#	Article	IF	CITATIONS
1	Cognitive reserve estimated with a life experience questionnaire outperforms education in predicting performance on MoCA: Italian normative data. Current Psychology, 2023, 42, 19503-19517.	1.7	4
2	Numerical activities of daily living: a short version. Neurological Sciences, 2022, 43, 967-978.	0.9	5
3	Psychometrics and diagnostics of Italian cognitive screening tests: a systematic review. Neurological Sciences, 2022, 43, 821-845.	0.9	25
4	Resting state network connectivity is attenuated by fMRI acoustic noise. Neurolmage, 2022, 247, 118791.	2.1	26
5	Auditory driven gamma synchrony is associated with cortical thickness in widespread cortical areas. Neurolmage, 2022, 255, 119175.	2.1	13
6	Disconnection from prediction: A systematic review on the role of right temporoparietal junction in aberrant predictive processing. Neuroscience and Biobehavioral Reviews, 2022, 138, 104713.	2.9	12
7	Neurocognitive correlates of numerical abilities in Parkinson's disease. Neurological Sciences, 2022, 43, 5313-5322.	0.9	1
8	The ageâ€related changes in 40 Hz Auditory S <scp>teadyâ€State</scp> Response and sustained E <scp>ventâ€Related</scp> Fields to the same amplitudeâ€modulated tones in typically developing children: A magnetoencephalography study. Human Brain Mapping, 2022, 43, 5370-5383.	1.9	6
9	Neurofunctional Components of Simple Calculation: A Magnetoencephalography Study. Cerebral Cortex, 2021, 31, 1149-1162.	1.6	5
10	Numerical Activities of Daily Living – Financial: a short version. Neurological Sciences, 2021, 42, 4183-4191.	0.9	5
11	Cognitive reserve protects language functions in patients with brain tumours. Neuropsychologia, 2021, 154, 107769.	0.7	7
12	Neurophysiological and behavioural effects of conventional and high definition tDCS. Scientific Reports, 2021, 11, 7659.	1.6	20
13	Predicting financial deficits from a standard neuropsychological assessment: preliminary evidence in mild cognitive impairment. Neurological Sciences, 2021, , 1.	0.9	2
14	Magnetoencephalography reveals differences in brain activations for fast and slow responses to simple multiplications. Scientific Reports, 2021, 11, 20296.	1.6	6
15	Theta and alpha oscillations as signatures of internal and external attention to delayed intentions: A magnetoencephalography (MEG) study. NeuroImage, 2020, 205, 116295.	2.1	36
16	Pragmatics and figurative language in individuals with traumatic brain injury: fine-grained assessment and relevance-theoretic considerations. Aphasiology, 2020, 34, 1070-1100.	1.4	17
17	Commonalities in alpha and beta neural desynchronizations during prediction in language comprehension and production. Cortex, 2020, 133, 328-345.	1.1	29
18	Beyond the motor account of amyotrophic lateral sclerosis: Verbal humour and its relationship with the cognitive and pragmatic profile. International Journal of Language and Communication Disorders, 2020, 55, 751-764.	0.7	13

GIORGIO ARCARA

#	Article	IF	CITATIONS
19	The role of limbic structures in financial abilities of mild cognitive impairment patients. NeuroImage: Clinical, 2020, 26, 102222.	1.4	13
20	A leopard cannot change its spots: A novel pragmatic account of concretism in schizophrenia. Neuropsychologia, 2020, 139, 107332.	0.7	25
21	Cortical gamma-synchrony measured with magnetoencephalography is a marker of clinical status and predicts clinical outcome in stroke survivors. NeuroImage: Clinical, 2019, 24, 102092.	1.4	23
22	Pragmatic Language Disorder in Parkinson's Disease and the Potential Effect of Cognitive Reserve. Frontiers in Psychology, 2019, 10, 1220.	1.1	29
23	Transcranial direct current stimulation over the sensoryâ€motor regions inhibits gamma synchrony. Human Brain Mapping, 2019, 40, 2736-2746.	1.9	37
24	Stuttering as a matter of delay in neural activation: A combined TMS/EEG study. Clinical Neurophysiology, 2019, 130, 61-76.	0.7	22
25	One can be some but some cannot be one: ERP correlates of numerosity incongruence are different for singular and plural. Cortex, 2019, 116, 104-121.	1.1	11
26	Numerical Activities of Daily Living – Financial (NADL-F): A tool for the assessment of financial capacities. Neuropsychological Rehabilitation, 2019, 29, 1062-1084.	1.0	18
27	Time reference in nonfluent and fluent aphasia: a cross-linguistic test of the PAst DIscourse LInking Hypothesis. Clinical Linguistics and Phonetics, 2018, 32, 823-843.	0.5	11
28	Morphosyntactic Production and Verbal Working Memory: Evidence From Greek Aphasia and Healthy Aging. Journal of Speech, Language, and Hearing Research, 2018, 61, 1171-1187.	0.7	18
29	Communication in Multiple Sclerosis: Pragmatic Deficit and its Relation with Cognition and Social Cognition. Archives of Clinical Neuropsychology, 2018, 33, 194-205.	0.3	67
30	Morphosyntactic production in Greek- and Italian-speaking individuals with probable Alzheimer's disease: evidence from subject–verb agreement, tense/time reference, and mood. Aphasiology, 2018, 32, 61-87.	1.4	17
31	Bilateral Transcranial Direct Current Stimulation Reshapes Resting-State Brain Networks: A Magnetoencephalography Assessment. Neural Plasticity, 2018, 2018, 1-10.	1.0	26
32	Pragmatic competence and its relationship with the linguistic and cognitive profile of young adults with dyslexia. Dyslexia, 2018, 24, 294-306.	0.8	21
33	Pragmatic abilities in multiple sclerosis: The contribution of the temporo-parietal junction. Brain and Language, 2018, 185, 47-53.	0.8	25
34	Aging and risky decision-making: New ERP evidence from the Iowa Gambling Task. Neuroscience Letters, 2017, 640, 93-98.	1.0	28
35	Assessing functional communication: validation of the Italian versions of the Communication Outcome after Stroke (COAST) scales for speakers and caregivers. Aphasiology, 2017, 31, 332-358.	1.4	10
36	The Relationship between Cognitive Reserve and Math Abilities. Frontiers in Aging Neuroscience, 2017, 9, 429.	1.7	34

GIORGIO ARCARA

#	Article	IF	CITATIONS
37	A Test for the Assessment of Pragmatic Abilities and Cognitive Substrates (APACS): Normative Data and Psychometric Properties. Frontiers in Psychology, 2016, 7, 70.	1.1	79
38	Numerical Activities and Information Learned at Home Link to the Exact Numeracy Skills in 5–6 Years-Old Children. Frontiers in Psychology, 2016, 7, 94.	1.1	43
39	The communicative impairment as a core feature of schizophrenia: Frequency of pragmatic deficit, cognitive substrates, and relation with quality of life. Comprehensive Psychiatry, 2016, 71, 106-120.	1.5	108
40	Communication and pragmatic breakdowns in amyotrophic lateral sclerosis patients. Brain and Language, 2016, 153-154, 1-12.	0.8	42
41	Does predictability matter? Effects of cue predictability on neurocognitive mechanisms underlying prospective memory. Frontiers in Human Neuroscience, 2015, 9, 188.	1.0	10
42	Anatomical substrates and neurocognitive predictors of daily numerical abilities in mild cognitive impairment. Cortex, 2015, 71, 58-67.	1.1	28
43	A new clinical tool for assessing numerical abilities in neurological diseases: numerical activities of daily living. Frontiers in Aging Neuroscience, 2014, 6, 112.	1.7	34
44	Semantic and syntactic processing of mass and count nouns: Data from dementia. Journal of Clinical and Experimental Neuropsychology, 2014, 36, 967-980.	0.8	8
45	Compound headedness in the mental lexicon: An event-related potential study. Cognitive Neuropsychology, 2014, 31, 164-183.	0.4	15
46	Word structure and decomposition effects in reading. Cognitive Neuropsychology, 2014, 31, 184-218.	0.4	8
47	Low-frequency rTMS inhibitory effects in the primary motor cortex: Insights from TMS-evoked potentials. NeuroImage, 2014, 98, 225-232.	2.1	80
48	Reading Italian Compound Words. Procedia, Social and Behavioral Sciences, 2013, 94, 181-182.	0.5	0
49	One-year repeated cycles of cognitive training (CT) for Alzheimer's disease. Aging Clinical and Experimental Research, 2013, 25, 421-426.	1.4	32
50	Specific numerical processing impairment in ALS patients. Amyotrophic Lateral Sclerosis and Frontotemporal Degeneration, 2013, 14, 6-12.	1.1	8
51	Does executive control really play a crucial role in explaining age-related cognitive and neural differences?. Neuropsychology, 2013, 27, 378-389.	1.0	16
52	ls Two Better than One? Limb Activation Treatment Combined with Contralesional Arm Vibration to Ameliorate Signs of Left Neglect. Frontiers in Human Neuroscience, 2013, 7, 460.	1.0	14
53	Age-related differences in the neural correlates of remembering time-based intentions. Neuropsychologia, 2012, 50, 2692-2704.	0.7	26
54	Electrophysiological Correlates of Strategic Monitoring in Event-Based and Time-Based Prospective Memory. PLoS ONE, 2012, 7, e31659.	1.1	36

55	ls "Hit and Run―a Single Word? The Processing of Irreversible Binomials in Neglect Dyslexia. Frontiers in Psychology, 2012, 3, 11.	1.1	26
56	Lexical and Buffer Effects in Reading and in Writing Noun-Noun Compound Nouns. Behavioural Neurology, 2012, 25, 245-253.	1.1	3
57	Reading compounds in neglect dyslexia: The headedness effect. Neuropsychologia, 2011, 49, 3116-3120.	0.7	17
58	The Mental Representation of Irreversible Binomials: Evidence from a Serial Recall Task. Procedia, Social and Behavioral Sciences, 2011, 23, 150-151.	0.5	0
59	Irreversible Binomials: Evidence from Neglect Dyslexia. Procedia, Social and Behavioral Sciences, 2010, 6, 20-21.	0.5	2
60	Lexical access of mass and count nouns. Mental Lexicon, 2009, 4, 354-379.	0.2	11
61	Communication in schizophrenia, between pragmatics, cognition, and social cognition. Linguistik Aktuell, 0 213-234.	0.5	7
