#	ARTICLE	IF	CITATIONS
1	A Portrait of Self-Reported Health and Distress in Parents Whose Child Died of Cancer. <i>Omega: Journal of Death and Dying</i> , 2022, 85, 958-973.	0.7	8
2	Screening for distress in pediatric cancer survivors: A systematic comparison of one-step and two-step strategies to minimize detection errors. <i>Journal of Psychosocial Oncology</i> , 2022, 40, 441-456.	0.6	2
3	Implications of Tumor Characteristics and Treatment Modality on Local Recurrence and Functional Outcomes in Children With Chest Wall Sarcoma. <i>Annals of Surgery</i> , 2022, 276, e969-e975.	2.1	13
4	Articulating viewpoints to better define and respond to the needs of adolescents and young adult survivors of pediatric brain tumors. <i>Journal of Psychosocial Oncology</i> , 2022, 40, 347-365.	0.6	5
5	Assessing Physician's Motivational Communication Skills: 5-Step Mixed Methods Development Study of the Motivational Communication Competency Assessment Test. <i>JMIR Medical Education</i> , 2022, 8, e31489.	1.2	1
6	Early Nutritional Intervention to Promote Healthy Eating Habits in Pediatric Oncology: A Feasibility Study. <i>Nutrients</i> , 2022, 14, 1024.	1.7	10
7	Cardiometabolic Health After Pediatric Cancer Treatment: Adolescents Are More Affected than Children. <i>Nutrition and Cancer</i> , 2022, 74, 3236-3252.	0.9	3
8	Contributing Factors of Unmet Needs Among Young Adult Survivors of Childhood Acute Lymphoblastic Leukemia with Comorbidities. <i>Journal of Adolescent and Young Adult Oncology</i> , 2021, 10, 462-475.	0.7	4
9	Does practising hypnosis-derived communication techniques by oncology nurses translate into reduced pain and distress in their patients? An exploratory study. <i>British Journal of Pain</i> , 2021, 15, 147-154.	0.7	9
10	French-language adaptation of the 16D and 17D Quality of Life measures and score description in two Canadian pediatric samples. <i>Health Psychology and Behavioral Medicine</i> , 2021, 9, 619-635.	0.8	4
11	Elaboration and refinement of a motivational communication training program for healthcare professionals in pediatric oncology: a feasibility and acceptability study. <i>Health Psychology and Behavioral Medicine</i> , 2021, 9, 220-238.	0.8	2
12	Learning through the experience of cancer survivorship: differences across age groups. <i>Journal of Psychosocial Oncology</i> , 2021, 39, 553-570.	0.6	3
13	Getting ready for transition to adult care: Tool validation and multi-informant strategy using the Transition Readiness Assessment Questionnaire in pediatrics. <i>Child: Care, Health and Development</i> , 2021, 47, 645-653.	0.8	5
14	Difficulties encountered by physicians and mental health professionals in evaluating and caring for affective and behavioral problems in pediatric brain tumor survivors. <i>Supportive Care in Cancer</i> , 2021, 29, 6771-6780.	1.0	2
15	“Taking back control together”: Definition of a new intervention designed to support parents confronted with childhood cancer. <i>Cogent Medicine</i> , 2021, 8, 1944476.	0.7	3
16	It's difficult to say no: Development of a parenting booklet about physical activity restrictions and recommendations in pediatric hemophilia. <i>Health Psychology Open</i> , 2021, 8, 205510292110399.	0.7	0
17	The VIE study: feasibility of a physical activity intervention in a multidisciplinary program in children with cancer. <i>Supportive Care in Cancer</i> , 2020, 28, 2627-2636.	1.0	8
18	Illness perceptions and their relation to physical activity in children and adolescents with hemophilia. <i>Health Psychology and Behavioral Medicine</i> , 2020, 8, 461-474.	0.8	2

#	ARTICLE	IF	CITATIONS
19	Changes in hair cortisol and self-reported stress measures following mindfulness-based stress reduction (MBSR): A proof-of-concept study in pediatric hematology-oncology professionals. <i>Complementary Therapies in Clinical Practice</i> , 2020, 41, 101249.	0.7	3
20	Inconsistencies between measures of cognitive dysfunction in childhood acute lymphoblastic leukemia survivors: Description and understanding. <i>Psycho-Oncology</i> , 2020, 29, 1201-1208.	1.0	3
21	Do professionals change their communication behaviours following a training in hypnosis-derived communication? A feasibility study in pediatric oncology. <i>Complementary Therapies in Medicine</i> , 2020, 52, 102426.	1.3	7
22	The effect of cardiorespiratory fitness and physical activity levels on cognitive functions in survivors of childhood acute lymphoblastic leukemia. <i>Pediatric Hematology and Oncology</i> , 2020, 37, 582-598.	0.3	8
23	The Integration of Resource Patients in Collaborative Research: A Mixed Method Assessment of the Nesting Dolls Design. <i>Patient Education and Counseling</i> , 2020, 103, 1830-1838.	1.0	5
24	Visual short-term memory activation patterns in adult survivors of childhood acute lymphoblastic leukemia. <i>Cancer</i> , 2019, 125, 3639-3648.	2.0	3
25	Influence of genetic factors on long-term treatment related neurocognitive complications, and on anxiety and depression in survivors of childhood acute lymphoblastic leukemia: The Petale study. <i>PLoS ONE</i> , 2019, 14, e0217314.	1.1	14
26	Definition and improvement of the concept and tools of a psychosocial intervention program for parents in pediatric oncology: a mixed-methods feasibility study conducted with parents and healthcare professionals. <i>Pilot and Feasibility Studies</i> , 2019, 5, 20.	0.5	13
27	Psychosocial Intervention Programs for Parents of Children with Cancer: A Systematic Review and Critical Comparison of Programs' Models and Development. <i>Journal of Clinical Psychology in Medical Settings</i> , 2019, 26, 550-574.	0.8	18
28	Measuring adherence in pediatric hemophilia patients: French-language adaptation of the VERITAS-Pro and VERITAS-PRN and psychometric properties. <i>Cogent Medicine</i> , 2019, 6, 1673659.	0.7	3
29	The Role of Pediatric Psychologists in the Transition of Youth to Adult Health Care: A Descriptive Qualitative Study of Their Practice and Recommendations. <i>Journal of Clinical Psychology in Medical Settings</i> , 2019, 26, 353-363.	0.8	5
30	A comparison of attitudes toward HSCT and survival estimations post HSCT across two pediatric Hematology-Oncology and Intensive Care departments in Canada. <i>Bone Marrow Transplantation</i> , 2018, 53, 511-514.	1.3	0
31	Developing professional caregivers' empathy and emotional competencies through mindfulness-based stress reduction (MBSR): results of two proof-of-concept studies. <i>BMJ Open</i> , 2018, 8, e018421.	0.8	29
32	Could we use parent report as a valid proxy of child report on anxiety, depression, and distress? A systematic investigation of father-mother-child triads in children successfully treated for leukemia. <i>Pediatric Blood and Cancer</i> , 2018, 65, e26840.	0.8	27
33	Development and inter-rater reliability of a tool assessing hypnotic communication behaviours adopted by nurses caring for children with cancer: The Sainte-Justine Hypnotic Communication Assessment Scale. <i>Complementary Therapies in Medicine</i> , 2018, 37, 178-184.	1.3	10
34	Categorizing factors of adherence to parenteral treatment in growth hormone deficiencies and hemophilia: What should be the targets for future research?. <i>Patient Preference and Adherence</i> , 2018, Volume 12, 2039-2063.	0.8	7
35	Cancer-related effects on relationships, long-term psychological status and relationship satisfaction in couples whose child was treated for leukemia: A PETALE study. <i>PLoS ONE</i> , 2018, 13, e0203435.	1.1	10
36	DIVERGT screening procedure predicts general cognitive functioning in adult long-term survivors of pediatric acute lymphoblastic leukemia: A PETALE study. <i>Pediatric Blood and Cancer</i> , 2018, 65, e27259.	0.8	14

#	ARTICLE	IF	CITATIONS
37	How do professionals assess the quality of life of children with advanced cancer receiving palliative care, and what are their recommendations for improvement?. <i>BMC Palliative Care</i> , 2018, 17, 71.	0.8	12
38	Psychological risk in long-term survivors of childhood acute lymphoblastic leukemia and its association with functional health status: A PETALE cohort study. <i>Pediatric Blood and Cancer</i> , 2018, 65, e27356.	0.8	25
39	Identifying domains of quality of life in children with cancer undergoing palliative care: A qualitative study with professionals. <i>Palliative and Supportive Care</i> , 2017, 15, 565-574.	0.6	6
40	Understanding adherence to treatment and physical activity in children with hemophilia: The role of psychosocial factors. <i>Pediatric Hematology and Oncology</i> , 2017, 34, 1-9.	0.3	10
41	Quality of Life, Treatment Beliefs, and Treatment Satisfaction in Children Treated for Primary Immunodeficiency with SClg. <i>Journal of Clinical Immunology</i> , 2017, 37, 496-504.	2.0	14
42	The PETALE study: Late adverse effects and biomarkers in childhood acute lymphoblastic leukemia survivors. <i>Pediatric Blood and Cancer</i> , 2017, 64, e26361.	0.8	66
43	Comparing two types of perspective taking as strategies for detecting distress amongst parents of children with cancer: A randomised trial. <i>PLoS ONE</i> , 2017, 12, e0175342.	1.1	12
44	Systemic aspects of conjugal resilience in couples with a child facing cancer and marrow transplantation. <i>International Journal of Qualitative Studies on Health and Well-being</i> , 2016, 11, 32423.	0.6	2
45	Motivational techniques to improve self-care in hemophilia: the need to support autonomy in children. <i>BMC Pediatrics</i> , 2016, 16, 4.	0.7	13
46	Training nurses in basic hypno-analgesia techniques to reduce procedural distress and pain in children: A feasibility trial. <i>Cogent Medicine</i> , 2016, 3, 1165083.	0.7	8
47	Outcomes of MBSR or MBSR-based interventions in health care providers: A systematic review with a focus on empathy and emotional competencies. <i>Complementary Therapies in Medicine</i> , 2016, 24, 19-28.	1.3	182
48	Stability and Repeatability of the Distress Thermometer (DT) and the Edmonton Symptom Assessment System-Revised (ESAS-r) with Parents of Childhood Cancer Survivors. <i>PLoS ONE</i> , 2016, 11, e0159773.	1.1	19
49	How does a physician's accurate understanding of a cancer patient's unmet needs contribute to patient perception of physician empathy?. <i>Patient Education and Counseling</i> , 2015, 98, 734-741.	1.0	21
50	To be or not to be empathic: the combined role of empathic concern and perspective taking in understanding burnout in general practice. <i>BMC Family Practice</i> , 2014, 15, 15.	2.9	189
51	How can we explain physician accuracy in assessing patient distress? A multilevel analysis in patients with advanced cancer. <i>Patient Education and Counseling</i> , 2014, 94, 322-327.	1.0	12
52	Changes in psychological adjustment over the course of treatment for breast cancer: the predictive role of social sharing and social support. <i>Psycho-Oncology</i> , 2014, 23, 291-298.	1.0	51
53	Empathic concern and professional characteristics associated with clinical empathy in French general practitioners. <i>European Journal of General Practice</i> , 2013, 19, 23-28.	0.9	32
54	A systematic review of the associations between empathy measures and patient outcomes in cancer care. <i>Psycho-Oncology</i> , 2012, 21, 1255-1264.	1.0	184

#	ARTICLE	IF	CITATIONS
55	Physicians' understanding of patients' personal representations of their diabetes: Accuracy and association with self-care. <i>Psychology and Health</i> , 2011, 26, 101-117.	1.2	25
56	A Rorschach Stability Study in a Nonpatient Adult Sample. <i>Journal of Personality Assessment</i> , 2006, 87, 330-348.	1.3	31
57	Development and refinement of Relax: A training in hypnosis-derived communication for pediatric nurses to prevent procedural pain. <i>British Journal of Pain</i> , 0, , 204946372211031.	0.7	0
