#	ARTICLE	IF	CITATIONS
1	Role of staple cereals in human nutrition: Separating the wheat from the chaff in the infodemics age. Trends in Food Science and Technology, 2022, 119, 508-513.	7.8	15
2	Rice Subsector Development and Farmer Efficiency in Nepal: Implications for Further Transformation and Food Security. Frontiers in Sustainable Food Systems, 2022, 5, .	1.8	6
3	Conservation Agriculture Benefits Indian Farmers, but Technology Targeting Needed for Greater Impacts. Frontiers in Agronomy, 2022, 4, .	1.5	7
4	Global Trends in Wheat Production, Consumption and Trade. , 2022, , 47-66.		52
5	Global maize production, consumption and trade: trends and R&D implications. Food Security, 2022, 14, 1295-1319.	2.4	200
6	Viewpoint: Agri-nutrition research: Revisiting the contribution of maize and wheat to human nutrition and health. Food Policy, 2021, 100, 101976.	2.8	101
7	Food Security and the Dynamics of Wheat and Maize Value Chains in Africa and Asia. Frontiers in Sustainable Food Systems, 2021, 4, .	1.8	222
8	Farms worldwide: 2020 and 2030 outlook. Outlook on Agriculture, 2021, 50, 221-229.	1.8	6
9	Disaggregating the Value of Conservation Agriculture to Inform Smallholder Transition to Sustainable Farming: A Mexican Case Study. Agronomy, 2021, 11, 1214.	1.3	14
10	Estimating the global number and distribution of maize and wheat farms. Global Food Security, 2021, 30, 100558.	4.0	59
11	Projecting food demand in 2030: Can Uganda attain the zero hunger goal?. Sustainable Production and Consumption, 2021, 28, 1140-1163.	5.7	11
12	Multi-Site Bundling of Drought Tolerant Maize Varieties and Index Insurance. Journal of Agricultural Economics, 2020, 71, 239-259.	1.6	8
13	Adoption and economic impacts of laser land leveling in the irrigated rice-wheat system in Haryana, India using endogenous switching regression. Natural Resources Forum, 2020, 44, 255-273.	1.8	9
14	Ethiopia's transforming wheat landscape: tracking variety use through DNA fingerprinting. Scientific Reports, 2020, 10, 18532.	1.6	22
15	Assessing technological change in agri-food systems of the Global South: A review of adoption-impact studies in wheat. Outlook on Agriculture, 2020, 49, 89-98.	1.8	11
16	Misidentification by farmers of the crop varieties they grow: Lessons from DNA fingerprinting of wheat in Ethiopia. PLoS ONE, 2020, 15, e0235484.	1.1	19
17	Direct and spillover impacts of community-based seed production: Quasi-experimental evidence from Nepal. Experimental Agriculture, 2020, 56, 884-900.	0.4	3
18	Smallholders' coping mechanisms with wheat rust epidemics: Lessons from Ethiopia. PLoS ONE, 2019, 14, e0219327.	1.1	19

#	ARTICLE	IF	CITATIONS
19	Understanding clients, providers and the institutional dimensions of irrigation services in developing countries: A study of water markets in Bangladesh. <i>Agricultural Water Management</i> , 2019, 222, 242-253.	2.4	19
20	Impacts of drought-tolerant maize varieties on productivity, risk, and resource use: Evidence from Uganda. <i>Land Use Policy</i> , 2019, 88, 104091.	2.5	49
21	Heterogeneous seed access and information exposure: implications for the adoption of drought-tolerant maize varieties in Uganda. <i>Agricultural and Food Economics</i> , 2019, 7, .	1.3	39
22	Assessing climate adaptation options for cereal-based systems in the eastern Indo-Gangetic Plains, South Asia. <i>Journal of Agricultural Science</i> , 2019, 157, 189-210.	0.6	10
23	Do market shocks generate gender-differentiated impacts? Policy implications from a quasi-natural experiment in Bangladesh. <i>Women's Studies International Forum</i> , 2019, 76, 102272.	0.6	2
24	Small businesses, potentially large impacts. <i>Journal of Agribusiness in Developing and Emerging Economies</i> , 2019, 9, 109-124.	1.2	10
25	Agricultural mechanization and reduced tillage: antagonism or synergy?. <i>International Journal of Agricultural Sustainability</i> , 2019, 17, 219-230.	1.3	21
26	Economic benefits of blast-resistant biofortified wheat in Bangladesh: The case of BARI Gom 33. <i>Crop Protection</i> , 2019, 123, 45-58.	1.0	28
27	Productivity and production risk effects of adopting drought-tolerant maize varieties in Zambia. <i>International Journal of Climate Change Strategies and Management</i> , 2019, 11, 570-591.	1.5	24
28	Understanding factors associated with agricultural mechanization: A Bangladesh case. <i>World Development Perspectives</i> , 2019, 13, 1-9.	0.8	40
29	Understanding the relations between farmers' seed demand and research methods: The challenge to do better. <i>Outlook on Agriculture</i> , 2019, 48, 16-21.	1.8	47
30	Averting wheat blast by implementing a "wheat holiday": In search of alternative crops in West Bengal, India. <i>PLoS ONE</i> , 2019, 14, e0211410.	1.1	16
31	Alternative use of wheat land to implement a potential wheat holiday as wheat blast control: In search of feasible crops in Bangladesh. <i>Land Use Policy</i> , 2019, 82, 1-12.	2.5	21
32	Maize lethal necrosis disease: Evaluating agronomic and genetic control strategies for Ethiopia and Kenya. <i>Agricultural Systems</i> , 2018, 162, 220-228.	3.2	25
33	Factors determining the adoption of laser land leveling in the irrigated rice-wheat system in Haryana, India. <i>Journal of Crop Improvement</i> , 2018, 32, 477-492.	0.9	19
34	Impact of improved maize adoption on household food security of maize producing smallholder farmers in Ethiopia. <i>Food Security</i> , 2018, 10, 81-93.	2.4	63
35	Evolving food consumption patterns of rural and urban households in developing countries. <i>British Food Journal</i> , 2018, 120, 392-408.	1.6	39
36	Laser-land leveling adoption and its impact on water use, crop yields and household income: Empirical evidence from the rice-wheat system of Pakistan Punjab. <i>Food Policy</i> , 2018, 77, 19-32.	2.8	28

#	ARTICLE	IF	CITATIONS
37	Determinants of maize cultivation in a land-scarce rice-based economy: The case of Bangladesh. <i>Journal of Crop Improvement</i> , 2018, 32, 453-476.	0.9	7
38	Measuring Farm and Market Level Economic Impacts of Improved Maize Production Technologies in Ethiopia: Evidence from Panel Data. <i>Journal of Agricultural Economics</i> , 2018, 69, 76-95.	1.6	95
39	Potential benefits of drought and heat tolerance for adapting maize to climate change in tropical environments. <i>Climate Risk Management</i> , 2018, 19, 106-119.	1.6	68
40	Changing Food Consumption of Households in Developing Countries: A Bangladesh Case. <i>Journal of International Food and Agribusiness Marketing</i> , 2018, 30, 156-174.	1.0	32
41	Wheat Production and Consumption Dynamics in an Asian Rice Economy: The Bangladesh Case. <i>European Journal of Development Research</i> , 2018, 30, 252-275.	1.2	24
42	Seeding eastern Africa's maize revolution in the post-structural adjustment era: a review and comparative analysis of the formal maize seed sector. <i>International Food and Agribusiness Management Review</i> , 2018, 21, 39-52.	0.8	20
43	Factors affecting the adoption of multiple climate-smart agricultural practices in the Indo-Gangetic Plains of India. <i>Natural Resources Forum</i> , 2018, 42, 141-158.	1.8	80
44	Threat of wheat blast to South Asia's food security: An ex-ante analysis. <i>PLoS ONE</i> , 2018, 13, e0197555.	1.1	68
45	Assessing farmer use of climate change adaptation practices and impacts on food security and poverty in Pakistan. <i>Climate Risk Management</i> , 2017, 16, 183-194.	1.6	412
46	Enhancing Smallholder Access to Agricultural Machinery Services: Lessons from Bangladesh. <i>Journal of Development Studies</i> , 2017, 53, 1502-1517.	1.2	48
47	Impacts of changing weather patterns on smallholder well-being. <i>International Journal of Climate Change Strategies and Management</i> , 2017, 9, 225-240.	1.5	11
48	Potential for Scaling up Climate Smart Agricultural Practices: Examples from Sub-Saharan Africa. <i>Climate Change Management</i> , 2017, , 185-203.	0.6	12
49	Demand for a labor-based drought insurance scheme in Ethiopia: a stated choice experiment approach. <i>Agricultural Economics (United Kingdom)</i> , 2017, 48, 501-511.	2.0	22
50	Rural transformation, cereals and youth in Africa: What role for international agricultural research?. <i>Outlook on Agriculture</i> , 2017, 46, 168-177.	1.8	29
51	Predicting minimum tillage adoption among smallholder farmers using micro-level and policy variables. <i>Agricultural and Food Economics</i> , 2017, 5, .	1.3	18
52	Climate change impacts and potential benefits of heat-tolerant maize in South Asia. <i>Theoretical and Applied Climatology</i> , 2017, 130, 959-970.	1.3	73
53	On-Farm Yield Gains with Stress-Tolerant Maize in Eastern and Southern Africa. <i>Agronomy Journal</i> , 2017, 109, 406-417.	0.9	60
54	Factors associated with small-scale agricultural machinery adoption in Bangladesh: Census findings. <i>Journal of Rural Studies</i> , 2016, 46, 155-168.	2.1	116

#	ARTICLE	IF	CITATIONS
55	Impact of irrigation water scarcity on rural household food security and income in Pakistan. <i>Water Science and Technology: Water Supply</i> , 2016, 16, 675-683.	1.0	12
56	Drivers of household food availability in sub-Saharan Africa based on big data from small farms. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 458-463.	3.3	248
57	Crop residue allocation to livestock feed, soil improvement and other uses along a productivity gradient in Eastern Africa. <i>Agriculture, Ecosystems and Environment</i> , 2016, 228, 101-110.	2.5	49
58	Resource saving and productivity enhancing impacts of crop management innovation packages in Ethiopia. <i>Agricultural Economics (United Kingdom)</i> , 2016, 47, 513-522.	2.0	42
59	Irrigation water saving through adoption of direct rice sowing technology in the Indo-Gangetic Plains: empirical evidence from Pakistan. <i>Water Practice and Technology</i> , 2016, 11, 610-620.	1.0	5
60	Weather index insurance for managing drought risk in smallholder agriculture: lessons and policy implications for sub-Saharan Africa. <i>Agricultural and Food Economics</i> , 2015, 3, .	1.3	71
61	Production Risks and Food Security under Alternative Technology Choices in Malawi: Application of a Multinomial Endogenous Switching Regression. <i>Journal of Agricultural Economics</i> , 2015, 66, 640-659.	1.6	142
62	Impact of gender participation in non-farming activities on household income and poverty levels in Pakistan. <i>Work</i> , 2015, 52, 345-351.	0.6	3
63	Beyond conservation agriculture. <i>Frontiers in Plant Science</i> , 2015, 6, 870.	1.7	269
64	Gendered food security in rural Malawi: why is women's food security status lower?. <i>Food Security</i> , 2015, 7, 1299-1320.	2.4	58
65	Social and income trade-offs of conservation agriculture practices on crop residue use in Mexico's central highlands. <i>Agricultural Systems</i> , 2015, 134, 61-75.	3.2	22
66	Identifying determinants, pressures and trade-offs of crop residue use in mixed smallholder farms in Sub-Saharan Africa and South Asia. <i>Agricultural Systems</i> , 2015, 134, 107-118.	3.2	71
67	Tradeoffs around crop residue biomass in smallholder crop-livestock systems – What's next?. <i>Agricultural Systems</i> , 2015, 134, 119-128.	3.2	44
68	Economic trade-offs of biomass use in crop-livestock systems: Exploring more sustainable options in semi-arid Zimbabwe. <i>Agricultural Systems</i> , 2015, 134, 48-60.	3.2	46
69	Determinants of maize stover utilization as feed, fuel and soil amendment in mixed crop-livestock systems, Ethiopia. <i>Agricultural Systems</i> , 2015, 134, 17-23.	3.2	34
70	Understanding the adoption of a portfolio of sustainable intensification practices in eastern and southern Africa. <i>Land Use Policy</i> , 2015, 42, 400-411.	2.5	356
71	Impact of direct rice-sowing technology on rice producers' earnings: empirical evidence from Pakistan. <i>Development Studies Research</i> , 2014, 1, 244-254.	1.0	24
72	Potential for dual-purpose maize varieties to meet changing maize demands: Overview. <i>Field Crops Research</i> , 2013, 153, 1-4.	2.3	13

#	ARTICLE	IF	CITATIONS
73	Maize stover use and sustainable crop production in mixed crop-livestock systems in Mexico. <i>Field Crops Research</i> , 2013, 153, 12-21.	2.3	57
74	Potential for dual-purpose maize varieties to meet changing maize demands: Synthesis. <i>Field Crops Research</i> , 2013, 153, 107-112.	2.3	21
75	Political and economic features of the maize seed industry in southern Africa. <i>Agrekon</i> , 2013, 52, 104-127.	0.5	13
76	Resource Scarcity Gradients and Agricultural Technologies. <i>Outlook on Agriculture</i> , 2012, 41, 87-95.	1.8	7
77	Conservation Agriculture in Maize- and Wheat-Based Systems in the (Sub)tropics: Lessons from Adaptation Initiatives in South Asia, Mexico, and Southern Africa. <i>Agroecology and Sustainable Food Systems</i> , 2012, 36, 180-206.	0.9	115
78	Conservation Agriculture in mixed crop-livestock systems: Scoping crop residue trade-offs in Sub-Saharan Africa and South Asia. <i>Field Crops Research</i> , 2012, 132, 175-184.	2.3	231
79	Livelihood Assets as a Multidimensional Inverse Proxy for Poverty: A District-level Analysis of the Indian Indo-Gangetic Plains. <i>Journal of Human Development and Capabilities</i> , 2011, 12, 283-302.	1.2	14
80	Livelihoods and agro-ecological gradients: A meso-level analysis in the Indo-Gangetic Plains, India. <i>Agricultural Systems</i> , 2011, 104, 42-53.	3.2	36
81	Cropping systems and crop residue management in the Trans-Gangetic Plains: Issues and challenges for conservation agriculture from village surveys. <i>Agricultural Systems</i> , 2011, 104, 54-62.	3.2	54
82	THE PARADOX OF LIMITED MAIZE STOVER USE IN INDIA'S SMALLHOLDER CROP-LIVESTOCK SYSTEMS. <i>Experimental Agriculture</i> , 2011, 47, 677-704.	0.4	31
83	Assessing the Impact of Adaptive Agricultural Research on Accelerating Technology Deployment. <i>Outlook on Agriculture</i> , 2010, 39, 121-126.	1.8	3
84	Crop-livestock interactions along agro-ecological gradients: a meso-level analysis in the Indo-Gangetic Plains, India. <i>Environment, Development and Sustainability</i> , 2010, 12, 669-689.	2.7	42
85	VILLAGE SURVEYS FOR TECHNOLOGY UPTAKE MONITORING: CASE OF TILLAGE DYNAMICS IN THE TRANS-GANGETIC PLAINS. <i>Experimental Agriculture</i> , 2010, 46, 277-292.	0.4	15
86	The Evolving Maize Sector in Asia: Challenges and Opportunities. <i>Journal of New Seeds</i> , 2010, 11, 1-15.	0.3	22
87	TRIANGULATING TECHNOLOGY DIFFUSION INDICATORS: ZERO TILLAGE WHEAT IN SOUTH ASIA'S IRRIGATED PLAINS. <i>Experimental Agriculture</i> , 2010, 46, 293-308.	0.4	4
88	Livelihoods-based impact assessment in the rice-wheat farming system of South Asia. <i>Development in Practice</i> , 2010, 20, 933-945.	0.6	0
89	A comparative analysis of rice-wheat systems in Indian Haryana and Pakistan Punjab. <i>Land Use Policy</i> , 2010, 27, 869-879.	2.5	33
90	Poverty mapping based on livelihood assets: A meso-level application in the Indo-Gangetic Plains, India. <i>Applied Geography</i> , 2010, 30, 112-125.	1.7	84

#	ARTICLE	IF	CITATIONS
91	Maize-Poultry Value Chains in India: Implications for Research and Development. <i>Journal of New Seeds</i> , 2009, 10, 245-263.	0.3	28
92	A SURVEY OF FACTORS ASSOCIATED WITH THE ADOPTION OF ZERO TILLAGE WHEAT IN THE IRRIGATED PLAINS OF SOUTH ASIA. <i>Experimental Agriculture</i> , 2009, 45, 133-147.	0.4	20
93	ASSESSING INNOVATIONS LACKING DEVELOPED SUPPLY MARKETS: A SIMPLE EX ANTE MODEL APPLIED TO ROCK PHOSPHATE USE IN RICE IN WEST AFRICA. <i>Experimental Agriculture</i> , 2009, 45, 287-294.	0.4	1
94	Specification effects in zero tillage survey data in South Asia's rice-wheat systems. <i>Field Crops Research</i> , 2009, 111, 166-172.	2.3	11
95	Comparing water management in rice-wheat production systems in Haryana, India and Punjab, Pakistan. <i>Agricultural Water Management</i> , 2009, 96, 1799-1806.	2.4	25
96	Factors Affecting the Adoption of Zero Tillage Wheat in the Rice-Wheat Systems of India and Pakistan. <i>Outlook on Agriculture</i> , 2009, 38, 367-373.	1.8	3
97	Zero tillage impacts in India's rice-wheat systems: A review. <i>Soil and Tillage Research</i> , 2008, 100, 1-14.	2.6	272
98	On-farm impacts of zero tillage wheat in South Asia's rice-wheat systems. <i>Field Crops Research</i> , 2008, 105, 240-252.	2.3	107
99	Funding International Agricultural Research and the Need to be Noticed. <i>Outlook on Agriculture</i> , 2008, 37, 159-168.	1.8	22
100	What future for integrated rice-vegetable production systems in West African lowlands?. <i>Agricultural Systems</i> , 2006, 88, 376-394.	3.2	13
101	Intensification or extensification? Factors affecting technology use in peri-urban lowlands along an agro-ecological gradient in West Africa. <i>Agricultural Systems</i> , 2006, 90, 132-158.	3.2	45
102	Determinants of lowland use close to urban markets along an agro-ecological gradient in West Africa. <i>Agriculture, Ecosystems and Environment</i> , 2006, 117, 205-217.	2.5	16
103	Smallholder conservation farming in the tropics and sub-tropics: a guide to the development and dissemination of mulching with crop residues and cover crops. <i>Agriculture, Ecosystems and Environment</i> , 2003, 100, 17-37.	2.5	192
104	Crop residue mulching in tropical and semi-tropical countries: An evaluation of residue availability and other technological implications. <i>Soil and Tillage Research</i> , 2002, 67, 115-133.	2.6	248
105	Estimating farmers' internal value of crop residues in smallholder crop-livestock systems: A South Asia case study. <i>Outlook on Agriculture</i> , 0, , 003072702110395.	1.8	1
106	Continuing cereals research for sustainable health and well-being. <i>International Journal of Agricultural Sustainability</i> , 0, , 1-12.	1.3	6
