#	ARTICLE	IF	CITATIONS
1	Glioblastoma Invasiveness and Collagen Secretion Are Enhanced by Vitamin C. Antioxidants and Redox Signaling, 2022, 37, 538-559.	2.5	8
2	Two Distinct Faces of Vitamin C: AA vs. DHA. Antioxidants, 2021, 10, 215.	2.2	15
3	Dietary Fructose Promotes Prostate Cancer Growth. Cancer Research, 2021, 81, 2824-2832.	0.4	20
4	Hexose Transporters in Cancer: From Multifunctionality to Diagnosis and Therapy. Trends in Endocrinology and Metabolism, 2021, 32, 198-211.	3.1	17
5	SVCT2 Overexpression and Ascorbic Acid Uptake Increase Cortical Neuron Differentiation, Which Is Dependent on Vitamin C Recycling between Neurons and Astrocytes. Antioxidants, 2021, 10, 1413.	2.2	9
6	IIIIG9 inhibition in adult ependymal cells changes adherens junctions structure and induces cellular detachment. Scientific Reports, 2021, 11, 18537.	1.6	6
7	Vitamin C deficient reduces proliferation in a human periventricular tumor stem cell-derived glioblastoma model. Journal of Cellular Physiology, 2021, 236, 5801-5817.	2.0	9
8	Cytosolic phosphoenolpyruvate carboxykinase is expressed in β -cells from human and murine pancreas. Journal of Cellular Physiology, 2020, 235, 166-175.	2.0	7
9	Vitamin C controls neuronal necroptosis under oxidative stress. Redox Biology, 2020, 29, 101408.	3.9	28
10	Vitamin C Recycling Regulates Neurite Growth in Neurospheres Differentiated In Vitro. Antioxidants, 2020, 9, 1276.	2.2	9
11	Dehydroascorbic acid, the oxidized form of vitamin C, improves renal histology and function in old mice. Journal of Cellular Physiology, 2020, 235, 9773-9784.	2.0	8
12	Brain Glucose-Sensing Mechanism and Energy Homeostasis. Molecular Neurobiology, 2019, 56, 769-796.	1.9	74
13	Sodium tungstate: Is it a safe option for a chronic disease setting, such as diabetes?. Journal of Cellular Physiology, 2019, 234, 51-60.	2.0	11
14	Basal Sodium-Dependent Vitamin C Transporter 2 polarization in choroid plexus explant cells in normal or scorbutic conditions. Scientific Reports, 2019, 9, 14422.	1.6	17
15	The median eminence as the hypothalamic area involved in rapid transfer of glucose to the brain: functional and cellular mechanisms. Journal of Molecular Medicine, 2019, 97, 1085-1097.	1.7	18
16	Gluconeogenic Enzymes in β -Cells: Pharmacological Targets for Improving Insulin Secretion. Trends in Endocrinology and Metabolism, 2019, 30, 520-531.	3.1	8
17	Metabolic control by dehydroascorbic acid: Questions and controversies in cancer cells. Journal of Cellular Physiology, 2019, 234, 19331-19338.	2.0	9
18	SVCT2 Expression and Function in Reactive Astrocytes Is a Common Event in Different Brain Pathologies. Molecular Neurobiology, 2018, 55, 5439-5452.	1.9	20

#	ARTICLE	IF	CITATIONS
19	SVCT2 Is Expressed by Cerebellar Precursor Cells, Which Differentiate into Neurons in Response to Ascorbic Acid. <i>Molecular Neurobiology</i> , 2018, 55, 1136-1149.	1.9	21
20	Expression of a Novel Ciliary Protein, IIG9, During the Differentiation and Maturation of Ependymal Cells. <i>Molecular Neurobiology</i> , 2018, 55, 1652-1664.	1.9	10
21	The Antidiabetic Agent Sodium Tungstate Induces Abnormal Glycogen Accumulation in Renal Proximal Tubules from Diabetic IRS2-Knockout Mice. <i>Journal of Diabetes Research</i> , 2018, 2018, 1-10.	1.0	8
22	Anti-diabetic Agent Sodium Tungstate Induces the Secretion of Pro- and Anti-inflammatory Cytokines by Human Kidney Cells. <i>Journal of Cellular Physiology</i> , 2017, 232, 355-362.	2.0	10
23	Structural and functional identification of vasculogenic mimicry in vitro. <i>Scientific Reports</i> , 2017, 7, 6985.	1.6	42
24	Aging Selectively Modulates Vitamin C Transporter Expression Patterns in the Kidney. <i>Journal of Cellular Physiology</i> , 2017, 232, 2418-2426.	2.0	6
25	Apical Polarization of SVCT2 in Apical Radial Glial Cells and Progenitors During Brain Development. <i>Molecular Neurobiology</i> , 2017, 54, 5449-5467.	1.9	19
26	Cytoarchitecture, Proliferative Activity and Neuroblast Migration in the Subventricular Zone and Lateral Ventricle Extension of the Adult Guinea Pig Brain. <i>Stem Cells</i> , 2016, 34, 2574-2586.	1.4	5
27	SVCT2 Overexpression in Neuroblastoma Cells Induces Cellular Branching that is Associated with ERK Signaling. <i>Molecular Neurobiology</i> , 2016, 53, 6668-6679.	1.9	15
28	Dehydroascorbic Acid Promotes Cell Death in Neurons Under Oxidative Stress: a Protective Role for Astrocytes. <i>Molecular Neurobiology</i> , 2016, 53, 5847-5863.	1.9	44
29	Enhanced astroglial Ca ²⁺ signaling increases excitatory synaptic strength in the epileptic brain. <i>Glia</i> , 2015, 63, 1507-1521.	2.5	52
30	In vivo sodium tungstate treatment prevents E-cadherin loss induced by diabetic serum in HK-2 cell line. <i>Journal of Cellular Physiology</i> , 2015, 230, 2437-2446.	2.0	5
31	Over-expression of muscle glycogen synthase in human diabetic nephropathy. <i>Histochemistry and Cell Biology</i> , 2015, 143, 313-324.	0.8	19
32	Unconventional Neurogenic Niches and Neurogenesis Modulation by Vitamins. <i>Journal of Stem Cell Research & Therapy</i> , 2014, 04, 184.	0.3	17
33	Vitamin C Transporters, Recycling and the Bystander Effect in the Nervous System: SVCT2 versus Gluts. <i>Journal of Stem Cell Research & Therapy</i> , 2014, 04, 209.	0.3	67
34	The oxidized form of vitamin C, dehydroascorbic acid, regulates neuronal energy metabolism. <i>Journal of Neurochemistry</i> , 2014, 129, 663-671.	2.1	59
35	SVCT2 transporter expression is postnatally induced in cortical neurons and its function is regulated by its short isoform. <i>Journal of Neurochemistry</i> , 2014, 130, 693-706.	2.1	20
36	Dynamic Localization of Glucokinase and Its Regulatory Protein in Hypothalamic Tanycytes. <i>PLoS ONE</i> , 2014, 9, e94035.	1.1	35

#	ARTICLE	IF	CITATIONS
37	Dynamic expression of the sodium-vitamin C co-transporters, SVCT1 and SVCT2, during perinatal kidney development. <i>Histochemistry and Cell Biology</i> , 2013, 139, 233-247.	0.8	16
38	Altered expression and localization of insulin receptor in proximal tubule cells from human and rat diabetic kidney. <i>Journal of Cellular Biochemistry</i> , 2013, 114, 639-649.	1.2	56
39	Human choroid plexus papilloma cells efficiently transport glucose and vitamin C. <i>Journal of Neurochemistry</i> , 2013, 127, 403-414.	2.1	20
40	SVCT2 vitamin C transporter expression in progenitor cells of the postnatal neurogenic niche. <i>Frontiers in Cellular Neuroscience</i> , 2013, 7, 119.	1.8	32
41	MCT2 Expression and Lactate Influx in Anorexigenic and Orexigenic Neurons of the Arcuate Nucleus. <i>PLoS ONE</i> , 2013, 8, e62532.	1.1	53
42	Glucose Transporter 1 and Monocarboxylate Transporters 1, 2, and 4 Localization within the Glial Cells of Shark Blood-Brain-Barriers. <i>PLoS ONE</i> , 2012, 7, e32409.	1.1	32
43	Typical and atypical stem cells in the brain, vitamin C effect and neuropathology. <i>Biological Research</i> , 2012, 45, 243-256.	1.5	18
44	Cellular distribution of Glutâ€¹ and Glutâ€µ in benign and malignant human prostate tissue. <i>Journal of Cellular Biochemistry</i> , 2012, 113, 553-562.	1.2	91
45	Glucose increases intracellular free Ca ²⁺ in tanycytes via ATP released through connexin 43 hemichannels. <i>Glia</i> , 2012, 60, 53-68.	2.5	154
46	MCT Expression and Lactate Influx/Efflux in Tanycytes Involved in Glia-Neuron Metabolic Interaction. <i>PLoS ONE</i> , 2011, 6, e16411.	1.1	72
47	Up-regulation of the vitamin C transporter SVCT2 upon differentiation and depolarization of myotubes. <i>FEBS Letters</i> , 2011, 585, 390-396.	1.3	8
48	Insulin regulates GLUT1â€mediated glucose transport in MGâ€³ human osteosarcoma cells. <i>Journal of Cellular Physiology</i> , 2011, 226, 1425-1432.	2.0	37
49	Expression and localization of an agmatinase-like protein in the rat brain. <i>Histochemistry and Cell Biology</i> , 2010, 134, 137-144.	0.8	16
50	Glial Glucokinase Expression in Adult and Post-Natal Development of the Hypothalamic Region. <i>ASN Neuro</i> , 2010, 2, AN20090059.	1.5	50
51	The ascorbic acid transporter SVCT2 is expressed in slow-twitch skeletal muscle fibres. <i>Histochemistry and Cell Biology</i> , 2009, 131, 565-574.	0.8	18
52	The Na ⁺ -dependent <i>l</i> -ascorbic acid transporter SVCT2 expressed in brainstem cells, neurons, and neuroblastoma cells is inhibited by flavonoids. <i>Journal of Neurochemistry</i> , 2009, 108, 563-577.	2.1	56
53	Glucose Transporters in Sex Steroid Hormone Related Cancer. <i>Current Vascular Pharmacology</i> , 2009, 7, 534-548.	0.8	27
54	Ascorbic acid participates in a general mechanism for concerted glucose transport inhibition and lactate transport stimulation. <i>Pflugers Archiv European Journal of Physiology</i> , 2008, 457, 519-528.	1.3	49

#	ARTICLE	IF	CITATIONS
55	Regulation of GLUT3 and glucose uptake by the cAMP signalling pathway in the breast cancer cell line ZR-75. <i>Journal of Cellular Physiology</i> , 2008, 214, 110-116.	2.0	33
56	Differential distribution of the Sodium-vitamin C cotransporter-1 along the proximal tubule of the mouse and human kidney. <i>Kidney International</i> , 2008, 74, 1278-1286.	2.6	25
57	Classical <i>Xenopus laevis</i> progesterone receptor associates to the plasma membrane through its ligand-binding domain. <i>Journal of Cellular Physiology</i> , 2007, 211, 560-567.	2.0	15
58	Intracellular ascorbic acid inhibits transport of glucose by neurons, but not by astrocytes. <i>Journal of Neurochemistry</i> , 2007, 102, 773-782.	2.1	42
59	Differential subcellular distribution of glucose transporters GLUT1 and GLUT9 in human cancer: Ultrastructural localization of GLUT1 and GLUT5 in breast tumor tissues. <i>Journal of Cellular Physiology</i> , 2006, 207, 614-627.	2.0	236
60	Novel expression of liver FBPase in Langerhans islets of human and rat pancreas. <i>Journal of Cellular Physiology</i> , 2005, 205, 19-24.	2.0	13
61	Sodium vitamin C cotransporter SVCT2 is expressed in hypothalamic glial cells. <i>Glia</i> , 2005, 50, 32-47.	2.5	99
62	Vitamin C uptake and recycling among normal and tumor cells from the central nervous system. <i>Journal of Neuroscience Research</i> , 2005, 79, 146-156.	1.3	63
63	Ependymal Cell Differentiation and GLUT1 Expression is a Synchronous Process in the Ventricular Wall. <i>Neurochemical Research</i> , 2005, 30, 1227-1236.	1.6	30
64	Differential regulation of glucose transporter expression by estrogen and progesterone in Ishikawa endometrial cancer cells. <i>Journal of Endocrinology</i> , 2004, 182, 467-478.	1.2	42
65	Regulation by Insulin and Insulin-Like Growth Factor of 2-Deoxyglucose Uptake in Primary Ependymal Cell Cultures. <i>Neurochemical Research</i> , 2004, 29, 127-134.	1.6	17
66	Broad expression of fructose-1,6-bisphosphatase and phosphoenolpyruvate carboxykinase provide evidence for gluconeogenesis in human tissues other than liver and kidney. <i>Journal of Cellular Physiology</i> , 2003, 197, 189-197.	2.0	71
67	Hypothalamic ependymal-glial cells express the glucose transporter GLUT2, a protein involved in glucose sensing. <i>Journal of Neurochemistry</i> , 2003, 86, 709-724.	2.1	181
68	Up-regulation and Polarized Expression of the Sodium-Ascorbic Acid Transporter SVCT1 in Post-confluent Differentiated CaCo-2 Cells. <i>Journal of Biological Chemistry</i> , 2003, 278, 9035-9041.	1.6	99
69	Estrogen and Progesterone Up-Regulate Glucose Transporter Expression in ZR-75-1 Human Breast Cancer Cells. <i>Endocrinology</i> , 2003, 144, 4527-4535.	1.4	48
70	High-affinity sodium-vitamin C co-transporters (SVCT) expression in embryonic mouse neurons. <i>Journal of Neurochemistry</i> , 2001, 78, 815-823.	2.1	107
71	Elevated expression of glucose transporter-1 in hypothalamic ependymal cells not involved in the formation of the brain-cerebrospinal fluid barrier. <i>Journal of Cellular Biochemistry</i> , 2001, 80, 491-503.	1.2	50
72	Elevated expression of glucose transporter-1 in hypothalamic ependymal cells not involved in the formation of the brain-cerebrospinal fluid barrier. <i>Journal of Cellular Biochemistry</i> , 2001, 80, 491-503.	1.2	25

#	ARTICLE	IF	CITATIONS
73	Expression of the hexose transporters GLUT1 and GLUT2 during the early development of the human brain. <i>Brain Research</i> , 1999, 824, 97-104.	1.1	84
74	Increased facilitated transport of dehydroascorbic acid without changes in sodium-dependent ascorbate transport in human melanoma cells. <i>Cancer Research</i> , 1997, 57, 2529-37.	0.4	64
75	Immunochemical analysis of the subcommissural organ-Reissner's fiber complex using antibodies against alkylated and deglycosylated glycoproteins of the bovine Reissner's fiber. <i>Cell and Tissue Research</i> , 1996, 286, 23-31.	1.5	21
76	Expression of the fructose transporter GLUT5 in human breast cancer.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1996, 93, 1847-1852.	3.3	177
77	Alpha1-Antitrypsin Expression in Human Thyroid Papillary Carcinoma. <i>American Journal of Surgical Pathology</i> , 1996, 20, 956-963.	2.1	24
78	Identification and partial characterization of the secretory glycoproteins of the bovine subcommissural organ-Reissner's fiber complex. Evidence for the existence of two precursor forms. <i>Molecular Brain Research</i> , 1991, 11, 227-238.	2.5	82
79	Pharmacological targets for the induction of ferroptosis: Focus on Neuroblastoma and Glioblastoma. <i>Frontiers in Oncology</i> , 0, 12, .	1.3	7
