CADI D PATON

#	Article	IF	CITATIONS
1	Caffeine metabolites are associated with different forms of caffeine supplementation and with perceived exertion during endurance exercise. Biology of Sport, 2021, 38, 261-267.	1.7	4
2	A comparison of acute glycaemic responses to accumulated or single bout walking exercise in apparently healthy, insufficiently active adults. Journal of Science and Medicine in Sport, 2020, 23, 902-907.	0.6	9
3	The Effects of Different Forms of Caffeine Supplement on 5-km Running Performance. International Journal of Sports Physiology and Performance, 2020, 15, 390-394.	1.1	9
4	A Comparison of Different Prerace Warm-Up Strategies on 1-km Cycling Time-Trial Performance. International Journal of Sports Physiology and Performance, 2020, 15, 1109-1116.	1.1	1
5	Occlusion Training During Specific Futsal Training Improves Aspects of Physiological and Physical Performance. Journal of Sports Science and Medicine, 2020, 19, 374-382.	0.7	7
6	Effects of Blood Flow Restriction and Exercise Intensity on Aerobic, Anaerobic, and Muscle Strength Adaptations in Physically Active Collegiate Women. Frontiers in Physiology, 2019, 10, 810.	1.3	20
7	Blood Flow Restriction During Futsal Training Increases Muscle Activation and Strength. Frontiers in Physiology, 2019, 10, 614.	1.3	23
8	Validity and Reliability of the PowerCal Device for Estimating Power Output During Cycling Time Trials. Journal of Strength and Conditioning Research, 2017, 31, 227-232.	1.0	8
9	The effects of muscle blood flow restriction during running training on measures of aerobic capacity and run time to exhaustion. European Journal of Applied Physiology, 2017, 117, 2579-2585.	1.2	31
10	Reproducibility and validity of the PowerCal device for estimating power output during sprints in well-trained cyclists. Isokinetics and Exercise Science, 2015, 23, 127-132.	0.2	3
11	Effects of caffeine chewing gum on race performance and physiology in male and female cyclists. Journal of Sports Sciences, 2015, 33, 1076-1083.	1.0	47
12	Effects of a Seven Day Overload-Period of High-Intensity Training on Performance and Physiology of Competitive Cyclists. PLoS ONE, 2014, 9, e115308.	1.1	16
13	Validity and reliability of a new field test (Carminatti's test) for soccer players compared with laboratory-based measures. Journal of Sports Sciences, 2011, 29, 1621-1628.	1.0	47
14	Caffeinated chewing gum increases repeated sprint performance and augments increases in testosterone in competitive cyclists. European Journal of Applied Physiology, 2010, 110, 1243-1250.	1.2	67
15	Acute signalling responses to intense endurance training commenced with low or normal muscle glycogen. Experimental Physiology, 2010, 95, 351-358.	0.9	95
16	The Effect of Glycerol Ingestion on Performance During Simulated Multisport Activity. Research Quarterly for Exercise and Sport, 2010, 81, 233-238.	0.8	1
17	The effects of increased absolute training intensity on adaptations to endurance exercise training. Journal of Science and Medicine in Sport, 2009, 12, 485-489.	0.6	19
18	Supplementing Regular Training With Short-Duration Sprint-Agility Training Leads to a Substantial Increase in Repeated Sprint-Agility Performance With National Level Badminton Players. Journal of Strength and Conditioning Research, 2009, 23, 1477-1481.	1.0	24

CARL D PATON

#	Article	IF	CITATIONS
19	Effects of Low- vs. High-Cadence Interval Training on Cycling Performance. Journal of Strength and Conditioning Research, 2009, 23, 1758-1763.	1.0	16
20	Effects of Shoe Cleat Position on Physiology and Performance of Competitive Cyclists. International Journal of Sports Physiology and Performance, 2009, 4, 517-523.	1.1	6
21	The Effects of EGCG on Fat Oxidation and Endurance Performance in Male Cyclists. International Journal of Sport Nutrition and Exercise Metabolism, 2009, 19, 624-644.	1.0	45
22	Caffeine has a small effect on 5-km running performance of well-trained and recreational runners. Journal of Science and Medicine in Sport, 2008, 11, 231-233.	0.6	48
23	The effects of interval–exercise duration and intensity on oxygen consumption during treadmill running. Journal of Science and Medicine in Sport, 2008, 11, 287-290.	0.6	10
24	Skeletal muscle adaptation and performance responses to once a day versus twice every second day endurance training regimens. Journal of Applied Physiology, 2008, 105, 1462-1470.	1.2	236
25	Effect of High-Intensity Resistance Training on Performance of Competitive Distance Runners. International Journal of Sports Physiology and Performance, 2006, 1, 40-49.	1.1	21
26	Six minute walk distance is greater when performed in a group than alone. British Journal of Sports Medicine, 2006, 40, 876-877.	3.1	18
27	Variation in performance of elite cyclists from race to race. European Journal of Sport Science, 2006, 6, 25-31.	1.4	145
28	Effects of High- vs Low-Cadence Interval Training on Physiology and Performance of Competitive Cyclists. Medicine and Science in Sports and Exercise, 2006, 38, S490.	0.2	0
29	Seasonal changes in power of competitive cyclists: Implications for monitoring performance. Journal of Science and Medicine in Sport, 2005, 8, 375-381.	0.6	17
30	Combining Explosive and High-Resistance Training Improves Performance in Competitive Cyclists. Journal of Strength and Conditioning Research, 2005, 19, 826.	1.0	33
31	Altitude Tents Do Not Impair Performance Response To Short-term High-intensity Cycling Training. Medicine and Science in Sports and Exercise, 2005, 37, S294.	0.2	1
32	Tests of Cycling Performance. Sports Medicine, 2002, 32, 953-954.	3.1	68
33	Tests of Cycling Performance. Sports Medicine, 2001, 31, 489-496.	3.1	116
34	Little effect of caffeine ingestion on repeated sprints in team-sport athletes. Medicine and Science in Sports and Exercise, 2001, 33, 822-825.	0.2	89
