#	ARTICLE	IF	CITATIONS
1	The price-bidding strategy for investors in a renewable auction: An option games-based study. Energy Economics, 2021, 100, 105331.	5.6	8
2	Manipulation via endowments: Quantifying the influence of market power on the emission trading scheme. Energy Economics, 2021, 103, 105533.	5.6	10
3	Impact of Generation Companies' Heterogeneous Investment Behaviors on the Effects of Non-fossil Energy Incentive Policies. , 2021, , .		1
4	Policy choice for end-of-pipe abatement technology adoption under technological uncertainty. Economic Modelling, 2020, 87, 121-130.	1.8	10
5	How to design a dynamic feed-in tariffs mechanism for renewables – a real options approach. International Journal of Production Research, 2020, 58, 4352-4366.	4.9	13
6	The impacts of emission trading scheme on China's thermal power industry: A pre-evaluation from the micro level. Energy and Environment, 2020, 31, 1007-1030.	2.7	9
7	Co-financing in the green climate fund: lessons from the global environment facility. Climate Policy, 2020, 20, 95-108.	2.6	29
8	How do carbon prices react to regulatory announcements in China? A genetic algorithm with overlapping events. Journal of Cleaner Production, 2020, 277, 122644.	4.6	6
9	DESIGNING A GLOBALLY ACCEPTABLE CARBON TAX SCHEME TO ADDRESS COMPETITIVENESS AND LEAKAGE CONCERNS. Climate Change Economics, 2020, 11, 2050008.	2.9	4
10	Modeling the emission trading scheme from an agent-based perspective: System dynamics emerging from firms' coordination among abatement options. European Journal of Operational Research, 2020, 286, 1113-1128.	3.5	36
11	Influence of allowance allocation events on prices in China's carbon market pilots – an AR-GARCH-based analysis. Energy Sources, Part B: Economics, Planning and Policy, 2020, 15, 157-171.	1.8	5
12	Evaluation of cooperative mitigation: captured carbon dioxide for enhanced oil recovery. Mitigation and Adaptation Strategies for Global Change, 2020, 25, 1261-1285.	1.0	5
13	Economic analysis of grid integration of variable solar and wind power with conventional power system. Applied Energy, 2020, 264, 114706.	5.1	43
14	Optimization of dynamic incentive for the deployment of carbon dioxide removal technology: A nonlinear dynamic approach combined with real options. Energy Economics, 2020, 86, 104643.	5.6	22
15	Dynamics of energy technology diffusion under uncertainty. Applied Stochastic Models in Business and Industry, 2020, 36, 795-808.	0.9	2
16	Cost and potential for CO2 emissions reduction in China's petroleum refining sector – A bottom up analysis. Energy Reports, 2020, 6, 497-506.	2.5	17
17	Economic evaluation of the trilateral FTA among China, Japan, and South Korea with big data analytics. Computers and Industrial Engineering, 2019, 128, 1040-1051.	3.4	17
18	Enabled comparative advantage strategy in China's solar PV development. Energy Policy, 2019, 133, 110880.	4.2	32

#	ARTICLE	IF	CITATIONS
19	Market Power and Technology Diffusion in an Energy-Intensive Sector Covered by an Emissions Trading Scheme. <i>Sustainability</i> , 2019, 11, 3870.	1.6	4
20	Can China achieve its 2030 energy development targets by fulfilling carbon intensity reduction commitments?. <i>Energy Economics</i> , 2019, 83, 61-73.	5.6	84
21	A Landslide Susceptibility Assessment Method Based on GIS Technology and an AHP-Weighted Information Content Method: A Case Study of Southern Anhui, China. <i>ISPRS International Journal of Geo-Information</i> , 2019, 8, 266.	1.4	39
22	Is it worth to invest? -An evaluation of CTL-CCS project in China based on real options. <i>Energy</i> , 2019, 182, 920-931.	4.5	22
23	A study on embodied carbon transfer at the provincial level of China from a social network perspective. <i>Journal of Cleaner Production</i> , 2019, 225, 1089-1104.	4.6	102
24	Imperfect market, emissions trading scheme, and technology adoption: A case study of an energy-intensive sector. <i>Energy Economics</i> , 2019, 81, 142-158.	5.6	24
25	Efficiency evaluation of thermal power plants in China based on the weighted Russell directional distance method. <i>Journal of Cleaner Production</i> , 2019, 222, 573-583.	4.6	28
26	A Comparison of Two Approaches for Damage Evaluation on Optimal Mitigation and Adaptation Responses in China. <i>Journal of Systems Science and Complexity</i> , 2019, 32, 1641-1658.	1.6	0
27	Policy uncertainties: What investment choice for solar panel producers?. <i>Energy Economics</i> , 2019, 78, 454-467.	5.6	10
28	Exploring optimal mitigation and adaptation investment strategies in China. <i>Climate Policy</i> , 2018, 18, 781-793.	2.6	6
29	Transaction costs, market structure and efficient coverage of emissions trading scheme: A microlevel study from the pilots in China. <i>Applied Energy</i> , 2018, 220, 657-671.	5.1	40
30	Buying green or producing green? Heterogeneous emitters' strategic choices under a phased emission-trading scheme. <i>Resources, Conservation and Recycling</i> , 2018, 136, 223-237.	5.3	15
31	Business model design for the carbon capture utilization and storage (CCUS) project in China. <i>Energy Policy</i> , 2018, 121, 519-533.	4.2	77
32	On the Effectiveness of the Abatement Policy Mix: A Case Study of China's Energy-Intensive Sectors. <i>Energies</i> , 2018, 11, 559.	1.6	1
33	Can an emission trading scheme promote the withdrawal of outdated capacity in energy-intensive sectors? A case study on China's iron and steel industry. <i>Energy Economics</i> , 2017, 63, 332-347.	5.6	60
34	Performance evaluation of climate policies in China: A study based on an integrated assessment model. <i>Journal of Cleaner Production</i> , 2017, 164, 1068-1080.	4.6	6
35	Strategic carbon taxation and energy pricing under the threat of climate tipping events. <i>Economic Modelling</i> , 2017, 60, 352-363.	1.8	3
36	Impact of Firms' Observation Network on the Carbon Market. <i>Energies</i> , 2017, 10, 1164.	1.6	3

#	ARTICLE	IF	CITATIONS
37	The Emission Taxes Refunding Scheme Based on Output Subsidies with an Exogenous Abatement Target. <i>Emerging Markets Finance and Trade</i> , 2016, 52, 1385-1394.	1.7	1
38	Optimal timing of technology adoption under the changeable abatement coefficient through R&D. <i>Computers and Industrial Engineering</i> , 2016, 96, 216-226.	3.4	8
39	Emission path planning based on dynamic abatement cost curve. <i>European Journal of Operational Research</i> , 2016, 255, 996-1013.	3.5	16
40	How will diffusion of PV solar contribute to China's emissions-peaking and climate responses?. <i>Renewable and Sustainable Energy Reviews</i> , 2016, 53, 1076-1085.	8.2	30
41	Regional Opportunities for China to Go Low-Carbon: Results from the REEC Model. <i>Energy Journal</i> , 2016, 37, 223-252.	0.9	9
42	Promoting the Carbon Removal in Coal Utilization-A Benefit-Risk Analysis among Full-Chain Carbon Capture and Utilization Project. <i>Energy and Environment</i> , 2015, 26, 1035-1053.	2.7	4
43	Delaying the introduction of emissions trading systems—Implications for power plant investment and operation from a multi-stage decision model. <i>Energy Economics</i> , 2015, 52, 255-264.	5.6	28
44	Embodied energy, export policy adjustment and China's sustainable development: A multi-regional input-output analysis. <i>Energy</i> , 2015, 82, 457-467.	4.5	90
45	CO2 mitigation potential of CCS in China — an evaluation based on an integrated assessment model. <i>Journal of Cleaner Production</i> , 2015, 103, 934-947.	4.6	57
46	Overseas oil investment projects under uncertainty: How to make informed decisions?. <i>Journal of Policy Modeling</i> , 2015, 37, 742-762.	1.7	27
47	Modelling the Evolutionary Paths of Multiple Carbon-Free Energy Technologies with Policy Incentives. <i>Environmental Modeling and Assessment</i> , 2015, 20, 55-69.	1.2	24
48	Design and analysis of the green climate fund. <i>Journal of Systems Science and Systems Engineering</i> , 2014, 23, 266-299.	0.8	30
49	Using Floor Price Mechanisms to Promote Carbon Capture and Storage (CCS) Investment and CO <sub>2</sub> Abatement. <i>Energy and Environment</i> , 2014, 25, 687-707.	2.7	15
50	A cross-country study on the relationship between diffusion of wind and photovoltaic solar technology. <i>Technological Forecasting and Social Change</i> , 2014, 83, 156-169.	6.2	25
51	Cost of energy saving and CO2 emissions reduction in China's iron and steel sector. <i>Applied Energy</i> , 2014, 130, 603-616.	5.1	151
52	Optimal carbon taxes in carbon-constrained China: A logistic-induced energy economic hybrid model. <i>Energy</i> , 2014, 69, 345-356.	4.5	42
53	How will the emissions trading scheme save cost for achieving China's 2020 carbon intensity reduction target?. <i>Applied Energy</i> , 2014, 136, 1043-1052.	5.1	274
54	Energy Efficiency Potentials in the Chlor-Alkali Sector — A Case Study of Shandong Province in China. <i>Energy and Environment</i> , 2014, 25, 661-686.	2.7	8

#	ARTICLE	IF	CITATIONS
55	Modelling the investment in carbon capture retrofits of pulverized coal-fired plants. <i>Energy</i> , 2013, 57, 66-75.	4.5	51
56	What's the most cost-effective policy of CO2 targeted reduction: An application of aggregated economic technological model with CCS?. <i>Applied Energy</i> , 2013, 112, 866-875.	5.1	71
57	Evaluating coal bed methane investment in China based on a real options model. <i>Resources Policy</i> , 2013, 38, 50-59.	4.2	27
58	The impact of potential climate policy on the coal bed methane investment in China - a real option-based study. <i>International Journal of Global Energy Issues</i> , 2013, 36, 96.	0.2	1
59	Long-Term Impacts of Carbon Tax and Feed-in Tariff Policies on China's Generating Portfolio and Carbon Emissions: A Multi-Agent-Based Analysis. <i>Energy and Environment</i> , 2013, 24, 1271-1293.	2.7	11
60	A simulation based real options approach for the investment evaluation of nuclear power. <i>Computers and Industrial Engineering</i> , 2012, 63, 585-593.	3.4	49
61	The impact of the EU ETS on the corporate value of European electricity corporations. <i>Energy</i> , 2012, 45, 3-11.	4.5	56
62	A non-linear model for estimating the cost of achieving emission reduction targets: The case of the U.S., China and India. <i>Journal of Systems Science and Systems Engineering</i> , 2012, 21, 297-315.	0.8	6
63	A real options-based CCS investment evaluation model: Case study of China's power generation sector. <i>Applied Energy</i> , 2011, 88, 4320-4333.	5.1	154
64	Evaluation of potential reductions in carbon emissions in Chinese provinces based on environmental DEA. <i>Energy Policy</i> , 2011, 39, 2352-2360.	4.2	201
65	Analysis of Global CCS Technology, Regulations and Its Potential for Emission Reduction with Focus on China. <i>Advances in Climate Change Research</i> , 2011, 2, 57-66.	2.1	10
66	Estimating the Macroeconomic Costs of CO2 Emission Reduction in China Based on Multi-objective Programming. <i>Advances in Climate Change Research</i> , 2010, 1, 27-33.	2.1	26
67	Optimization of China's generating portfolio and policy implications based on portfolio theory. <i>Energy</i> , 2010, 35, 1391-1402.	4.5	79
68	A real options based model and its application to China's overseas oil investment decisions. <i>Energy Economics</i> , 2010, 32, 627-637.	5.6	63
69	The Investment Evaluation of Third-Generation Nuclear Power - From the Perspective of Real Options. , , .		0
70	An Evaluation of Overseas Oil Investment Projects Under Uncertainty Using a Real Options Based Simulation Model. <i>SSRN Electronic Journal</i> , 0, , .	0.4	1
