| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | A spatiotemporal framework to calibrate high-resolution global monthly precipitation products: An application to the Urmia Lake Watershed in Iran. <i>International Journal of Climatology</i> , 2022, 42, 2169-2194.    | 1.5 | 10        |
| 2  | Energy-Based Approaches in Estimating Actual Evapotranspiration Focusing on Land Surface Temperature: A Review of Methods, Concepts, and Challenges. <i>Energies</i> , 2022, 15, 1264.                                   | 1.6 | 12        |
| 3  | Stacking machine learning models versus a locally weighted linear model to generate high-resolution monthly precipitation over a topographically complex area. <i>Atmospheric Research</i> , 2022, 272, 106159.          | 1.8 | 24        |
| 4  | Predicting failure pressure of the corroded offshore pipelines using an efficient finite element based algorithm and machine learning techniques. <i>Ocean Engineering</i> , 2022, 254, 111382.                          | 1.9 | 15        |
| 5  | Comparing the Effects of Different Daily and Sub-Daily Downscaling Approaches on the Response of Urban Stormwater Collection Systems. <i>Water Resources Management</i> , 2021, 35, 505-533.                             | 1.9 | 4         |
| 6  | System dynamics approaches to assess the impacts of climate change on surface water quality and quantity: case study of Karoun River, Iran. <i>Environmental Science and Pollution Research</i> , 2021, 28, 31327-31339. | 2.7 | 6         |
| 7  | Performance evaluation of various evapotranspiration modeling scenarios based on METRIC method and climatic indexes. <i>Environmental Monitoring and Assessment</i> , 2021, 193, 111.                                    | 1.3 | 6         |
| 8  | Improving spatial estimation of hydrologic attributes via optimized moving search strategies. <i>Arabian Journal of Geosciences</i> , 2021, 14, 1.   | 0.6 | 10        |
| 9  | An Uncertainty-Based Regional Comparative Analysis on the Performance of Different Bias Correction Methods in Statistical Downscaling of Precipitation. <i>Water Resources Management</i> , 2021, 35, 2503-2518.         | 1.9 | 6         |
| 10 | GRACEfully Closing the Water Balance: A Data-Driven Probabilistic Approach Applied to River Basins in Iran. <i>Water Resources Research</i> , 2021, 57, e2020WR029071.   | 1.7 | 13        |
| 11 | Uncertainty-based rainfall network design using a fuzzy spatial interpolation method. <i>Applied Soft Computing Journal</i> , 2021, 106, 107296.   | 4.1 | 12        |
| 12 | Nested Augmentation of Rainfall Monitoring Network: Proposing a Hybrid Implementation of Block Kriging and Entropy Theory. <i>Water Resources Management</i> , 2021, 35, 4665-4680.                                      | 1.9 | 4         |
| 13 | Assessing GHG mitigation goals of INDCs (NDCs) considering socio-economic and environmental indicators of the parties. <i>Mitigation and Adaptation Strategies for Global Change</i> , 2021, 26, 1.                      | 1.0 | 1         |
| 14 | Assessing vulnerability to climate change for total organic carbon in a system of drinking water supply. <i>Sustainable Cities and Society</i> , 2020, 53, 101904.   | 5.1 | 19        |
| 15 | Localized linear regression methods for estimating monthly precipitation grids using elevation, rain gauge, and TRMM data. <i>Theoretical and Applied Climatology</i> , 2020, 142, 623-641.                              | 1.3 | 13        |
| 16 | Do direct and inverse uncertainty assessment methods present the same results?. <i>Journal of Hydroinformatics</i> , 2020, 22, 842-855.  | 1.1 | 9         |
| 17 | Effects of sample size of ground motions on seismic fragility analysis of offshore jacket platforms using Genetic Algorithm. <i>Ocean Engineering</i> , 2019, 189, 106326.   | 1.9 | 27        |
| 18 | Parametric uncertainty assessment of hydrological models: coupling UNEEC-P and a fuzzy general regression neural network. <i>Hydrological Sciences Journal</i> , 2019, 64, 1080-1094.                                    | 1.2 | 20        |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Challenge of rainfall network design considering spatial versus spatiotemporal variations. Journal of Hydrology, 2019, 574, 990-1002.   | 2.3 | 18        |
| 20 | A new approach to flood susceptibility assessment in data-scarce and ungauged regions based on GIS-based hybrid multi criteria decision-making method. Journal of Hydrology, 2019, 572, 17-31.              | 2.3 | 112       |
| 21 | Prediction of scour pattern around hydraulic structures using geostatistical methods. Arabian Journal of Geosciences, 2019, 12, 1.  | 0.6 | 0         |
| 22 | Spatial Scale Resolution of Prognostic Hydrological Models: Simulation Performance and Application in Climate Change Impact Assessment. Water Resources Management, 2019, 33, 189-205.                      | 1.9 | 5         |
| 23 | Backcasting long-term climate data: evaluation of hypothesis. Theoretical and Applied Climatology, 2018, 132, 717-726.  | 1.3 | 7         |
| 24 | Improvement of multiple linear regression method for statistical downscaling of monthly precipitation. International Journal of Environmental Science and Technology, 2018, 15, 1897-1912.                  | 1.8 | 10        |
| 25 | Revisited rainfall network design: evaluation of heuristic versus entropy theory methods. Arabian Journal of Geosciences, 2018, 11, 1.  | 0.6 | 7         |
| 26 | Water quality assessment of the most important dam (Latyan dam) in Tehran, Iran. Environmental Science and Pollution Research, 2018, 25, 29227-29239.   | 2.7 | 14        |
| 27 | A comparison between direct and indirect frameworks to evaluate impacts of climate change on streamflows: case study of Karkheh River basin in Iran. Journal of Water and Climate Change, 2017, 8, 652-674. | 1.2 | 6         |
| 28 | Exploring spatiotemporal meteorological correlations for basin scale meteorological drought forecasting using data mining methods. Arabian Journal of Geosciences, 2017, 10, 1.                             | 0.6 | 13        |
| 29 | Spatial rainfall prediction using optimal features selection approaches. Hydrology Research, 2015, 46, 343-355.   | 1.1 | 13        |
| 30 | Identification of long-term annual pattern of meteorological drought based on spatiotemporal methods: evaluation of different geostatistical approaches. Natural Hazards, 2015, 76, 515-541.                | 1.6 | 18        |
| 31 | Uncertainty assessment of hydrological models with fuzzy extension principle: Evaluation of a new arithmetic operator. Water Resources Research, 2014, 50, 1095-1111.                                       | 1.7 | 20        |
| 32 | Improving Bayesian maximum entropy and ordinary Kriging methods for estimating precipitations in a large watershed: a new cluster-based approach. Canadian Journal of Earth Sciences, 2014, 51, 43-55.      | 0.6 | 13        |
| 33 | Monthly water balance modeling: Probabilistic, possibilistic and hybrid methods for model combination and ensemble simulation. Journal of Hydrology, 2014, 511, 675-691.                                    | 2.3 | 23        |
| 34 | Evaluation of spatial and spatiotemporal estimation methods in simulation of precipitation variability patterns. Theoretical and Applied Climatology, 2013, 113, 429-444.                                   | 1.3 | 29        |
| 35 | Improved statistical downscaling of daily precipitation using <scp>SDSM</scp> platform and data mining methods. International Journal of Climatology, 2013, 33, 2561-2578.                                  | 1.5 | 54        |
| 36 | Performance assessment of different data mining methods in statistical downscaling of daily precipitation. Journal of Hydrology, 2013, 492, 1-14.   | 2.3 | 50        |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Uncertainty assessment of monthly water balance models based on Incremental Modified Fuzzy Extension Principle method. <i>Journal of Hydroinformatics</i> , 2013, 15, 1340-1360.        | 1.1 | 17        |
| 38 | New Analytical Solution to Water Content Simulation in Porous Media. <i>Journal of Irrigation and Drainage Engineering - ASCE</i> , 2012, 138, 328-335.                                 | 0.6 | 15        |
| 39 | Comparison Between Active Learning Method and Support Vector Machine for Runoff Modeling. <i>Journal of Hydrology and Hydromechanics</i> , 2012, 60, 16-32.                             | 0.7 | 9         |
| 40 | The use of a genetic algorithm-based search strategy in geostatistics: application to a set of anisotropic piezometric head data. <i>Computers and Geosciences</i> , 2012, 41, 136-146. | 2.0 | 22        |
| 41 | Application of simple clustering on space-time mapping of mean monthly rainfall pattern. <i>International Journal of Climatology</i> , 2011, 31, 732-741.                               | 1.5 | 21        |
| 42 | Forecasting monthly urban water demand using Extended Kalman Filter and Genetic Programming. <i>Expert Systems With Applications</i> , 2011, 38, 7387-7395.                             | 4.4 | 86        |
| 43 | Time domain analysis of dam-reservoir interaction. <i>Engineering Computations</i> , 2010, 27, 280-294.   | 0.7 | 5         |
| 44 | Applications of Variational Iteration Method in Applied Hydrology. <i>Journal of Hydrologic Engineering - ASCE</i> , 2009, 14, 984-991.   | 0.8 | 4         |
| 45 | Optimized scenario for rainfall forecasting using genetic algorithm coupled with artificial neural network. <i>Expert Systems With Applications</i> , 2008, 35, 1415-1421.              | 4.4 | 171       |
| 46 | Cluster-based ordinary kriging of piezometric head in West Texas/New Mexico – Testing of hypothesis. <i>Journal of Hydrology</i> , 2008, 351, 360-367.                                  | 2.3 | 29        |
| 47 | An Analytic Solution of Water Transport in Unsaturated Porous Media. <i>Journal of Porous Media</i> , 2008, 11, 591-601.  | 1.0 | 17        |
