

Raymond B Runyan

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5941975/raymond-b-runyan-publications-by-year.pdf>

Version: 2024-04-19

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

80
papers

4,732
citations

#	Paper	IF	Citations
80	Cartilage Oligomeric Matrix Protein, COMP may be a Better Prognostic Marker Than CEACAM5 and Correlates With Colon Cancer Molecular Subtypes, Tumor Aggressiveness and Overall Survival. <i>Journal of Surgical Research</i> , 2021 , 270, 169-177	2.5	1
79	Phosphodiesterase 9a Inhibition in Mouse Models of Diastolic Dysfunction. <i>Circulation: Heart Failure</i> , 2020 , 13, e006609	7.6	11
78	HNF4a transcription is a target of trichloroethylene toxicity in the embryonic mouse heart. <i>Environmental Sciences: Processes and Impacts</i> , 2020 , 22, 824-832	4.3	1
77	Study of the Expression Transition of Cardiac Myosin Using Polarization-Dependent SHG Microscopy. <i>Biophysical Journal</i> , 2020 , 118, 1058-1066	2.9	3
76	Guidelines and definitions for research on epithelial-mesenchymal transition. <i>Nature Reviews Molecular Cell Biology</i> , 2020 , 21, 341-352	48.7	469
75	Letter to the Editor. <i>Birth Defects Research</i> , 2019 , 111, 1234-1236	2.9	3
74	Changes in the crystallographic structures of cardiac myosin filaments detected by polarization-dependent second harmonic generation microscopy. <i>Biomedical Optics Express</i> , 2019 , 10, 3183-3195	3.5	4
73	COMP Gene Coexpresses With EMT Genes and Is Associated With Poor Survival in Colon Cancer Patients. <i>Journal of Surgical Research</i> , 2019 , 233, 297-303	2.5	14
72	Trichloroethylene perturbs HNF4a expression and activity in the developing chick heart. <i>Toxicology Letters</i> , 2018 , 285, 113-120	4.4	8
71	Runx2-I is an Early Regulator of Epithelial-Mesenchymal Cell Transition in the Chick Embryo. <i>Developmental Dynamics</i> , 2018 , 247, 542-554	2.9	12
70	Remodeling Failing Human Myocardium With Hybrid Cell/Matrix and Transmyocardial Revascularization. <i>ASAIO Journal</i> , 2018 , 64, e130-e133	3.6	1
69	A dual therapy of off-pump temporary left ventricular extracorporeal device and amniotic stem cell for cardiogenic shock. <i>Journal of Cardiothoracic Surgery</i> , 2017 , 12, 80	1.6	0
68	Cardiac Regeneration in the Human Left Ventricle After CorMatrix Implantation. <i>Annals of Thoracic Surgery</i> , 2017 , 104, e239-e241	2.7	5
67	Improved metabolism and redox state with a novel preservation solution: implications for donor lungs after cardiac death (DCD). <i>Pulmonary Circulation</i> , 2017 , 7, 494-504	2.7	2
66	Clinical outcomes meta-analysis: measuring subendocardial perfusion and efficacy of transmyocardial laser revascularization with nuclear imaging. <i>Journal of Cardiothoracic Surgery</i> , 2017 , 12, 37	1.6	5
65	Remodeling an infarcted heart: novel hybrid treatment with transmyocardial revascularization and stem cell therapy. <i>SpringerPlus</i> , 2016 , 5, 738		2
64	Biochip-based study of unidirectional mitochondrial transfer from stem cells to myocytes via tunneling nanotubes. <i>Biofabrication</i> , 2016 , 8, 015012	10.5	32

63	Dynamic Myofibrillar Remodeling in Live Cardiomyocytes under Static Stretch. <i>Scientific Reports</i> , 2016 , 6, 20674	4.9	35
62	Adipose-derived human stem/stromal cells: comparative organ specific mitochondrial bioenergy profiles. <i>SpringerPlus</i> , 2016 , 5, 2057		4
61	Endosomal regulation of contact inhibition through the AMOT:YAP pathway. <i>Molecular Biology of the Cell</i> , 2015 , 26, 2673-84	3.5	16
60	Environmental Sensitivity to Trichloroethylene (TCE) in the Developing Heart. <i>Molecular and Integrative Toxicology</i> , 2014 , 153-169	0.5	2
59	Low-dose trichloroethylene alters cytochrome P450-2C subfamily expression in the developing chick heart. <i>Cardiovascular Toxicology</i> , 2013 , 13, 77-84	3.4	18
58	Olfactomedin-1 activity identifies a cell invasion checkpoint during epithelial-mesenchymal transition in the chick embryonic heart. <i>DMM Disease Models and Mechanisms</i> , 2013 , 6, 632-42	4.1	18
57	Myosin filament assembly onto myofibrils in live neonatal cardiomyocytes observed by TPEF-SHG microscopy. <i>Cardiovascular Research</i> , 2013 , 97, 262-70	9.9	26
56	Laser patterning for the study of MSC cardiogenic differentiation at the single-cell level. <i>Light: Science and Applications</i> , 2013 , 2,	16.7	24
55	Mesenchymal stem cell-cardiomyocyte interactions under defined contact modes on laser-patterned biochips. <i>PLoS ONE</i> , 2013 , 8, e56554	3.7	33
54	Transforming growth factor beta signaling in adult cardiovascular diseases and repair. <i>Cell and Tissue Research</i> , 2012 , 347, 203-23	4.2	69
53	4D imaging of embryonic chick hearts by streak-mode Fourier domain optical coherence tomography 2012 ,		3
52	Collagen gel analysis of epithelial-mesenchymal transition in the embryo heart: an in vitro model system for the analysis of tissue interaction, signal transduction, and environmental effects. <i>Birth Defects Research Part C: Embryo Today Reviews</i> , 2011 , 93, 298-311		14
51	Out of the desert: the 4th TEMTIA Meeting on new advances in development, fibrosis and cancer. <i>Cells Tissues Organs</i> , 2011 , 193, 4-7	2.1	0
50	Arsenic exposure perturbs epithelial-mesenchymal cell transition and gene expression in a collagen gel assay. <i>Toxicological Sciences</i> , 2010 , 116, 273-85	4.4	14
49	Molecular Regulation of Cushion Morphogenesis 2010 , 363-387		8
48	Exposure to low-dose trichloroethylene alters shear stress gene expression and function in the developing chick heart. <i>Cardiovascular Toxicology</i> , 2010 , 10, 100-7	3.4	23
47	Gene expression profiling in the fetal cardiac tissue after folate and low-dose trichloroethylene exposure. <i>Birth Defects Research Part A: Clinical and Molecular Teratology</i> , 2010 , 88, 111-27		26
46	Ligand-specific function of transforming growth factor beta in epithelial-mesenchymal transition in heart development. <i>Developmental Dynamics</i> , 2009 , 238, 431-42	2.9	93

45	Trichloroethylene disrupts cardiac gene expression and calcium homeostasis in rat myocytes. <i>Toxicological Sciences</i> , 2008 , 104, 135-43	4.4	25
44	Differential growth and multicellular villi direct proepicardial translocation to the developing mouse heart. <i>Developmental Dynamics</i> , 2008 , 237, 145-52	2.9	42
43	Multiple transforming growth factor-beta isoforms and receptors function during epithelial-mesenchymal cell transformation in the embryonic heart. <i>Cells Tissues Organs</i> , 2007 , 185, 146-56	3.1	119
42	Endoglin and Alk5 regulate epithelial-mesenchymal transformation during cardiac valve formation. <i>Developmental Biology</i> , 2007 , 304, 420-32	3.1	58
41	Transfection of cells attached to selected cell based biosensor surfaces. <i>Life Sciences</i> , 2007 , 80, 1395-402	2.8	2
40	TGF beta-mediated RhoA expression is necessary for epithelial-mesenchymal transition in the embryonic chick heart. <i>Developmental Dynamics</i> , 2006 , 235, 1589-98	2.9	64
39	Latrophilin-2 is a novel component of the epithelial-mesenchymal transition within the atrioventricular canal of the embryonic chicken heart. <i>Developmental Dynamics</i> , 2006 , 235, 3213-21	2.9	30
38	Frzb modulates Wnt-9a-mediated beta-catenin signaling during avian atrioventricular cardiac cushion development. <i>Developmental Biology</i> , 2005 , 278, 35-48	3.1	63
37	Cell biology of cardiac cushion development. <i>International Review of Cytology</i> , 2005 , 243, 287-335		279
36	Effects of trichloroethylene and its metabolite trichloroacetic acid on the expression of vimentin in the rat H9c2 cell line. <i>Cell Biology and Toxicology</i> , 2005 , 21, 83-95	7.4	13
35	Epithelial-Mesenchymal Transformation in the Embryonic Heart 2005 , 40-55		3
34	TGF-beta1, -beta2 and -beta3 cooperate to facilitate tubulogenesis in the explanted quail heart. <i>Journal of Vascular Research</i> , 2004 , 41, 491-8	1.9	23
33	Trichloroethylene effects on gene expression during cardiac development. <i>Birth Defects Research Part A: Clinical and Molecular Teratology</i> , 2003 , 67, 488-95		33
32	Temporal and distinct TGFbeta ligand requirements during mouse and avian endocardial cushion morphogenesis. <i>Developmental Biology</i> , 2002 , 248, 170-81	3.1	242
31	TGFbeta Type III and TGFbeta Type II receptors have distinct activities during epithelial-mesenchymal cell transformation in the embryonic heart. <i>Developmental Dynamics</i> , 2001 , 221, 454-9	2.9	42
30	Transforming Growth Factor- β Signal Transduction in the Atrioventricular Canal During Heart Development 2001 , 201-219		1
29	Trichloroethylene inhibits development of embryonic heart valve precursors in vitro. <i>Toxicological Sciences</i> , 2000 , 53, 109-17	4.4	44
28	Slug is an essential target of TGFbeta2 signaling in the developing chicken heart. <i>Developmental Biology</i> , 2000 , 223, 91-102	3.1	145

27	Epithelial-mesenchymal transformation in the embryonic heart is mediated through distinct pertussis toxin-sensitive and TGFbeta signal transduction mechanisms. <i>Developmental Dynamics</i> , 1999 , 214, 81-91	2.9	51
26	Requirement of type III TGF-beta receptor for endocardial cell transformation in the heart. <i>Science</i> , 1999 , 283, 2080-2	33.3	341
25	Utilization of antisense oligodeoxynucleotides with embryonic tissues in culture. <i>Methods</i> , 1999 , 18, 316-21	4.6	8
24	TGFbeta2 and TGFbeta3 have separate and sequential activities during epithelial-mesenchymal cell transformation in the embryonic heart. <i>Developmental Biology</i> , 1999 , 208, 530-45	3.1	187
23	Slug is a mediator of epithelial-mesenchymal cell transformation in the developing chicken heart. <i>Developmental Biology</i> , 1999 , 212, 243-54	3.1	63
22	Production of the transforming growth factor-beta binding protein endoglin is regulated during chick heart development. <i>Developmental Dynamics</i> , 1998 , 213, 237-47	2.9	20
21	Morphogenetic mechanisms of epithelial tubulogenesis: MDCK cell polarity is transiently rearranged without loss of cell-cell contact during scatter factor/hepatocyte growth factor-induced tubulogenesis. <i>Developmental Biology</i> , 1998 , 204, 64-79	3.1	193
20	Antibodies to the Type II TGFbeta receptor block cell activation and migration during atrioventricular cushion transformation in the heart. <i>Developmental Biology</i> , 1996 , 174, 248-57	3.1	117
19	Mechanisms of cell transformation in the embryonic heart. <i>Annals of the New York Academy of Sciences</i> , 1995 , 752, 317-30	6.5	33
18	Expression of complete keratin filaments in mouse L cells augments cell migration and invasion. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1993 , 90, 4261-5	11.5	144
17	TGF-beta 3-mediated tissue interaction during embryonic heart development. <i>Molecular Reproduction and Development</i> , 1992 , 32, 152-9	2.6	68
16	Sense and antisense TGF beta 3 mRNA levels correlate with cardiac valve induction. <i>Developmental Dynamics</i> , 1992 , 193, 340-5	2.9	70
15	Purification and characterization of avian beta 1,4 galactosyltransferase: comparison with the mammalian enzyme. <i>Glycobiology</i> , 1991 , 1, 211-21	5.8	12
14	Epithelial-mesenchymal transformation of embryonic cardiac endothelial cells is inhibited by a modified antisense oligodeoxynucleotide to transforming growth factor beta 3. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1991 , 88, 1516-20	11.5	231
13	Tissue Interaction and Signal Transduction in the Atrioventricular Canal of the Embryonic Heart. <i>Annals of the New York Academy of Sciences</i> , 1990 , 588, 442-443	6.5	8
12	A comparison of fibronectin, laminin, and galactosyltransferase adhesion mechanisms during embryonic cardiac mesenchymal cell migration in vitro. <i>Developmental Biology</i> , 1990 , 140, 401-12	3.1	49
11	Epithelial-mesenchymal cell transformation in the embryonic heart can be mediated, in part, by transforming growth factor beta. <i>Developmental Biology</i> , 1989 , 134, 392-401	3.1	247
10	Functionally distinct laminin receptors mediate cell adhesion and spreading: the requirement for surface galactosyltransferase in cell spreading. <i>Journal of Cell Biology</i> , 1988 , 107, 1863-71	7.3	108

9	Cell surface galactosyltransferase as a recognition molecule during development. <i>Molecular and Cellular Biochemistry</i> , 1986 , 72, 141-51	4.2	32
8	Evidence for a novel enzymatic mechanism of neural crest cell migration on extracellular glycoconjugate matrices. <i>Journal of Cell Biology</i> , 1986 , 102, 432-41	7.3	112
7	Protein extracts from early embryonic hearts initiate cardiac endothelial cytodifferentiation. <i>Developmental Biology</i> , 1985 , 112, 414-26	3.1	122
6	Invasion of mesenchyme into three-dimensional collagen gels: a regional and temporal analysis of interaction in embryonic heart tissue. <i>Developmental Biology</i> , 1983 , 95, 108-14	3.1	229
5	PROTEINS OF THE EMBRYONIC EXTRACELLULAR MATRIX: REGIONAL AND TEMPORAL CORRELATION WITH TISSUE INTERACTION IN THE HEART ¹¹ Supported by NIH grant HL-19136 to R.R.M. 1982 , 153-157		3
4	A freeze-fracture study of avian epiphyseal cartilage differentiation. <i>The Anatomical Record</i> , 1981 , 199, 449-57		24
3	An in situ demonstration of self-recognition in gorgonians. <i>Developmental and Comparative Immunology</i> , 1979 , 3, 591-7	3.2	11
2	Correlation of freeze-fracture and scanning electron microscopy of epiphyseal chondrocytes. <i>Calcified Tissue Research</i> , 1978 , 26, 237-41		14
1	Indium tin oxide electrodes for cell-based biosensors		1
