

# Steven D Gaines

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/6034441/steven-d-gaines-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

136  
papers

11,099  
citations

#	Paper	IF	Citations
136	Expanding ocean food production under climate change.. <i>Nature</i> , <b>2022</b> , 605, 490-496	50.4	0
135	First report on the swim bladder index, proximate composition, and fatty acid analysis of swim bladder from cultured <i>Totoaba macdonaldi</i> fed compound aquafeeds. <i>Aquaculture Reports</i> , <b>2021</b> , 21, 100901	2.3	0
134	Variation in herbivore grazing behavior across Caribbean reef sites. <i>Marine Biology</i> , <b>2021</b> , 168, 1	2.5	1
133	Protecting the global ocean for biodiversity, food and climate. <i>Nature</i> , <b>2021</b> , 592, 397-402	50.4	131
132	Range edges of North American marine species are tracking temperature over decades. <i>Global Change Biology</i> , <b>2021</b> , 27, 3145-3156	11.4	7
131	Reply to Hilborn: We agree that MPAs can improve fish catch in the South and Southeast Asia. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2021</b> , 118,	11.5	
130	Reply to Ovando et al.: How connected are global fisheries?. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2021</b> , 118,	11.5	1
129	Assessing the population-level conservation effects of marine protected areas. <i>Conservation Biology</i> , <b>2021</b> , 35, 1861-1870	6	3
128	A case for seaweed aquaculture inclusion in U.S. nutrient pollution management. <i>Marine Policy</i> , <b>2021</b> , 129, 104506	3.5	9
127	A novel marine spatial management tool for multiple conflicts recognition and optimization of marine functional zoning in the East China sea. <i>Journal of Environmental Management</i> , <b>2021</b> , 298, 113506	7.9	1
126	Realistic fisheries management reforms could mitigate the impacts of climate change in most countries. <i>PLoS ONE</i> , <b>2020</b> , 15, e0224347	3.7	28
125	Opportunities for agent-based modelling in human dimensions of fisheries. <i>Fish and Fisheries</i> , <b>2020</b> , 21, 570-587	6	6
124	Latitude and protection affect decadal trends in reef trophic structure over a continental scale. <i>Ecology and Evolution</i> , <b>2020</b> , 10, 6954-6966	2.8	2
123	Cooperation as a solution to shared resources in territorial use rights in fisheries. <i>Ecological Applications</i> , <b>2020</b> , 30, e02022	4.9	4
122	The importance of cultural ecosystem services in natural resource-dependent communities: Implications for management. <i>Ecosystem Services</i> , <b>2020</b> , 44, 101123	6.1	1
121	Cold range edges of marine fishes track climate change better than warm edges. <i>Global Change Biology</i> , <b>2020</b> , 26, 2908-2922	11.4	25
120	Trophic redundancy and predator size class structure drive differences in kelp forest ecosystem dynamics. <i>Ecology</i> , <b>2020</b> , 101, e02993	4.6	17

119	Ecological impacts of human-induced animal behaviour change. <i>Ecology Letters</i> , <b>2020</b> , 23, 1522-1536	10	28
118	Status and trends of moored fish aggregating device (MFAD) fisheries in the Caribbean and Bermuda. <i>Marine Policy</i> , <b>2020</b> , 121, 104148	3.5	1
117	A global network of marine protected areas for food. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2020</b> , 117, 28134-28139	11.5	31
116	Let more big fish sink: Fisheries prevent blue carbon sequestration-half in unprofitable areas. <i>Science Advances</i> , <b>2020</b> , 6,	14.3	26
115	Calibrating Environmental DNA Metabarcoding to Conventional Surveys for Measuring Fish Species Richness. <i>Frontiers in Ecology and Evolution</i> , <b>2020</b> , 8,	3.7	27
114	Fisheries governance in the face of climate change: Assessment of policy reform implications for Mexican fisheries. <i>PLoS ONE</i> , <b>2019</b> , 14, e0222317	3.7	10
113	Designing MPAs for food security in open-access fisheries. <i>Scientific Reports</i> , <b>2019</b> , 9, 8033	4.9	15
112	When Do Ecosystem Services Depend on Rare Species?. <i>Trends in Ecology and Evolution</i> , <b>2019</b> , 34, 746-758	5.9	66
111	Optimal harvest responses to environmental forecasts depend on resource knowledge and how it can be used. <i>Canadian Journal of Fisheries and Aquatic Sciences</i> , <b>2019</b> , 76, 1495-1502	2.4	0
110	Organization Science improves management effectiveness of Marine Protected Areas. <i>Journal of Environmental Management</i> , <b>2019</b> , 240, 285-292	7.9	14
109	Broadly inflicted stressors can cause ecosystem thinning. <i>Theoretical Ecology</i> , <b>2019</b> , 12, 207-223	1.6	1
108	Design trade-offs in rights-based management of small-scale fisheries. <i>Conservation Biology</i> , <b>2019</b> , 33, 361-368	6	4
107	Underestimating the benefits of marine protected areas for the replenishment of fished populations. <i>Frontiers in Ecology and the Environment</i> , <b>2019</b> , 17, 407-413	5.5	29
106	PISCO: Advances Made Through the Formation of a Large-Scale, Long-Term Consortium for Integrated Understanding of Coastal Ecosystem Dynamics. <i>Oceanography</i> , <b>2019</b> , 32, 16-25	2.3	5
105	Connecting Science to Policymakers, Managers, and Citizens. <i>Oceanography</i> , <b>2019</b> , 32, 106-115	2.3	5
104	Looking to aquatic species for conservation farming success. <i>Conservation Letters</i> , <b>2019</b> , 12, e12681	6.9	4
103	Leveraging satellite technology to create true shark sanctuaries. <i>Conservation Letters</i> , <b>2019</b> , 12, e12610	6.9	9
102	Ontogenetic shifts in predator diet drive tradeoffs between fisheries yield and strength of predator-prey interactions. <i>Fisheries Research</i> , <b>2018</b> , 205, 11-20	2.3	3

101	Biogeographic constraints to marine conservation in a changing climate. <i>Annals of the New York Academy of Sciences</i> , <b>2018</b> , 1429, 5-17	6.5	20
100	Comparative terrestrial feed and land use of an aquaculture-dominant world. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2018</b> , 115, 5295-5300	11.5	97
99	Protecting marine mammals, turtles, and birds by rebuilding global fisheries. <i>Science</i> , <b>2018</b> , 359, 1255-1258	12.3	18
98	Rapid and lasting gains from solving illegal fishing. <i>Nature Ecology and Evolution</i> , <b>2018</b> , 2, 650-658	12.3	53
97	Linking home ranges to protected area size: The case study of the Mediterranean Sea. <i>Biological Conservation</i> , <b>2018</b> , 221, 175-181	6.2	41
96	Five rules for pragmatic blue growth. <i>Marine Policy</i> , <b>2018</b> , 87, 331-339	3.5	51
95	Reply to 'Achieving sustainable and equitable fisheries requires nuanced policies not silver bullets'. <i>Nature Ecology and Evolution</i> , <b>2018</b> , 2, 1335	12.3	
94	Quality of a fished resource: Assessing spatial and temporal dynamics. <i>PLoS ONE</i> , <b>2018</b> , 13, e0196864	3.7	10
93	Opinion: Offshore aquaculture in the United States: Untapped potential in need of smart policy. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2018</b> , 115, 7162-7165	11.5	43
92	Using people's perceptions of ecosystem services to guide modeling and management efforts. <i>Science of the Total Environment</i> , <b>2018</b> , 637-638, 1014-1025	10.2	27
91	The cost of management delay: The case for reforming Mexican fisheries sooner rather than later. <i>Marine Policy</i> , <b>2018</b> , 88, 1-10	3.5	12
90	Improved fisheries management could offset many negative effects of climate change. <i>Science Advances</i> , <b>2018</b> , 4, eaao1378	14.3	107
89	The scale of life and its lessons for humanity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2018</b> , 115, 6328-6330	11.5	5
88	Offshore aquaculture: Spatial planning principles for sustainable development. <i>Ecology and Evolution</i> , <b>2017</b> , 7, 733-743	2.8	82
87	Are Territorial Use Rights in Fisheries (TURFs) sufficiently large?. <i>Marine Policy</i> , <b>2017</b> , 78, 189-195	3.5	11
86	Resetting predator baselines in coral reef ecosystems. <i>Scientific Reports</i> , <b>2017</b> , 7, 43131	4.9	40
85	Protection of large predators in a marine reserve alters size-dependent prey mortality. <i>Proceedings of the Royal Society B: Biological Sciences</i> , <b>2017</b> , 284,	4.4	27
84	Describing ecosystem contexts with single-species models: a theoretical synthesis for fisheries. <i>Fish and Fisheries</i> , <b>2017</b> , 18, 264-284	6	6

83	Disentangling the effects of fishing and environmental forcing on demographic variation in an exploited species. <i>Biological Conservation</i> , <b>2017</b> , 209, 488-498	6.2	8
82	Range contraction enables harvesting to extinction. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2017</b> , 114, 3945-3950	11.5	40
81	High fishery catches through trophic cascades in China. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2017</b> , 114, 717-721	11.5	81
80	Growth and life history variability of the grey reef shark ( <i>Carcharhinus amblyrhynchos</i> ) across its range. <i>PLoS ONE</i> , <b>2017</b> , 12, e0172370	3.7	20
79	Effects of fish movement assumptions on the design of a marine protected area to protect an overfished stock. <i>PLoS ONE</i> , <b>2017</b> , 12, e0186309	3.7	8
78	Accounting for tourism benefits in marine reserve design. <i>PLoS ONE</i> , <b>2017</b> , 12, e0190187	3.7	9
77	Agricultural pesticide use and adverse birth outcomes in the San Joaquin Valley of California. <i>Nature Communications</i> , <b>2017</b> , 8, 302	17.4	57
76	Ecological effects of full and partial protection in the crowded Mediterranean Sea: a regional meta-analysis. <i>Scientific Reports</i> , <b>2017</b> , 7, 8940	4.9	88
75	Mapping the global potential for marine aquaculture. <i>Nature Ecology and Evolution</i> , <b>2017</b> , 1, 1317-1324	12.3	212
74	Reply to Le Pape et al.: Management is key to preventing marine extinctions. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2017</b> , 114, E6275-E6276	11.5	2
73	Marine reserves solve an important bycatch problem in fisheries. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2017</b> , 114, 8927-8934	11.5	28
72	To what extent can ecosystem services motivate protecting biodiversity?. <i>Ecology Letters</i> , <b>2017</b> , 20, 935-946	11.5	26
71	Operationalizing Network Theory for Ecosystem Service Assessments. <i>Trends in Ecology and Evolution</i> , <b>2017</b> , 32, 118-130	10.9	69
70	Fisheries regulatory regimes and resilience to climate change. <i>Ambio</i> , <b>2017</b> , 46, 399-412	6.5	31
69	Drivers of redistribution of fishing and non-fishing effort after the implementation of a marine protected area network <b>2017</b> , 27, 416-428		18
68	Unexpected Management Choices When Accounting for Uncertainty in Ecosystem Service Tradeoff Analyses. <i>Conservation Letters</i> , <b>2017</b> , 10, 422-430	6.9	12
67	Compelling evidence: an influence on middle school students' accounts that may impact decision-making about socioscientific issues. <i>Environmental Education Research</i> , <b>2017</b> , 23, 1115-1129	3.1	8
66	Opportunism on the High Seas: Foraging Ecology of Olive Ridley Turtles in the Eastern Pacific Ocean. <i>Frontiers in Marine Science</i> , <b>2017</b> , 4,	4.5	17

65	Reply to Hilborn: Role of marine reserves depends on assumptions. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2017</b> , 114, E10611	11.5	1
64	Factors driving the implementation of fishery reforms. <i>Marine Policy</i> , <b>2016</b> , 71, 222-228	3.5	5
63	Functional diversity of catch mitigates negative effects of temperature variability on fisheries yields. <i>Proceedings of the Royal Society B: Biological Sciences</i> , <b>2016</b> , 283,	4.4	25
62	Siting marine protected areas based on habitat quality and extent provides the greatest benefit to spatially structured metapopulations. <i>Ecosphere</i> , <b>2016</b> , 7, e01533	3.1	25
61	Global fishery prospects under contrasting management regimes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2016</b> , 113, 5125-9	11.5	343
60	Where Does River Runoff Matter for Coastal Marine Conservation?. <i>Frontiers in Marine Science</i> , <b>2016</b> , 3,	4.5	17
59	New England Cod Collapse and the Climate. <i>PLoS ONE</i> , <b>2016</b> , 11, e0158487	3.7	12
58	Expanding marine protected areas to include degraded coral reefs. <i>Conservation Biology</i> , <b>2016</b> , 30, 1182-1191	4.1	28
57	Remaining questions in the case for balanced harvesting. <i>Fish and Fisheries</i> , <b>2016</b> , 17, 1216-1226	6	34
56	U.S. seafood import restriction presents opportunity and risk. <i>Science</i> , <b>2016</b> , 354, 1372-1374	33.3	29
55	OCEANS. Managing mining of the deep seabed. <i>Science</i> , <b>2015</b> , 349, 144-5	33.3	131
54	Organization Science—A new prospective to assess marine protected areas effectiveness. <i>Ocean and Coastal Management</i> , <b>2015</b> , 116, 443-448	3.9	8
53	Managing Bay and Estuarine Ecosystems for Multiple Services. <i>Estuaries and Coasts</i> , <b>2015</b> , 38, 35-48	2.8	23
52	Trophic cascades in an invaded ecosystem: native keystone predators facilitate a dominant invader in an estuarine community. <i>Oikos</i> , <b>2015</b> , 124, 1282-1292	4	8
51	Spatiotemporal variation in the relationship between landscape simplification and insecticide use. <i>Ecological Applications</i> , <b>2015</b> , 25, 1976-83	4.9	12
50	Solutions for Recovering and Sustaining the Bounty of the Ocean: Combining Fishery Reforms, Rights-Based Fisheries Management, and Marine Reserves. <i>Oceanography</i> , <b>2015</b> , 25, 252-263	2.3	31
49	Confronting Ambiguity in Science. <i>The Science Teacher</i> , <b>2015</b> , 082,	0.6	3
48	Removing biases in forecasts of fishery status. <i>Journal of Bioeconomics</i> , <b>2014</b> , 16, 213-219	0.7	4

47	Halpern et al. reply. <i>Nature</i> , <b>2013</b> , 495, E7-E7	50.4	4
46	Evaluating tradeoffs among ecosystem services to inform marine spatial planning. <i>Marine Policy</i> , <b>2013</b> , 38, 80-89	3.5	199
45	Forecasting fisheries collapse. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2013</b> , 110, 15859-60	11.5	5
44	New metrics for managing and sustaining the ocean's bounty. <i>Marine Policy</i> , <b>2012</b> , 36, 303-306	3.5	53
43	Habitat complexity impacts persistence and species interactions in an intertidal whelk. <i>Marine Biology</i> , <b>2012</b> , 159, 2867-2874	2.5	5
42	An index to assess the health and benefits of the global ocean. <i>Nature</i> , <b>2012</b> , 488, 615-20	50.4	578
41	Status and solutions for the world's unassessed fisheries. <i>Science</i> , <b>2012</b> , 338, 517-20	33.3	472
40	Reconciling conflict between the direct and indirect effects of marine reserve protection. <i>Environmental Conservation</i> , <b>2012</b> , 39, 225-236	3.3	26
39	Do behavioral foraging responses of prey to predators function similarly in restored and pristine foodwebs?. <i>PLoS ONE</i> , <b>2012</b> , 7, e32390	3.7	10
38	Using portfolio theory to assess tradeoffs between return from natural capital and social equity across space. <i>Biological Conservation</i> , <b>2011</b> , 144, 1499-1507	6.2	29
37	Integrated Land-Sea Conservation Planning: The Missing Links. <i>Annual Review of Ecology, Evolution, and Systematics</i> , <b>2011</b> , 42, 381-409	13.5	138
36	Identifying critical regions in small-world marine metapopulations. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2011</b> , 108, E907-13	11.5	84
35	Key features and context-dependence of fishery-induced trophic cascades. <i>Conservation Biology</i> , <b>2010</b> , 24, 382-94	6	54
34	Conservation management approaches to protecting the capacity for corals to respond to climate change: a theoretical comparison. <i>Global Change Biology</i> , <b>2010</b> , 16, 1229-1246	11.4	51
33	Fishing indirectly structures macroalgal assemblages by altering herbivore behavior. <i>American Naturalist</i> , <b>2010</b> , 176, 785-801	3.7	60
32	Designing marine reserve networks for both conservation and fisheries management. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2010</b> , 107, 18286-93	11.5	562
31	Economic Incentives and Global Fisheries Sustainability. <i>Annual Review of Resource Economics</i> , <b>2010</b> , 2, 299-318	5.9	39
30	Evolving science of marine reserves: new developments and emerging research frontiers. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2010</b> , 107, 18251-5	11.5	134

29	Model-based assessment of persistence in proposed marine protected area designs <b>2009</b> , 19, 433-48		54
28	Seascape genetics and the spatial ecology of marine populations. <i>Fish and Fisheries</i> , <b>2008</b> , 9, 363-377	6	193
27	Marine reserve effects on fishery profit. <i>Ecology Letters</i> , <b>2008</b> , 11, 370-9	10	88
26	Can catch shares prevent fisheries collapse?. <i>Science</i> , <b>2008</b> , 321, 1678-81	33.3	572
25	Spillover from marine reserves related to mechanisms of population regulation. <i>Theoretical Ecology</i> , <b>2008</b> , 1, 117-127	1.6	26
24	Temperature control of larval dispersal and the implications for marine ecology, evolution, and conservation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2007</b> , 104, 1266-71	11.5	614
23	Reproduction on the edge: large-scale patterns of individual performance in a marine invertebrate. <i>Ecology</i> , <b>2007</b> , 88, 2229-39	4.6	64
22	Fishing the line near marine reserves in single and multispecies fisheries <b>2007</b> , 17, 1039-54		204
21	Moving beyond assumptions to understand abundance distributions across the ranges of species. <i>Trends in Ecology and Evolution</i> , <b>2006</b> , 21, 524-30	10.9	370
20	MARINE RESERVES EXPLOIT POPULATION STRUCTURE AND LIFE HISTORY IN POTENTIALLY IMPROVING FISHERIES YIELDS <b>2005</b> , 15, 2180-2191		63
19	Habitat size, recruitment, and longevity as factors limiting population size in stage-structured species. <i>American Naturalist</i> , <b>2005</b> , 165, 82-94	3.7	64
18	MARINE RESERVE DESIGN AND THE EVOLUTION OF SIZE AT MATURATION IN HARVESTED FISH <b>2005</b> , 15, 882-901		94
17	Recruitment of intertidal invertebrates and oceanographic variability at Santa Cruz Island, California. <i>Limnology and Oceanography</i> , <b>2005</b> , 50, 1473-1479	4.8	57
16	Propagule dispersal and the scales of marine community process. <i>Diversity and Distributions</i> , <b>2005</b> , 11, 139-148	5	196
15	CONFOUNDING EFFECTS OF THE EXPORT OF PRODUCTION AND THE DISPLACEMENT OF FISHING EFFORT FROM MARINE RESERVES <b>2004</b> , 14, 1248-1256		115
14	<b>2003</b> , 13, 8-24		135
13	The limits to biogeographical distributions: insights from the northward range extension of the marine snail, <i>Kelletia kelletii</i> (Forbes, 1852). <i>Journal of Biogeography</i> , <b>2003</b> , 30, 913-924	4.1	127
12	<b>2003</b> , 13, 47-64		270

11	Species diversity: from global decreases to local increases. <i>Trends in Ecology and Evolution</i> , <b>2003</b> , 18, 561-566	10.9	577
10	PROPAGULE DISPERSAL IN MARINE AND TERRESTRIAL ENVIRONMENTS: A COMMUNITY PERSPECTIVE. <i>Ecology</i> , <b>2003</b> , 84, 2007-2020	4.6	699
9	<b>2003</b> , 13, 32-46		182
8	Geographical abundance distributions of coastal invertebrates: using one-dimensional ranges to test biogeographic hypotheses. <i>Journal of Biogeography</i> , <b>2002</b> , 29, 985-997	4.1	143
7	The 'abundant centre' distribution: to what extent is it a biogeographical rule?. <i>Ecology Letters</i> , <b>2002</b> , 5, 137-147	10	526
6	Spatial and temporal variability in size at settlement of intertidal mytilid mussels from around Pt. Conception, California. <i>Invertebrate Reproduction and Development</i> , <b>2002</b> , 41, 171-177	0.7	14
5	Competition and the Effect of Spatial Resource Heterogeneity on Evolutionary Diversification. <i>American Naturalist</i> , <b>2000</b> , 155, 769-789	3.7	335
4	CAN RAPOPORT'S RULE BE RESCUED? MODELING CAUSES OF THE LATITUDINAL GRADIENT IN SPECIES RICHNESS. <i>Ecology</i> , <b>1999</b> , 80, 2474-2482	4.6	41
3	MAKING MOUNTAINS OUT OF BARNACLES: THE DYNAMICS OF ACORN BARNACLE HUMMOCKING. <i>Ecology</i> , <b>1998</b> , 79, 1382-1394	4.6	78
2	MAKING MOUNTAINS OUT OF BARNACLES: THE DYNAMICS OF ACORN BARNACLE HUMMOCKING <b>1998</b> , 79, 1382		1
1	Dispersal and Geographic Ranges in the Sea 227-249		16
