| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Elevated serum uric acid is associated with a greater inflammatory response and with short- and long-term mortality in patients with ST-segment elevation myocardial infarction undergoing primary percutaneous coronary intervention. Nutrition, Metabolism and Cardiovascular Diseases, 2021, 31, 608-614. | 2.6 | 22        |
| 2  | Neutrophil to platelet ratio: A novel prognostic biomarker in ST-elevation myocardial infarction patients undergoing primary percutaneous coronary intervention. European Journal of Preventive Cardiology, 2020, 27, 2338-2340.   | 1.8 | 17        |
| 3  | Reduced Cardio-Renal Function Accounts for Most of the In-Hospital Morbidity and Mortality Risk<br>Among Patients With Type 2 Diabetes Undergoing Primary Percutaneous Coronary Intervention for<br>ST-Segment Elevation Myocardial Infarction. Diabetes Care, 2019, 42, 1305-1311.                          | 8.6 | 15        |
| 4  | Serum uric acid may modulate the inflammatory response after primary percutaneous coronary intervention in patients with ST-elevation myocardial infarction. Journal of Cardiovascular Medicine, 2020, 21, 337-339.  | 1.5 | 14        |
| 5  | Elevated serum uric acid is a predictor of contrast associated acute kidney injury in patient with<br>ST-segment elevation myocardial infarction undergoing primary percutaneous coronary intervention.<br>Nutrition, Metabolism and Cardiovascular Diseases, 2021, 31, 2140-2143.                           | 2.6 | 12        |
| 6  | Short Pâ€Wave Duration is a Marker of Higher Rate of Atrial Fibrillation Recurrences after Pulmonary<br>Vein Isolation: New Insights into the Pathophysiological Mechanisms Through Computer Simulations.<br>Journal of the American Heart Association, 2021, 10, e018572.                                   | 3.7 | 10        |
| 7  | Acute kidney injury and in-hospital mortality in patients with ST-elevation myocardial infarction of different age groups. International Journal of Cardiology, 2021, 344, 8-12.   | 1.7 | 10        |
| 8  | Has hyperglycemia a different prognostic role in STEMI patients with or without diabetes?. Nutrition,<br>Metabolism and Cardiovascular Diseases, 2021, 31, 528-531.  | 2.6 | 9         |
| 9  | Comparison of Outcomes of Staged Complete Revascularization Versus Culprit Lesion–Only<br>Revascularization for ST-Elevation Myocardial Infarction and Multivessel Coronary Artery Disease.<br>American Journal of Cardiology, 2017, 119, 508-514.   | 1.6 | 8         |
| 10 | Long-term percentage of ventricular pacing in patients requiring pacemaker implantation after<br>transcatheter aortic valve replacement: A multicenter 10-year experience. Heart Rhythm, 2020, 17,<br>1897-1903.   | 0.7 | 6         |
| 11 | Leptin affects the inflammatory response after STEMI. Nutrition, Metabolism and Cardiovascular Diseases, 2020, 30, 922-924.  | 2.6 | 4         |
| 12 | Peripheral Artery Disease in Diabetes Mellitus: Focus on Novel Treatment Options. Current<br>Pharmaceutical Design, 2020, 26, 5953-5968.   | 1.9 | 4         |
| 13 | Incidence of Ventricular Arrhythmias and 1‥ear Predictors of Mortality in Patients Treated With<br>Implantable Cardioverterâ€Defibrillator Undergoing Generator Replacement. Journal of the American<br>Heart Association, 2021, 10, e018090.  | 3.7 | 3         |
| 14 | Serum uric acid in patients with ST-segment elevation myocardial infarction: An innocent bystander or leading actor?. Nutrition, Metabolism and Cardiovascular Diseases, 2022, 32, 1583-1589.  | 2.6 | 3         |
| 15 | Smoker's paradox in ST-elevation myocardial infarction: Role of inflammation and platelets. Hellenic<br>Journal of Cardiology, 2019, 60, 397-399.  | 1.0 | 2         |
| 16 | New Drugs and Interventional Strategies for the Management of Hypertension. Current<br>Pharmaceutical Design, 2021, 27, 1396-1406.   | 1.9 | 1         |
| 17 | The unfavourable inflammatory response in elderly patients after myocardial infarction: should we talk of †dysflammaging'?. Journal of Cardiovascular Medicine, 2020, 21, 340-342.   | 1.5 | 1         |
