#	ARTICLE	IF	CITATIONS
1	Apelin: A potential link between inflammation and cardiovascular disease in end stage renal disease patients. <i>Scandinavian Journal of Clinical and Laboratory Investigation</i> , 2010, 70, 421-427.	0.6	42
2	Relationship of <i>BsmI</i> polymorphism of vitamin D receptor gene with left ventricular hypertrophy and atherosclerosis in hemodialysis patients. <i>Scandinavian Journal of Clinical and Laboratory Investigation</i> , 2013, 73, 75-81.	0.6	36
3	Relationship of plasma level of chemerin and vaspin to early atherosclerotic changes and cardiac autonomic neuropathy in adolescent type 1 diabetic patients. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2015, 28, 265-73.	0.4	19
4	Carotid intimal medial thickness and its relation to endothelial dysfunction and echocardiographic changes in adolescents with type 1 diabetes. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2015, 28, 1029-37.	0.4	15
5	Assessment of human cartilage glycoprotein 39 (YKL-40), preptin, and nitric oxide in adolescent patients with type 1 diabetes and its relation to cardiorenal affection. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2015, 28, 309-14.	0.4	13
6	Natural progression of cardiac autonomic neuropathy in patients with type 1 diabetes: a four-year follow-up study. <i>Anatolian Journal of Cardiology</i> , 2011, 11, 224-31.	0.4	9
7	Association of genetic variants of hemostatic genes with myocardial infarction in Egyptian patients. <i>Gene</i> , 2018, 641, 212-219.	1.0	8
8	Cardiac Affection in Type 1 Diabetic Patients in Relation to Omentin. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2015, 3, 699-704.	0.1	7
9	Assessment of Increase in Aortic and Carotid Intimal Medial Thickness in Type 1 Diabetic Patients. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2016, 4, 630-635.	0.1	7
10	Hypertension in type 1 diabetic patients-the influence of body composition and body mass index: an observational study. <i>Anatolian Journal of Cardiology</i> , 2012, 12, 60-4.	0.4	6
11	Effect of glycemic control on the progress of left ventricular hypertrophy and diastolic dysfunction in children with type I diabetes mellitus. <i>Anatolian Journal of Cardiology</i> , 2012, 12, 498-507.	0.4	6
12	Asymmetric dimethyl L-arginine, nitric oxide and cardiovascular disease in adolescent type 1 diabetics. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2014, 27, 437-44.	0.4	6
13	Cardiovascular Autonomic Neuropathy and Early Atherosclerosis in Adolescent Type 1 Diabetic Patient. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2015, 3, 681-688.	0.1	6
14	Evaluation of fetuin-A and carotid intima-media thickness in adolescent type 1 diabetic patients. <i>Journal of Pediatric Endocrinology and Metabolism</i> , 2015, 28, 287-92.	0.4	5
15	Nitric Oxide Gene Polymorphism is a Risk Factor for Diabetic Nephropathy and Atherosclerosis in Type 1 Diabetic Patients. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2019, 7, 3132-3138.	0.1	5
16	Copeptin as a Biomarker of Atherosclerosis in Type 1 Diabetic Patients. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2019, 7, 3975-3978.	0.1	5
17	Apelin, Nitric Oxide and Vascular Affection in Adolescent Type 1 Diabetic Patients. <i>Open Access Macedonian Journal of Medical Sciences</i> , 2017, 5, 934-939.	0.1	4
18	Electrocardiography as a predictor of left main or three-vessel disease in patients with non-ST segment elevation acute coronary syndrome. <i>Egyptian Heart Journal</i> , 2011, 63, 103-107.	0.4	3

#	ARTICLE	IF	CITATIONS
19	Osteopontin for Early Detection of Microvascular and Macrovascular Type 1 Diabetic Complication. Open Access Macedonian Journal of Medical Sciences, 2019, 7, 3619-3622.	0.1	2
20	Relationship of increased circulating adrenomedullin with cardiac dysfunction, inflammation, oxidative stress and volume overload in hemodialysis patients. Scandinavian Journal of Clinical and Laboratory Investigation, 2011, 71, 208-215.	0.6	1
