#	Article	IF	CITATIONS
1	Rivers of waste: Anthropogenic litter in intermittent Sardinian rivers, Italy (Central Mediterranean). Environmental Pollution, 2022, 302, 119073.	7.5	10
2	Environmental Status and Geomorphological Characterisation of Seven Black Coral Forests on the Sardinian Continental Shelf (NW Mediterranean Sea). Biology, 2022, 11, 732.	2.8	2
3	Effects of Field Simulated Marine Heatwaves on Sedimentary Organic Matter Quantity, Biochemical Composition, and Degradation Rates. Biology, 2022, 11, 841.	2.8	1
4	Mediterranean rocky reefs in the Anthropocene: Present status and future concerns. Advances in Marine Biology, 2021, 89, 1-51.	1.4	20
5	Colonization of plastic debris by the long-lived precious red coral Corallium rubrum: New insights on the "plastic benefits―paradox. Marine Pollution Bulletin, 2021, 165, 112104.	5.0	11
6	Particulate organic matter release below melting sea ice (Terra Nova Bay, Ross Sea, Antarctica): Possible relationships with zooplankton. Journal of Marine Systems, 2021, 217, 103510.	2.1	3
7	Foraging of the sea urchin Paracentrotus lividus (Lamarck, 1816) on invasive allochthonous and autochthonous algae. Marine Environmental Research, 2021, 170, 105428.	2.5	4
8	Microplastic pollution in perch (Perca fluviatilis, Linnaeus 1758) from Italian south-alpine lakes. Environmental Pollution, 2021, 288, 117782.	7.5	25
9	Biology, ecology and management perspectives of overexploited deposit-feeders sea cucumbers, with focus on Holothuria tubulosa (Gmelin, 1788). Advances in Oceanography and Limnology, 2021, 12, .	0.6	6
10	Ocean acidification alters meiobenthic assemblage composition and organic matter degradation rates in seagrass sediments. Limnology and Oceanography, 2020, 65, 37-50.	3.1	14
11	Impact of historical sulfide mine tailings discharge on meiofaunal assemblages (Portmán Bay,) Tj ETQq1 1 0.78	4314 rgBT 8.0	/Oyerlock 10
12	Sedimentary Organic Matter, Prokaryotes, and Meiofauna across a River-Lagoon-Sea Gradient. Diversity, 2020, 12, 189.	1.7	7
13	Implementation of the EU ecological flow policy in Italy with a focus on Sardinia. Advances in Oceanography and Limnology, 2020, 11, .	0.6	7
14	Benthic Crustacean Digestion Can Modulate the Environmental Fate of Microplastics in the Deep Sea. Environmental Science & Technology, 2020, 54, 4886-4892.	10.0	96
15	Potentially combined effect of the invasive seaweed Caulerpa cylindracea (Sonder) and sediment deposition rates on organic matter and meiofaunal assemblages. Marine Environmental Research, 2020, 159, 104966.	2.5	14
16	Benthic foraminifera as tracers of brine production in the Storfjorden "sea ice factory― Biogeosciences, 2020, 17, 1933-1953.	3.3	23
17	Microplastics in the crustaceans Nephrops norvegicus and Aristeus antennatus: Flagship species for deep-sea environments?. Environmental Pollution, 2019, 255, 113107.	7.5	95
18	Small-scale distribution of metazoan meiofauna and sedimentary organic matter in subtidal sandy sediments (Mediterranean Sea). Advances in Oceanography and Limnology, 2019, 10, .	0.6	3

#	Article	IF	CITATIONS
19	European spiny lobster recovery from overfishing enhanced through active restocking in Fully Protected Areas. Scientific Reports, 2019, 9, 13025.	3.3	10
20	Shelf-life and labels: A cheap dating tool for seafloor macro litter? Insights from MEDITS surveys in Sardinian sea. Marine Pollution Bulletin, 2019, 141, 430-433.	5.0	10
21	Assessing the potential of marine Natura 2000 sites to produce ecosystemâ€wide effects in rocky reefs: A case study from Sardinia Island (Italy). Aquatic Conservation: Marine and Freshwater Ecosystems, 2019, 29, 537-545.	2.0	10
22	Organic matter contents and degradation in a highly trawled area during fresh particle inputs (Gulf) Tj ETQq0 0) rgBT /Ove	erlock 10 Tf 5
23	Geostatistical approach to investigate spatial patterns of the endangered fan mussel Pinna nobilis (Linnaeus, 1758). Regional Studies in Marine Science, 2019, 32, 100884.	0.7	3
24	Fragment quality and sediment organic loading regulate the survival of an invasive, clonal seaweed. Biological Invasions, 2018, 20, 1953-1959.	2.4	8
25	Benthic foraminiferal assemblages in the Cap de Creus canyon and adjacent open slope: Potential influence of dense shelf water cascading and open-ocean convection. Deep-Sea Research Part I: Oceanographic Research Papers, 2018, 136, 31-43.	1.4	2
26	Belowâ€ground processes control the success of an invasive seaweed. Journal of Ecology, 2018, 106, 2082-2095.	4.0	20
27	Nematode biodiversity and benthic trophic state are simple tools for the assessment of the environmental quality in coastal marine ecosystems. Ecological Indicators, 2018, 95, 270-287.	6.3	26
28	Dumping to the abyss: single-use marine litter invading bathyal plains of the Sardinian margin (Tyrrhenian Sea). Marine Pollution Bulletin, 2018, 135, 845-851.	5.0	36
29	Submarine canyons along the upper Sardinian slope (Central Western Mediterranean) as repositories for derelict fishing gears. Marine Pollution Bulletin, 2017, 123, 357-364.	5.0	74
30	Potential effects of an invasive seaweed (Caulerpa cylindracea, Sonder) on sedimentary organic matter and microbial metabolic activities. Scientific Reports, 2017, 7, 12113.	3.3	33
31	Functional response to food limitation can reduce the impact of global change in the deepâ€sea benthos. Global Ecology and Biogeography, 2017, 26, 1008-1021.	5.8	40
32	Biodiversity loss and turnover in alternative states in the Mediterranean Sea: a case study on meiofauna. Scientific Reports, 2016, 6, 34544.	3.3	36
33	Meiofauna communities, nematode diversity and C degradation rates in seagrass (Posidonia oceanica) Tj ETQq1 Environmental Research, 2016, 119, 88-99.	1 0.78431 2.5	4 rgBT /Over 34
34	Large marine protected areas (LMPAs) in the Mediterranean Sea: The opportunity of the Adriatic Sea. Marine Policy, 2016, 68, 165-177.	3.2	60
35	Organic matter pools, C turnover and meiofaunal biodiversity in the sediments of the western Spitsbergen deep continental margin, Svalbard Archipelago. Deep-Sea Research Part I: Oceanographic Research Papers, 2016, 107, 48-58.	1.4	8
36	Trophic status and meiofauna biodiversity in the Northern Adriatic Sea: Insights for the assessment of good environmental status. Marine Environmental Research, 2016, 113, 18-30.	2.5	34

ANTONIO PUSCEDDU

97Quantity and blochenical composition of particulate organic matter in a highly trawled area Systems, 2015, 61, Eastern Mediterranean Sea, Advances in Oceanography and Linnalogy, 2015, 61, 1390.6739Organic carbon inputs to the sea bottom of the Mallorca continental slope. Journal of Marine Systems, 2015, 614, 142-151.1330Deprice sources and downward fluxes in the eastern Fram strait under the influence of the west Systems gene current. Deep Sea Research Part I: Coenographic Research Papers, 2015, 103, 49 63.1.41741Genotic and intensive bottom trawling impairs deep-sea blochwersity and coosystem functioning Proceedings of the National Academy of Sciences of the United States of America, 2014, 111, 586 18866.7.1and42Secolary and Biogeography, 2014, 23, 24-39.5.86.36.343Robiston-hips between Meditarial diversity in Proceedings of the deep Ecology and Biogeography, 2014, 23, 24-39.1.61.344Effects of a large storm and sea surface biological processes. Progress in Oceanography, 2013, 118, 108-118.3.21.745Biovaliable compounds in sinking particulare organic matter, Banes Caryon, NM Mediterranean Sea 108-118.3.21.746Biovaliable compounds in sinking particulare organic matter, Banes Caryon, NM Mediterranean Sea 108-121.3.91.647Mutos and macrofiscum communities in three sarky backets of the northern Advistic Sea protected by 108-131.3.81.748Effects of a large storm and sea surface biological processes.
