

Carlo Caiati

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5959621/carlo-caiati-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
16	Wellens Syndrome from COVID-19 Infection Assessed by Enhanced Transthoracic Coronary Echo Doppler: A Case Report.. <i>Diagnostics</i> , 2022 , 12,	3.8	1
15	Coronary Flow and Reserve by Enhanced Transthoracic Doppler Trumps Coronary Anatomy by Computed Tomography in Assessing Coronary Artery Stenosis. <i>Diagnostics</i> , 2021 , 11,	3.8	2
14	Predictors of Exercise Capacity in Dilated Cardiomyopathy with Focus on Pulmonary Venous Flow Recorded with Transesophageal Eco-Doppler.. <i>Journal of Clinical Medicine</i> , 2021 , 10,	5.1	1
13	Minimal Cardiac Perforation by Lead Pacemaker Complicated with Pericardial Effusion and Impending Tamponade: Optimal Management with No Pericardiocentesis Driven by Echocardiography. <i>Diagnostics</i> , 2020 , 10,	3.8	1
12	The Herbicide Glyphosate and Its Apparently Controversial Effect on Human Health: An Updated Clinical Perspective. <i>Endocrine, Metabolic and Immune Disorders - Drug Targets</i> , 2020 , 20, 489-505	2.2	6
11	A new noninvasive method for assessing mild coronary atherosclerosis: transthoracic convergent color Doppler after heart rate reduction. Validation vs. intracoronary ultrasound. <i>Coronary Artery Disease</i> , 2020 , 31, 500-511	1.4	4
10	A Novel Clinical Perspective on New Masses after Lead Extraction (Ghosts) by Means of Intracardiac Echocardiography. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	2
9	Pacemaker Lead Endocarditis Investigated with Intracardiac Echocardiography: Factors Modulating the Size of Vegetations and Larger Vegetation Embolic Risk during Lead Extraction. <i>Antibiotics</i> , 2019 , 8,	4.9	5
8	Head-to-head comparison of peak upright bicycle and post-treadmill echocardiography in detecting coronary artery disease: a randomized, single-blind crossover study. <i>Journal of the American Society of Echocardiography</i> , 2013 , 26, 1434-43	5.8	10
7	Early noninvasive evaluation of coronary flow reserve after angioplasty in the left anterior descending coronary artery identifies patients at high risk of restenosis at follow-up. <i>Journal of the American Society of Echocardiography</i> , 2012 , 25, 902-10	5.8	8
6	Detection, location, and severity assessment of left anterior descending coronary artery stenoses by means of contrast-enhanced transthoracic harmonic echo Doppler. <i>European Heart Journal</i> , 2009 , 30, 1797-806	9.5	16
5	Detection of coronary restenosis after coronary angioplasty by contrast-enhanced transthoracic echocardiographic Doppler assessment of coronary flow velocity reserve. <i>Journal of the American College of Cardiology</i> , 2002 , 40, 896-903	15.1	39
4	New noninvasive method for coronary flow reserve assessment: contrast-enhanced transthoracic second harmonic echo Doppler. <i>Circulation</i> , 1999 , 99, 771-8	16.7	274
3	Contrast-enhanced transthoracic second harmonic echo Doppler with adenosine: a noninvasive, rapid and effective method for coronary flow reserve assessment. <i>Journal of the American College of Cardiology</i> , 1999 , 34, 122-30	15.1	131
2	Validation of a new noninvasive method (contrast-enhanced transthoracic second harmonic echo Doppler) for the evaluation of coronary flow reserve: comparison with intracoronary Doppler flow wire. <i>Journal of the American College of Cardiology</i> , 1999 , 34, 1193-200	15.1	158
1	Improved Doppler detection of proximal left anterior descending coronary artery stenosis after intravenous injection of a lung-crossing contrast agent: a transesophageal Doppler echocardiographic study. <i>Journal of the American College of Cardiology</i> , 1996 , 27, 1413-21	15.1	46
