>Journal of Nutritional Biochemistry</i> , 2013 , 24, 97-103	6.3	38
31	A mouse model of pathological small intestinal epithelial cell apoptosis and shedding induced by systemic administration of lipopolysaccharide. <i>DMM Disease Models and Mechanisms</i> , 2013 , 6, 1388-99	4.1	105
30	Intestinal inflammation targets cancer-inducing activity of the microbiota. <i>Science</i> , 2012 , 338, 120-3	33.3	1362
29	Lessons from diversion studies and antibacterial interventions. <i>Digestive Diseases</i> , 2012 , 30, 347-50	3.2	3
28	Bacteria in the pathogenesis of inflammatory bowel disease. <i>Biochemical Society Transactions</i> , 2011 , 39, 1067-72	5.1	35
27	Confocal laser endomicroscopy is a new imaging modality for recognition of intramucosal bacteria in inflammatory bowel disease in vivo. <i>Gut</i> , 2011 , 60, 26-33	19.2	85
26	Genetic characterization indicates that a specific subpopulation of Pseudomonas aeruginosa is associated with keratitis infections. <i>Journal of Clinical Microbiology</i> , 2011 , 49, 993-1003	9.7	63
25	Complete genome sequence of the Crohn's disease-associated adherent-invasive Escherichia coli strain HM605. <i>Journal of Bacteriology</i> , 2011 , 193, 4540	3.5	34

24	Crohn disease--associated adherent-invasive E. coli bacteria target mouse and human Peyer's patches via long polar fimbriae. <i>Journal of Clinical Investigation</i> , 2011 , 121, 966-75	15.9	181
23	Bacteria, good and bad: Host-microbiota interactions in inflammatory bowel disease. <i>Biochemist</i> , 2011 , 33, 22-25	0.5	
22	NOD2 stimulation induces autophagy in dendritic cells influencing bacterial handling and antigen presentation. <i>Nature Medicine</i> , 2010 , 16, 90-7	50.5	807
21	Translocation of Crohn's disease Escherichia coli across M-cells: contrasting effects of soluble plant fibres and emulsifiers. <i>Gut</i> , 2010 , 59, 1331-9	19.2	172
20	RNA interference: a chemist's perspective. <i>Chemical Society Reviews</i> , 2010 , 39, 4169-84	58.5	58
19	Glycosylation and Disease 2010 ,		3
18	The role of bacteria in the pathogenesis of inflammatory bowel disease. <i>Gut and Liver</i> , 2010 , 4, 295-306	4.8	73
17	A subset of mucosa-associated Escherichia coli isolates from patients with colon cancer, but not Crohn's disease, share pathogenicity islands with urinary pathogenic E. coli. <i>Microbiology (United Kingdom)</i> , 2008 , 154, 571-583	2.9	28
16	Host-bacteria interaction in inflammatory bowel disease. <i>British Medical Bulletin</i> , 2008 , 88, 95-113	5.4	36
15	Incorporation of 3'-phosphorothiolates into RNA: potential applications in RNAi. <i>Nucleic Acids Symposium Series</i> , 2008 , 319-20		2
14	Replication of Colonic Crohn's Disease Mucosal Escherichia coli Isolates within Macrophages and Their Susceptibility to Antibiotics. <i>Antimicrobial Agents and Chemotherapy</i> , 2008 , 52, 427-34	5.9	74
13	Lectin-epithelial interactions in the human colon. <i>Biochemical Society Transactions</i> , 2008 , 36, 1482-6	5.1	33
12	Characterization of epithelial IL-8 response to inflammatory bowel disease mucosal E. coli and its inhibition by mesalamine. <i>Inflammatory Bowel Diseases</i> , 2008 , 14, 162-75	4.5	65
11	Microbial mannan inhibits bacterial killing by macrophages: a possible pathogenic mechanism for Crohn's disease. <i>Gastroenterology</i> , 2007 , 133, 1487-98	13.3	56
10	Transcriptomic analysis of the sulfate starvation response of Pseudomonas aeruginosa. <i>Journal of Bacteriology</i> , 2007 , 189, 6743-50	3.5	53
9	Peanut lectin stimulates proliferation of colon cancer cells by interaction with glycosylated CD44v6 isoforms and consequential activation of c-Met and MAPK: functional implications for disease-associated glycosylation changes. <i>Glycobiology</i> , 2006 , 16, 594-601	5.8	41
8	Enhanced Escherichia coli adherence and invasion in Crohn's disease and colon cancer. <i>Gastroenterology</i> , 2004 , 127, 80-93	13.3	564
7	An N-terminal truncated form of Orp150 is a cytoplasmic ligand for the anti-proliferative mushroom Agaricus bisporus lectin and is required for nuclear localization sequence-dependent nuclear protein import. <i>Journal of Biological Chemistry</i> , 2002 , 277, 24538-45	5.4	23

6	Inflammation and colorectal cancer: IBD-associated and sporadic cancer compared. <i>Trends in Molecular Medicine</i> , 2002 , 8, 10-6	11.5	244
5	Interaction between bacterial peptides, neutrophils and goblet cells: a possible mechanism for neutrophil recruitment and goblet cell depletion in colitis. <i>Clinical Science</i> , 2001 , 101, 395-402	6.5	20
4	Altered glycosylation in inflammatory bowel disease: a possible role in cancer development. <i>Glycoconjugate Journal</i> , 2001 , 18, 851-8	3	90
3	Increasing the intra-Golgi pH of cultured LS174T goblet-differentiated cells mimics the decreased mucin sulfation and increased Thomsen-Friedenreich antigen (Gal beta1-3GalNac alpha-) expression seen in colon cancer. <i>Glycobiology</i> , 2001 , 11, 385-93	5.8	35
2	Stimulation of colonic mucin synthesis by corticosteroids and nicotine. <i>Clinical Science</i> , 1996 , 91, 359-64	6.5	52
1	Using systems medicine to identify a therapeutic agent with potential for repurposing in Inflammatory Bowel Disease		1
