#	ARTICLE	IF	CITATIONS
1	Urban life promotes delayed dispersal and family living in a non-social bird species. <i>Scientific Reports</i> , 2021, 11, 107.	1.6	2
2	Slc7a11 downregulation is rapidly reversed after cessation of competitive social stress in zebra finches. <i>Molecular Biology Reports</i> , 2021, 48, 3007-3010.	1.0	0
3	Juvenile pheomelanin-based plumage coloration has evolved more frequently in carnivorous species. <i>Ibis</i> , 2020, 162, 238-244.	1.0	8
4	A source of exogenous oxidative stress improves oxidative status and favors pheomelanin synthesis in zebra finches. <i>Comparative Biochemistry and Physiology Part - C: Toxicology and Pharmacology</i> , 2020, 228, 108667.	1.3	4
5	Increase of the benzothiazole moiety content of pheomelanin pigment after endogenous free radical inducement. <i>Dyes and Pigments</i> , 2020, 180, 108516.	2.0	7
6	Exposure to a competitive social environment activates an epigenetic mechanism that limits pheomelanin synthesis in zebra finches. <i>Molecular Ecology</i> , 2019, 28, 3698-3708.	2.0	5
7	Changes in melanocyte RNA and DNA methylation favour pheomelanin synthesis and may avoid systemic oxidative stress after dietary cysteine supplementation in birds. <i>Molecular Ecology</i> , 2019, 28, 1030-1042.	2.0	16
8	A Negative Association between Melanin-Based Plumage Color Heterogeneity and Intensity in Birds. <i>Physiological and Biochemical Zoology</i> , 2019, 92, 266-273.	0.6	0
9	Dark pigmentation limits thermal niche position in birds. <i>Functional Ecology</i> , 2018, 32, 1531-1540.	1.7	50
10	Females mate with males with diminished pheomelanin-based coloration in the Eurasian nuthatch <i>Sitta europaea</i> . <i>Journal of Avian Biology</i> , 2018, 49, e01854.	0.6	10
11	Heritability of fear of humans in urban and rural populations of a bird species. <i>Scientific Reports</i> , 2016, 6, 31060.	1.6	49
12	Links between fear of humans, stress and survival support a non-random distribution of birds among urban and rural habitats. <i>Scientific Reports</i> , 2015, 5, 13723.	1.6	61
13	High Urban Breeding Densities Do Not Disrupt Genetic Monogamy in a Bird Species. <i>PLoS ONE</i> , 2014, 9, e91314.	1.1	31
