#	ARTICLE	IF	CITATIONS
1	A new method for solving linear programming problems using Z-numbersâ€™ ranking. Mathematical Sciences, 2023, 17, 121-131.	1.0	5
2	A New Stochastic Model for Classifying Flexible Measures in Data Envelopment Analysis. Journal of the Operations Research Society of China, 2021, 9, 569-592.	0.9	0
3	A systematic study on meta-heuristic approaches for solving the graph coloring problem. Computers and Operations Research, 2020, 120, 104850.	2.4	29
4	Data envelopment analysis technique to measure the management ability: Evidence from Iran Cement industry. Cogent Business and Management, 2020, 7, 1801960.	1.3	2
5	A whale optimization algorithm (WOA) approach for clustering. Cogent Mathematics & Statistics, 2018, 5, 1483565.	0.9	156
6	Identification and Prioritization of Effective Factors on the Creation and Development of Industry Cluster of Rail Industries Using Network Analysis Technique. Brazilian Journal of Operations and Production Management, 2018, 15, 490-498.	0.8	2
7	Approximation SR1-based algorithms for nonlinear image processing. , 2016, , .		0
8	Quasi-Newton methods based on ordinary differential equation approach for unconstrained nonlinear optimization. Applied Mathematics and Computation, 2014, 233, 272-291.	1.4	3
9	Limited Memory Methods with Improved Symmetric Rank-one Updates and Its Applications on Nonlinear Image Restoration. Arabian Journal for Science and Engineering, 2014, 39, 7823-7838.	1.1	2
10	On the performance of a new symmetric rank-one method with restart for solving unconstrained optimization problems. Computers and Mathematics With Applications, 2012, 64, 2141-2152.	1.4	1
11	Improved Hessian approximation with modified secant equations for symmetric rank-one method. Journal of Computational and Applied Mathematics, 2011, 235, 2423-2431.	1.1	16
