

Mariana G Figueiro

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6115584/mariana-g-figueiro-publications-by-year.pdf>

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
123	Impact of Circadian Rhythms on the Development and Clinical Management of Genitourinary Cancers.. <i>Frontiers in Oncology</i> , 2022 , 12, 759153	5.3	0
122	Intermittent Light Exposures in Humans: A Case for Dual Entrainment in the Treatment of Alzheimer's Disease. <i>Frontiers in Neurology</i> , 2021 , 12, 625698	4.1	5
121	Relative light sensitivities of four retinal hemi-fields for suppressing the synthesis of melatonin at night. <i>Neurobiology of Sleep and Circadian Rhythms</i> , 2021 , 10, 100066	2.9	4
120	Lighting and Alzheimer's disease and related dementias: Spotlight on sleep and depression. <i>Lighting Research and Technology</i> , 2021 , 53, 405-422	2	0
119	Light-Dark Patterns Mirroring Shift Work Accelerate Atherosclerosis and Promote Vulnerable Lesion Phenotypes. <i>Journal of the American Heart Association</i> , 2021 , 10, e018151	6	4
118	Modeling Circadian Phototransduction: Quantitative Predictions of Psychophysical Data. <i>Frontiers in Neuroscience</i> , 2021 , 15, 615322	5.1	14
117	The sleep maths: A strong correlation between more daytime light and better night-time sleep. <i>Lighting Research and Technology</i> , 2021 , 53, 423-435	2	1
116	Spatial sensitivity of human circadian response: Melatonin suppression from on-axis and off-axis light exposures. <i>Neurobiology of Sleep and Circadian Rhythms</i> , 2021 , 11, 100071	2.9	1
115	Access to Daylight at Home Improves Circadian Alignment, Sleep, and Mental Health in Healthy Adults: A Crossover Study. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	4
114	Flickering Red-Light Stimulus for Promoting Coherent 40 Hz Neural Oscillation: A Feasibility Study. <i>Journal of Alzheimer's Disease</i> , 2020 , 75, 911-921	4.3	2
113	Nonvisual Lighting Effects and Their Impact on Health and Well-Being 2020 , 1-11		
112	Future Directions for Lighting Environments 2020 , 221-240		1
111	Light, entrainment and alertness: A case study in offices. <i>Lighting Research and Technology</i> , 2020 , 52, 736-750	2	13
110	Red light: A novel, non-pharmacological intervention to promote alertness in shift workers. <i>Journal of Safety Research</i> , 2020 , 74, 169-177	4	6
109	Robust light-dark patterns and reduced amyloid load in an Alzheimer's disease transgenic mouse model. <i>Scientific Reports</i> , 2020 , 10, 11436	4.9	3
108	Long-Term, All-Day Exposure to Circadian-Effective Light Improves Sleep, Mood, and Behavior in Persons with Dementia. <i>Journal of Alzheimer's Disease Reports</i> , 2020 , 4, 297-312	3.3	11
107	Predictions of melatonin suppression during the early biological night and their implications for residential light exposures prior to sleeping. <i>Scientific Reports</i> , 2020 , 10, 14114	4.9	8

106	Impact of an Individually Tailored Light Mask on Sleep Parameters in Older Adults With Advanced Phase Sleep Disorder. <i>Behavioral Sleep Medicine</i> , 2020 , 18, 226-240	4.2	2
105	The effectiveness of light-emitting diode lighting for providing circadian stimulus in office spaces while minimizing energy use. <i>Lighting Research and Technology</i> , 2020 , 52, 167-188	2	6
104	Modeling Circadian Phototransduction: Retinal Neurophysiology and Neuroanatomy. <i>Frontiers in Neuroscience</i> , 2020 , 14, 615305	5.1	13
103	Effects of red light on sleep inertia. <i>Nature and Science of Sleep</i> , 2019 , 11, 45-57	3.6	14
102	Shift Work, Chronotype, and Melatonin Rhythm in Nurses. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2019 , 28, 1177-1186	4	48
101	Effect of White Light Devoid of "Cyan" Spectrum Radiation on Nighttime Melatonin Suppression Over a 1-h Exposure Duration. <i>Journal of Biological Rhythms</i> , 2019 , 34, 195-204	3.2	15
100	Nocturnal Melatonin Suppression by Adolescents and Adults for Different Levels, Spectra, and Durations of Light Exposure. <i>Journal of Biological Rhythms</i> , 2019 , 34, 178-194	3.2	23
99	Effects of a Tailored Lighting Intervention on Sleep Quality, Rest-Activity, Mood, and Behavior in Older Adults With Alzheimer Disease and Related Dementias: A Randomized Clinical Trial. <i>Journal of Clinical Sleep Medicine</i> , 2019 , 15, 1757-1767	3.1	43
98	Effect of exposure duration and light spectra on nighttime melatonin suppression in adolescents and adults. <i>Lighting Research and Technology</i> , 2019 , 51, 530-543	2	32
97	Does the iPad Night Shift mode reduce melatonin suppression?. <i>Lighting Research and Technology</i> , 2019 , 51, 373-383	2	24
96	Circadian-effective light and its impact on alertness in office workers. <i>Lighting Research and Technology</i> , 2019 , 51, 171-183	2	48
95	Non-visual effects of light: how to use light to promote circadian entrainment and elicit alertness. <i>Lighting Research and Technology</i> , 2018 , 50, 38-62	2	68
94	Light as a circadian stimulus for architectural lighting. <i>Lighting Research and Technology</i> , 2018 , 50, 497-510	2	96
93	Circadian Health and Light: A Report on the National Heart, Lung, and Blood Institute's Workshop. <i>Journal of Biological Rhythms</i> , 2018 , 33, 451-457	3.2	20
92	Programmed environmental illumination during autologous stem cell transplantation hospitalization for the treatment of multiple myeloma reduces severity of depression: A preliminary randomized controlled trial. <i>Cancer Medicine</i> , 2018 , 7, 4345-4353	4.8	9
91	Biological Effects of Light: Can Self-Luminous Displays Play a Role?. <i>Information Display</i> , 2018 , 34, 6-20	0.8	3
90	Analysis of circadian stimulus allowed by daylighting in hospital rooms. <i>Lighting Research and Technology</i> , 2017 , 49, 49-61	2	36
89	Glucose tolerance in mice exposed to light-dark stimulus patterns mirroring dayshift and rotating shift schedules. <i>Scientific Reports</i> , 2017 , 7, 40661	4.9	18

88	Disruption of Circadian Rhythms by Light During Day and Night. <i>Current Sleep Medicine Reports</i> , 2017 , 3, 76-84	1.2	26
87	The impact of daytime light exposures on sleep and mood in office workers. <i>Sleep Health</i> , 2017 , 3, 204-215		131
86	Measuring Light at Night and Melatonin Levels in Shift Workers: A Review of the Literature. <i>Biological Research for Nursing</i> , 2017 , 19, 365-374	2.6	47
85	22-1: Invited Paper: Biological Effects of Light: Can Self-luminous Displays Play a Role?. <i>Digest of Technical Papers SID International Symposium</i> , 2017 , 48, 302-305	0.5	3
84	Light, sleep and circadian rhythms in older adults with Alzheimer's disease and related dementias. <i>Neurodegenerative Disease Management</i> , 2017 , 7, 119-145	2.8	32
83	Health consequences of electric lighting practices in the modern world: A report on the National Toxicology Program's workshop on shift work at night, artificial light at night, and circadian disruption. <i>Science of the Total Environment</i> , 2017 , 607-608, 1073-1084	10.2	148
82	Research Note: A self-luminous light table for persons with Alzheimer's disease. <i>Lighting Research and Technology</i> , 2016 , 48, 253-259	2	22
81	The NICU Lighted Environment. <i>Newborn and Infant Nursing Reviews</i> , 2016 , 16, 195-202		7
80	Feasibility of a stepped wedge cluster RCT and concurrent observational sub-study to evaluate the effects of modified ward night lighting on inpatient fall rates and sleep quality: a protocol for a pilot trial. <i>Pilot and Feasibility Studies</i> , 2016 , 2, 1	1.9	24
79	Office lighting and personal light exposures in two seasons: Impact on sleep and mood. <i>Lighting Research and Technology</i> , 2016 , 48, 352-364	2	66
78	Light at Night and Measures of Alertness and Performance: Implications for Shift Workers. <i>Biological Research for Nursing</i> , 2016 , 18, 90-100	2.6	52
77	Delayed sleep phase disorder: clinical perspective with a focus on light therapy. <i>Nature and Science of Sleep</i> , 2016 , 8, 91-106	3.6	22
76	At-sea trial of 24-h-based submarine watchstanding schedules with high and low correlated color temperature light sources. <i>Journal of Biological Rhythms</i> , 2015 , 30, 144-54	3.2	27
75	Individually tailored light intervention through closed eyelids to promote circadian alignment and sleep health. <i>Sleep Health</i> , 2015 , 1, 75-82	4	17
74	Tailored Lighting Intervention for Persons with Dementia and Caregivers Living at Home. <i>Sleep Health</i> , 2015 , 1, 322-330	4	54
73	Using Light to Manage Sleep-Wake Issues in Patients With Dementia. <i>Federal Practitioner: for the Health Care Professionals of the VA, DoD, and PHS</i> , 2015 , 32, 42-45	0.7	
72	Daily activity and light exposure levels for five species of lemurs at the Duke Lemur Center. <i>American Journal of Physical Anthropology</i> , 2014 , 153, 68-77	2.5	8
71	Daytime light exposure: effects on biomarkers, measures of alertness, and performance. <i>Behavioural Brain Research</i> , 2014 , 274, 176-85	3.4	65

70	Temporal dynamics of EEG activity during short- and long-wavelength light exposures in the early morning. <i>BMC Research Notes</i> , 2014 , 7, 113	2.3	16
69	Measuring and using light in the melanopsin age. <i>Trends in Neurosciences</i> , 2014 , 37, 1-9	13.3	651
68	Tailored lighting intervention improves measures of sleep, depression, and agitation in persons with Alzheimer's disease and related dementia living in long-term care facilities. <i>Clinical Interventions in Aging</i> , 2014 , 9, 1527-37	4	127
67	Pulsing blue light through closed eyelids: effects on acute melatonin suppression and phase shifting of dim light melatonin onset. <i>Nature and Science of Sleep</i> , 2014 , 6, 149-56	3.6	16
66	Daylight exposure has a positive carryover effect on nighttime performance and subjective sleepiness. <i>Lighting Research and Technology</i> , 2014 , 46, 506-519	2	17
65	Quantifying light-dependent circadian disruption in humans and animal models. <i>Chronobiology International</i> , 2014 , 31, 1239-46	3.6	12
64	The effects of chronotype, sleep schedule and light/dark pattern exposures on circadian phase. <i>Sleep Medicine</i> , 2014 , 15, 1554-64	4.6	32
63	Circadian Disruption: comparing humans with mice. <i>Chronobiology International</i> , 2013 , 30, 1066-71	3.6	14
62	Controlling light-dark exposure patterns rather than sleep schedules determines circadian phase. <i>Sleep Medicine</i> , 2013 , 14, 456-61	4.6	31
61	Advanced sleep schedules affect circadian gene expression in young adults with delayed sleep schedules. <i>Sleep Medicine</i> , 2013 , 14, 449-55	4.6	4
60	Alerting effects of short-wavelength (blue) and long-wavelength (red) lights in the afternoon. <i>Physiology and Behavior</i> , 2013 , 116-117, 1-7	3.5	94
59	Light level and duration of exposure determine the impact of self-luminous tablets on melatonin suppression. <i>Applied Ergonomics</i> , 2013 , 44, 237-40	4.2	263
58	Comparisons of three practical field devices used to measure personal light exposures and activity levels. <i>Lighting Research and Technology</i> , 2013 , 45, 421-434	2	97
57	47.3: The Impact of Watching Television on Evening Melatonin Levels. <i>Digest of Technical Papers SID International Symposium</i> , 2013 , 44, 656-659	0.5	0
56	The impact of watching television on evening melatonin levels. <i>Journal of the Society for Information Display</i> , 2013 , 21, 417-421	2.1	7
55	An Overview of the Effects of Light on Human Circadian Rhythms: Implications for New Light Sources and Lighting Systems Design. <i>Journal of Light and Visual Environment</i> , 2013 , 37, 51-61		27
54	Light therapy and Alzheimer's disease and related dementia: past, present, and future. <i>Journal of Alzheimer's Disease</i> , 2013 , 33, 913-22	4.3	79
53	A train of blue light pulses delivered through closed eyelids suppresses melatonin and phase shifts the human circadian system. <i>Nature and Science of Sleep</i> , 2013 , 5, 133-41	3.6	28

52	Preliminary evidence that light through the eyelids can suppress melatonin and phase shift dim light melatonin onset. <i>BMC Research Notes</i> , 2012 , 5, 221	2.3	29
51	Field measurements of light exposures and circadian disruption in two populations of older adults. <i>Journal of Alzheimer's Disease</i> , 2012 , 31, 711-5	4.3	38
50	Lighting for improving balance in older adults with and without risk for falls. <i>Age and Ageing</i> , 2012 , 41, 392-5	3	15
49	Light modulates leptin and ghrelin in sleep-restricted adults. <i>International Journal of Endocrinology</i> , 2012 , 2012, 530726	2.7	21
48	Relationship of morning cortisol to circadian phase and rising time in young adults with delayed sleep times. <i>International Journal of Endocrinology</i> , 2012 , 2012, 749460	2.7	9
47	Short-wavelength light enhances cortisol awakening response in sleep-restricted adolescents. <i>International Journal of Endocrinology</i> , 2012 , 2012, 301935	2.7	24
46	Lessons from the Daysimeter [®] : can circadian disruption in individuals with Alzheimer's disease be measured?. <i>Neurodegenerative Disease Management</i> , 2012 , 2, 553-556	2.8	3
45	Reply to: Window Illumination Should be Expected to Poorly Correlate With Satellite Brightness Measurements. <i>Chronobiology International</i> , 2012 , 29, 88-90	3.6	1
44	Modelling the spectral sensitivity of the human circadian system. <i>Lighting Research and Technology</i> , 2012 , 44, 386-396	2	176
43	Effects of an advanced sleep schedule and morning short wavelength light exposure on circadian phase in young adults with late sleep schedules. <i>Sleep Medicine</i> , 2011 , 12, 685-92	4.6	50
42	31.1: Invited Paper: The Impact of Self-luminous Electronic Devices on Melatonin Suppression. <i>Digest of Technical Papers SID International Symposium</i> , 2011 , 42, 408-411	0.5	2
41	Lighting and perceptual cues: effects on gait measures of older adults at high and low risk for falls. <i>BMC Geriatrics</i> , 2011 , 11, 49	4.1	33
40	Implications of controlled short-wavelength light exposure for sleep in older adults. <i>BMC Research Notes</i> , 2011 , 4, 334	2.3	21
39	Measuring circadian light and its impact on adolescents. <i>Lighting Research and Technology</i> , 2011 , 43, 2012-215		31
38	Sleep opportunities and periodic light exposures: Impact on biomarkers, performance and sleepiness. <i>Lighting Research and Technology</i> , 2011 , 43, 349-369	2	13
37	WHAT IS "HEALTHY LIGHTING?". <i>International Journal of High Speed Electronics and Systems</i> , 2011 , 20, 321-342	0.5	6
36	Measuring and predicting eyelid spectral transmittance. <i>Journal of Biomedical Optics</i> , 2011 , 16, 067011	3.5	32
35	Measurements of light at night (LAN) for a sample of female school teachers. <i>Chronobiology International</i> , 2011 , 28, 673-80	3.6	40

34	The impact of light from computer monitors on melatonin levels in college students. <i>Neuroendocrinology Letters</i> , 2011 , 32, 158-63	0.3	50
33	Circadian light. <i>Journal of Circadian Rhythms</i> , 2010 , 8, 2	2.5	169
32	The effects of red and blue light on alertness and mood at night. <i>Lighting Research and Technology</i> , 2010 , 42, 449-458	2	47
31	Rest-activity and light exposure patterns in the home setting: a methodological case study. <i>American Journal of Alzheimer's Disease and Other Dementias</i> , 2010 , 25, 353-61	2.5	8
30	The effects of red and blue lights on circadian variations in cortisol, alpha amylase, and melatonin. <i>International Journal of Endocrinology</i> , 2010 , 2010, 829351	2.7	75
29	Ecological measurements of light exposure, activity, and circadian disruption. <i>Lighting Research and Technology</i> , 2010 , 42, 271-284	2	35
28	Circadian system modeling and phase control 2010 ,		12
27	Evening daylight may cause adolescents to sleep less in spring than in winter. <i>Chronobiology International</i> , 2010 , 27, 1242-58	3.6	38
26	Lack of short-wavelength light during the school day delays dim light melatonin onset (DLMO) in middle school students. <i>Neuroendocrinology Letters</i> , 2010 , 31, 92-6	0.3	33
25	Preliminary evidence that both blue and red light can induce alertness at night. <i>BMC Neuroscience</i> , 2009 , 10, 105	3.2	92
24	A personal light-treatment device for improving sleep quality in the elderly: dynamics of nocturnal melatonin suppression at two exposure levels. <i>Chronobiology International</i> , 2009 , 26, 726-39	3.6	13
23	A new approach to understanding the impact of circadian disruption on human health. <i>Journal of Circadian Rhythms</i> , 2008 , 6, 7	2.5	75
22	Retinal mechanisms determine the subadditive response to polychromatic light by the human circadian system. <i>Neuroscience Letters</i> , 2008 , 438, 242-5	3.3	51
21	On melatonin suppression from polychromatic and narrowband light. <i>Chronobiology International</i> , 2008 , 25, 653-6	3.6	13
20	A proposed 24 h lighting scheme for older adults. <i>Lighting Research and Technology</i> , 2008 , 40, 153-160	2	40
19	A novel night lighting system for postural control and stability in seniors. <i>Lighting Research and Technology</i> , 2008 , 40, 111-126	2	17
18	Light as Therapy for Sleep Disorders and Depression in Older Adults 2008 , 16, 25-31		18
17	Developing Architectural Lighting Designs to Improve Sleep in Older Adults. <i>The Open Sleep Journal</i> , 2008 , 1, 40-51		9

16	Sustainable Lighting for Healthcare Facilities: More Than Just Lumens Per Watt. <i>Journal of Green Building</i> , 2008 , 3, 74-89	1.3	2
15	On light as an alerting stimulus at night. <i>Acta Neurobiologiae Experimentalis</i> , 2007 , 67, 171-8	1	26
14	Does architectural lighting contribute to breast cancer?. <i>Journal of Carcinogenesis</i> , 2006 , 5, 20	1.9	26
13	Circadian effectiveness of two polychromatic lights in suppressing human nocturnal melatonin. <i>Neuroscience Letters</i> , 2006 , 406, 293-7	3.3	53
12	Of mice and women: light as a circadian stimulus in breast cancer research. <i>Cancer Causes and Control</i> , 2006 , 17, 375-83	2.8	43
11	Preliminary evidence for a change in spectral sensitivity of the circadian system at night. <i>Journal of Circadian Rhythms</i> , 2005 , 3, 14	2.5	18
10	Additivity in murine circadian phototransduction. <i>Zoological Science</i> , 2005 , 22, 223-7	0.8	19
9	A model of phototransduction by the human circadian system. <i>Brain Research Reviews</i> , 2005 , 50, 213-28		247
8	Demonstration of additivity failure in human circadian phototransduction. <i>Neuroendocrinology Letters</i> , 2005 , 26, 493-8	0.3	18
7	Preliminary evidence for spectral opponency in the suppression of melatonin by light in humans. <i>NeuroReport</i> , 2004 , 15, 313-6	1.7	65
6	Phototransduction for human melatonin suppression. <i>Journal of Pineal Research</i> , 2002 , 32, 209-13	10.4	45
5	Circadian photobiology: an emerging framework for lighting practice and research. <i>Lighting Research and Technology</i> , 2002 , 34, 177-187	2	97
4	Human melatonin suppression by light: a case for scotopic efficiency. <i>Neuroscience Letters</i> , 2001 , 299, 45-8	3.3	37
3	Non-visual effects of colored light619-638		
2	A 24-hour lighting scheme to promote alertness and circadian entrainment in railroad dispatchers on rotating shifts: A field study. <i>Lighting Research and Technology</i> ,147715352110409	2	0
1	Lighting as a Circadian Rhythm-Entraining and Alertness-Enhancing Stimulus in the Submarine Environment. <i>SSRN Electronic Journal</i> ,	1	1
