| #  | Article                                                                                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Outcomes of reverse shoulder arthroplasty following failed superior capsular reconstruction.<br>Journal of Shoulder and Elbow Surgery, 2022, 31, 1426-1435.                                                                                                                                     | 2.6 | 10        |
| 2  | Knee Medial Collateral Ligament Augmentation With Bioinductive Scaffold: Surgical Technique and<br>Indications. Arthroscopy Techniques, 2022, 11, e583-e589.                                                                                                                                    | 1.3 | 6         |
| 3  | Clinical Outcomes following Biologically Enhanced Demineralized Bone Matrix Augmentation of Complex Rotator Cuff Repair. Journal of Clinical Medicine, 2022, 11, 2956.                                                                                                                          | 2.4 | 3         |
| 4  | Subacromial bursa increases the failure force in a mouse model of supraspinatus detachment and repair. Journal of Shoulder and Elbow Surgery, 2022, 31, e519-e533.                                                                                                                              | 2.6 | 3         |
| 5  | Conversion to anatomic coracoclavicular ligament reconstruction (ACCR) shows similar clinical outcomes compared to successful non-operative treatment in chronic primary type III to V acromioclavicular joint injuries. Knee Surgery, Sports Traumatology, Arthroscopy, 2021, 29, 2264-2271.   | 4.2 | 9         |
| 6  | Anatomic coracoclavicular ligament reconstruction (ACCR) using free tendon allograft is effective<br>for chronic acromioclavicular joint injuries at mid-term follow-up. Knee Surgery, Sports<br>Traumatology, Arthroscopy, 2021, 29, 2096-2102.                                                | 4.2 | 11        |
| 7  | Radiographic alterations in clavicular bone tunnel width following anatomic coracoclavicular<br>ligament reconstruction (ACCR) for chronic acromioclavicular joint injuries. Knee Surgery, Sports<br>Traumatology, Arthroscopy, 2021, 29, 2046-2054.                                            | 4.2 | 22        |
| 8  | Analysis of Time to Form Colony Units for Connective Tissue Progenitor Cells (Stem Cells) Harvested<br>From Concentrated Bone Marrow Aspirate and Subacromial Bursa Tissue in Patients Undergoing<br>Rotator Cuff Repair. Arthroscopy, Sports Medicine, and Rehabilitation, 2020, 2, e629-e636. | 1.7 | 11        |
| 9  | Preliminary Clinical Outcomes Following Biologic Augmentation of Arthroscopic Rotator Cuff Repair<br>Using Subacromial Bursa, Concentrated Bone Marrow Aspirate, and Platelet-Rich Plasma.<br>Arthroscopy, Sports Medicine, and Rehabilitation, 2020, 2, e803-e813.                             | 1.7 | 21        |
| 10 | A 18-Year-Old Male Thrower with Acromioclavicular Joint Injury. , 2019, , 201-218.                                                                                                                                                                                                              |     | 0         |
| 11 | Arthroscopic Tenotomy of the Long Head of the Biceps Tendon. Operative Techniques in Sports<br>Medicine, 2018, 26, 82-85.                                                                                                                                                                       | 0.3 | 1         |
| 12 | Platelet-Rich Plasma: Review of Current Literature on its Use for Tendon and Ligament Pathology.<br>Current Reviews in Musculoskeletal Medicine, 2018, 11, 566-572.                                                                                                                             | 3.5 | 63        |
