

Karen A Moriello

List of Publications by Citations

Source: <https://exaly.com/author-pdf/596602/karen-a-moriello-publications-by-citations.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
47	Diagnosis and treatment of dermatophytosis in dogs and cats.: Clinical Consensus Guidelines of the World Association for Veterinary Dermatology. <i>Veterinary Dermatology</i> , 2017 , 28, 266-e68	1.8	106
46	Treatment of dermatophytosis in dogs and cats: review of published studies. <i>Veterinary Dermatology</i> , 2004 , 15, 99-107	1.8	89
45	Feline dermatophytosis: aspects pertinent to disease management in single and multiple cat situations. <i>Journal of Feline Medicine and Surgery</i> , 2014 , 16, 419-31	2.3	34
44	Use of lime sulphur and itraconazole to treat shelter cats naturally infected with <i>Microsporum canis</i> in an annex facility: an open field trial. <i>Veterinary Dermatology</i> , 2007 , 18, 324-31	1.8	34
43	Effects of lufenuron treatment in cats on the establishment and course of <i>Microsporum canis</i> infection following exposure to infected cats. <i>Journal of the American Veterinary Medical Association</i> , 2003 , 222, 1216-20	1	25
42	Efficacy of pre-treatment with lufenuron for the prevention of <i>Microsporum canis</i> infection in a feline direct topical challenge model. <i>Veterinary Dermatology</i> , 2004 , 15, 357-62	1.8	25
41	Safety and immunologic effects after inoculation of inactivated and combined live-inactivated dermatophytosis vaccines in cats. <i>American Journal of Veterinary Research</i> , 2002 , 63, 1532-7	1.1	25
40	The Immune Response to <i>Microsporum canis</i> Induced by a Fungal Cell Wall Vaccine*. <i>Veterinary Dermatology</i> , 1994 , 5, 47-55	1.8	25
39	Development of an in vitro, isolated, infected spore testing model for disinfectant testing of <i>Microsporum canis</i> isolates. <i>Veterinary Dermatology</i> , 2004 , 15, 175-80	1.8	24
38	Pilot study: prevalence of positive aeroallergen reactions in 10 cats with small-airway disease without concurrent skin disease. <i>Veterinary Dermatology</i> , 2007 , 18, 94-100	1.8	23
37	Isolation of Dermatophytes from the Haircoats of Stray Cats from Selected Animal Shelters in two Different Geographic Regions in the United States. <i>Veterinary Dermatology</i> , 1994 , 5, 57-62	1.8	22
36	Development of an experimental model of <i>Microsporum canis</i> infection in cats. <i>Veterinary Microbiology</i> , 1994 , 42, 289-95	3.3	22
35	Zoonotic skin diseases of dogs and cats. <i>Animal Health Research Reviews</i> , 2003 , 4, 157-168	2.1	18
34	Isolation of fungal flora from the hair coats of shelter cats in the Pacific coastal USA. <i>Veterinary Dermatology</i> , 2000 , 11, 143-150	1.8	18
33	Efficacy of eight commercial disinfectants against <i>Microsporum canis</i> and <i>Trichophyton</i> spp. infective spores on an experimentally contaminated textile surface. <i>Veterinary Dermatology</i> , 2013 , 24, 621-3, e151-2	1.8	17
32	Use of itraconazole and either lime sulphur or Malaseb Concentrate Rinse □ to treat shelter cats naturally infected with <i>Microsporum canis</i> : an open field trial. <i>Veterinary Dermatology</i> , 2011 , 22, 75-9	1.8	17
31	Efficacy of disinfectants containing accelerated hydrogen peroxide against conidial arthrospores and isolated infective spores of <i>Microsporum canis</i> and <i>Trichophyton</i> sp. <i>Veterinary Dermatology</i> , 2014 , 25, 191-e48	1.8	16

30	Immunological Reactivity to Intradermal Dermatophyte Antigens in Cats with Dermatophytosis. <i>Veterinary Dermatology</i> , 1991 , 2, 59-67	1.8	16
29	A Review of Systemic Antifungal Agents. <i>Veterinary Dermatology</i> , 1995 , 6, 59-66	1.8	15
28	Management of endemic <i>Microsporum canis</i> dermatophytosis in an open admission shelter: a field study. <i>Journal of Feline Medicine and Surgery</i> , 2015 , 17, 342-7	2.3	14
27	Five observations of a third morphologically distinct feline <i>Demodex</i> mite. <i>Veterinary Dermatology</i> , 2013 , 24, 460-2, e106	1.8	14
26	Decontamination of laundry exposed to <i>Microsporum canis</i> hairs and spores. <i>Journal of Feline Medicine and Surgery</i> , 2016 , 18, 457-61	2.3	13
25	Feline dermatophytosis: steps for investigation of a suspected shelter outbreak. <i>Journal of Feline Medicine and Surgery</i> , 2014 , 16, 407-18	2.3	13
24	Treatment of shelter cats with oral terbinafine and concurrent lime sulphur rinses. <i>Veterinary Dermatology</i> , 2013 , 24, 618-20, e149-50	1.8	13
23	Recommendations for the management and treatment of dermatophytosis in animal shelters. <i>Veterinary Clinics of North America - Small Animal Practice</i> , 2006 , 36, 89-114, vi	2.4	13
22	Zoonotic skin diseases of dogs and cats. <i>Animal Health Research Reviews</i> , 2003 , 4, 157-68	2.1	13
21	Inability of Short-duration Treatment with a 5-Lipoxy-genase Inhibitor to Reduce Clinical Signs of Canine Atopy. <i>Veterinary Dermatology</i> , 1994 , 5, 13-16	1.8	12
20	Kennel Disinfectants for <i>Microsporum canis</i> and <i>Trichophyton</i> sp. <i>Veterinary Medicine International</i> , 2015 , 2015, 853937	1.5	11
19	Use of isolated infected spores to determine the sporocidal efficacy of two commercial antifungal rinses against <i>Microsporum canis</i> . <i>Veterinary Dermatology</i> , 2007 , 18, 55-8	1.8	10
18	Effects of temperature variations and light exposure on the time to growth of dermatophytes using six different fungal culture media inoculated with laboratory strains and samples obtained from infected cats. <i>Journal of Feline Medicine and Surgery</i> , 2010 , 12, 988-90	2.3	7
17	In vitro efficacy of shampoos containing miconazole, ketoconazole, climbazole or accelerated hydrogen peroxide against <i>Microsporum canis</i> and <i>Trichophyton</i> species. <i>Journal of Feline Medicine and Surgery</i> , 2017 , 19, 370-374	2.3	6
16	Dinotefuran/pyriproxyfen/permethrin pemphigus-like drug reaction in three dogs. <i>Veterinary Dermatology</i> , 2015 , 26, 206-8, e45-6	1.8	6
15	Evaluation of incubation time for <i>Microsporum canis</i> dermatophyte cultures. <i>Journal of Feline Medicine and Surgery</i> , 2018 , 20, 997-1000	2.3	6
14	Use of a commercial qPCR assay in 52 high risk shelter cats for disease identification of dermatophytosis and mycological cure. <i>Veterinary Dermatology</i> , 2018 , 29, 66-e26	1.8	5
13	Efficacy of eight commercial formulations of lime sulphur on in vitro growth inhibition of <i>Microsporum canis</i> . <i>Veterinary Dermatology</i> , 2011 , 22, 197-201	1.8	5

12	Decontamination of carpet exposed to <i>Microsporium canis</i> hairs and spores. <i>Journal of Feline Medicine and Surgery</i> , 2017 , 19, 435-439	2.3	4
11	Dermatophytosis in cats and dogs: a practical guide to diagnosis and treatment. <i>In Practice</i> , 2019 , 41, 138-147	0.3	4
10	Efficacy of itraconazole oral solution using an alternating-week pulse therapy regimen for treatment of cats with experimental <i>Microsporium canis</i> infection. <i>Journal of Feline Medicine and Surgery</i> , 2018 , 20, 869-874	2.3	4
9	Decontamination of 70 foster family homes exposed to <i>Microsporium canis</i> infected cats: a retrospective study. <i>Veterinary Dermatology</i> , 2019 , 30, 178-e55	1.8	3
8	One year surveillance of the isolation of pathogenic dermatophyte spores from risk areas in a veterinary medical teaching hospital. <i>Veterinary Dermatology</i> , 2013 , 24, 474-5	1.8	2
7	Changes in serum chemistry values in shelter cats treated with 21 consecutive days of oral itraconazole for dermatophytosis. <i>Veterinary Dermatology</i> , 2013 , 24, 557-8	1.8	2
6	One vs two negative fungal cultures to confirm mycological cure in shelter cats treated for dermatophytosis: a retrospective study. <i>Journal of Feline Medicine and Surgery</i> , 2020 , 22, 598-601	2.3	2
5	Immediate and residual antifungal activity of compounds used for whole body and adjuvant topical therapy against <i>Microsporium canis</i> : an in vitro study. <i>Veterinary Dermatology</i> , 2020 , 31, 272-e64	1.8	1
4	species and infection and fomite carriage in cats from three animal shelters: a retrospective case series. <i>Journal of Feline Medicine and Surgery</i> , 2020 , 22, 391-394	2.3	1
3	Dermatophytosis 2020 , 265-296		0
2	Mechanical washing of pet food bowls is effective for <i>Microsporium canis</i> decontamination. <i>Veterinary Dermatology</i> , 2019 , 30, 428-e130	1.8	
1	Diagnostic Investigation of the Allergic Feline 2013 , 223-227
