#	ARTICLE	IF	CITATIONS
1	Do <i>Apis</i> and non- <i>Apis</i> bees provide a similar contribution to crop production with different levels of pollination dependency? A review using meta-analysis. <i>Ecological Entomology</i> , 2022, 47, 76-83.	2.2	6
2	Community structure and specialization in fig wasps (Hymenoptera: Chalcidoidea) in a region of Cerrado. <i>Revista Brasileira De Entomologia</i> , 2022, 66, .	0.4	0
3	What makes a fig: insights from a comparative analysis of inflorescence morphogenesis in Moraceae. <i>Annals of Botany</i> , 2021, 127, 621-631.	2.9	4
4	Exploring systematic biases, rooting methods and morphological evidence to unravel the evolutionary history of the genus <i>Ficus</i> (Moraceae). <i>Cladistics</i> , 2021, 37, 402-422.	3.3	11
5	Mutualism as a Source of Evolutionary Innovation: Insights from Insect-Plant Interactions. , 2021, , 307-332.		2
6	The Role of <i>Baccharis dracunculifolia</i> and its Chemical Profile on Green Propolis Production by <i>Apis mellifera</i> . <i>Journal of Chemical Ecology</i> , 2020, 46, 150-162.	1.8	33
7	LARVAL STRATEGY OF TWO SPECIES OF SEED-FEEDING CHALCIDOIDEA PARALLELS THAT OF PARASITOID KOINOBIONTS. <i>Oecologia Australis</i> , 2020, 24, 903-916.	0.2	3
8	Morphological diversity and function of the stigma in <i>Ficus</i> species (Moraceae). <i>Acta Oecologica</i> , 2018, 90, 117-131.	1.1	11
9	Atlantic forests to the all Americas: Biogeographical history and divergence times of Neotropical <i>Ficus</i> (Moraceae). <i>Molecular Phylogenetics and Evolution</i> , 2018, 122, 46-58.	2.7	27
10	Laticifer distribution in fig inflorescence and its potential role in the fig-fig wasp mutualism. <i>Acta Oecologica</i> , 2018, 90, 160-167.	1.1	10
11	The role of non-fig-wasp insects on fig tree biology, with a proposal of the F phase (Fallen figs). <i>Acta Oecologica</i> , 2018, 90, 132-139.	1.1	10
12	Ovipositor morphology correlates with life history evolution in agaonid fig wasps. <i>Acta Oecologica</i> , 2018, 90, 109-116.	1.1	11
13	Taxonomic revision and molecular phylogenetics of the <i>Idarnes incertus</i> species-group (Hymenoptera, Agaonidae, Sycophaginae). <i>PeerJ</i> , 2017, 5, e2842.	2.0	5
14	First record of a non-pollinating fig wasp (Hymenoptera: Sycophaginae) from Dominican amber, with estimation of the size of its host figs. <i>Journal of Natural History</i> , 2016, 50, 2237-2247.	0.5	7
15	The fig wasp followers and colonists of a widely introduced fig tree, <i>Ficus microcarpa</i> . <i>Insect Conservation and Diversity</i> , 2015, 8, 322-336.	3.0	27
16	Diversity of fig glands is associated with nursery mutualism in fig trees. <i>American Journal of Botany</i> , 2015, 102, 1564-1577.	1.7	25
17	Mortal combat and competition for oviposition sites in female pollinating fig wasps. <i>Behavioral Ecology</i> , 2015, 26, 262-268.	2.2	25
18	Same but different: Larval development and gall-inducing process of a non-pollinating fig wasp compared to that of pollinating fig-wasps. <i>Acta Oecologica</i> , 2014, 57, 44-50.	1.1	17

#	ARTICLE	IF	CITATIONS
19	Different ontogenetic processes promote dichliny in <i>Ficus</i> L. (Moraceae). <i>Acta Oecologica</i> , 2014, 57, 5-16.	1.1	16
20	Water availability determines the richness and density of fig trees within Brazilian semideciduous forest landscapes. <i>Acta Oecologica</i> , 2014, 57, 109-116.	1.1	13
21	Convergent structure of multitrophic communities over three continents. <i>Ecology Letters</i> , 2013, 16, 1436-1445.	6.4	46
22	Taxonomic revision and molecular phylogeny of the fig wasp genus <i>Anidarnes</i> Bouček, 1993 (Hymenoptera: Sycophaginae). <i>Systematic Entomology</i> , 2013, 38, 14-34.	3.9	8
23	Dioecy, more than monoecy, affects plant spatial genetic structure: the case study of <i>Ficus</i> . <i>Ecology and Evolution</i> , 2013, 3, 3495-3508.	1.9	38
24	New records of <i>Paracrias</i> Ashmead (Hymenoptera, Eulophidae) as parasitoids on weevil larvae (Coleoptera, Curculionidae) in Brazil, with the description of a new species. <i>Iheringia - Serie Zoologia</i> , 2013, 103, 313-317.	0.5	1
25	An Extreme Case of Plant-Insect Codiversification: Figs and Fig-Pollinating Wasps. <i>Systematic Biology</i> , 2012, 61, 1029-1047.	5.6	319
26	Mutualism from the inside: coordinated development of plant and insect in an active pollinating fig wasp. <i>Arthropod-Plant Interactions</i> , 2012, 6, 601-609.	1.1	42
27	Diversification in the use of resources by <i>Idarnes</i> species: bypassing functional constraints in the fig-fig wasp interaction. <i>Biological Journal of the Linnean Society</i> , 2012, 106, 114-122.	1.6	38
28	Out of Australia and back again: the world-wide historical biogeography of non-pollinating fig wasps (Hymenoptera: Sycophaginae). <i>Journal of Biogeography</i> , 2011, 38, 209-225.	3.0	59
29	Measuring the discrepancy between fecundity and lifetime reproductive success in a pollinating fig wasp. <i>Entomologia Experimentalis Et Applicata</i> , 2011, 140, 218-225.	1.4	18
30	Phylogeny and evolution of life-history strategies in the Sycophaginae non-pollinating fig wasps (Hymenoptera, Chalcidoidea). <i>BMC Evolutionary Biology</i> , 2011, 11, 178.	3.2	47
31	Fig-fig wasp mutualism: the fall of the strict cospeciation paradigm?. , 2011, , 68-102.		4
32	Gynandromorphs and intersexes: potential to understand the mechanism of sex determination in arthropods. <i>Terrestrial Arthropod Reviews</i> , 2010, 3, 63-96.	0.8	72
33	Transferability and characterization of microsatellite markers in two Neotropical <i>Ficus</i> species. <i>Genetics and Molecular Biology</i> , 2009, 32, 568-571.	1.3	21
34	Mating strategies and aggressive combat in wingless neotropical fig wasp males. <i>Brazilian Archives of Biology and Technology</i> , 2008, 51, 553-560.	0.5	5
35	EFFECT OF ACCLIMATION TO OUTDOOR CONDITIONS ON THE SEXUAL PERFORMANCE OF MASS-PRODUCED MEDFLIES (DIPTERA: TEPHRITIDAE). <i>Florida Entomologist</i> , 2007, 90, 171-174.	0.5	7
36	An inquiline fig wasp using seeds as a resource for small male production: a potential first step for the evolution of new feeding habits?. <i>Biological Journal of the Linnean Society</i> , 2007, 92, 9-17.	1.6	39

#	ARTICLE	IF	CITATIONS
37	Phenological patterns of <i>Ficus citrifolia</i> (Moraceae) in a seasonal humid-subtropical region in Southern Brazil. <i>Plant Ecology</i> , 2007, 188, 265-275.	1.6	23
38	Components of fecundity and abortion in a tropical tree, <i>Dahlstedtia pentaphylla</i> (Leguminosae). <i>Brazilian Archives of Biology and Technology</i> , 2006, 49, 905-913.	0.5	10
39	Non-pollinating wasps distort the sex ratio of pollinating fig wasps. <i>Oikos</i> , 2005, 110, 613-619.	2.7	28
40	Recognition of competitive asymmetries reduces the severity of fighting in male <i>Idarnes</i> fig wasps. <i>Animal Behaviour</i> , 2005, 70, 249-256.	1.9	19
41	Comparing species richness among assemblages using sample units: why not use extrapolation methods to standardize different sample sizes?. <i>Oikos</i> , 2003, 101, 398-410.	2.7	71
42	Pollination and other biotic interactions in figs of <i>Ficus eximia</i> Schott (Moraceae). <i>Revista Brasileira De Botanica</i> , 2000, 23, 217.	1.3	24
43	Oogenesis and ovarian morphology in pollinating and non-pollinating fig wasps: evidence from adult and immature stages. <i>Invertebrate Reproduction and Development</i> , 0, , 1-7.	0.8	1
44	Naturalization of the bodhi fig tree (<i>Ficus religiosa</i> L. - Moraceae) in Brazil. , 0, , 177-182.		5
45	The unknown followers: Discovery of a new species of <i>Sycobia</i> Walker (Hymenoptera:) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 50 42 of Hymenoptera Research, 0, 67, 85-102.	0.8	6
