

Giovanni de Gaetano

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6139206/giovanni-de-gaetano-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
45	Worldwide trends in body-mass index, underweight, overweight, and obesity from 1975 to 2016: a pooled analysis of 2416 population-based measurement studies in 128.9 million children, adolescents, and adults. <i>Lancet, The</i> , 2017 , 390, 2627-2642	40	2980
44	Different effects of red wine and gin consumption on inflammatory biomarkers of atherosclerosis: a prospective randomized crossover trial. Effects of wine on inflammatory markers. <i>Atherosclerosis</i> , 2004 , 175, 117-23	3.1	194
43	Sex Differences and Similarities in Atrial Fibrillation Epidemiology, Risk Factors, and Mortality in Community Cohorts: Results From the BiomarCaRE Consortium (Biomarker for Cardiovascular Risk Assessment in Europe). <i>Circulation</i> , 2017 , 136, 1588-1597	16.7	163
42	White blood cell count, sex and age are major determinants of heterogeneity of platelet indices in an adult general population: results from the MOLI-SANI project. <i>Haematologica</i> , 2011 , 96, 1180-8	6.6	118
41	Mediterranean diet, dietary polyphenols and low grade inflammation: results from the MOLI-SANI study. <i>British Journal of Clinical Pharmacology</i> , 2017 , 83, 107-113	3.8	97
40	Adherence to the traditional Mediterranean diet and mortality in subjects with diabetes. Prospective results from the MOLI-SANI study. <i>European Journal of Preventive Cardiology</i> , 2016 , 23, 400-7	3.9	68
39	Polyphenol intake is associated with low-grade inflammation, using a novel data analysis from the Moli-sani study. <i>Thrombosis and Haemostasis</i> , 2016 , 115, 344-52	7	68
38	Distribution of short and lifetime risks for cardiovascular disease in Italians. <i>European Journal of Preventive Cardiology</i> , 2012 , 19, 723-30	3.9	56
37	Association of D-dimer levels with all-cause mortality in a healthy adult population: findings from the MOLI-SANI study. <i>Haematologica</i> , 2013 , 98, 1476-80	6.6	55
36	A score of low-grade inflammation and risk of mortality: prospective findings from the Moli-sani study. <i>Haematologica</i> , 2016 , 101, 1434-1441	6.6	53
35	Mediterranean diet and mortality in the elderly: a prospective cohort study and a meta-analysis. <i>British Journal of Nutrition</i> , 2018 , 120, 841-854	3.6	53
34	Ultra-processed food consumption is associated with increased risk of all-cause and cardiovascular mortality in the Moli-sani Study. <i>American Journal of Clinical Nutrition</i> , 2021 , 113, 446-455	7	36
33	Determinants of platelet conjugate formation with polymorphonuclear leukocytes or monocytes in whole blood. <i>Thrombosis and Haemostasis</i> , 2007 , 98, 1276-1284	7	30
32	Chili Pepper Consumption and Mortality in Italian Adults. <i>Journal of the American College of Cardiology</i> , 2019 , 74, 3139-3149	15.1	30
31	Socioeconomic and psychosocial determinants of adherence to the Mediterranean diet in a general adult Italian population. <i>European Journal of Public Health</i> , 2019 , 29, 328-335	2.1	20
30	Reduced mortality risk by a polyphenol-rich diet: An analysis from the Moli-sani study. <i>Nutrition</i> , 2018 , 48, 87-95	4.8	18
29	Determinants of platelet conjugate formation with polymorphonuclear leukocytes or monocytes in whole blood. <i>Thrombosis and Haemostasis</i> , 2007 , 98, 1276-84	7	14

28	Machine Learning Approaches for the Estimation of Biological Aging: The Road Ahead for Population Studies. <i>Frontiers in Medicine</i> , 2019 , 6, 146	4.9	13
27	Effect of two non tricyclic antidepressant drugs on [¹⁴ C]5-hydroxytryptamine uptake by rat platelets. <i>Journal of Pharmacy and Pharmacology</i> , 1977 , 29, 546-9	4.8	11
26	Variation of PEAR1 DNA methylation influences platelet and leukocyte function. <i>Clinical Epigenetics</i> , 2019 , 11, 151	7.7	9
25	Beyond Haemostasis and Thrombosis: Platelets in Depression and Its Co-Morbidities. <i>International Journal of Molecular Sciences</i> , 2020 , 21,	6.3	9
24	Changes in ultra-processed food consumption during the first Italian lockdown following the COVID-19 pandemic and major correlates: results from two population-based cohorts. <i>Public Health Nutrition</i> , 2021 , 24, 3905-3915	3.3	9
23	Revisiting the link between platelets and depression through genetic epidemiology: new insights from platelet distribution width. <i>Haematologica</i> , 2020 , 105, e246-e248	6.6	8
22	Impact of Nationwide Lockdowns Resulting from The First Wave of the COVID-19 Pandemic on Food Intake, Eating Behaviours and Diet Quality: A Systematic Review.. <i>Advances in Nutrition</i> , 2021 ,	10	8
21	ZBTB12 DNA methylation is associated with coagulation- and inflammation-related blood cell parameters: findings from the Moli-family cohort. <i>Clinical Epigenetics</i> , 2019 , 11, 74	7.7	7
20	Changes in the consumption of foods characterising the Mediterranean dietary pattern and major correlates during the COVID-19 confinement in Italy: results from two cohort studies. <i>International Journal of Food Sciences and Nutrition</i> , 2021 , 72, 1105-1117	3.7	7
19	Association of a traditional Mediterranean diet and non-Mediterranean dietary scores with all-cause and cause-specific mortality: prospective findings from the Moli-sani Study. <i>European Journal of Nutrition</i> , 2021 , 60, 729-746	5.2	6
18	Hydroxychloroquine and mortality in COVID-19 patients: a systematic review and a meta-analysis of observational studies and randomized controlled trials. <i>Pathogens and Global Health</i> , 2021 , 115, 456-466 ^{3.1}		5
17	Combined influence of depression severity and low-grade inflammation on incident hospitalization and mortality risk in Italian adults. <i>Journal of Affective Disorders</i> , 2021 , 279, 173-182	6.6	5
16	Ultra-processed food intake and all-cause and cause-specific mortality in individuals with cardiovascular disease: the Moli-sani Study. <i>European Heart Journal</i> , 2021 ,	9.5	4
15	Assessing Genetic Overlap Between Platelet Parameters and Neurodegenerative Disorders. <i>Frontiers in Immunology</i> , 2020 , 11, 02127	8.4	4
14	Dietary Polyphenol Intake Is Associated with Biological Aging, a Novel Predictor of Cardiovascular Disease: Cross-Sectional Findings from the Moli-Sani Study. <i>Nutrients</i> , 2021 , 13,	6.7	4
13	Body Mass Index and Mortality in Elderly Subjects from the Moli-Sani Study: A Possible Mediation by Low-Grade Inflammation?. <i>Immunological Investigations</i> , 2018 , 47, 774-789	2.9	4
12	Wine Consumption and Oral Cavity Cancer: Friend or Foe, Two Faces of Janus. <i>Molecules</i> , 2020 , 25,	4.8	3
11	Platelet Distribution Width Is Associated with P-Selectin Dependent Platelet Function: Results from the Moli-Family Cohort Study. <i>Cells</i> , 2021 , 10,	7.9	2

10	Exploring domains, clinical implications and environmental associations of a deep learning marker of biological ageing. <i>European Journal of Epidemiology</i> , 2021 , 1	12.1	2
9	Risk Factors, Subsequent Disease Onset, and Prognostic Impact of Myocardial Infarction and Atrial Fibrillation.. <i>Journal of the American Heart Association</i> , 2022 , e024299	6	2
8	Genomic Overlap between Platelet Parameters Variability and Age at Onset of Parkinson Disease. <i>Applied Sciences (Switzerland)</i> , 2021 , 11, 6927	2.6	1
7	Exploring domains, clinical implications and environmental associations of a deep learning marker of biological ageing		1
6	DNA methylation in blood is associated with metabolic and inflammatory indices: results from the Moli-sani study. <i>Epigenetics</i> , 2021 , 16, 1347-1360	5.7	1
5	Mediterranean diet and other dietary patterns in association with biological aging in the Moli-sani Study cohort.. <i>Clinical Nutrition</i> , 2022 , 41, 1025-1033	5.9	1
4	Influence of geographical latitude on vitamin D status: cross-sectional results from the BiomarCaRE consortium.. <i>British Journal of Nutrition</i> , 2021 , 1-27	3.6	1
3	Fine-grained investigation of the relationship between human nutrition and global DNA methylation patterns. <i>European Journal of Nutrition</i> , 2021 , 1	5.2	0
2	Hydroxichloroquine for COVID-19 infection: Do we have a final word after one year?. <i>European Journal of Internal Medicine</i> , 2021 , 94, 4-5	3.9	0
1	Circulating Inflammation Markers Partly Explain the Link Between the Dietary Inflammatory Index and Depressive Symptoms. <i>Journal of Inflammation Research</i> , 2021 , 14, 4955-4968	4.8	0
