citing authors

#	ARTICLE	IF	CITATIONS
1	The statistical analysis of crash-frequency data: A review and assessment of methodological alternatives. <i>Transportation Research, Part A: Policy and Practice</i> , 2010, 44, 291-305.	2.0	809
2	The statistical analysis of highway crash-injury severities: A review and assessment of methodological alternatives. <i>Accident Analysis and Prevention</i> , 2011, 43, 1666-1676.	3.0	753
3	Poisson, Poisson-gamma and zero-inflated regression models of motor vehicle crashes: balancing statistical fit and theory. <i>Accident Analysis and Prevention</i> , 2005, 37, 35-46.	3.0	601
4	Modeling Traffic Crash-Flow Relationships for Intersections: Dispersion Parameter, Functional Form, and Bayes Versus Empirical Bayes Methods. <i>Transportation Research Record</i> , 2003, 1840, 31-40.	1.0	298
5	Modeling motor vehicle crashes using Poisson-gamma models: Examining the effects of low sample mean values and small sample size on the estimation of the fixed dispersion parameter. <i>Accident Analysis and Prevention</i> , 2006, 38, 751-766.	3.0	285
6	Predicting motor vehicle crashes using Support Vector Machine models. <i>Accident Analysis and Prevention</i> , 2008, 40, 1611-1618.	3.0	245
7	Comparing three commonly used crash severity models on sample size requirements: Multinomial logit, ordered probit and mixed logit models. <i>Analytic Methods in Accident Research</i> , 2014, 1, 72-85.	4.7	235
8	Multivariate Poisson-Lognormal Models for Jointly Modeling Crash Frequency by Severity. <i>Transportation Research Record</i> , 2007, 2019, 1-6.	1.0	231
9	Safety Effect of Roundabout Conversions in the United States: Empirical Bayes Observational Before-After Study. <i>Transportation Research Record</i> , 2001, 1751, 1-8.	1.0	212
10	Predicting motor vehicle collisions using Bayesian neural network models: An empirical analysis. <i>Accident Analysis and Prevention</i> , 2007, 39, 922-933.	3.0	191
11	Accident Prediction Models With and Without Trend: Application of the Generalized Estimating Equations Procedure. <i>Transportation Research Record</i> , 2000, 1717, 102-108.	1.0	183
12	Application of the Conwayâ€œMaxwellâ€œPoisson generalized linear model for analyzing motor vehicle crashes. <i>Accident Analysis and Prevention</i> , 2008, 40, 1123-1134.	3.0	179
13	Further notes on the application of zero-inflated models in highway safety. <i>Accident Analysis and Prevention</i> , 2007, 39, 53-57.	3.0	177
14	Effects of low sample mean values and small sample size on the estimation of the fixed dispersion parameter of Poisson-gamma models for modeling motor vehicle crashes: A Bayesian perspective. <i>Safety Science</i> , 2008, 46, 751-770.	2.6	172
15	Modeling crash-flow-density and crash-flow-V/C ratio relationships for rural and urban freeway segments. <i>Accident Analysis and Prevention</i> , 2005, 37, 185-199.	3.0	161
16	Application of finite mixture models for vehicle crash data analysis. <i>Accident Analysis and Prevention</i> , 2009, 41, 683-691.	3.0	140
17	Investigation of Effects of Underreporting Crash Data on Three Commonly Used Traffic Crash Severity Models. <i>Transportation Research Record</i> , 2011, 2241, 51-58.	1.0	115
18	The negative binomial-Lindley generalized linear model: Characteristics and application using crash data. <i>Accident Analysis and Prevention</i> , 2012, 45, 258-265.	3.0	102

#	ARTICLE	IF	CITATIONS
19	Re-visiting crash–speed relationships: A new perspective in crash modelling. <i>Accident Analysis and Prevention</i> , 2016, 86, 173-185.	3.0	101
20	Investigating the effect of modeling single-vehicle and multi-vehicle crashes separately on confidence intervals of Poisson–gamma models. <i>Accident Analysis and Prevention</i> , 2010, 42, 1273-1282.	3.0	100
21	Calibration and Transferability of Accident Prediction Models for Urban Intersections. <i>Transportation Research Record</i> , 2002, 1784, 57-64.	1.0	94
22	Development of Accident Modification Factors for Rural Frontage Road Segments in Texas. <i>Transportation Research Record</i> , 2007, 2023, 20-27.	1.0	89
23	Extension of the Application of Conway-Maxwell-Poisson Models: Analyzing Traffic Crash Data Exhibiting Underdispersion. <i>Risk Analysis</i> , 2010, 30, 1268-1276.	1.5	89
24	Investigating the effects of the fixed and varying dispersion parameters of Poisson-gamma models on empirical Bayes estimates. <i>Accident Analysis and Prevention</i> , 2008, 40, 1441-1457.	3.0	84
25	Bayesian mixture modeling approach to account for heterogeneity in speed data. <i>Transportation Research Part B: Methodological</i> , 2010, 44, 662-673.	2.8	74
26	The negative binomial–Lindley distribution as a tool for analyzing crash data characterized by a large amount of zeros. <i>Accident Analysis and Prevention</i> , 2011, 43, 1738-1742.	3.0	72
27	Estimating the safety performance of urban road transportation networks. <i>Accident Analysis and Prevention</i> , 2004, 36, 609-620.	3.0	69
28	Application of finite mixture of negative binomial regression models with varying weight parameters for vehicle crash data analysis. <i>Accident Analysis and Prevention</i> , 2013, 50, 1042-1051.	3.0	69
29	Using geographical information systems to organize police patrol routes effectively by grouping hotspots of crash and crime data. <i>Journal of Transport Geography</i> , 2013, 30, 138-148.	2.3	65
30	Bias properties of Bayesian statistics in finite mixture of negative binomial regression models in crash data analysis. <i>Accident Analysis and Prevention</i> , 2010, 42, 741-749.	3.0	63
31	Empirical Bayes estimates of finite mixture of negative binomial regression models and its application to highway safety. <i>Journal of Applied Statistics</i> , 2018, 45, 1652-1669.	0.6	55
32	Analysis of crash severities using nested logit model—Accounting for the underreporting of crashes. <i>Accident Analysis and Prevention</i> , 2012, 45, 646-653.	3.0	52
33	Impacts of Autonomous Vehicles on Public Health: A Conceptual Model and Policy Recommendations. <i>Sustainable Cities and Society</i> , 2020, 63, 102457.	5.1	51
34	A semi-nonparametric Poisson regression model for analyzing motor vehicle crash data. <i>PLoS ONE</i> , 2018, 13, e0197338.	1.1	48
35	A semiparametric negative binomial generalized linear model for modeling over-dispersed count data with a heavy tail: Characteristics and applications to crash data. <i>Accident Analysis and Prevention</i> , 2016, 91, 10-18.	3.0	46
36	Investigating the safety and operational benefits of mixed traffic environments with different automated vehicle market penetration rates in the proximity of a driveway on an urban arterial. <i>Accident Analysis and Prevention</i> , 2021, 152, 105982.	3.0	46

#	ARTICLE	IF	CITATIONS
37	Quantifying the automated vehicle safety performance: A scoping review of the literature, evaluation of methods, and directions for future research. <i>Accident Analysis and Prevention</i> , 2021, 152, 106003.	3.0	46
38	The Poisson inverse Gaussian (PIG) generalized linear regression model for analyzing motor vehicle crash data. <i>Journal of Transportation Safety and Security</i> , 2016, 8, 18-35.	1.1	44
39	Calibration of Predictive Models for Estimating Safety of Ramp Design Configurations. , 0, .		44
40	Characterizing the Performance of the Conwayâ€Maxwell Poisson Generalized Linear Model. <i>Risk Analysis</i> , 2012, 32, 167-183.	1.5	41
41	The Poissonâ€Weibull generalized linear model for analyzing motor vehicle crash data. <i>Safety Science</i> , 2013, 54, 38-42.	2.6	41
42	Application of finite mixture models for analysing freeway incident clearance time. <i>Transportmetrica A: Transport Science</i> , 2016, 12, 99-115.	1.3	40
43	Developing a Random Parameters Negative Binomial-Lindley Model to analyze highly over-dispersed crash count data. <i>Analytic Methods in Accident Research</i> , 2018, 18, 33-44.	4.7	40
44	Analyzing different functional forms of the varying weight parameter for finite mixture of negative binomial regression models. <i>Analytic Methods in Accident Research</i> , 2014, 1, 39-52.	4.7	38
45	Calibration of Predictive Models for Estimating Safety of Ramp Design Configurations. <i>Transportation Research Record</i> , 2005, 1908, 88-95.	1.0	37
46	Finite mixture modeling for vehicle crash data with application to hotspot identification. <i>Accident Analysis and Prevention</i> , 2014, 71, 319-326.	3.0	37
47	Development of Accident Modification Factors for Rural Frontage Road Segments in Texas Using Generalized Additive Models. <i>Journal of Transportation Engineering</i> , 2011, 137, 74-83.	0.9	36
48	Comparison of Sichel and Negative Binomial Models in Estimating Empirical Bayes Estimates. <i>Transportation Research Record</i> , 2013, 2392, 11-21.	1.0	36
49	Examination of Methods to Estimate Crash Counts by Collision Type. <i>Transportation Research Record</i> , 2010, 2165, 12-20.	1.0	35
50	Effects of geometry and pavement friction on horizontal curve crash frequency. <i>Journal of Transportation Safety and Security</i> , 2019, 11, 167-188.	1.1	35
51	Examining the effects of site selection criteria for evaluating the effectiveness of traffic safety countermeasures. <i>Accident Analysis and Prevention</i> , 2012, 47, 52-63.	3.0	34
52	Modeling over-dispersed crash data with a long tail: Examining the accuracy of the dispersion parameter in Negative Binomial models. <i>Analytic Methods in Accident Research</i> , 2015, 5-6, 1-16.	4.7	33
53	Exploring the application of the Negative Binomialâ€Generalized Exponential model for analyzing traffic crash data with excess zeros. <i>Analytic Methods in Accident Research</i> , 2015, 7, 29-36.	4.7	33
54	Sample-size guidelines for recalibrating crash prediction models: Recommendations for the highway safety manual. <i>Accident Analysis and Prevention</i> , 2016, 93, 160-168.	3.0	33

#	ARTICLE	IF	CITATIONS
55	Effects of Varying Dispersion Parameter of Poisson-Gamma Models on Estimation of Confidence Intervals of Crash Prediction Models. <i>Transportation Research Record</i> , 2008, 2061, 46-54.	1.0	32
56	Impact of Shoulder Width and Median Width on Safety. , 0, , .		31
57	A caution about using deviance information criterion while modeling traffic crashes. <i>Safety Science</i> , 2014, 62, 495-498.	2.6	30
58	Multilevel Dirichlet process mixture analysis of railway grade crossing crash data. <i>Analytic Methods in Accident Research</i> , 2016, 9, 27-43.	4.7	30
59	Estimating the safety performance of urban intersections in Lisbon, Portugal. <i>Safety Science</i> , 2012, 50, 1732-1739.	2.6	29
60	A strategy to reduce older driver injuries at intersections using more accommodating roundabout design practices. <i>Accident Analysis and Prevention</i> , 2007, 39, 427-432.	3.0	28
61	Horizontal Curve Accident Modification Factor with Consideration of Driveway Density on Rural Four-Lane Highways in Texas. <i>Journal of Transportation Engineering</i> , 2010, 136, 827-835.	0.9	28
62	Validation of Crash Modification Factors Derived from Cross-Sectional Studies with Regression Models. <i>Transportation Research Record</i> , 2015, 2514, 88-96.	1.0	27
63	Finite mixture modeling approach for developing crash modification factors in highway safety analysis. <i>Accident Analysis and Prevention</i> , 2016, 97, 274-287.	3.0	27
64	Developing Guidelines for Median Barrier Installation. <i>Transportation Research Record</i> , 2005, 1904, 2-19.	1.0	26
65	How to Incorporate Accident Severity and Vehicle Occupancy into the Hot Spot Identification Process?. <i>Transportation Research Record</i> , 2009, 2102, 53-60.	1.0	25
66	Evaluating the Effects of Freeway Design Elements on Safety. <i>Transportation Research Record</i> , 2010, 2195, 58-69.	1.0	25
67	Bayesian methodology to estimate and update safety performance functions under limited data conditions: A sensitivity analysis. <i>Accident Analysis and Prevention</i> , 2014, 64, 41-51.	3.0	25
68	Comparison of Sichel and Negative Binomial Models in Hot Spot Identification. <i>Transportation Research Record</i> , 2014, 2460, 107-116.	1.0	25
69	Analyzing Different Parameterizations of the Varying Dispersion Parameter as a Function of Segment Length. <i>Transportation Research Record</i> , 2009, 2103, 108-118.	1.0	24
70	Bayesian road safety analysis: Incorporation of past evidence and effect of hyper-prior choice. <i>Journal of Safety Research</i> , 2013, 46, 31-40.	1.7	24
71	Accident Modification Factors for Medians on Freeways and Multilane Rural Highways in Texas. <i>Transportation Research Record</i> , 2008, 2083, 62-71.	1.0	23
72	Examining Application of Aggregated and Disaggregated Poisson-Gamma Models Subjected to Low Sample Mean Bias. <i>Transportation Research Record</i> , 2009, 2136, 1-10.	1.0	23

#	ARTICLE	IF	CITATIONS
73	Application of Accident Prediction Models for Computation of Accident Risk on Transportation Networks. Transportation Research Record, 2002, 1784, 17-26.	1.0	22
74	Estimating Dispersion Parameter of Negative Binomial Distribution for Analysis of Crash Data. Transportation Research Record, 2007, 2019, 15-21.	1.0	22
75	Differences in the Performance of Safety Performance Functions Estimated for Total Crash Count and for Crash Count by Crash Type. Transportation Research Record, 2009, 2102, 115-123.	1.0	22
76	Adjustment for Maximum Likelihood Estimate of Negative Binomial Dispersion Parameter. Transportation Research Record, 2008, 2061, 9-19.	1.0	21
77	Identifying Hot Spots by Modeling Single-Vehicle and Multivehicle Crashes Separately. Transportation Research Record, 2010, 2147, 97-104.	1.0	21
78	A segment level analysis of multi-vehicle motorcycle crashes in Ohio using Bayesian multi-level mixed effects models. Safety Science, 2014, 66, 47-53.	2.6	21
79	Evaluating the double Poisson generalized linear model. Accident Analysis and Prevention, 2013, 59, 497-505.	3.0	20
80	Examining driver distraction in the context of driving speed: An observational study using disruptive technology and naturalistic data. Accident Analysis and Prevention, 2021, 153, 105983.	3.0	20
81	Examining the influence of link function misspecification in conventional regression models for developing crash modification factors. Accident Analysis and Prevention, 2017, 102, 123-135.	3.0	19
82	Developing Guidelines for Median Barrier Installation: Benefitâ€‘Cost Analysis with Texas Data. , 0, .		19
83	Effect of Roadside Features on Single-Vehicle Roadway Departure Crashes on Rural Two-Lane Roads. Transportation Research Record, 2012, 2309, 21-29.	1.0	18
84	A methodology to design heuristics for model selection based on the characteristics of data: Application to investigate when the Negative Binomial Lindley (NB-L) is preferred over the Negative Binomial (NB). Accident Analysis and Prevention, 2017, 107, 186-194.	3.0	18
85	Application of different negative binomial parameterizations to develop safety performance functions for non-federal aid system roads. Accident Analysis and Prevention, 2021, 156, 106103.	3.0	18
86	Does Separating Trucks from Other Traffic Improve Overall Safety?. Transportation Research Record, 2005, 1922, 156-166.	1.0	17
87	Application of Latent Class Growth Model to Longitudinal Analysis of Traffic Crashes. Transportation Research Record, 2011, 2236, 102-109.	1.0	17
88	Methodology for estimating the variance and confidence intervals for the estimate of the product of baseline models and AMFs. Accident Analysis and Prevention, 2008, 40, 1013-1017.	3.0	16
89	Environmentally Conscious Highway Design for Crest Vertical Curves. Transportation Research Record, 2012, 2270, 96-106.	1.0	16
90	Bayesian Poisson hierarchical models for crash data analysis: Investigating the impact of model choice on site-specific predictions. Accident Analysis and Prevention, 2018, 117, 181-195.	3.0	16

#	ARTICLE	IF	CITATIONS
91	Examination of Crash Variances Estimated by Poisson-Gamma and Conway-Maxwell-Poisson Models. Transportation Research Record, 2011, 2241, 59-67.	1.0	15
92	The Conway-Maxwell-Poisson model for analyzing crash data. Applied Stochastic Models in Business and Industry, 2012, 28, 122-127.	0.9	15
93	Applying the Generalized Waring model for investigating sources of variance in motor vehicle crash analysis. Accident Analysis and Prevention, 2014, 73, 20-26.	3.0	15
94	A Monte-Carlo simulation analysis for evaluating the severity distribution functions (SDFs) calibration methodology and determining the minimum sample-size requirements. Accident Analysis and Prevention, 2017, 98, 303-311.	3.0	15
95	Toward a crowdsourcing solution to identify high-risk highway segments through mining driving jerks. Accident Analysis and Prevention, 2021, 155, 106101.	3.0	15
96	Analysis of crash injury severity on two trans-European transport network corridors in Spain using discrete-choice models and random forests. Traffic Injury Prevention, 2020, 21, 228-233.	0.6	14
97	Comparison of Application of Product of Baseline Models and Accident-Modification Factors and Models with Covariates: Predicted Mean Values and Variance. Transportation Research Record, 2010, 2147, 113-122.	1.0	13
98	Investigating Peltzman effects in adopting mandatory seat belt laws in the US: Evidence from non-occupant fatalities. Transport Policy, 2015, 44, 58-64.	3.4	12
99	Developing Crash Modification Factors for Horizontal Curves on Rural Two-Lane Undivided Highways Using a Cross-Sectional Study. Transportation Research Record, 2017, 2636, 53-61.	1.0	12
100	Derivation of the Empirical Bayesian method for the Negative Binomial-Lindley generalized linear model with application in traffic safety. Accident Analysis and Prevention, 2022, 170, 106638.	3.0	12
101	Development of a Procedure for Estimating Expected Safety Effects of a Contemplated Traffic Signal Installation. Transportation Research Record, 2003, 1840, 96-103.	1.0	11
102	A procedure to determine when safety performance functions should be recalibrated. Journal of Transportation Safety and Security, 2017, 9, 457-469.	1.1	11
103	Characteristics-based heuristics to select a logical distribution between the Poisson-gamma and the Poisson-lognormal for crash data modelling. Transportmetrica A: Transport Science, 2019, 15, 1791-1803.	1.3	11
104	Extension of Negative Binomial GARCH Model. Transportation Research Record, 2012, 2279, 31-39.	1.0	10
105	Goodness-of-fit testing for accident models with low means. Accident Analysis and Prevention, 2013, 61, 78-86.	3.0	10
106	Crash data modeling with a generalized estimator. Accident Analysis and Prevention, 2018, 117, 340-345.	3.0	10
107	Environmentally Conscious Highway Design for Vertical Grades. Transportation Research Record, 2013, 2341, 53-65.	1.0	9
108	Exploring the Need for Region-Specific Calibration Factors. Transportation Research Record, 2017, 2636, 73-79.	1.0	9

#	ARTICLE	IF	CITATIONS
109	Estimating the safety impacts in before-after studies using the Naïve Adjustment Method. <i>Transportmetrica A: Transport Science</i> , 2017, 13, 915-931.	1.3	9
110	A promising example of smart policing: A cross-national study of the effectiveness of a data-driven approach to crime and traffic safety. <i>Case Studies on Transport Policy</i> , 2019, 7, 761-771.	1.1	9
111	Generalized criteria for evaluating hotspot identification methods. <i>Accident Analysis and Prevention</i> , 2020, 145, 105684.	3.0	9
112	Use of Expert Panels in Highway Safety. <i>Transportation Research Record</i> , 2009, 2102, 101-107.	1.0	9
113	Application of the Hyper-Poisson Generalized Linear Model for Analyzing Motor Vehicle Crashes. <i>Risk Analysis</i> , 2015, 35, 919-930.	1.5	8
114	Applying the colocation quotient index to crash severity analyses. <i>Accident Analysis and Prevention</i> , 2020, 135, 105368.	3.0	8
115	Effects of Sample Size on Goodness-of-Fit Statistic and Confidence Intervals of Crash Prediction Models Subjected to Low Sample Mean Values. , 0, .		8
116	Evaluating alternative variations of Negative Binomial-Lindley distribution for modelling crash data. <i>Transportmetrica A: Transport Science</i> , 2023, 19, .	1.3	8
117	Evaluating Safety Effects of Daylight Savings Time on Fatal and Nonfatal Injury Crashes in Texas. <i>Transportation Research Record</i> , 2006, 1953, 147-155.	1.0	7
118	Feasibility of Landfill Gas as a Liquefied Natural Gas Fuel Source for Refuse Trucks. <i>Journal of the Air and Waste Management Association</i> , 2008, 58, 613-619.	0.9	7
119	Safety impact of Gateway Monuments. <i>Accident Analysis and Prevention</i> , 2011, 43, 290-300.	3.0	7
120	Severity Distribution Functions for Freeway Segments. <i>Transportation Research Record</i> , 2013, 2398, 19-27.	1.0	7
121	Accounting for site-selection bias in before-after studies for continuous distributions: Characteristics and application using speed data. <i>Transportation Research, Part A: Policy and Practice</i> , 2013, 49, 256-269.	2.0	7
122	Determining Skid Resistance Needs on Horizontal Curves for Different Levels of Precipitation. <i>Transportation Research Record</i> , 2020, 2674, 358-370.	1.0	7
123	A simulation analysis to study the temporal and spatial aggregations of safety datasets with excess zero observations. <i>Transportmetrica A: Transport Science</i> , 2021, 17, 1305-1317.	1.3	7
124	Role and Application of Accident Modification Factors within Highway Design Process. , 0, .		6
125	Investigating Regression to the Mean in Before-and-After Speed Data Analysis. <i>Transportation Research Record</i> , 2010, 2165, 52-58.	1.0	5
126	Safety Impacts of Design Element Trade-Offs for Multilane Rural Highways. <i>Journal of Transportation Engineering</i> , 2011, 137, 333-340.	0.9	5

#	ARTICLE	IF	CITATIONS
127	Adjusting finite sample bias in traffic safety modeling. <i>Accident Analysis and Prevention</i> , 2019, 131, 112-121.	3.0	5
128	Impact of Urban Arterial Traffic LOS on the Vehicle Density of Different Lanes of the Arterial in Proximity of an Unsignalized Intersection for Autonomous Vehicle vs. Conventional Vehicle Environments. , 2019, , .		5
129	Comparison of confidence and prediction intervals for different mixed-Poisson regression models. <i>Journal of Transportation Safety and Security</i> , 2021, 13, 357-379.	1.1	5
130	A visual approach for defining the spatial relationships among crashes, crimes, and alcohol retailers: Applying the color mixing theorem to define the colocation pattern of multiple variables. <i>Accident Analysis and Prevention</i> , 2021, 154, 106062.	3.0	5
131	The variability of urban safety performance functions for different road elements: an Italian case study. <i>European Transport Research Review</i> , 2021, 13, .	2.3	5
132	Analysis of Injury Severity in Crashes on Ramps and at Crossroad Ramp Terminals. <i>Transportation Research Record</i> , 2014, 2435, 37-44.	1.0	4
133	Chapter 14. Safety Prediction with Datasets Characterised with Excess Zero Responses and Long Tails. <i>Transport and Sustainability</i> , 2018, , 297-323.	0.2	4
134	Examining Network Segmentation for Traffic Safety Analysis With Data-Driven Spectral Analysis. <i>IEEE Access</i> , 2019, 7, 120744-120757.	2.6	4
135	Can Autonomous Vehicles Enhance Traffic Safety at Unsignalized Intersections?. , 2020, , .		4
136	Exploratory analyses of safety data. , 2021, , 135-177.		4
137	Alcohol-impaired motorcyclists versus car drivers: A comparison of crash involvement and legal consequence from adjudication data. <i>Journal of Safety Research</i> , 2021, 79, 292-303.	1.7	4
138	Navigating to safety: Necessity, requirements, and barriers to considering safety in route finding. <i>Transportation Research Part C: Emerging Technologies</i> , 2022, 137, 103542.	3.9	4
139	Traffic Safety Diagnostics and Application of Countermeasures for Rural Roads in Burkina Faso. <i>Transportation Research Record</i> , 2003, 1846, 39-43.	1.0	3
140	Estimating the variance in before-after studies. <i>Journal of Safety Research</i> , 2009, 40, 257-263.	1.7	3
141	Beauty or the Beast? Impacts of Autonomous Vehicles on Public Health. <i>Journal of Transport and Health</i> , 2019, 14, 100765.	1.1	3
142	Data mining and machine learning techniques. , 2021, , 399-428.		3
143	Analysis of Two Left-Turn Equations from the Highway Capacity Manual. <i>Transportation Research Record</i> , 1998, 1646, 71-78.	1.0	3
144	Fundamentals and data collection. , 2021, , 17-57.		2
