

# Susan L Andersen

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/6018646/susan-l-andersen-publications-by-year.pdf>

**Version:** 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

80  
papers

9,454  
citations

41

#	Paper	IF	Citations
80	Neuroinflammation, Early-Life Adversity, and Brain Development.. <i>Harvard Review of Psychiatry</i> , <b>2022</b> , 30, 24-39	4.1	5
79	Novelty preferences and cocaine-associated cues influence regions associated with the salience network in juvenile female rats. <i>Pharmacology Biochemistry and Behavior</i> , <b>2021</b> , 203, 173117	3.9	0
78	Sluggish cognitive tempo and exposure to interpersonal trauma in children. <i>Anxiety, Stress and Coping</i> , <b>2020</b> , 33, 100-114	3.1	6
77	This is your teen brain on drugs: In search of biological factors unique to dependence toxicity in adolescence. <i>Neurotoxicology and Teratology</i> , <b>2020</b> , 81, 106916	3.9	6
76	Experience during adolescence shapes brain development: From synapses and networks to normal and pathological behavior. <i>Neurotoxicology and Teratology</i> , <b>2019</b> , 76, 106834	3.9	27
75	The use of laser capture microdissection to identify specific pathways and mechanisms involved in impulsive choice in rats. <i>Heliyon</i> , <b>2019</b> , 5, e02254	3.6	0
74	Juvenile exposure to methylphenidate and guanfacine in rats: effects on early delay discounting and later cocaine-taking behavior. <i>Psychopharmacology</i> , <b>2019</b> , 236, 685-698	4.7	9
73	Stress, sensitive periods, and substance abuse. <i>Neurobiology of Stress</i> , <b>2019</b> , 10, 100140	7.6	28
72	Anhedonic behavior and ̢-aminobutyric acid during a sensitive period in female rats exposed to early adversity. <i>Journal of Psychiatric Research</i> , <b>2018</b> , 100, 8-15	5.2	9
71	Working memory and salivary brain-derived neurotrophic factor as developmental predictors of cocaine seeking in male and female rats. <i>Addiction Biology</i> , <b>2018</b> , 23, 868-879	4.6	9
70	Early life stress and later peer distress on depressive behavior in adolescent female rats: Effects of a novel intervention on GABA and D2 receptors. <i>Behavioural Brain Research</i> , <b>2017</b> , 330, 37-45	3.4	22
69	Risks of Stimulant Use for Attention Deficit Hyperactivity Disorder on the Developing Brain: Primum non nocere. <i>Clinical Pediatrics</i> , <b>2017</b> , 56, 805-810	1.2	1
68	Sensitive periods of substance abuse: Early risk for the transition to dependence. <i>Developmental Cognitive Neuroscience</i> , <b>2017</b> , 25, 29-44	5.5	149
67	When the party is over: depressive-like states in rats following termination of cortical D1 receptor overexpression. <i>Psychopharmacology</i> , <b>2016</b> , 233, 1191-201	4.7	20
66	The developmental inter-relationships between activity, novelty preferences, and delay discounting in male and female rats. <i>Developmental Psychobiology</i> , <b>2016</b> , 58, 231-42	3	21
65	Sex differences in the ontogeny of CRF receptors during adolescent development in the dorsal raphe nucleus and ventral tegmental area. <i>Synapse</i> , <b>2016</b> , 70, 125-32	2.4	19
64	Preventative treatment in an animal model of ADHD: Behavioral and biochemical effects of methylphenidate and its interactions with ovarian hormones in female rats. <i>European Neuropsychopharmacology</i> , <b>2016</b> , 26, 1496-1506	1.2	7

63	Commentary on the special issue on the adolescent brain: Adolescence, trajectories, and the importance of prevention. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2016</b> , 70, 329-333	9	19
62	Cocaine-conditioned odor cues without chronic exposure: Implications for the development of addiction vulnerability. <i>NeuroImage: Clinical</i> , <b>2015</b> , 8, 652-9	5.3	7
61	Developmental emergence of an obsessive-compulsive phenotype and binge behavior in rats. <i>Psychopharmacology</i> , <b>2015</b> , 232, 3173-81	4.7	15
60	Extinction and reinstatement to cocaine-associated cues in male and female juvenile rats and the role of D1 dopamine receptor. <i>Neuropharmacology</i> , <b>2015</b> , 95, 22-8	5.5	10
59	Exposure to early adversity: Points of cross-species translation that can lead to improved understanding of depression. <i>Development and Psychopathology</i> , <b>2015</b> , 27, 477-91	4.3	80
58	Reducing substance use during adolescence: a translational framework for prevention. <i>Psychopharmacology</i> , <b>2014</b> , 231, 1437-53	4.7	40
57	Sex-dependent changes in ADHD-like behaviors in juvenile rats following cortical dopamine depletion. <i>Behavioural Brain Research</i> , <b>2014</b> , 270, 357-63	3.4	17
56	Juvenile methylphenidate reduces prefrontal cortex plasticity via D3 receptor and BDNF in adulthood. <i>Frontiers in Synaptic Neuroscience</i> , <b>2014</b> , 6, 1	3.5	34
55	Viral over-expression of D1 dopamine receptors in the prefrontal cortex increase high-risk behaviors in adults: comparison with adolescents. <i>Psychopharmacology</i> , <b>2014</b> , 231, 1615-26	4.7	43
54	Evidence for a neuroinflammatory mechanism in delayed effects of early life adversity in rats: relationship to cortical NMDA receptor expression. <i>Brain, Behavior, and Immunity</i> , <b>2013</b> , 28, 218-26	16.6	65
53	Early life adversity alters the developmental profiles of addiction-related prefrontal cortex circuitry. <i>Brain Sciences</i> , <b>2013</b> , 3, 143-58	3.4	50
52	Depressive-like behavior in adolescents after maternal separation: sex differences, controllability, and GABA. <i>Developmental Neuroscience</i> , <b>2012</b> , 34, 210-7	2.2	67
51	Reply to Abramowitz et al.: Animal Models of OCD. <i>Biological Psychiatry</i> , <b>2011</b> , 69, e31-e32	7.9	4
50	Nonsteroidal anti-inflammatory treatment prevents delayed effects of early life stress in rats. <i>Biological Psychiatry</i> , <b>2011</b> , 70, 434-40	7.9	92
49	Annual Research Review: New frontiers in developmental neuropharmacology: can long-term therapeutic effects of drugs be optimized through carefully timed early intervention?. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , <b>2011</b> , 52, 476-503	7.9	29
48	Developmental trajectories during adolescence in males and females: a cross-species understanding of underlying brain changes. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2011</b> , 35, 1687-703 <sup>9</sup>		243
47	Pharmacologic neuroimaging of the ontogeny of dopamine receptor function. <i>Developmental Neuroscience</i> , <b>2010</b> , 32, 125-38	2.2	44
46	A novel, multiple symptom model of obsessive-compulsive-like behaviors in animals. <i>Biological Psychiatry</i> , <b>2010</b> , 68, 741-7	7.9	49

45	Abnormal behavioral and neurotrophic development in the younger sibling receiving less maternal care in a communal nursing paradigm in rats. <i>Psychoneuroendocrinology</i> , <b>2010</b> , 35, 392-402	5	48
44	Juvenile methylphenidate exposure and factors that influence incentive processing. <i>Developmental Neuroscience</i> , <b>2009</b> , 31, 95-106	2.2	19
43	Neurobiology of the development of motivated behaviors in adolescence: a window into a neural systems model. <i>Pharmacology Biochemistry and Behavior</i> , <b>2009</b> , 93, 199-211	3.9	186
42	Desperately driven and no brakes: developmental stress exposure and subsequent risk for substance abuse. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2009</b> , 33, 516-24	9	239
41	Length of time between onset of childhood sexual abuse and emergence of depression in a young adult sample: a retrospective clinical report. <i>Journal of Clinical Psychiatry</i> , <b>2009</b> , 70, 684-91	4.6	71
40	Juvenile methylphenidate modulates reward-related behaviors and cerebral blood flow by decreasing cortical D3 receptors. <i>European Journal of Neuroscience</i> , <b>2008</b> , 27, 2962-72	3.5	37
39	Stress, sensitive periods and maturational events in adolescent depression. <i>Trends in Neurosciences</i> , <b>2008</b> , 31, 183-91	13.3	633
38	Transient D1 dopamine receptor expression on prefrontal cortex projection neurons: relationship to enhanced motivational salience of drug cues in adolescence. <i>Journal of Neuroscience</i> , <b>2008</b> , 28, 2375-82	6.6	223
37	Preliminary evidence for sensitive periods in the effect of childhood sexual abuse on regional brain development. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , <b>2008</b> , 20, 292-301	2.7	476
36	Delayed extinction and stronger reinstatement of cocaine conditioned place preference in adolescent rats, compared to adults. <i>Behavioral Neuroscience</i> , <b>2008</b> , 122, 460-5	2.1	129
35	Is adolescence a sensitive period for depression? Behavioral and neuroanatomical findings from a social stress model. <i>Synapse</i> , <b>2008</b> , 62, 22-30	2.4	147
34	The enduring effects of an adolescent social stressor on synaptic density, part II: Poststress reversal of synaptic loss in the cortex by adinazolam and MK-801. <i>Synapse</i> , <b>2008</b> , 62, 185-92	2.4	69
33	Determination of hemispheric emotional valence in individual subjects: a new approach with research and therapeutic implications. <i>Behavioral and Brain Functions</i> , <b>2007</b> , 3, 13	4.1	22
32	Neurobiological and Behavioral Consequences of Exposure to Childhood Traumatic Stress <b>2006</b> , 180-195		2
31	Neurobiological consequences of early stress and childhood maltreatment: are results from human and animal studies comparable?. <i>Annals of the New York Academy of Sciences</i> , <b>2006</b> , 1071, 313-23	6.5	264
30	Stimulants and the developing brain. <i>Trends in Pharmacological Sciences</i> , <b>2005</b> , 26, 237-43	13.2	142
29	Early developmental exposure to methylphenidate reduces cocaine-induced potentiation of brain stimulation reward in rats. <i>Biological Psychiatry</i> , <b>2005</b> , 57, 120-5	7.9	74
28	Mapping dopamine D2/D3 receptor function using pharmacological magnetic resonance imaging. <i>Psychopharmacology</i> , <b>2005</b> , 180, 705-15	4.7	76

27	Delayed effects of early stress on hippocampal development. <i>Neuropsychopharmacology</i> , <b>2004</b> , 29, 1988-93	8.7	249
26	Regulation of working memory by dopamine D4 receptor in rats. <i>Neuropsychopharmacology</i> , <b>2004</b> , 29, 1648-55	8.7	94
25	Childhood neglect is associated with reduced corpus callosum area. <i>Biological Psychiatry</i> , <b>2004</b> , 56, 80-5	7.9	346
24	Altering the course of neurodevelopment: a framework for understanding the enduring effects of psychotropic drugs. <i>International Journal of Developmental Neuroscience</i> , <b>2004</b> , 22, 423-40	2.7	102
23	Rate dependency revisited: understanding the effects of methylphenidate in children with attention deficit hyperactivity disorder. <i>Journal of Child and Adolescent Psychopharmacology</i> , <b>2003</b> , 13, 41-51	2.9	32
22	Trajectories of brain development: point of vulnerability or window of opportunity?. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2003</b> , 27, 3-18	9	1101
21	The neurobiological consequences of early stress and childhood maltreatment. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2003</b> , 27, 33-44	9	1005
20	Enduring behavioral effects of early exposure to methylphenidate in rats. <i>Biological Psychiatry</i> , <b>2003</b> , 54, 1330-7	7.9	205
19	Pubertal changes in gonadal hormones do not underlie adolescent dopamine receptor overproduction. <i>Psychoneuroendocrinology</i> , <b>2002</b> , 27, 683-91	5	110
18	Differences in behavior and monoamine laterality following neonatal clomipramine treatment. <i>Developmental Psychobiology</i> , <b>2002</b> , 41, 50-7	3	35
17	Altered responsiveness to cocaine in rats exposed to methylphenidate during development. <i>Nature Neuroscience</i> , <b>2002</b> , 5, 13-4	25.5	232
16	Developmental neurobiology of childhood stress and trauma. <i>Psychiatric Clinics of North America</i> , <b>2002</b> , 25, 397-426, vii-viii	3.1	413
15	Changes in the second messenger cyclic AMP during development may underlie motoric symptoms in attention deficit/hyperactivity disorder (ADHD). <i>Behavioural Brain Research</i> , <b>2002</b> , 130, 197-201	3.4	68
14	Maturation increases in c-fos expression in the ascending dopamine systems. <i>Synapse</i> , <b>2001</b> , 41, 345-50	2.4	50
13	Dopamine receptor pruning in prefrontal cortex during the periadolescent period in rats. <i>Synapse</i> , <b>2000</b> , 37, 167-9	2.4	385
12	Degree of neuronal activation following FG-7142 changes across regions during development. <i>Developmental Brain Research</i> , <b>1999</b> , 116, 201-3		30
11	Serotonin laterality in amygdala predicts performance in the elevated plus maze in rats. <i>NeuroReport</i> , <b>1999</b> , 10, 3497-500	1.7	83
10	The developing prefrontal cortex: is there a transient interneuron that stimulates catecholamine terminals?. <i>Synapse</i> , <b>1998</b> , 29, 89-91	2.4	11

9	Progressive accumbens degeneration after neonatal striatal 6-hydroxydopamine in rats. <i>Neuroscience Letters</i> , <b>1998</b> , 247, 99-102	3.3	5
8	Sex differences in dopamine receptor overproduction and elimination. <i>NeuroReport</i> , <b>1997</b> , 8, 1495-8	1.7	262
7	Effects of (-)-sulpiride on dopamine release in striatum of developing rats: degree of depolarization influences responsiveness. <i>Journal of Neurochemistry</i> , <b>1996</b> , 67, 1931-7	6	9
6	Development of an affordable hi-resolution activity monitor system for laboratory animals. <i>Pharmacology Biochemistry and Behavior</i> , <b>1996</b> , 54, 479-83	3.9	8
5	Evidence for dopamine receptor pruning between adolescence and adulthood in striatum but not nucleus accumbens. <i>Developmental Brain Research</i> , <b>1995</b> , 89, 167-72		398
4	Calcium dependency and tetrodotoxin sensitivity of neostriatal dopamine release in 5-day-old and adult rats as measured by in vivo microdialysis. <i>Journal of Neurochemistry</i> , <b>1994</b> , 62, 1741-9	6	15
3	The ontogeny of apomorphine-induced alterations of neostriatal dopamine release: effects on potassium-evoked release. <i>Neurochemical Research</i> , <b>1994</b> , 19, 339-45	4.6	12
2	The development of D2 autoreceptor-mediated modulation of K(+)-evoked dopamine release in the neostriatum. <i>Developmental Brain Research</i> , <b>1994</b> , 78, 123-30		23
1	The ontogeny of apomorphine-induced alterations of neostriatal dopamine release: effects on spontaneous release. <i>Journal of Neurochemistry</i> , <b>1993</b> , 61, 2247-55	6	68
