#	ARTICLE	IF	CITATIONS
1	Holocene paleoclimate inferred from stable isotope ($\delta^{18}O$ and $\delta^{13}C$) values in Sphagnum cellulose, Mohos peat bog, Romania. <i>Journal of Paleolimnology</i> , 2021, 66, 229-248.	1.6	2
2	Holocene environmental changes as recorded in the geochemistry of glacial lake sediments from Retezat Mountains, South Carpathians. <i>Quaternary International</i> , 2018, 477, 19-39.	1.5	11
3	Holocene fire-regime changes near the treeline in the Retezat Mts. (Southern Carpathians, Romania). <i>Quaternary International</i> , 2018, 477, 94-105.	1.5	24
4	Age–depth relationship and accumulation rates in four sediment sequences from the Retezat Mts, South Carpathians (Romania). <i>Quaternary International</i> , 2018, 477, 7-18.	1.5	14
5	Treeline and timberline dynamics on the northern and southern slopes of the Retezat Mountains (Romania) during the late glacial and the Holocene. <i>Quaternary International</i> , 2018, 477, 59-78.	1.5	18
6	Limnological changes in South Carpathian glacier-formed lakes (Retezat Mountains, Romania) during the Late Glacial and the Holocene: A synthesis. <i>Quaternary International</i> , 2018, 477, 138-152.	1.5	15
7	High-Resolution Peat Core Chronology Covering the Last 12 KYR Applying an Improved Peat Bog Sampling. <i>Radiocarbon</i> , 2018, 60, 1367-1378.	1.8	2
8	Palaeohydrological changes during the mid and late Holocene in the Carpathian area, central-eastern Europe. <i>Global and Planetary Change</i> , 2017, 152, 99-114.	3.5	28
9	Holocene treeline and timberline changes in the South Carpathians (Romania): Climatic and anthropogenic drivers on the southern slopes of the Retezat Mountains. <i>Holocene</i> , 2017, 27, 1613-1630.	1.7	30
10	Periodic input of dust over the Eastern Carpathians during the Holocene linked with Saharan desertification and human impact. <i>Climate of the Past</i> , 2017, 13, 897-917.	3.4	36
