

Vanya Mantareva

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6147786/vanya-mantareva-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
41	Effects of metal ion in cationic Pd(II) and Ni(II) phthalocyanines on physicochemical and photodynamic inactivation properties. <i>Journal of Molecular Structure</i> , 2022 , 1247, 131288	3.4	4
40	Palladium Phthalocyanines Varying in Substituents Position for Photodynamic Inactivation of <i>Flavobacterium hydatis</i> as Sensitive and Resistant Species. <i>Current Issues in Molecular Biology</i> , 2022 , 44, 1950-1959	2.9	1
39	Cationic amino acids linked to Zn(II) phthalocyanines for photodynamic therapy: Synthesis and effects on physicochemical properties. <i>Journal of Photochemistry and Photobiology A: Chemistry</i> , 2020 , 396, 112555	4.7	3
38	Photodynamic Opening of the Blood-Brain Barrier Using Different Photosensitizers in Mice. <i>Applied Sciences (Switzerland)</i> , 2020 , 10, 33	2.6	4
37	Novel Zn(II) phthalocyanine with tyrosine moieties for photodynamic therapy: Synthesis and comparative study of light-associated properties. <i>Polyhedron</i> , 2019 , 162, 121-128	2.7	8
36	Impact of water-soluble zwitterionic Zn(II) phthalocyanines against pathogenic bacteria. <i>Zeitschrift Fur Naturforschung - Section C Journal of Biosciences</i> , 2019 , 74, 183-191	1.7	4
35	Novel Water-Soluble Silicon(IV) Phthalocyanine for Photodynamic Therapy and Antimicrobial Inactivations. <i>Macroheterocycles</i> , 2019 , 12, 255-263	2.2	6
34	Quaternized Zn(II) phthalocyanines for photodynamic strategy against resistant periodontal bacteria. <i>Zeitschrift Fur Naturforschung - Section C Journal of Biosciences</i> , 2018 , 73, 221-228	1.7	7
33	Virus inactivation under the photodynamic effect of phthalocyanine zinc(II) complexes. <i>Zeitschrift Fur Naturforschung - Section C Journal of Biosciences</i> , 2017 , 72, 123-128	1.7	11
32	Photodynamic Effect of some Phthalocyanines on Enveloped and Naked Viruses. <i>Acta Virologica</i> , 2017 , 61, 341-346	2.2	12
31	Axially substituted silicon(IV) phthalocyanine and its quaternized derivative as photosensitizers towards tumor cells and bacterial pathogens. <i>Bioorganic and Medicinal Chemistry</i> , 2017 , 25, 5415-5422	3.4	19
30	Tyrosine conjugated zinc(II) phthalocyanine for photodynamic therapy: Synthesis and photophysicochemical properties. <i>Journal of Photochemistry and Photobiology A: Chemistry</i> , 2017 , 334, 101-106	4.7	11
29	Photodynamic opening of blood-brain barrier. <i>Biomedical Optics Express</i> , 2017 , 8, 5040-5048	3.5	32
28	Photodynamic inactivation of pathogenic species <i>Pseudomonas aeruginosa</i> and <i>Candida albicans</i> with lutetium (III) acetate phthalocyanines and specific light irradiation. <i>Lasers in Medical Science</i> , 2016 , 31, 1591-1598	3.1	13
27	Lutetium(III) acetate phthalocyanines for photodynamic therapy applications: Synthesis and photophysicochemical properties. <i>Photodiagnosis and Photodynamic Therapy</i> , 2016 , 14, 98-103	3.5	14
26	Antimicrobial photodisinfection with Zn(II) phthalocyanine adsorbed on TiO ₂ upon UVA and red irradiation 2015 ,		3
25	Axially paraben substituted silicon(IV) phthalocyanines towards dental pathogen <i>Streptococcus mutans</i> : Synthesis, photophysical, photochemical and in vitro properties. <i>Journal of Photochemistry and Photobiology A: Chemistry</i> , 2015 , 306, 31-40	4.7	31

24	2-Carbamido-1,3-indandione - a Fluorescent Molecular Probe and Sunscreen Candidate. <i>Journal of Fluorescence</i> , 2015 , 25, 1601-14	2.4	6
23	Antimicrobial photodynamic efficiency of novel cationic porphyrins towards periodontal Gram-positive and Gram-negative pathogenic bacteria. <i>Photochemistry and Photobiology</i> , 2014 , 90, 628-40	3.6	47
22	Thresholds of optical limiting in solutions of nanoscale compounds of zinc phthalocyanine with galactopyranosyl radicals. <i>Technical Physics Letters</i> , 2013 , 39, 664-668	0.7	4
21	Metallophthalocyanines for antimicrobial photodynamic therapy: an overview of our experience. <i>Journal of Porphyrins and Phthalocyanines</i> , 2013 , 17, 399-416	1.8	34
20	Selective photodynamic therapy induced by preirradiation of galactopyranosyl Zn(II) phthalocyanines with UV and red lights. <i>Journal of Porphyrins and Phthalocyanines</i> , 2013 , 17, 529-539	1.8	5
19	Effects of the position of galactose units to Zn(II) phthalocyanine on the uptake and photodynamic activity towards breast cancer cells 2012 ,		3
18	Al(III), Pd(II), and Zn(II) phthalocyanines for inactivation of dental pathogen <i>Aggregatibacter actinomycetemcomitans</i> as planktonic and biofilm-cultures 2012 ,		2
17	Photodynamic therapy with water-soluble phthalocyanines against bacterial biofilms in teeth root canals 2012 ,		4
16	Non-aggregated Ga(III)-phthalocyanines in the photodynamic inactivation of planktonic and biofilm cultures of pathogenic microorganisms. <i>Photochemical and Photobiological Sciences</i> , 2011 , 10, 91-102	4.2	89
15	Photodynamic efficacy of water-soluble Si(IV) and Ge(IV) phthalocyanines towards <i>Candida albicans</i> planktonic and biofilm cultures. <i>European Journal of Medicinal Chemistry</i> , 2011 , 46, 4430-40	6.8	47
14	Water-soluble phthalocyanine complexes of Ga(III) and In(III) in the photodynamic inactivation of pathogenic fungus 2010 ,		5
13	Photodynamic inactivation of <i>Aeromonas hydrophila</i> by cationic phthalocyanines with different hydrophobicity. <i>FEMS Microbiology Letters</i> , 2009 , 294, 133-40	2.9	55
12	Improved antimicrobial therapy with cationic tetra- and octa-substituted phthalocyanines 2008 ,		3
11	Photodynamic activity of water-soluble phthalocyanine zinc(II) complexes against pathogenic microorganisms. <i>Bioorganic and Medicinal Chemistry</i> , 2007 , 15, 4829-35	3.4	105
10	Tumor detection by exogenous fluorescent dyes using new generation photo-multiplier tubes 2005 ,		2
9	Long wavelength absorbing cationic Zn(II)-phthalocyanines as fluorescent contrast agents for B16 pigmented melanoma. <i>Journal of Porphyrins and Phthalocyanines</i> , 2005 , 09, 47-53	1.8	23
8	2-Acetylindan-1,3-dione and its Cu(2+) and Zn(2+) complexes as promising sunscreen agents. <i>International Journal of Cosmetic Science</i> , 2002 , 24, 103-10	2.7	18
7	Naphthalocyanine complexes as potential photosensitizers for photodynamic therapy of tumors. <i>Journal of Biomedical Optics</i> , 1999 , 4, 276-85	3.5	20

6	Effect of delivery system on the pharmacokinetic and phototherapeutic properties of bis(methoxyethyleneoxy) silicon-phthalocyanine in tumor-bearing mice. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1999 , 50, 124-8	6.7	27
5	Si(IV)-methoxyethylene-glycol-naphthalocyanine: synthesis and pharmacokinetic and photosensitizing properties in different tumour models. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1997 , 40, 258-62	6.7	10
4	Tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1996 , 35, 167-74	6.7	35
3	Hydrophobic Zn(II)-naphthalocyanines as photodynamic therapy agents for Lewis lung carcinoma. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1994 , 23, 35-42	6.7	27
2	Liposome-delivered Zn(II)-2,3-naphthalocyanines as potential sensitizers for PDT: synthesis, photochemical, pharmacokinetic and phototherapeutic studies. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1993 , 21, 155-65	6.7	69
1	Comparative pharmacokinetic and photodynamic studies with zinc(II) phthalocyanine in hamsters bearing an induced or transplanted rhabdomyosarcoma. <i>Journal of Photochemistry and Photobiology B: Biology</i> , 1992 , 16, 83-9	6.7	23
